Teacher Evaluation Protocol

Introduction

Missouri’s Educator Evaluation System was created, field-tested and piloted, and refined by hundreds of educators across the state. The system is founded on general beliefs about the purpose of the evaluation process. Central to these beliefs is a theory of action which maintains that improving student performance is predicated on the improvement of educator practice. These beliefs include that evaluation processes are formative in nature and lead to continuous improvement; are aligned to standards that reflect excellence; build a culture of informing practice and promoting learning; and use multiple, balanced measurements that are fair and ethical. Districts are encouraged to collectively establish basic beliefs that serve as the foundation of their local evaluation process. Based on the theory of action and beliefs that are the foundation to the state’s model Educator Evaluation System, the primary purpose of the Teacher Evaluation Protocol is to promote growth in effective practice that ultimately increases student performance. This growth in practice occurs based on the following sequence:

Growth requires focus. The identification of indicators is essential to establishing a particular focus based on performances articulated in the indicators. The baseline data serves as a starting point by establishing a current level of performance. Strategies for improvement are identified and practiced. Meaningful feedback is provided regarding the extent to which the new strategies are addressing the area of focus. A follow-up rating provides indication of the amount of growth in performance that occurred. Reflection on the process and the amount of growth that

occurred or didn't occur informs whether this particular indicator remains an area of focus or whether there is a new area of focus. This sequence is an important component to the growth in educational practice that occurs in the teacher evaluation process described in the following steps:

Step 1: Identify the indicators to be assessed

Rationale

Appropriate indicators are selected that most support increasing student learning through a focus on potential growth opportunities for the teacher. The indicators identified create an alignment between district and school improvement plans and the efforts and primary responsibilities of the teacher in the classroom.

Description

The selection of indicators is very important to the process. These determine the focus and rationale for improving effective practice and are based on what is needed most to improve student learning.

The identified indicators provide a focus area for ongoing learning and growth. Typically these are identified at the end of the year for returning teachers. The determination of which and how many indicators to identify is determined with the following criteria in mind:

1. Driven by student learning needs
2. Derived from the Building and District Improvement Plans (BIP-building level / CSIP-district level)
3. A maximum of three indicators per teacher per year are recommended which are:
 - Based on student needs
 - Represents priorities of the building/district leadership for that teacher
 - Based on a potential growth opportunity for the teacher and are determined in collaboration between the teacher(s) and principal
4. At a minimum two of the indicators must address impact on student learning
5. Other indicators may be identified at any time based on issues and needs that arise. In extreme instances where particular growth or change in practice must be addressed, an Educator Improvement Plan (see Step 3) may be instituted.

Example

Mrs. Johnson is a third year teacher. Based on student data, the third graders in Mrs. Johnson's class struggle with reading comprehension. This is an area of concentration for her class for this year. The principal, who is focusing on the implementation of the Common Core Standards, is directing all teachers to work on Indicator 1.1 "Content knowledge and academic language". In addition, Mrs. Johnson, in consultation with her

principal, has identified Indicator 7.3 “Student-led assessment strategies” in order to better meet the challenging needs of her third grade class. The principal also felt that 8.1 “Self-assessment and improvement” would be helpful to Mrs. Johnson in documenting her efforts to meet the specific needs of her third graders regarding reading comprehension. For this year, Mrs. Johnson’s area of focus will be on performances articulated in the following three indicators:

1. Content knowledge and academic language 1.1
2. Student-led assessment strategies 7.3
3. Self assessment and improvement 8.1

Indicator 1.1 includes evidence for commitment, practice and impact; indicator 7.3 has evidence for practice and impact; and indicator 8.1 has commitment and practice evidence.

Step 2: Determine a baseline score for each identified indicator

Rationale

In order to determine growth on an indicator, it is necessary to establish a baseline score and compare it to a follow-up score. This represents a type of pre- and post-test format where growth in practice occurs between two points in time. A numerical rating provides an assessment of both pre- and post-status to determine accurately the growth that occurred in between.

Description

The 0 – 7 scale found on each [growth guide](#) provides a numerical rating for each indicator. This numerical rating establishes a baseline score. The baseline score for returning teachers working on the same indicator as the previous year is the follow-up rating they received. This generates continuity of improvement on a particular indicator.

The baseline rating is determined by considering the evidence at each level of the appropriate growth guide. Evidence falls into one of three different categories: commitment, practice and impact. Evidence in the commitment frame focuses on the quality of the teacher and includes data and information like preparation, lesson design and credentialing. Evidence in the practice frames focuses on observable behaviors, or the quality of the teaching that the teacher is doing. Evidence in the impact frames focuses on outcomes or what students in the teacher’s class are doing.

It is important to think about a teacher’s rating by taking these separate categories of evidence into consideration. After all, if a teacher designs what they think is a great lesson and delivers it in what they think is an effective manner and yet students do not grasp the content, then there is

still something less than ideal in the learning experience. Identifying where that growth opportunity exists that limits the learning experience from being ideal is the type of focus that leads to growth in practice.

It is first necessary to determine the appropriate descriptive rating for the teacher's performance. This descriptive rating will be either Emerging, Developing, Proficient or Distinguished. To determine the descriptive rating, it is necessary to establish the highest level for which there is evidence of performance.

For example, in Growth Guide 1.1, a determination about the teacher's performance might be as illustrated below. There is Commitment evidence that the teacher is well prepared, that their lesson design includes current content and there is use of supplementary sources. There is also observable Practice evidence reflecting the accuracy and complexity of content knowledge in instruction as indicated. While evidence at the Impact level reveals that students are generally familiar with academic language, student data does not support that a majority of students are able to use academic language. Although evidence can be gathered by observing student performance and various student products, an additional way to gather evidence at the impact level could be through the use of [student surveys](#). Although this is perceptual in nature, research maintains that it does offer useful data.

Teacher Growth Guide 1.1								
Standard 1: Content knowledge aligned with appropriate instruction.								
Quality Indicator 1: Content knowledge and academic language								
Emerging		Developing		Proficient		Distinguished		
1E1) The emerging teacher... Knows and can demonstrate breadth and depth of content knowledge and communicates the meaning of academic language.		1D1) The developing teacher also... Delivers accurate content learning experiences using supplemental resources and incorporates academic language into learning activities.		1P1) The proficient teacher also... Infuses new information into instructional units and lessons displaying solid knowledge of the important concepts of the discipline.		1S1) The distinguished teacher also... Has mastery of taught subjects and continually infuses new research-based content knowledge into instruction.		
Professional Frames								
Evidence of Commitment Is well prepared to guide students to a deeper understanding of content		Evidence of Commitment Stays current on new content and incorporates it into lessons		Evidence of Commitment Use of supplemental primary sources that are aligned to local standards		Evidence of Commitment Continually expands knowledge base on content and infuses into content		
Evidence of Practice Instruction reflects accuracy of content knowledge		Evidence of Practice Instruction indicates an appreciation of the complexity and ever evolving nature of the content		Evidence of Practice Instructional focus is on the most important concepts of the content and includes new content as appropriate		Evidence of Practice Continually seeks out new information and applies it to learning in their classroom		
Evidence of Impact Students are generally familiar with academic language		Evidence of Impact Students are able to use academic language		Evidence of Impact Students accurately use academic language related to their discipline		Evidence of Impact Students communicate effectively using academic language from a variety of sources		
Score = 0		1	2	3	4	5	6	7

Alignment
Of
Evidence

In this illustration, the highlighted areas reflect the evidence of the teacher’s performance. In this illustration, as noted by the highlighted text, there are examples of evidence in three different columns, Emerging, Developing and Proficient. However, it is only in the Emerging column where there is an alignment, or evidence in all three professional frames. This alignment of evidence supports that the teacher is fully rated at the Emerging level. In this particular example, student’s ability to use academic language would be the teacher’s growth opportunity.

It is next necessary to establish a baseline score within the Emerging level. This would be calculated and communicated as follows:

- Using the appropriate growth guide and rating scale (see below), determine a baseline score. A score of 0 indicates there is no evidence present in at least one of the three frames. A score of 1 indicates there is evidence in all frames, but that it is inconsistently present or demonstrated. A score of 2 would indicate it is present and routinely demonstrated. Ideally, this score determination would occur as a collaborative, professional conversation between the teacher and administrator.

RATING SCALE

Not Present	Present but Inconsistent	Present Consistent Routine	Present but Inconsistent	Present Consistent Routine	Present but Inconsistent	Present Consistent Routine	Present Consistent Routine
0	1	2	3	4	5	6	7
Emerging			Developing		Proficient		Distinguished

- Once a score has been determined, provide specific feedback that includes an explanation and rationale for the given score. Again, this would ideally occur within a collaborative, professional conversation.
- In the example illustrated above, students’ ability to use academic language is the specific area where growth is needed to move performance from the “Emerging” level to the “Developing” level.

Example

Mrs. Johnson received the following ratings on her baseline assessment:

- A score of “2 Emerging” on Quality Indicator 1.1: Content knowledge and academic language
 - The evidence, as presented in the example in the Description section, indicates that Mrs. Johnson routinely and consistently is well prepared and uses current and new content as well as supplementary sources where appropriate and her instruction reflects accuracy and complexity of content; and her students are familiar with academic language but do not consistently use it. This consistent use of academic language by students represents a growth opportunity for Mrs. Johnson.
- A score of “4 Developing” on Quality Indicator 7.3: Student-led assessment strategies
 - The evidence indicates that Mrs. Johnson routinely and consistently orientates students on various formats of assessments and instructs them on how to reflect on their own learning based on data. She also instructs them on setting personal learning goals. Students routinely and consistently are prepared for the demands of different assessments and successfully set personal

learning goals based on their own reflection of their learning. An appropriate growth opportunity would include Mrs. Johnson facilitating student learning on how to report on their own progress.

- A score of “2 Emerging” on Indicator 8.1: Self assessment and improvement
 - This indicates that Mrs. Johnson’s professional development or growth plan includes information from self-assessment and reflection strategies and that she also uses this information to improve the overall learning of her students. An appropriate growth opportunity in this area would involve Mrs. Johnson specifically reflecting on the impact of her teaching and using that to guide adjustments to her practices.

Step 3: Develop an Educator Growth Plan (i.e. professional learning/development plan or improvement plan)

Rationale

The primary purpose of the Teacher Evaluation Protocol is to promote growth. Therefore, the acquisition and application of new learning and skills is essential for turning opportunities for growth into outcomes and results.

Description

The description of performance in each indicator and the baseline rating identifies an opportunity for growth. It is important when addressing this opportunity for growth that a very clear plan be developed. The [Educator Growth Plan](#) is the document used to articulate the various necessary components of this plan. For instances where very specific growth is required, or where particular areas of concern must be addressed, the [Educator Improvement Plan](#) is used to ensure that this growth occurs to the extent necessary and in a timely fashion. For more on the [Educator Improvement Protocol](#), see page 34 of this Teacher Evaluation Protocol.

The Educator Growth Plan addresses specific sources of new learning, the practice of skills related to new learning and timelines for completion. The state model offers two different formats for the Educator Growth Plan. One option uses language from the Data Team Process while the other uses language from the Plan/Do/Study Act process. Regardless of which option is used, the Educator Growth Plan includes the following key general components:

1. It corresponds to the examples of evidence provided in the appropriate growth guide
2. It is a clear articulation of a plan or goal statement to address growth opportunities
3. It includes specific strategies and timelines for application of new learning and skills
4. It is focused on results and outcomes

Educator Growth Plan
(Based on the Data Team Process Model)

Professional Growth Plan for _____

Name _____ Date _____

Identify Indicator: _____

Standard Number and Name _____ Quality Indicator Number and Name _____

Briefly describe why this indicator was selected
(Include whether this indicator aligns to a CSIP
and/or BIP improvement goal)

<p>1. FOCUS <i>Based on evidence generated from the growth guide, determine strengths and a key opportunity for growth. This opportunity for growth then becomes the priority – the FOCUS – for your growth plan.</i></p>	<p>2. GOAL <i>Create a goal statement addressing the FOCUS. This goal statement should include these essential qualities: specific, measurable, achievable, relevant, and timely. What will be the result indicators?</i></p>
<p>3. STRATEGY <i>Describe the specific strategy(ies) to be implemented that will address the goal statement. This strategy should provide the best plan for effectively addressing the FOCUS and include clear action steps and timeline.</i></p>	<p>4. RESULTS <i>What was the outcome of the strategy? Based on progress monitoring, provide the data that supports that the outcome of the strategy has effectively addressed the FOCUS.</i></p>

_____ Signature of Teacher _____ Signature of Evaluator Baseline Score Follow-Up Score Growth Score

FOCUS – an area that represents an opportunity for growth and is generated from evidence on the growth guide

GOAL – a statement that addresses the focus and is specific, measureable, achievable, relevant and timely

STRATEGY – description of the skill(s) to be demonstrated that will effectively address the focus and include clear action steps and timelines

RESULTS – data and evidence that supports that the outcome of the strategy has effectively addressed the focus

When considering different strategies to address growth opportunities, the state model offers several different sources of [research](#). Research sources are included in the “Research and Proven Practices” section of this document.

