SUBJECT: New Function in MOSIS Data Collection System

There is a new function available in the MOSIS Data Collection System allowing you to choose the Year and/or Cycle from a dropdown list. When you log in you will see the full list of the 'Current Submissions'. This list has become quite lengthy including each year and cycle data has been collected via the MOSIS Data Collection System. By allowing you to choose the Year and/or Cycle it will help to narrow down the list to focus on the cycle you are working on.
