

## **June Cycle MOSIS/Core Data Updates**

FROM: Office of Data System Management

TO: Core Data, MOSIS Contacts

DATE: May 23, 2011

SUBJECT: June Cycle MOSIS/Core Data Updates

The updates to Core Data Screens 7 (Library Media Center) and 10 (School Calendar) are now complete and working as expected in the June cycle of the Core Data System. We are still working on Core Data Screen 18A (Educator Evaluation) and will update you when it is complete.

The updates to the MOSIS Course Completion Collection are now complete, and the collection is available in MOSIS today. These updates included allowing the additional field of Course Time Unit to be uploaded, as well as the new code of NC for No Credit.

Also, last week we notified you that the EOC Exception List Report available through the 2011 February Student Core Reports was not displaying the correct collection of students. This report is working appropriately now.

Thanks for your patience.