The research provided in this section includes the work of Dr. Robert Marzano, Dr. John Hattie, and Mr. Doug Lemov. These bodies of research were included because of the effect size information provided and their proven record of having impact on student learning. Crosswalks are provided for each to align each body of research with teacher indicators.

This research offers specific strategies that can be included in the teacher’s Educator Growth Plan as a demonstration of progression on the specific indicator being addressed.

Possible Sources of Evidence

Standard 1: Content knowledge, including varied perspectives, aligned with appropriate instruction.

The teacher understands the central concepts, structures, and tools of inquiry of the discipline(s) and creates learning experiences that make these aspects of subject matter meaningful and engaging for students.

Professional Commitment		
<ul style="list-style-type: none"> Lesson/unit plan Learning activities plan Student learning expectations Student learning objectives Lesson design 	<ul style="list-style-type: none"> Tiered/differentiated lessons/units Homework assignments and guiding instructions Flexible grouping plans Parent/guardian outreach Bulletin boards 	<ul style="list-style-type: none"> Research integration plan Praxis scores Agenda/meeting notes from grade level/content area team IEP Conferences/reports
Professional Practice		
<ul style="list-style-type: none"> Builds student background knowledge utilizing a variety of global perspectives Uses and facilitates academic language acquisition Incorporates new research-based content information into instruction Uses instructional and engagement strategies 	<ul style="list-style-type: none"> Facilitates student enrichment activities Uses tiered differentiated learning opportunities Uses flexible grouping Draws from multiple content sources Encourages student responsibility and articulates clear student expectations 	<ul style="list-style-type: none"> Facilitates student directed learning activities Engages students in inquiry/research experiences Implements interdisciplinary learning experiences Facilitates student action to address relevant real-world issues from a global perspective
Professional Impact		
<ul style="list-style-type: none"> Observation verification of student mastery Student work samples Student portfolios Student feedback/comments Student assessment data Student reflection/journals IEP Performance/growth reports 	<ul style="list-style-type: none"> Student discussions/questions Non-academic records of individual progress (class participation, engagement, motivation, behavior, etc.) Academic records of individual student progress Student completion data on homework/projects Performance assessments 	<ul style="list-style-type: none"> Data on academic vocabulary use Structured interviews with students Student engagement and participation Student and/or parent survey results Student products/projects Parent/community attendance at school functions

Also provided is a document called the [Possible Sources of Evidence](#). There is a single page document provided for each standard. This document provides a list of “possible” sources of evidence that a teacher might include as a component of the Educator Growth Plan.

It is important to note that this is not a comprehensive list of all evidence sources nor is it a checklist of things to do and/or provide. It simply offers some possible examples that might be included.

The evidence provided is categorized by the three professional frames found on each of the teacher’s growth guides. In this way, teachers and administrators can use this to clarify exactly what kind of evidence will indicate that growth in performance has occurred.

Example

Mrs. Johnson, in consultation with her administrator and perhaps also peers and/or a mentor, reviews the Possible Sources of Evidence documents and the Research and Proven Practices section of the Educator Evaluation System webpage to determine which new skills and strategies would be most appropriate given the particular growth opportunities of her selected indicators. Mrs. Johnson considers the following information as she works to complete her Educator Growth Plan:

- Quality Indicator 1.1: Content knowledge and academic language
 - Using the Research and Proven Practices section of the Educator Evaluation webpage, Mrs. Johnson observes that there are 23 different [Marzano](#) instructional strategies that align to Quality Indicator 1.1. In reviewing these strategies, she and her administrator agree that strategy MDQ 2.12: “The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represents the content in nonlinguistic ways” would be helpful for increasing a students’ use of academic language. From the Professional Impact section of the Possible Sources of Evidence for

Standard 1 document, they further determine that student work samples could appropriately provide evidence to this increase in academic language.

- In the Educator Growth Plan, Mrs. Johnson documents the following:
 - FOCUS – Mrs. Johnson describes the focus for increasing the use of academic language
 - GOAL – Mrs. Johnson describes how much she wants student use of academic language to increase by and when
 - STRATEGY – Mrs. Johnson describes how she will use a Marzano strategy (MDQ 2.12) and student work samples to demonstrate an increase in academic language
 - RESULTS – (to be completed later in Step 5)

- Quality Indicator 7.3: Student-led assessment strategies
 - Using the Research and Proven Practices section of the Educator Evaluation webpage, Mrs. Johnson observes that there are 9 different strategies taken from the research of [John Hattie](#) that align to Quality Indicator 7.3. In reviewing these strategies, she and her administrator agree that “Self-reported Grades” would assist students in learning to report their own progress in learning. From the Professional Impact section of the Possible Sources of Evidence for Standard 7 document, they further determine that individual student growth/performance could appropriately provide evidence specific to this opportunity for growth.
 - In the Educator Growth Plan, Mrs. Johnson documents the following:
 - FOCUS – Mrs. Johnson describes the focus for assisting students in reporting their progress in learning
 - GOAL – Mrs. Johnson describes how she wants students to report their progress and a timeframe for this to occur
 - STRATEGY – Mrs. Johnson describes how she will use the research of John Hattie and individual student growth/performance to demonstrate students’ ability to report their progress in learning
 - RESULTS – (to be completed later in Step 5)

- Quality Indicator 8.1: Self-assessment and improvement
 - Using the Research and Proven Practices section of the Educator Evaluation webpage, Mrs. Johnson observes that there are 10 different techniques taken from the work of [Doug Lemov](#) in his book “Teach Like a Champion”. In reviewing these 10 techniques, she and her administrator agree that “Technique 10: Double Plan” would be helpful in Mrs. Johnson being more intentional on reflecting on the impact of her teaching. From the Professional Commitment section of the Possible Sources of Evidence for Standard 8 document, they further determine that a reflective journal could appropriately provide evidence specific to this opportunity for growth.
 - In the Educator Growth Plan, Mrs. Johnson documents the following:
 - FOCUS – Mrs. Johnson describes the focus of using reflection to improve instruction

- GOAL – Mrs. Johnson describes her goal of using reflection and timelines for meeting that goal
- STRATEGY – Mrs. Johnson describes how she will use “Technique 10: Double Plan” to organize her reflections and her planning for improved instruction
- RESULTS – (to be completed later in Step 5)

Mrs. Johnson can further support these opportunities for growth with appropriate articles and research. Her local Professional Development Committee (PDC), district coaches, the regional professional development center and professional associations can be of assistance as well as other effective teachers in her building and district.

Step 4: Regularly assess progress and provide feedback

Rationale

In keeping with the research on formative development, the essential role of practice and feedback will ensure that the acquisition and application of new learning, skills and strategies will lead to the improvement of effective practice resulting in improved learning for students.

Description

Determine progress made on new skill acquisition and application using a variety of formal and informal strategies. In addition to building and district administrators, the use of peers, mentors, coaches, regional centers, associations and other building and district resources assist with this part of the process.

Feedback on the growth opportunities from the identified indicator is critical. It ensures that new learning takes place, but more importantly that new skills and strategies are applied and practiced and growth documented. The following guidelines assist in this process of regular assessment of progress and feedback:

1. A minimum of three to five opportunities for formal and informal feedback should occur on each identified indicator
2. Informal feedback may be provided by mentors, coaches, peers, external consultants, etc.
3. A formal follow-up assessment should be completed by the administrator
4. Numerical scoring on the appropriate growth guide for each indicator included as a part of the feedback is optional, but is often helpful to accurately determine progress

The use of [feedback forms](#) included as a part of the state model allows for documentation of feedback and progress. There are several different forms available for use in providing and documenting feedback.

Performance Indicator Feedback Form

Teacher: _____ Grade/Level: _____

Standard # <u>Select One</u>	
Quality Indicator # <u>Select One</u>	
Date of Observation: _____	
Principal Comments:	Overall Performance Rating <input type="checkbox"/> Emerging <input type="checkbox"/> Developing <input type="checkbox"/> Proficient <input type="checkbox"/> Distinguished

Overall Comments/ Observations			

Teacher's Signature/Date _____ Observer's Signature/Date _____
Signatures indicate the document has been reviewed and discussed.

The Performance Indicator Feedback Form (shown on left) provides documentation of the progression of feedback offered on a particular indicator. This single page form can be used to document up to three instances of feedback for a single indicator. Additional forms may be used as needed. There is opportunity for both teacher and observer comments.

The General Observation Feedback Form (shown on right) provides documentation of general information and data gathered from a classroom observation. In addition to the option of providing feedback on specific indicators offered in the top section, the form also allows for a very general overview of other relevant information including particular practice strategies being used by the teacher, student engagement levels, the depth of knowledge observed, structure of the classroom, alignment between curriculum and instruction, type of assessment being used and an overall assessment of the learning environment.

Example

On several occasions, Mrs. Johnson receives a Performance Indicator Feedback Form from the district's instructional coach on her use of linguistic and nonlinguistic demonstrations of student understanding of content in support of Quality Indicator 1.1. She also receives a Performance Indicator Feedback Form on how well she is facilitating students' efforts to self-report their progress in learning. Mrs. Johnson also receives a couple of General Observation Feedback Forms from her administrator and in their discussions they review her reflective journal and discuss how well the strategy for making a double plan is working. This discussion includes looking at evidence of the changes she has made in instruction and how well she feels these have impacted her students' learning.

These forms provide Mrs. Johnson with documented feedback and evidence on the progress she is making on her selected indicators. She has opportunity to continue emphasizing those particular strategies that appear to be working as well as make adjustments in any areas where she feels she could be making more progress.

Step 5: Determine a follow-up score for each identified indicator

Rationale

To determine growth on an indicator, it is necessary to compare the follow-up score to the baseline score. The comparison provides a measure of growth that has occurred on the performance articulated in each quality indicator.

Description

Using the same process to determine the baseline rating, the follow-up rating is determined by considering the evidence at the appropriate level of the growth guide. When making a determination about the follow-up rating, it is necessary to consider the particular professional frame of the teacher's opportunity for growth.

As a reminder, evidence falls into one of three different categories: commitment, practice and impact. Evidence in the commitment frame focuses on the quality of the teacher and includes data and information like preparation, lesson design and credentialing. Evidence in the practice frames focuses on observable behaviors, or the quality of the teaching that the teacher is doing. Evidence in the impact frames focuses on outcomes or what students in the teacher's class are doing. The follow-up score is determined as follows:

1. Using the appropriate growth guide and rating scale (see below), determine a follow-up score. A score of 0 indicates there is no evidence present in at least one of the three frames. Ideally, this follow-up score is collaboratively determined through a professional conversation between the teacher and administrator.

RATING SCALE

Not Present	Present but Inconsistent	Present Consistent Routine	Present but Inconsistent	Present Consistent Routine	Present but Inconsistent	Present Consistent Routine	Present Consistent Routine
0	1	2	3	4	5	6	7
Emerging			Developing		Proficient		Distinguished

2. Once the follow-up score has been determined, provide specific feedback that includes an explanation and rationale for the given score.

The purpose of follow-up rating is to determine the extent to which the plan articulated on the Educator Growth Plan was addressed. In particular, it is used to determine the extent to which the strategies outlined in the plan addressed the goal. If the strategies did address the goal, then the opportunity for growth will have been addressed and satisfied. This is documented in the RESULTS box of the Educator Growth Plan. In addition, the follow-up score and growth score are captured on the Educator Growth Plan as well.

