

**Speak Up 2008 is open through December 19.**

Missouri school teachers, administrators, and students are strongly encouraged to participate in Speak Up 2008. Since fall of 2003, the annual Speak Up project has collected and reported on the views of over 1.2 million K-12 students, teachers, administrators, and parents, representing over 14,000 schools in all 50 states. The survey presents the largest collection of authentic, unfiltered stakeholder input on education, technology, 21st century skills, and schools of the future. Survey data are used regularly by education, business, and policy leaders to inform federal, state, and local education programs.

**Missouri's goal is to achieve at least one percent (1%) of total student enrollment** and, with your help, we can accomplish this goal. Note that **participating schools and districts will receive free, online access to their results in Feb 2009**

The 2008 topics include:

- Technology usage in and out of the classroom
- Science education and career exploration
- 21<sup>st</sup> Century skills: information and media literacy
- Emerging trends: digital content, broadband access and policy, online learning
- Designing the 21<sup>st</sup> century school
