

## District Technology Plan Review – Exemplars

The district technology plans listed below received exemplary ratings during peer reviews. Each year the Department asks technology plan readers to make note when plans have exemplary parts – or are exemplary overall – to recognize the planners and to give examples for other districts to consider when creating new plans. Posting to this list does not necessarily indicate a perfect plan, but suggests content and/or format that might serve as a model. Planners should develop content and a format that is uniquely suited to their district’s situation.

<b>Local Needs Assessment</b> <i>[Formerly Current Status – Compiling Raw Data]</i>	E	This plan gives detailed information about who reviewed the data, where the data originated, and whether it was multiple years of data in the data table.
<b>Goal(s)</b>	E	Details each data source used by each TFA sub-committee, notes it as a strength or weakness, and gives implications for district.
<b>Exemplary Overall</b>	E	This would be a good model plan because it hits every mark with good detailed information. There are only a few minor things (see comment on committee list above) and one or two typos, but overall a really good model plan.

<b>Strategies and Action Steps – Student Learning (TFA 1)</b>	E	Good list of objectives on page 22. Very useful overview.
<b>Exemplary Overall</b>	E	After spending years trying to understand how to approach tech plans, it is good to read one that does it right. Beyond the structure of the plan, you have demonstrated that your district is a front runner in your approach to educational technology professional development.