Example

Mrs. Johnson’s follow-up ratings included:

- A follow-up score of “4 Developing” on Quality Indicator 1.1: Content knowledge and academic language
 - Based on the feedback Mrs. Johnson received on the use of the Marzano strategy she was practicing (MDQ 2.12) and monitoring student work samples, the evidence now suggests that students are using academic language more consistently than they were at the time of the baseline assessment.
 - In the Educator Growth Plan, Mrs. Johnson adds the additional documentation:
 - FOCUS – Mrs. Johnson describes the focus for increasing the use of academic language
 - GOAL – Mrs. Johnson describes how much she wants student use of academic language to increase by and when
 - STRATEGY – Mrs. Johnson describes how she will use a Marzano strategy (MDQ 2.12) and student works samples to demonstrate an increase in academic language
 - RESULTS – Mrs. Johnson describes the specific data from student work samples that demonstrates an increase in her students’ ability to use academic language
 - Baseline Score – 2

- Follow-up Score – 4
 - Growth Score – 2

- A follow-up score of “5 Proficient” on Quality Indicator 7.3: Student-led assessment strategies
 - Observation of Mrs. Johnson’s classroom provides evidence of students using their progress in learning. A review of different ways that students have communicated this progress to their parents also provides additional evidence.
 - In the Educator Growth Plan, Mrs. Johnson adds the additional documentation:
 - FOCUS – Mrs. Johnson describes the focus for assisting students in reporting their progress in learning
 - GOAL – Mrs. Johnson describes how she wants students to report their progress and a timeframe for this to occur
 - STRATEGY – Mrs. Johnson describes how she will use the research of John Hattie and individual student growth/performance to demonstrate students’ ability to report their progress in learning
 - RESULTS – Mrs. Johnson describes examples of students communicating their progress in learning and the impact it appears to have had throughout the year
 - Baseline Score – 4
 - Follow-up Score – 5
 - Growth Score – 1

- A follow-up score of “3 Developing” on Quality Indicator 8.1 Self-assessment and improvement
 - Through discussions and review of Mrs. Johnson’s lesson plans and reflective journal, there is evidence to suggest that she is more intentional in using reflection to modify instruction. In addition, the T-Chart she developed using “Technique 10: Double Plan” provides further evidence of the impact this has had on learning in her classroom.
 - In the Educator Growth Plan, Mrs. Johnson adds the additional documentation:
 - FOCUS – Mrs. Johnson describes the focus of using reflection to improve instruction
 - GOAL – Mrs. Johnson describes her goal of using reflection and timelines for meeting that goal
 - STRATEGY – Mrs. Johnson describes how she will use “Technique 10: Double Plan” to organize her reflections and her planning for improved instruction
 - RESULTS – Mrs. Johnson describes the evidence gathered in her reflective journal, from her T-Chart, and from changes and adaptations made in her lesson plans
 - Baseline Score – 2
 - Follow-up Score – 3
 - Growth Score – 1

Step 6: Complete the final summative evaluation

Rationale

The evaluation process exists for the improvement as a necessary catalyst for improving student performance. The summative evaluation pulls together the data that has been collected and provides a final overall statement of the teacher's effectiveness.

Description

An overall determination on performance uses baseline and follow-up scores, feedback generated throughout the year on selected indicators, general feedback generated periodically through classroom observations and any other data or information relevant to the teacher's performance observed or gathered throughout the year. This information is captured on feedback forms and the Educator Growth Plan or, if applicable, the Educator Improvement Plan. This information and data is used to complete [Summative Evaluation Form](#).

Teacher Evaluation Summative Report Academic Year _____ -- _____

Teacher: _____ Subject/Grade Level: _____

Probationary Teacher: Permanent Teacher: School: _____

Standard	**Area of Concern	*Growth Opportunity	Meets Expectation
Standard 1: Content Knowledge Aligned with Appropriate Instruction <input type="checkbox"/> Teacher effectively plans for the delivery of the essential content of the discipline <input type="checkbox"/> Subject matter learning activities are meaningful and engaging for students <input type="checkbox"/> Students demonstrate mastery and application of content Standard 1 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standard 2: Student Learning Growth and Development <input type="checkbox"/> Teacher uses theories and student information to design meaningful lessons <input type="checkbox"/> Teacher's instructional strategies use current theories of growth and development <input type="checkbox"/> Students' level of growth and development is the foundation for new learning Standard 2 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standard 3: Curriculum Implementation <input type="checkbox"/> Teacher designs lessons aligned with state (Common Core) and district standards <input type="checkbox"/> Teacher facilitates student learning based on state and district standards <input type="checkbox"/> Students master essential learning objectives based on state and district standards Standard 3 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standard 4: Critical Thinking <input type="checkbox"/> Teacher lesson design and use of instructional resources promotes critical thinking <input type="checkbox"/> Teacher's instructional strategies promote critical thinking and problem-solving <input type="checkbox"/> Students demonstrate their ability to think critically and problem-solve Standard 4 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standard 5: Positive Classroom Environment <input type="checkbox"/> The rules, routines and structures create an environment conducive to learning <input type="checkbox"/> Teacher's strategies create a positive classroom environment conducive to learning <input type="checkbox"/> Students are self-directed, exhibit positive relationships and are engaged in learning Standard 5 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standard 6: Effective Communication <input type="checkbox"/> Non-verbal communication (written/electronic) is effective, correct and appropriate <input type="checkbox"/> Teacher demonstrates correct and appropriate communication <input type="checkbox"/> Students exhibit correct and appropriate communication Standard 6 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Standard 7: Student Assessment and Data Analysis <input type="checkbox"/> Maintains accurate data on each student's progress based on multiple data points <input type="checkbox"/> Teacher effectively collects and uses student data to inform and improve instruction <input type="checkbox"/> Students are knowledgeable of their own progress and plan personal learning goals Standard 7 Comments:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Standard 8: Self-Assessment and Improvement <input type="checkbox"/> Maintains a professional growth to document the application of new knowledge and skills <input type="checkbox"/> Teacher engages in professional learning to improve practice and increase student learning <input type="checkbox"/> Teacher follows district policies and procedures regarding ethical practices & responsibilities <input type="checkbox"/> Teacher maintains positive relationships with students, staff, parents, patrons, administrators, and supervisors. Standard 8 Comments:	**Area of Concern	*Growth Opportunity	Meets Expectation
Standard 9: Professional Collaboration <input type="checkbox"/> Teacher engages with colleagues to promote the district/school vision, mission and goals <input type="checkbox"/> Teacher works collaboratively regarding improvements in student learning and well-being Standard 9 Comments:	**Area of Concern	*Growth Opportunity	Meets Expectation

*A "Growth Opportunity" rating on a standard results in a Growth Plan for that area.
 **An "Area of Concern" rating on a standard results in an Improvement Plan for that area.

Growth Opportunities Academic Year _____ -- _____

Indicator and Rationale	Baseline Assessment	Goal (Target related to selected indicator)	Results (Outcome of implemented strategies)	Follow-Up Assessment
#1	Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2			Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2
	Developing (3-4) <input type="checkbox"/> 3 <input type="checkbox"/> 4			Developing (3-4) <input type="checkbox"/> 3 <input type="checkbox"/> 4
	Proficient (5-6) <input type="checkbox"/> 5 <input type="checkbox"/> 6			Proficient (5-6) <input type="checkbox"/> 5 <input type="checkbox"/> 6
	Distinguished (7) <input type="checkbox"/> 7			Distinguished (7) <input type="checkbox"/> 7
#2	Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2			Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2
	Developing (3-4) <input type="checkbox"/> 3 <input type="checkbox"/> 4			Developing (3-4) <input type="checkbox"/> 3 <input type="checkbox"/> 4
	Proficient (5-6) <input type="checkbox"/> 5 <input type="checkbox"/> 6			Proficient (5-6) <input type="checkbox"/> 5 <input type="checkbox"/> 6
	Distinguished (7) <input type="checkbox"/> 7			Distinguished (7) <input type="checkbox"/> 7
#3	Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2			Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2
	Developing (3-4) <input type="checkbox"/> 3 <input type="checkbox"/> 4			Developing (3-4) <input type="checkbox"/> 3 <input type="checkbox"/> 4
	Proficient (5-6) <input type="checkbox"/> 5 <input type="checkbox"/> 6			Proficient (5-6) <input type="checkbox"/> 5 <input type="checkbox"/> 6
	Distinguished (7) <input type="checkbox"/> 7			Distinguished (7) <input type="checkbox"/> 7

The first 1 ½ pages of the summative evaluation form provides both an overview of the effectiveness of the teacher looking across all nine standards as well as a focused view in regards to the specific indicators the teacher has worked on throughout the year.

- Assessing the teacher’s performance across all teaching standards
 - Each standard is listed with summary statements. The statements represent a very broad description drawn from the categories of commitment, practice and impact. They are listed as a type of checklist supporting each of 9 standards. For each standard, three options are provided:
 - Area of Concern – checking this box for a standard will likely result in an improvement plan for this standard meaning that growth in this area is both necessary and required for continued employment
 - Growth Opportunity – checking this box for a standard might possibly result in an indicator from this standard being selected in the following year as an opportunity for growth and documented in the next year’s Educator Growth Plan
 - Meets Expectation – checking this box for this standard indicates that performance in this area meets the expectation of the administrator/district at the present time
 - Note: the comment box provided below each standard provides opportunity to offer the rationale for the rating as well as to note exemplary performance in this particular area.

- Assessing the teacher’s performance on selected indicators
 - This section of the summative evaluation form focuses on the growth opportunities presented through the selected indicators. Summative information is provided in the following areas:
 - Indicator and Rationale – document the specific indicator(s) that were selected and the reason this was a growth opportunity for the teacher
 - Baseline Assessment – indicate the initial rating achieved for each selected indicator
 - Goal – summarize the goal that was created to address the growth opportunity
 - Results – describe the outcomes of implementing the strategy and determine whether the focus was adequately addressed
 - Follow-Up Assessment – indicate the follow-up rating achieved for each selected indicator
 - Note: This information is transferred from the Educator Growth Plan

Overall Teacher Rating

Years in Position	Ineffective	Minimally Effective	Effective	Highly Effective
<input type="checkbox"/> 0-2	<input type="checkbox"/> Multiple Areas of Concern Or Indicator Rating 0	<input type="checkbox"/> 1 Area of Concern Or Indicator Rating 1	<input type="checkbox"/> No Areas of Concern And Indicator Ratings 2-3	<input type="checkbox"/> No Areas of Concern And Indicator Ratings 4-7
<input type="checkbox"/> 3-5	<input type="checkbox"/> Multiple Areas of Concern Or Indicator Ratings 0-2	<input type="checkbox"/> 1 Area of Concern Or Indicator Rating 3	<input type="checkbox"/> No Areas of Concern And Indicator Ratings 4-5	<input type="checkbox"/> No Areas of Concern And Indicator Ratings 6-7
<input type="checkbox"/> 6-10	<input type="checkbox"/> Multiple Areas of Concern Or Indicator Ratings 0-3	<input type="checkbox"/> 1 Area of Concern Or Indicator Rating 4	<input type="checkbox"/> No Areas of Concern And Indicator Ratings 5-6	<input type="checkbox"/> No Areas of Concern And Indicator Rating 7
<input type="checkbox"/> Over 10	<input type="checkbox"/> Multiple Areas of Concern Or Indicator Ratings 0-4	<input type="checkbox"/> 1 Area of Concern Or Indicator Rating 5	<input type="checkbox"/> No Areas of Concern And Indicator Rating 6	<input type="checkbox"/> No Areas of Concern And Indicator Rating 7

_____ is rated as _____ for the _____ - _____ school year.
Teacher's Name Effectiveness Rating

Overall Comments:

- Recommend for Re-Employment**
- Develop a new or revised growth plan based on new indicators or a continuation of the same ones
 - Develop an improvement plan linked to indicators, must include specific target dates and timelines that must be met in order for re-employment to continue
- Do Not Recommend for Re-Employment**

Teacher's Signature Date Evaluator's Signature Date

The final page of the Summative Evaluation Form provides an overall rating for the teacher. This section is completed as follows:

1. Years in Position – determine the number of years the teacher has been in the current evaluated position (Note: the purpose for “in position” is to allow for reassignment of teachers to different grade levels/positions without adversely affecting performance ratings)
2. Select one of the effectiveness ratings based on the following criteria:
 - a. Ineffective Rating
 - i. Multiple areas of concern across the 9 standards, OR
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - b. Minimally Effective Rating
 - i. 1 area of concern across the 9 standards, OR
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - c. Effective Rating
 - i. No areas of concern across the 9 standards, AND
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - d. Highly Effective Rating
 - i. No areas of concern across the 9 standards, AND
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - e. Complete the comments section and the recommendation for employment

Example

Mrs. Johnson's administrator completed her summative evaluation form with the following information:

Assessing Mrs. Johnson's performance across all 9 teaching standards

- | | |
|--|--------------------|
| • Standard 1: Content Knowledge Aligned with Appropriate Instruction | Meets Expectation |
| • Standard 2: Student Learning Growth and Development | Growth Opportunity |
| • Standard 3: Curriculum Implementation | Meets Expectation |
| • Standard 4: Critical Thinking | Meets Expectation |
| • Standard 5: Positive Classroom Environment | Meets Expectation |
| • Standard 6: Effective Communication | Growth Opportunity |
| • Standard 7: Student Assessment and Data Analysis | Meets Expectation |
| • Standard 8: Self-Assessment and Improvement | Meets Expectation |
| • Standard 9: Professional Collaboration | Meets Expectation |

Mrs. Johnson had no areas of concern. She had two areas, Student Learning, Growth and Development and Effective Communication, that were marked by her administrator as growth opportunities. Her selected indicators next year could possibly come from these two standards. In the comments section under Standard 9 Professional Collaboration, her administrator particularly noted that he felt Mrs. Johnson was particularly strong in her collaboration skills and in working with other colleagues.

