Accountability

State and federal accountability data inform the public of the progress of all public schools and school districts toward enabling all students to meet state academic achievement standards. Information includes state Annual Performance Reports (APR) and federal Adequate Yearly Progress (AYP) reports.

Welcome to the new Missouri Comprehensive Data System

The MCDS is a new resource provided by the Missouri Department of Elementary and Secondary Education that allows school personnel and the public to access education-related data.

The data made available to the public masks or hides data for groups with 10 or fewer students to protect confidential information about individual students, as required by federal law. The MCDS is still in development. In the coming months, a secured area of the website will become available to authorized school personnel to access unmasked school district and school building data.
