

MSIP 5 Recommendations

1. Direct the Department to bring to the State Board of Education a new rule to update process and resource standards by August 2012. The process should:
 - Start with the recommendations previously developed by the committee convened in 2008-09;
 - Consider current research and best practices; and
 - Include stakeholders.
2. Direct the Department to work with stakeholders and technical experts to develop state standards and a scoring guide for calculating proficiency on the revised MSIP 5 standards.
3. Approve the revised assessment plan as recommended, with the understanding that full implementation will be dependent on state funding and the work of the SMARTER Balanced Assessment Consortium.
4. Authorize the publication of a notice of proposed rulemaking to adopt Rule 5 CSR 50-345.1054, relating to Missouri School Improvement Program 5 in the *Missouri Register* and that the State Board of Education finds this proposed rule necessary to carry out the purposes of Sections 161.092, 162.081, 167.131, and 168.081 RSMo.