Assessing Mrs. Johnson's performance on selected indicators

Mrs. Johnson's follow-up ratings on her identified indicators show improved effective practice on specific research-based targets intended to improve the learning of her 3rd grade students. Her ratings on her practice moved from a rating of

- Emerging (2) to Developing (4) on Quality Indicator 1.1: Content knowledge and academic language.
- Developing (4) to Proficient (5) on Quality Indicator 7.3: Student-led assessment strategies.
- Emerging (2) to Developing (3) on Quality Indicator 8.1 Self-assessment and improvement.

Her average rating based on her follow-up assessments is a 4 (12 total / 3 indicators = 4). This average follow-up assessment score provides a general summary on the growth Mrs. Johnson achieved in her three growth opportunities.

Mrs. Johnson is in her third year of teaching third grade. Since she has been in her current, evaluated position for three years, the second row of the Overall Teacher Rating chart is used. Mrs. Johnson had no areas of concern AND her average rating fell in the 4-5 range.

Overall Teacher Rating

Years in Position	Ineffective	Minimally Effective	Effective	Highly Effective
0-2	Multiple Areas of Concern Or Indicator Rating 0	1 Area of Concern Or Indicator Rating 1	No Areas of Concern And Indicator Ratings 2-3	No Areas of Concern And Indicator Ratings 4-7
3-5	Multiple Areas of Concern Or Indicator Ratings 0-2	1 Area of Concern Or Indicator Rating 3	No Areas of Concern And Indicator Ratings 4-5	No Areas of Concern And Indicator Ratings 6-7
6-10	Multiple Areas of Concern Or Indicator Ratings 0-3	1 Area of Concern Or Indicator Rating 4	No Areas of Concern And Indicator Ratings 5-6	No Areas of Concern And Indicator Rating 7
Over 10	Multiple Areas of Concern Or Indicator Ratings 0-4	1 Area of Concern Or Indicator Rating 5	No Areas of Concern And Indicator Rating 6	No Areas of Concern And Indicator Rating 7

Based on the information collected throughout the year and compiled on the Summative Evaluation Form, Mrs. Johnson would receive the following overall rating:

Mrs. Johnson is rated as Effective for the 2012 - 2013 school year.
Teacher's Name Effectiveness Rating

Recommend for Re-Employment

Do Not Recommend for Re-Employment

Develop a new or revised growth plan based on new indicators or a continuation of the same indicators.

Develop an improvement plan linked to indicators. This must include specific target dates and timelines that must be met in order for re-employment to continue.

Step 7: Reflect and Plan

Rationale

The evaluation process exists primarily for the improvement of effective practice in order to improve student performance. Ongoing reflection and planning are used to ensure that student learning needs are continually met.

Description

The improvement of effective practice is a means to an end. The ongoing and continual process of improving professional practice is essential for ensuring that student learning needs remain the focus of the evaluation process. The ultimate result is the improvement of student learning. Monitoring student learning growth caused by a teacher's improved practice satisfies the primary purpose of the evaluation process.

Reflection on personal growth is an important part of feedback. It provides personal insight to areas of strength and potential growth opportunities for future focus. As a part of this reflection, consider the following:

1. Assess whether the particular areas of improvement of effective practice impacted student learning
2. Reflect on personal growth and possible future opportunities for continued growth
3. Plan ahead for future opportunities for growth. In collaboration with the administrator and perhaps teams of teachers and/or colleagues, select indicators for next year (applies to returning teachers).
4. Continue to acquire new knowledge and practice new strategies and skills

Example

Through the end of the year, Mrs. Johnson continues to monitor the learning of her 3rd grade students. She particularly reflects on how new learning, skills and strategies from the evaluation process have contributed to her students improved performance. In consultation with her principal, she begins to plan which particular indicators would be most appropriate for her to focus on next year. In particular, based on her Summative Evaluation Form, they consider and discuss selecting indicators from Standard 2: Student Learning, Growth and Development and Standard 6: Effective Communication. Their professional conversation includes consideration of working on some of the same indicators next year. Mrs. Johnson will use her summer months to continue her learning in ways that will improve her performance on the indicators she will work on next year.

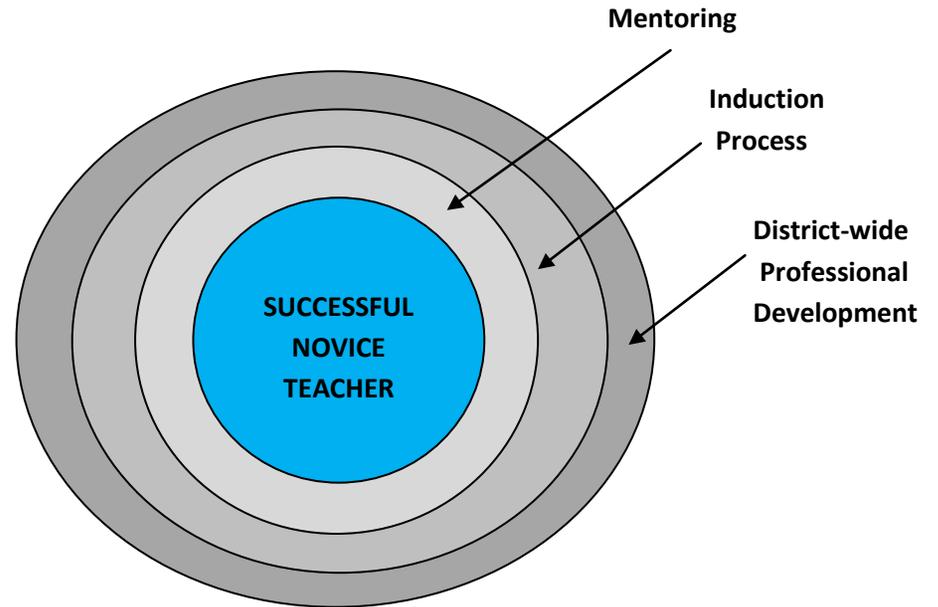

Timeline for completion of the Teacher Evaluation Protocol

Step #	Step 1	Step 2	Step 3	Step 4	Step 5	Step 6	Step 7
Title and Description Of Step	Identify the indicators to be assessed	Determine a baseline score for each identified indicator	Develop an Educator Growth Plan	Regularly assess progress and provide feedback	Determine a follow-up score for each identified indicator	Complete the final summative evaluation	Reflect and Plan
	Select indicators to be assessed based on student data and aligned to building & district improvement plans.	Conduct an initial assessment of identified indicators and set a baseline score for each identified indicator.	Based on the opportunities for growth and the baseline scores, complete the Educator Growth Plan that includes the practice and application of new knowledge and skills.	<p>Conduct observations on performances in the identified indicators.</p> <p>Provide targeted feedback on areas of strength and opportunities for growth.</p> <p>Note: observations may be conducted by coaches, peers, teacher team members as well as principals and assistant principals.</p>	Conduct a follow-up assessment of identified indicators. Determine overall progress on the Educator Growth Plan.	Complete the Summative Evaluation Form to determine the overall rating on performance by the 15 th of March.	<p>Continue to monitor student growth and reflect on the impact of improved effective practice.</p> <p>Reflect on progress of growth opportunities.</p> <p>Indicators for next year may be selected based on local student data and the results of the evaluation process.</p>
Timeline Returning Teacher	April – Summer	August – October	November – February			By March 15	April – May – Summer

New Teacher Protocol

The entry into the teaching profession is too often characterized as times of isolation, stress and fear of failure on the part of the new teacher. Effective districts work to ensure this is not the case. The first two years of teaching should be supported by intentional mechanisms and support structures to ensure the success of the novice educator.

- The overall structure is the district’s plan for **professional development** of all teachers. This plan ensures that teachers receive what they need to be successful.
- Within the district’s plan for professional development is the **induction process** which ensures that teachers new to the district, including new teachers, are successfully introduced and brought into the expectations, priorities and culture of the system.
- Within the district’s induction process is the **mentoring program** where the novice teacher receives two years of one-to-one support.

**For a more comprehensive description, see the Guidelines for the Probationary Period offered by the Department of Elementary and Secondary Education*

A district’s successful induction process, which includes an effective mentoring program, focuses on particular performance targets to ensure the effective teacher practice of the new teacher. Improving the effectiveness of the teacher and the achievement of their students occurs through a focus on evidence of the teacher’s knowledge and skills. Typical areas of focus include classroom management procedures and routines, effective instructional practices, understanding the school community, engaging in ongoing professional learning, and participating in teamwork among administrators, teachers, support staff and community members. Building on these proven practices, the induction process continues the ongoing development of the educator in ways that promote successful teaching which demonstrates effectiveness. The initial years are particularly important as a time to assess initial baseline performance data and identify personal strengths and opportunities for growth.

Timeline for New Teacher Evaluation

The first and second year of teaching can be particularly overwhelming for the new teacher. It is simply not realistic to expect the new teacher to demonstrate performance across 36 separate indicators. As such, doing an in-depth assessment of the novice educator's performance on all 36 indicators would not only be overwhelming but likely inaccurate as well. However, events at certain times of the year do allow opportunity to collect baseline data on performance and provide specific meaningful feedback to new teachers on particularly relevant knowledge and skills. This specific feedback should be provided to the mentee by the mentor. The administrator should also regularly interact with the new teacher, providing specific feedback on performance. By maintaining a focus on specific performances at particular times of the year, it's possible to accomplish the following:

- The mentee has a clear sense of expectations connected to certain times/events
- The induction process and mentor can offer very targeted support aligned to particular school events the mentee is experiencing
- The administrator has a very clear goal of providing support and feedback multiple times throughout the year to the novice teacher
- By the conclusion of the second year, the mentee has received support, guidance, collaboration and feedback across a broad set of expectations

Baseline data, observed and gathered across the initial two years, provides a general overview of the mentee's strengths as well as opportunities for growth. These areas, in particular the opportunities for growth, will inform areas of concentration in the mentee's continued development as a part of the overall system's professional development plan.

