SUBJECT: NEW Core Data Screens Update

DESE has been developing a new design for the Core Data Screens, this new look has been implemented. We are aware that Core Data Screens 18 and 20 are having a few problems as well as many of the Reports are not functioning properly. We are currently working on these issues and will keep you updated.

Also, please note that when you Certify a trial in MOSIS, it will not populate the Core Data Screens at this time, we hope to have that process running again as early as Tuesday morning.

We appreciate your patience.