1 st Year Teacher Practices		
Timeframe	MO Indicator	Evidence of Knowledge and Skills
Preparation	All 36 Teacher Quality Indicators	Developed/Assessed in coursework & clinical experience
Prior to the Beginning of School	1.1 Content Knowledge	Plans for essential learning outcomes of content Uses theories of learning to plan for instruction Aligns lesson design and assessments to curriculum Begins student/family communication Understands District Policy and Code of Conduct Engages in the induction process with a mentor
	2.3 Theory of Learning	
	3.1 Implementing the Curriculum	
	4.2 Instructional Resources	
	6.1 Verbal and Non-Verbal Communication	
	8.3 Professional Responsibilities	
	9.1 Induction & Collegial Activities	
First Month	1.2 Engaging in Content	Delivers lessons that engage students in content Assesses student personalities and abilities Effective use of basic classroom management techniques Manages time, space, transitions, activities effectively Demonstrates sensitivity to students' differences Uses a variety of different assessment formats Engages in the induction process with a mentor
	2.1 Student Development (see also 2.6)	
	5.1 Classroom Management	
	5.2 Time, Space, Transitions, and Activities	
	6.2 Sensitivity to student differences (see also 2.6)	
	7.1 Use of Assessments	
	9.1 Induction & Collegial Activities	
2 nd -3 rd Month Quarter 1	2.2 Student Goals	Helps students establish goals and monitor own progress Teaches students to think critically and problem-solve Uses different learning configurations effectively Adjusts procedures/routines to reinforce expectations Helps students assess their own progress to learning goals Communicates student progress and maintains records
	4.1 Critical Thinking Strategies	
	4.3 Cooperative, small group and independent learning	
	5.2 Time, Space, Transitions, and Activities	
	7.3 Student-led Assessments	
	7.5 Communicates Student Progress	
4 th -5 th Month Quarter 2	1.5 Diverse Social and Cultural Perspectives	Helps students develop balanced cultural perspectives Differentiates instruction to meet student needs Addresses variations in learner styles and performances Communicate student progress effectively Use student data to plan future instruction
	2.4 Differentiated Lesson Design (see also 3.3)	
	3.2 Lessons for Diverse Learners	
	6.1 Verbal and Non-Verbal Communication	
	7.2 Assessment Data to Improve Learning	
	7.5 Communicating Student Progress	
6 th Month Mid-Year	2.5 Use of Student's Prior Experience	Adjust learning activities based on data from 1 st semester Adjusts procedures/routines to reinforce expectations Uses relevant information to plan future instruction Collaborate with peers on student data Self-reflect on progress to determine impact of instruction Seeks/Provides services to meet needs of learners
	5.2 Time, Space, Transitions, and Activities	
	7.4 Effects of instruction	
	7.6 Collaborative Data Analysis	
	8.1 Self-assessment and Improvement	
	9.2 Collaborating to Meet Student Needs	
7 th -8 th Month Quarter 3	1.2 Engaging in Content	Connecting content to classroom design Helps students establish goals and monitor own progress Uses different learning configurations effectively Communicate progress effectively to students/parents Use student data to plan future instruction
	2.2 Student Goals	
	4.3 Cooperative, small group and independent learning	
	7.2 Assessment Data to Improve Learning	
	7.5 Communicating Student Progress	
9 th -10 th Month Quarter 4	2.5 Use of Student's Prior Experience	Review data of student progression throughout the year Collaborate and reflect with colleagues on student data Reflects on impact of instruction Reflects with mentor on strengths & growth opportunities
	7.4 Effects of instruction	
	7.6 Collaborative Data Analysis	
	8.1 Self-assessment and Improvement	
	9.1 Induction & Collegial Activities	
End of the School Year	8.1 Self-assessment and Improvement	Reflect on impact on student learning Uses resources available to advance professional learning
	8.2 Professional Learning	

Certain performance targets, or specific skills, are of particular importance at certain times of the year. While the context of the community and in particular the teachers' student population will have influence over the timing and the types of knowledge and skills the new teacher will need to possess and demonstrate; there are some generalizations that can be reasonably concluded, regardless of context.

For example, knowledge and skills associated with curriculum and lesson planning are especially relevant in the days just prior to beginning the school year when the teacher is planning for the first few weeks of school. Likewise, skills involving classroom management, procedures and routines are of particular significance in the first few weeks of the school year.

A general summary of indicators of teacher performance and a time of significance is provided for the first and second year of teaching. The timeframes on this table begin with the end of the clinical experience which occurs in the preparation process. The timeframes extend through the summer prior to the first day of school and conclude with the summer following initial year of teaching.

The second year of teaching is organized in similar fashion. The timeframes on this table begin with the summer prior to the second year of teaching and extend through to the summer following the second year of teaching. This encompasses all of the required two years of mentoring that is to be provided to all new teachers.

Each table contains 8 separate timeframes. Each timeframe contains anywhere between 2 to 7 Quality Indicators as the particular focus during the indicated timeframe. In this way, mentees are focusing on a defined set up performances within each specified timeframe. The selected indicators are suggested based on ordinary events that occur in a typical school year. There is flexibility to substitute indicators based on the unique characteristics of a particular district and/or school.

What is most important is ensuring that baseline data on performance is collected on the mentee; that the mentee receives specific feedback on their performance from the mentor on those specific performances and knowledge; that the administrator regularly interacts with the new teacher providing support and specific feedback on performance; and that this occurs without overwhelming the new teacher, but instead provides real time support for the emotions and reactions the new teacher is experiencing based on the issues they are experiencing.

2 nd Year Teacher Practices		
Timeframe	MO Indicator	Knowledge and Skills
Prior to the Beginning of School	1.1 Content Knowledge	Plans for essential learning outcomes of content
	1.3 Disciplinary Research and Inquiry Methodologies	Plans for teaching students about inquiry and research
	3.1 Implementing the Curriculum	Aligns lesson design and assessments to curriculum
	4.2 Instructional Resources	Uses available resources to support lesson activities
	9.1 Induction & Collegial Activities	Engages in the induction process with a mentor
First Month	1.2 Engaging in Content	Delivers lessons that engage students in content
	1.4 Interdisciplinary Instruction	Makes interdisciplinary content connections in instruction
	2.6 Language, Culture, Family, Community Values	Uses data to determine the variety of learning needs
	5.1 Classroom Management	Effective use of basic classroom management techniques
	5.2 Time, Space, Transitions, and Activities	Manages time, space, transitions, activities
	6.4 Technology and Media Communication Tools	Uses technology and media communication tools
	7.1 Use of Assessments	Uses a variety of different assessment formats
2 nd -3 rd Month Quarter 1	2.2 Student Goals	Helps students establish goals and monitor own progress
	4.1 Critical Thinking Strategies	Teaches students to think critically and problem-solve
	4.3 Cooperative, small group and independent learning	Uses different learning configurations effectively
	5.2 Time, Space, Transitions, and Activities	Manages time, space, transitions, activities
	7.3 Student-led Assessments	Helps students assess their own progress to learning goals
	7.5 Communicates Student Progress	Communicates student progress and maintains records
4 th -5 th Month Quarter 2	3.2 Lessons for Diverse Learners	Differentiates instruction to meet student needs
	3.3 Instructional Goals and DI Strategies	Uses differentiated instructional strategies effectively
	5.3 Classroom, School, Community Culture	Uses culture of school/community to impact relationships
	7.2 Assessment Data to Improve Learning	Addresses variations in learner styles and performances
	7.5 Communicating Student Progress	Use student data to plan future instruction
6 th Month Mid-Year	2.5 Use of Student's Prior Experience	Adjust learning activities based on data from 1 st semester
	7.4 Effects of instruction	Uses relevant information to plan future instruction
	7.6 Collaborative Data Analysis	Collaborate with peers on student data
	8.1 Self-assessment and Improvement	Reflects on progress to determine impact of instruction
	9.3 Cooperative Partnerships Supporting Learning	Builds partnerships to support student learning
7 th -8 th Month Quarter 3	1.2 Engaging in Content	Connects content to classroom design
	6.3 Speaking, Writing and other Media	Supports learners in speaking, writing and other media
	7.2 Assessment Data to Improve Learning	Communicates progress effectively to students/parents
	7.5 Communicating Student Progress	Uses student data to plan future instruction
9 th -10 th Month Quarter 4	7.4 Effects of instruction	Reviews data of student progression throughout the year
	7.6 Collaborative Data Analysis	Collaborates and reflects with colleagues on student data
	8.1 Self-assessment and Improvement	Reflects on impact of instruction
	9.1 Induction & Collegial Activities	Reflects with mentor on strengths & growth opportunities
End of the School Year	8.1 Self-assessment and Improvement	Reflects on impact on student learning
	8.2 Professional Learning	Uses resources available to advance professional learning

New Teacher Feedback and Evaluation Forms

YEAR 1	First Month of the School Year _____	Academic Year _____ - _____	
Teacher: _____		Subject/Grade Level: _____	
Standard 1.2 Engaging in Content			
<i>Description: The mentee identifies and uses engagement strategies to keep students interested and engaged in the content</i>			
Reflection: _____			
Standard 2.1 Student Development (see also 2.6)			
<i>Description: The mentee assesses student personalities and abilities in order to design and make instructional decisions based on developmental factors</i>			
Reflection: _____			
Standard 5.1 Classroom Management			
<i>Description: The mentee uses basic classroom management techniques to address misbehavior and avoid disruptions in instruction to keep students generally interested and engaged in their learning</i>			
Reflection: _____			
Standard 5.2 Time, Space, Transitions, and Activities			
<i>Description: The mentee designs routines that support effective management of time, space, transitions and activities</i>			
Reflection: _____			
Standard 6.2 Sensitivity to Student Differences (see also 2.6)			
<i>Description: The mentee exhibits understanding, sensitivity and empathy toward student needs and differences</i>			
Reflection: _____			
Standard 7.1 Use of Assessments			
<i>Description: The mentee demonstrates the use of formal and informal student assessments to address specific learning goals and modifications</i>			
Reflection: _____			
Standard 9.1 – Induction and Collegial Activities			
<i>Description: The mentee meets regularly with their mentor and fully participates in the district/school induction process, documenting support and growth in mentor logs aligned to the state's mentor standards</i>			
Reflection: _____			
_____ Mentee's Signature	_____ Date	_____ Mentor's Signature	_____ Date
<i>Signatures indicate that the mentee and mentor have discussed these areas.</i>			

There is a series of [mentee feedback forms](#). These forms are aligned to the 8 timeframes that occur each year and collectively create the process for gathering baseline data and directing meaningful feedback between the mentee and mentor. Each form specifically lists the quality indicators for the specified timeframe. Each indicator includes a general description referencing the particular knowledge and/or skill to be demonstrated.

There is opportunity provided for reflection on each of the listed indicators. As mentee and mentor talk through the specific indicator and its relevance for what is currently happening in the school year, this area is used to capture potential strengths and areas of confidence as well as potential opportunities for continued growth.

An overall determination on performance uses feedback generated throughout the year on selected indicators, general feedback generated periodically through classroom observations and any other data or information relevant to the new teacher's performance observed or gathered throughout the year.

- Area of Concern – checking this box for a standard results in an improvement plan for this standard meaning that growth in this area is both necessary and required for continued employment
- Growth Opportunity – checking this box for a standard might possibly result in an indicator from this standard being selected in the teacher’s second year as an opportunity for growth and documented in the next year’s Educator Growth Plan
- Meets Expectation – checking this box for a standard indicates that performance in this area meets the expectation of the administrator/district at the present time
- Note: the comment box provided below each standard provides opportunity to offer the rationale for the rating as well as to note exemplary performance in this particular area.

The second page of the Summative Evaluation Form provides an overall rating for the new teacher. This section is completed as follows:

1. Years in Position – determine if this is the first or second year the teacher has been in the current evaluated position (Note: the purpose for “in position” is to allow for reassignment of teachers to different grade levels/positions without adversely affecting performance ratings)
2. Select one of the effectiveness ratings based on the following criteria:
 - a. Ineffective Rating
 - i. Multiple areas of concern across the 9 standards, OR
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - b. Minimally Effective Rating
 - i. 1 area of concern across the 9 standards, OR
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - c. Effective Rating
 - i. No areas of concern across the 9 standards, AND
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - d. Highly Effective Rating
 - i. No areas of concern across the 9 standards, AND
 - ii. An average of the follow-up assessment scores on the selected indicators falls into the indicated range
 - e. Complete the comments section and the recommendation for employment

Timeline for completion of the New Teacher Evaluation Protocol

Educator Improvement Protocol

While the primary purpose of the Educator Growth Plan is to identify and capitalize on growth opportunities, the focus of the Educator Improvement Protocol is on intervention for areas of concern that require immediate attention. Thus, the Educator Improvement Protocol targets very specific standards, indicators, and actions that must be improved within a specific timeline. Accordingly, the Educator Improvement Protocol is not only a collaborative process between teacher and evaluator; it is also one of direction and guidance from the evaluator requiring the achievement of certain outcomes in a timely fashion.

It is important to remember that the Educator Improvement Protocol is a single process within a larger process of evaluation and growth.

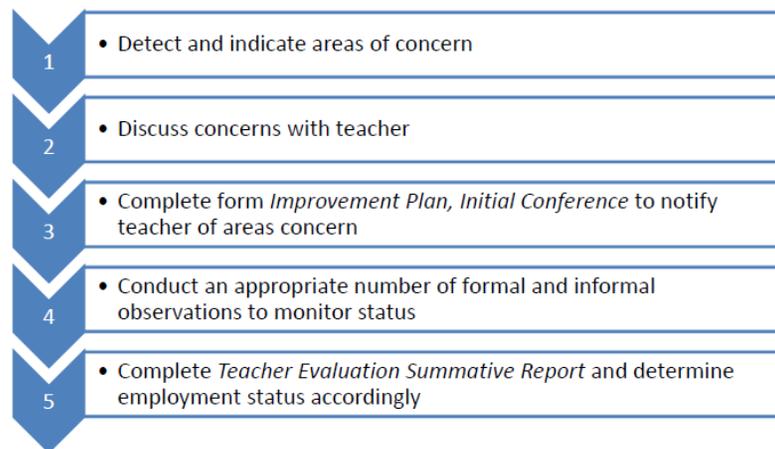

Therefore, the Educator Improvement Protocol should only be followed

after an initial evaluation, either formal or informal, revealing one or more areas of concern. Consequently, the first step of the Educator Improvement Protocol is to detect and indicate any areas of concern. If the evaluator detects any such areas of concern, the next step in the protocol is to complete the form: Educator Improvement Plan, Initial Conference. This form allows the evaluator to note the indicator causing concern as well as the rationale for concern, the improvement target, and the corresponding benchmarks and timelines. The Educator Improvement Plan, Initial Conference form should be completed collaboratively with the teacher and copies should be subsequently shared as documentation of the overall plan and areas of concern.

After collaborative completion of the Educator Improvement Plan, Initial Conference form, the evaluator should conduct the appropriate number of necessary formal and informal observations to monitor the status of the teacher. The Educator Improvement Plan, Follow-up Observation & Conference form should be used to document every formal observation conducted.

Finally, after multiple follow-up observations and conferences, the evaluator should complete the [Summative Evaluation Form](#) to determine the respective teacher's employment status accordingly.

NOTE: For incidents involving blatant violations of board policy and state or federal law, immediate employment action may be taken as prescribed or permitted by law.

Timeline for completion of the Educator Improvement Protocol

Step #	Step 1	Step 2	Step 3	Step 4	Step 5
Action Title	Detect and indicate areas of concern upon evaluation	See page 34: <i>Improvement Plan, Initial Conference</i>	Hold Initial Conference to notify educator of status and plan	Conduct the appropriate number of formal and informal observations to monitor status	Complete Summative Evaluation Form to determine employment status accordingly
Action Description	Formal and/or informal observations should be held throughout the year. If one or more areas of concern are detected, teacher should be placed in the Improvement Protocol	Note standards and indicators causing concern, give rationale, set timeline and improvement target complete with benchmarks and strategies	Explain to teacher rationale for placement in Improvement Protocol, explain improvement target, timeline, benchmarks, and ramifications	Evaluate, observe, and confer with teacher either formally or informally multiple times throughout the Improvement Protocol timeline. Evaluator should document such meetings on the Follow-up Observation & Conference forms to note any improvements, shortcomings, or other general observational data	Use and apply in the same manner described in Step 6 of the general Teacher Evaluation Protocol
Timeline	Detection of areas of concern can occur at any time throughout the year or at any point in a teacher's career	The Initial Conference form should be completed immediately after detection of areas of concern	The Initial Conference should be held immediately after completion of the form	Formal and informal observations and/or conferences should be conducted throughout the remainder of the established timeline for achievement of the improvement target. Such observations and/or conferences should be held in gaps wide enough for the teacher to show improvement, but consistent to accurately monitor progress	The Summative Evaluation Form should be completed at the end of the timeline

*Note: For incidents involving blatant violations of board policy and state or federal law, immediate employment action may be taken as permitted by law.

Educator Improvement Plan forms

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Educator Improvement Plan Initial Conference

Improvement Plan for: _____
Name Date School Subject Academic Year

Identify Indicator: _____
Standard number and name Quality Indicator number and name

Rationale: Describe why improvement on this performance indicator is required

<p>1. IMPROVEMENT TARGET State specifically the improvement required based on the performance indicator referenced above.</p>	<p>2. SPECIFIC STRATEGIES Create a goal statement addressing the IMPROVEMENT TARGET. This goal statement should include essential, measurable qualities.</p>
<p>3. BENCHMARKS AND TIMELINES Describe the specific benchmarks and/or relevant timelines that will demonstrate growth or completion of the improvement target.</p>	<p>4. MEASURES Describe the measures providing evidence that the improvement target has been accomplished or adequately addressed</p>

Initial Evaluation Signature (teacher signature indicates knowledge of the report, not necessarily agreement)

Signature of Teacher/Leader Date Signature of Evaluator Date

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Educator Improvement Plan Follow-up Observation & Conference

Date: _____

NOTES ON PROGRESS

Using the timeline set during the Initial Evaluation, determine progress to date towards achieving each benchmark and accomplishing improvement targets.

Follow-up Meeting Signature (teacher signature indicates knowledge of the report, not necessarily agreement)

Signature of Teacher/Leader Date Signature of Evaluator Date

The Educator Improvement Plan, Initial Conference form (above left) is used to document specific standards and indicators creating areas of concern. After identifying the indicator to be improved upon, the evaluator then expresses a rationale for why improvement is required. Finally, the evaluator sets an improvement target complete with the necessary benchmarks and timeline for achievement of the required outcome.

The Educator Improvement Plan, Follow-up Observation & Conference form (above right) is used for any formal or informal observations or conferences that are conducted throughout the timeline established by the evaluator. At least one formal and one informal evaluation should be held. When using this form, the evaluator can document any meetings to note improvements, shortcomings, or other general observational data.

Collectively, the documents provide the essential framework for improvement, as well as the documentation and protocol necessary to make high-stakes employment decisions. Upon completion of the timeline, evaluators should use the [Summative Evaluation Form](#) to note final outcomes and make ultimate employment decisions.

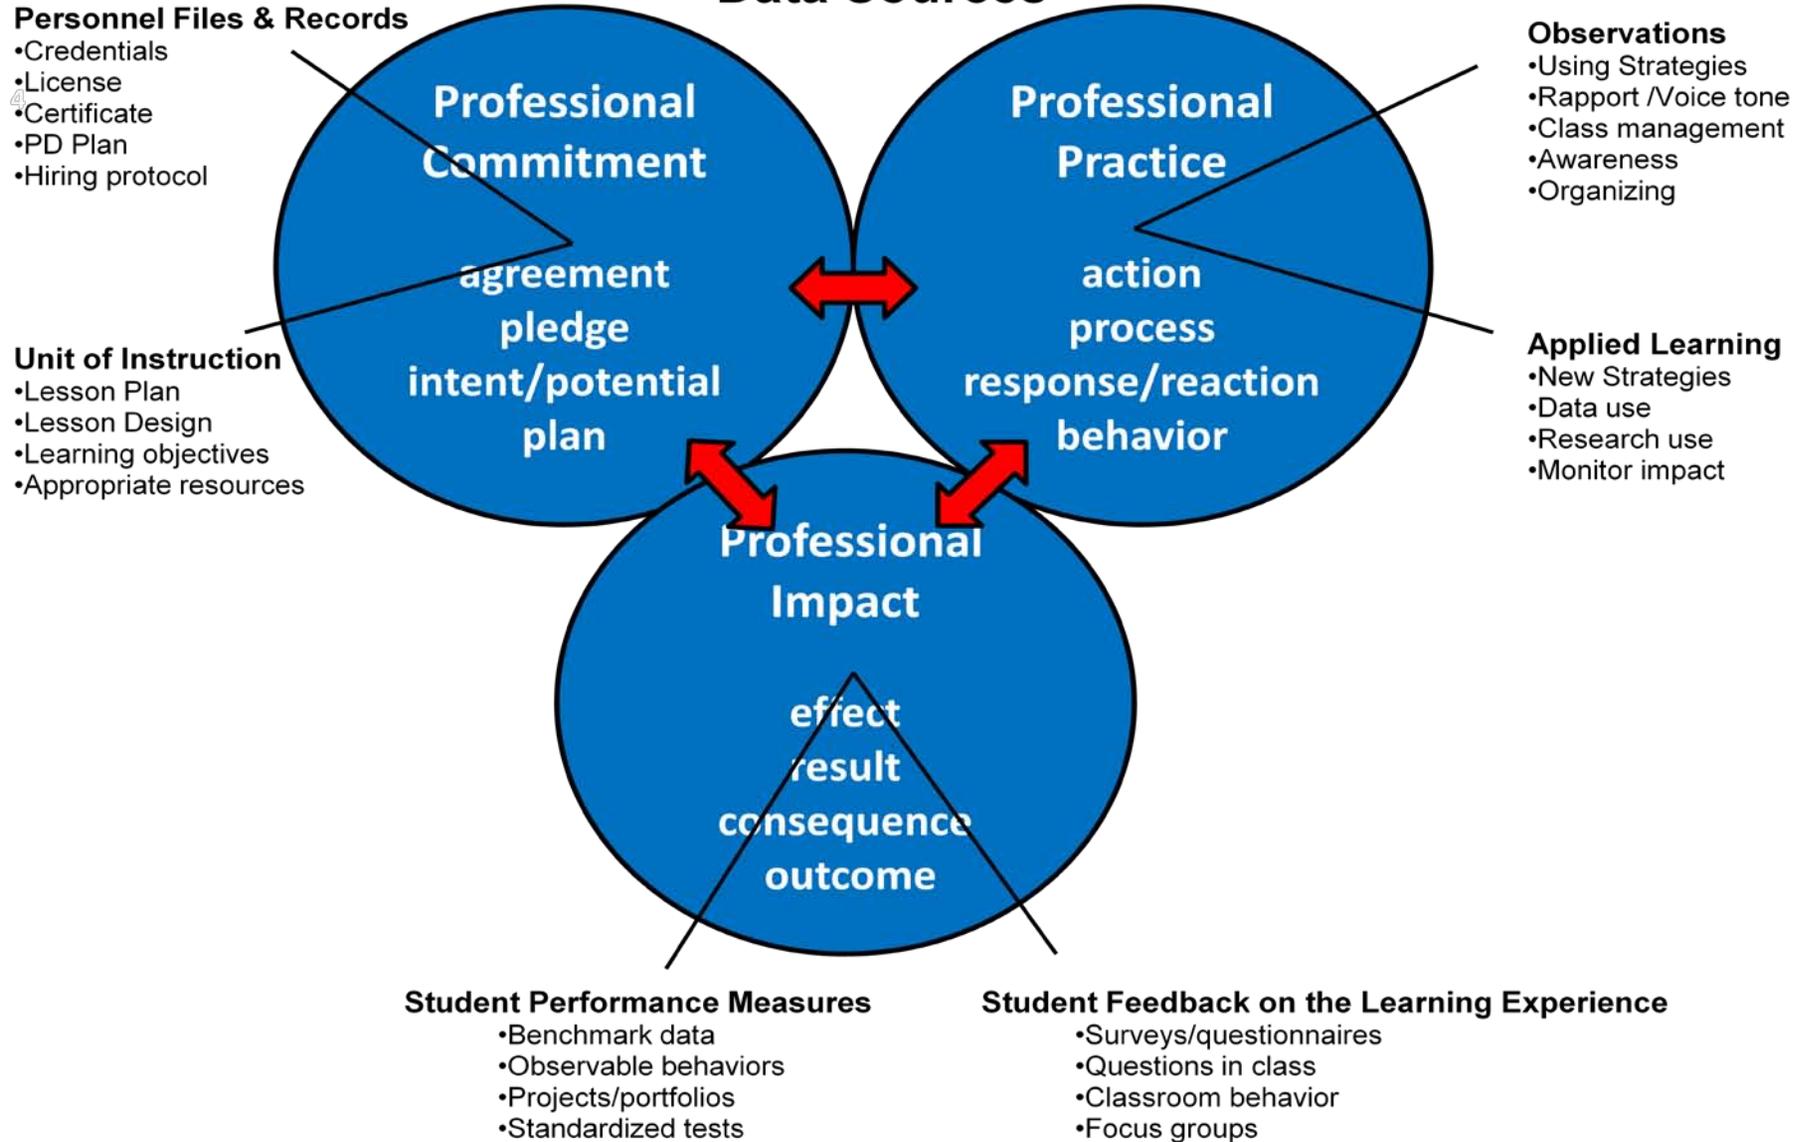

Growth Guide

Professional Frames of the Teacher

Data Sources

Teacher Growth Guide 1.1

Standard 1: Content knowledge aligned with appropriate instruction.

The teacher understands the central concepts, structures, and tools of inquiry of the discipline(s) and creates learning experiences that make these aspects of subject matter meaningful and engaging for students.

Quality Indicator 1: Content knowledge and academic language

Emerging		Developing		Proficient		Distinguished	
1E1) The emerging teacher...		1D1) The developing teacher also...		1P1) The proficient teacher also...		1S1) The distinguished teacher also...	
Knows and can demonstrate breadth and depth of content knowledge and communicates the meaning of academic language.		Delivers accurate content learning experiences using supplemental resources and incorporates academic language into learning activities.		Infuses new information into instructional units and lessons displaying solid knowledge of the important concepts of the discipline.		Has mastery of taught subjects and continually infuses new research-based content knowledge into instruction.	
Professional Frames							
<p>Evidence of Commitment <i>Is well prepared to guide students to a deeper understanding of content</i></p> <p>Evidence of Practice <i>Instruction reflects accuracy of content knowledge</i></p> <p>Evidence of Impact <i>Students are generally familiar with academic language</i></p>		<p>Evidence of Commitment <i>Stays current on new content and incorporates it into lessons</i></p> <p>Evidence of Practice <i>Instruction indicates an appreciation of the complexity and ever evolving nature of the content</i></p> <p>Evidence of Impact <i>Students are able to use academic language</i></p>		<p>Evidence of Commitment <i>Use of supplemental primary sources that are aligned to local standards</i></p> <p>Evidence of Practice <i>Instructional focus is on the most important concepts of the content and includes new content as appropriate</i></p> <p>Evidence of Impact <i>Students accurately use academic language related to their discipline</i></p>		<p>Evidence of Commitment <i>Continually expands knowledge base on content and infuses into content</i></p> <p>Evidence of Practice <i>Continually seeks out new information and applies it to learning in their classroom</i></p> <p>Evidence of Impact <i>Students communicate effectively using academic language from a variety of sources</i></p>	
Score = 0	1	2	3	4	5	6	7

Teacher Growth Guide 1.2

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 2: Student engagement in subject matter

Emerging		Developing		Proficient		Distinguished	
1E2) The emerging teacher...		1D2) The developing teacher also...		1P2) The proficient teacher also...		1S2) The distinguished teacher also...	
Chooses from multiple sources to engage student interest and activity in the content.		Uses a variety of differentiated instructional strategies which purposefully engage students in content.		Uses specific instructional strategies to engage students and advance each individual student's learning as evidenced by student data.		Moves fluidly between differentiated instructional strategies based on the unique learning needs and situations of the students resulting in deeper student knowledge and understanding in the content area.	
Professional Frames							
Evidence of Commitment N/A		Evidence of Commitment N/A		Evidence of Commitment N/A		Evidence of Commitment N/A	
Evidence of Practice <i>Identifies engagement strategies to use to maintain student interest</i>		Evidence of Practice <i>Uses engagement strategies to increase students' levels of interest and activity</i>		Evidence of Practice <i>Instructional strategies use techniques prompting higher levels of engagement confirmed by advances in learning</i>		Evidence of Practice <i>Teacher demonstrates a wide variety of differentiated instructional strategies that directly address student needs.</i>	
Evidence of Impact <i>Students are interested and engaged in the content</i>		Evidence of Impact <i>Students' engagement causes content knowledge to advance</i>		Evidence of Impact <i>Individual student's learning increases and students can articulate why learning activities cause them to learn</i>		Evidence of Impact <i>Students demonstrate deeper content knowledge and understanding</i>	
Score = 0	1	2	3	4	5	6	7

Teacher Growth Guide 1.3

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 3: Disciplinary research and inquiry methodologies

Emerging		Developing		Proficient		Distinguished	
1E3) The emerging teacher...		1D3) The developing teacher also...		1P3) The proficient teacher also...		1S3) The distinguished teacher also...	
Introduces students to various methods of inquiry and research methodologies.		Employs student- inquiry instructional approaches to build capacity for all students on research methodologies.		Develops strategies to engage students in the processes of inquiry and research pertinent to the discipline being taught.		Acquires and shares new knowledge on inquiry and research methodologies that improve student learning.	
Professional Frames							
Evidence of Commitment N / A		Evidence of Commitment N / A		Evidence of Commitment N / A		Evidence of Commitment N / A	
Evidence of Practice <i>Instruction indicates a basic level of understanding about research and inquiry methodologies</i>		Evidence of Practice <i>Accepted methods of research in the content area are identifiable in observations of instructional practice</i>		Evidence of Practice <i>Instruction and classroom facilitation prompt student use of methods of inquiry and standards of evidence used in the discipline</i>		Evidence of Practice <i>Student- inquiry instructional approaches are prominent throughout instruction</i>	
Evidence of Impact <i>Students have a general knowledge of basic inquiry and research strategies</i>		Evidence of Impact <i>Students begin to use basic methods of inquiry/research methodologies</i>		Evidence of Impact <i>Students acquire and critically evaluate information/knowledge on their own and in groups using inquiry methods</i>		Evidence of Impact <i>Students design and conduct research individually and in teams using standards of evidence in the field</i>	
Score = 0	1	2	3	4	5	6	7

Teacher Growth Guide 1.4

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 4: Interdisciplinary instruction

Emerging		Developing		Proficient		Distinguished	
1E4) The emerging teacher...		1D4) The developing teacher also...		1P4) The proficient teacher also...		1S4) The distinguished teacher also...	
Demonstrates the ability to make interdisciplinary content connections during instruction.		Implements meaningful interdisciplinary learning experiences that require students to apply disciplinary knowledge.		Develops and implements interdisciplinary projects that guide students in analyzing the complexities of an issue or question using perspectives from varied disciplines.		Connects current interdisciplinary themes to their discipline(s) and weaves those themes into meaningful learning experiences through collaboration with students, colleagues, and/or real-world partners.	
Professional Frames							
Evidence of Commitment N / A		Evidence of Commitment N / A		Evidence of Commitment N / A		Evidence of Commitment N / A	
Evidence of Practice <i>Connections between various disciplines are logical and add to overall learning</i>		Evidence of Practice <i>Meaningful learning experiences are appropriate to particular content or concepts and contribute to student's overall mastery</i>		Evidence of Practice <i>Lesson activities include interdisciplinary projects prompting students to analyze the complexities of an issue or question</i>		Evidence of Practice <i>Incorporates current interdisciplinary themes into collaborative classroom learning experiences</i>	
Evidence of Impact <i>Students understand the meaning of inter-disciplinary content connections</i>		Evidence of Impact <i>Students apply disciplinary knowledge to real world problems with interdisciplinary themes</i>		Evidence of Impact <i>Students analyze the complexities of an issue or question using perspectives from varied disciplines</i>		Evidence of Impact <i>Students evaluate and synthesize the complexities of an issue or question using perspectives from varied disciplines</i>

Teacher Growth Guide 7.1

Standard 7: Student Assessment and Data Analysis

The teacher understands and uses formative and summative assessment strategies to assess the learner’s progress and uses both classroom and standardized assessment data to plan ongoing instruction. The teacher monitors the performance of each student and devises instruction to enable students to grow and develop, making adequate academic progress.

Quality Indicator 1: Effective use of assessments

Emerging		Developing		Proficient		Distinguished	
7E1) The emerging teacher...		7D1) The developing teacher also...		7P1) The proficient teacher also...		7S1) The distinguished teacher also...	
Demonstrates the use of formal and informal assessments to determine progress towards specific learning goals.		Effectively uses multiple formal and informal student assessments to address specific learning goals, including modifications for students with special needs.		Identifies student’s prior knowledge, progress during instruction and achievement at the end of an instructional unit to demonstrate individual and whole class learning.		Shares knowledge and expertise with others on the effective use of assessments to generate data demonstrating progress toward individual and whole class learning.	
Professional Frames

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Professional Frames of the Teacher

Data Sources

Possible Sources of Evidence

Standard 1: Content knowledge, including varied perspectives, aligned with appropriate instruction.

The teacher understands the central concepts, structures, and tools of inquiry of the discipline(s) and creates learning experiences that make these aspects of subject matter meaningful and engaging for students.

Professional Commitment		
<ul style="list-style-type: none"> • Lesson/unit plan • Learning activities plan • Student learning expectations • Student learning objectives • Lesson design 	<ul style="list-style-type: none"> • Tiered/differentiated lessons/units • Homework assignments and guiding instructions • Flexible grouping plans • Parent/guardian outreach • Bulletin boards 	<ul style="list-style-type: none"> • Research integration plan • Praxis scores • Agenda/meeting notes from grade level/content area team • IEP Conferences/reports
Professional Practice		
<ul style="list-style-type: none"> • Builds student background knowledge utilizing a variety of global perspectives • Uses and facilitates academic language acquisition • Incorporates new research-based content information into instruction • Uses instructional and engagement strategies 	<ul style="list-style-type: none"> • Facilitates student enrichment activities • Uses tiered differentiated learning opportunities • Uses flexible grouping • Draws from multiple content sources • Encourages student responsibility and articulates clear student expectations 	<ul style="list-style-type: none"> • Facilitates student directed learning activities • Engages students in inquiry/research experiences • Implements interdisciplinary learning experiences • Facilitates student action to address relevant real-world issues from a global perspective
Professional Impact		
<ul style="list-style-type: none"> • Observation verification of student mastery • Student work samples • Student portfolios • Student feedback/comments • Student assessment data • Student reflection/journals • IEP Performance/growth reports 	<ul style="list-style-type: none"> • Student discussions/questions • Non-academic records of individual progress (class participation, engagement, motivation, behavior, etc.) • Academic records of individual student progress • Student completion data on homework/projects • Performance assessments 	<ul style="list-style-type: none"> • Data on academic vocabulary use • Structured interviews with students • Student engagement and participation • Student and/or parent survey results • Student products/projects • Parent/community attendance at school functions

Possible Sources of Evidence

Standard 2: Student Learning, Growth and Development

The teacher understands how students learn, develop and differ in their approaches to learning. The teacher provides learning opportunities that are adapted to diverse learners and support the intellectual, social, and personal development of all students.

Professional Commitment			
<ul style="list-style-type: none"> • Student assessment data • Lesson/unit plans • Substitute teacher plan • Bulletin board(s) • Posted behavioral norms/class procedures • Student work/rubric displays 	<ul style="list-style-type: none"> • Structured teacher interviews • Student/parent survey • Research documentation log • Instructional records • Professional growth plans • Personnel file • Flexible grouping plans 	<ul style="list-style-type: none"> • Rubrics/scoring guides • Self reflection • Student inventories - interest, learning style, multiple intelligence, developmental • Observation • Tiered/differentiated lessons/units 	<ul style="list-style-type: none"> • Communications • Educational environment • Agenda - collaborative meeting • IEP conferences/reports • Counselor reports • Professional learning
Professional Practice			
<ul style="list-style-type: none"> • Maintains individual student records and assessment data • Monitors individual student growth • Uses assessment data to make informed instructional and/or assessment decisions • Demonstrates knowledge and understanding of individual student backgrounds'/ demographics/academic growth/learning profiles • Designs and implements student need-based instruction 	<ul style="list-style-type: none"> • Applies learning theories to the design of instruction • Plans and implements culturally responsive lessons • Connects instruction to students' background knowledge and experiences • Facilitates student long- and short-term goal setting • Provides differentiated learning activities • Modifies instruction based on a determined need (i.e. student learning, research, etc.) 	<ul style="list-style-type: none"> • Promotes student cooperative learning and collaboration • Implements research-based instruction • Makes "in the moment" instructional decisions/changes • Provides focused, objective, relevant, valid, specific, and purposeful feedback to students • Creates a safe risk-free learning environment • Demonstrates a respectful regard for each student 	<ul style="list-style-type: none"> • Models and/or shares with colleagues • Assists/Coaches colleagues • Mentors new teachers • Reflects on practice • Uses student/parent surveys to inform educator practice • Communicates respectfully with students, parents, guardians, community members, colleagues, and other school staff • Engages in community activities
Professional Impact			
<ul style="list-style-type: none"> • Observation verification of student mastery • Student work samples • Student planners • Student assessment data 	<ul style="list-style-type: none"> • Student reflection/journals • Student inventories • Student /parent feedback/comments • Student and/or parent survey results 	<ul style="list-style-type: none"> • Structured interviews with students • Student products/projects • Performance assessments 	<ul style="list-style-type: none"> • IEP Performance/growth reports • Non-academic records of individual progress (class participation, engagement, motivation, behavior, etc.) • Academic records of individual student progress

Possible Sources of Evidence

Standard 3: Curriculum Implementation

The teacher recognizes the importance of long-range planning and curriculum development. The teacher develops, implements, and evaluates curriculum based upon student, district and state standards data.

Professional Commitment			
<ul style="list-style-type: none"> • Lesson plans/unit plans • Adjusted lesson/unit plans • Lesson design • Classroom activities 	<ul style="list-style-type: none"> • Planned learning experiences • Curriculum maps • Goals/Expectations/Essential learning outcomes 	<ul style="list-style-type: none"> • Teacher reflections • Professional learning presentations • Homework assignments 	<ul style="list-style-type: none"> • Presentations to colleagues • Peer conversations, discussions, comments, reflections, etc.
Professional Practice			
<ul style="list-style-type: none"> • Makes informed curriculum decisions • Incorporates state and district curriculum into learning activities • Develops curriculum-aligned instructional strategies and interventions • Uses differentiated instructional strategies • Evaluates the effectiveness of instructional strategies 	<ul style="list-style-type: none"> • Adjusts goals, instruction and time based on identified learning gaps • Modifies instructional strategies and content based on learner needs • Implements learning activities focused on the needs of diverse learners • Collects data on diverse learning needs to provide direction for future lessons 	<ul style="list-style-type: none"> • Delivers effective instruction aligned to state and district curriculum standards • Utilizes specific learning activities to address curriculum objectives • Integrates resources that enhance instruction and support diverse learners 	<ul style="list-style-type: none"> • Uses data to evaluate the effectiveness of instructional strategies • Models and shares with colleagues (formally and informally) • Serves on curricular review committees • Assists/Coaches colleagues
Professional Impact			
<ul style="list-style-type: none"> • Student/Parent feedback • Student/Parent survey perceptual data results 	<ul style="list-style-type: none"> • Student journals/reflections • Student structured interviews 	<ul style="list-style-type: none"> • Student- lead parent conferences • Student tracked record of individual progress 	<ul style="list-style-type: none"> • Observation/examples of student learning needs being met

Possible Sources of Evidence

Standard 4: Critical Thinking

The teacher uses a variety of instructional strategies to encourage students' critical thinking, problem solving, and performance skills including technological resources.

Professional Commitment			
<ul style="list-style-type: none"> • Lesson plans/unit plans • Lesson design 	<ul style="list-style-type: none"> • Planned resource list including technology resources • Instructional strategies list 	<ul style="list-style-type: none"> • Planned Cooperative learning strategies (list) • Plans for projects and activities 	<ul style="list-style-type: none"> • Student learning expectations • Flexible grouping plans • Professional reading/research documentation
Professional Practice			
<ul style="list-style-type: none"> • Selects and utilizes developmentally appropriate instructional resources including technology • Adapts instructional resources to promote complex thinking and technology skills attainment • Selects instructional strategies that promote critical thinking skills and are aligned to instructional goals. 	<ul style="list-style-type: none"> • Implements learning activities focused on higher order thinking and problem-solving skills • Utilizes cooperative learning strategies that promote collaborative learning • Utilizes class debates and other methods requiring students to defend their thinking and solutions • Uses independent, collaborative and whole-class learning situations 	<ul style="list-style-type: none"> • Uses effective questioning techniques to expand student critical thinking skills, to consider multiple solutions, and defend their own thinking. • Designs open-ended projects/activities promoting complex thinking and technology skills including multiple solutions and innovations 	<ul style="list-style-type: none"> • Provides frequent opportunities for students to use critical thinking and problem solving • Uses advanced instructional techniques to create a high level of student achievement • Overall effectiveness is enhanced through the use of instructional resources and technology • Serves as a resource providing collegial support and modeling
Professional Impact			
<ul style="list-style-type: none"> • Student work/projects • Observation of student participation in collaborative learning activities • Observation/examples of student directed inquiry and problem • Performance assessments data 	<ul style="list-style-type: none"> • Technology literacy inventories • Student assessment data • Student questions/discussions (higher level questions) • Student presentations/research/reports • Student application/use of technology tools - demonstrations, projects, products, etc. 	<ul style="list-style-type: none"> • Student feedback/comments • Student reflection/journals • Student structured interviews • Anecdotal data and formative evaluations • Students products/projects showing application of learning documenting the ability to in analyze, synthesize, interpret and create original products 	<ul style="list-style-type: none"> • Non-instructional records of individual student progress (participation, engagement, motivation, behavior, etc.) • Demonstration/examples that students are able to explain their reasoning • Observations or examples of students ability to pose and answer own questions pursuant to learning objectives

Possible Sources of Evidence

Standard 5: Positive Classroom Environment

The teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages active engagement in learning, positive social interaction, and self-motivation.

Professional Commitment			
<ul style="list-style-type: none"> • Posted classroom procedures/routines <ul style="list-style-type: none"> • Classroom norms • Parent/community outreach 			
Professional Practice			
<ul style="list-style-type: none"> • Designs classroom routines and procedures • Communicates classroom routines, procedures, and expectations for behavior to parents/guardians • Uses motivation and engagement strategies in the classroom • Organizes classroom and routines with regard to management of time, space, transitions and activities 	<ul style="list-style-type: none"> • Maintains student engagement by managing time, space, transitions and activities • Self-reflects on the effectiveness of motivation and engagement strategies • Uses effective classroom management techniques preserving instructional time • Engages in practices to learn the culture of the school and community 	<ul style="list-style-type: none"> • Work with students and parents to build a positive, supportive classroom culture • Engages in ongoing assessment of how the classroom environment is impacted by the culture of the school and community • Adapts strategies to address unique student behaviors • Attends community and school events 	<ul style="list-style-type: none"> • Gathers and implements new research-based strategies for positively managing student behavior • Engages students in strategies to think about and provide input into building positive relationships and culture • Models, coaches, or shares with colleagues strategies to address student behavior
Professional Impact			
<ul style="list-style-type: none"> • Observation/examples of Student feedback/comments • Students respond to teacher prompts (observable) • Student to student and student to teacher interactions are positive (observable verbal and non-verbal cues) • Classroom discipline/incident report analysis trend data 	<ul style="list-style-type: none"> • Parent/community outreach and engagement summary • Completed homework/projects trend data • Student reflections/journal data • Students/parents survey summary data • Students quickly respond to the teacher's cues and prompts 	<ul style="list-style-type: none"> • Students maintain high levels of engagement • Students understand expectations and automatically follow the procedures, routines, and norms-- self directed • Non-instructional records of individual student progress (participation, engagement, motivation, behavior, etc.) 	<ul style="list-style-type: none"> • Students participate in forming the classroom environment • Staff survey • Attendance data • IEP reports

Possible Sources of Evidence

Standard 6: Effective Communication

The teacher models effective verbal, nonverbal, and media communication techniques with students, colleagues and parents to foster active inquiry, collaboration, and supportive interaction in the classroom.

Professional Commitment			
<ul style="list-style-type: none"> • Posted communications - bulletin boards, norms, routines, procedures, etc. • Parent/community outreach materials • Lesson plans/activities 	<ul style="list-style-type: none"> • Email, newsletters, memos, websites, announcements, reports, etc. • Student assignments/Instructions 	<ul style="list-style-type: none"> • Strategies for ELL Students • Samples of effective communication 	<ul style="list-style-type: none"> • Grade level/content area team meeting notes and agendas • Professional development presentations and materials
Professional Practice			
<ul style="list-style-type: none"> • Uses correct grammar in classroom communication and materials • Promotes sensitivity to cultural, gender, intellectual, physical and emotional differences in communication • Uses technology and media communication tools to engage students • Facilitates positive and correct student communication 	<ul style="list-style-type: none"> • Uses a variety of different strategies to enhance student literacy skills • Provides many opportunities for students to practice effective communication • Extends communication opportunities for students outside of the classroom • Provides focused, objective, relevant, specific and purposeful feedback to students 	<ul style="list-style-type: none"> • Uses strategies to assess the impact of their communication • Communicates effectively with students, families, colleagues and others • Enhances student literacy skills with impact beyond the classroom • Facilitates student use of technology and media communication tools 	<ul style="list-style-type: none"> • Assists other colleagues with effective, correct communication • Models and shares technology and media communication tools to enhance student learning • Serves as a resource for building student literacy skills
Professional Impact			
<ul style="list-style-type: none"> • Student activities • Performance assessments • Student feedback/comments • Student reflection/journals • Formative assessment data 	<ul style="list-style-type: none"> • Student work samples, portfolios, writing, etc. show correct communication • Student expression (observation) • Student self-assessment (observation or student work) 	<ul style="list-style-type: none"> • Student data • Student discussions • Students selection and use of technology and media (observation, demonstration, or work sample) 	<ul style="list-style-type: none"> • Non-instructional records of individual student progress • Peer assistance data • Antidotal data of student expression • Staff survey

Possible Sources of Evidence

Standard 7: Student Assessment and Data Analysis

The teacher understands and uses formative and summative assessment strategies to assess the learner’s progress, uses assessment data to plan ongoing instruction, monitors the performance of each student and devises instruction to enable students to grow and develop.

Professional Commitment			
<ul style="list-style-type: none"> • Unit instructional plan including assessment • Tiered/differentiated lesson designs • Tiered/differentiated assessments • Lessons/units amended based on data analysis (examples of both) 	<ul style="list-style-type: none"> • Example of analysis of student learning needs • Formal/information assessments • Instructional/assessment record management system • Scoring guides/rubrics • Student progress reports 	<ul style="list-style-type: none"> • Examples of communication/feedback to students about their work/progress • Communication logs to parents/guardians • Sample parent response sheets • Parent/guardian communication examples 	<ul style="list-style-type: none"> • Presentation materials • Professional development attendance record/sign-in sheet • Mentor log • Grade level/content area meeting notes and agenda • Building/district professional learning community log/agenda
Professional Practice			
<ul style="list-style-type: none"> • Uses a variety of formal/informal methods of assessment • Utilizes individual student assessment data to plan differentiated learning activities • Maintains a comprehensive instructional/assessment system charting individual student growth and performance 	<ul style="list-style-type: none"> • Designs, develops, and/or utilizes pre and post tests to identify prior knowledge and chart progress • Reviews student trend data • Communicates clearly to students the learning goals (rubrics/scoring guides) 	<ul style="list-style-type: none"> • Utilizes observation data to modify instruction and monitor impact • Communicates student progress to parents/guardians using performance and behavior data • Assists students in charting their own progress and goal setting 	<ul style="list-style-type: none"> • Adjusts instruction to maximize student learning • Shares knowledge and expertise with colleagues • Models effective assessment practices to enhance individual and class achievement • Participates in data team training or works with mentor on data analysis
Professional Impact			
<ul style="list-style-type: none"> • Samples of student directed goal statements • Samples of pre- and post assessments • Assessment data guides decisions about specific learning goals • Data information and assessment results 	<ul style="list-style-type: none"> • Samples of progress reports using concrete student data • Evidence of changed practice • Instructional records of individual student progress • Samples of students charting their own progress 	<ul style="list-style-type: none"> • Student work samples: projects, products, presentations, etc. • Running Records or Running Charts • Feedback from colleagues • Feedback from parents/guardians • Professional growth plan 	<ul style="list-style-type: none"> • Evidence of individual student growth/performance • Parent-teacher conference participation • Behavioral referral data • RTI, IEP, or 504 plan conference participation

Possible Sources of Evidence

Standard 8: Professionalism

The teacher is a reflective practitioner who continually assesses the effects of choices and actions on others. The teacher actively seeks out opportunities to grow professionally in order to improve learning for all students.

Professional Commitment			
<ul style="list-style-type: none"> • Lesson planning • Evaluation data • Professional development request list • Mentor log/agenda/notes • List of resources • Posted procedures/policies • Professional growth plan 	<ul style="list-style-type: none"> • New student activities • Behavior management plans and lesson plans • Attendance data, classroom rules, etc. • Coaching/Modeling log • Presentation artifacts – agenda, hand outs, video 	<ul style="list-style-type: none"> • Building/District committee Participation - preparation and documentation (professional development, PLC, etc.) • Professional Membership and /or committee leadership (documentation) • Professional development attendance log/artifacts 	<ul style="list-style-type: none"> • Regional or State Committee participation (documentation) • Meeting log, agenda, and notes supporting participation on data team, grade-level, vertical team or other • Reflective journal
Professional Practice			
<ul style="list-style-type: none"> • Demonstrates the capacity to reflect on and improve their own practice • Uses new learning to positively benefit student learning • Shares new knowledge and expertise with colleagues • Actively pursues professional development and learning opportunities 	<ul style="list-style-type: none"> • Creates, evaluates, and procures resources for professional development • Builds expertise and experience to assume different instructional or leadership roles • Collaborates with colleagues on a wide range of tasks and committees 	<ul style="list-style-type: none"> • Participates in school-wide decision making • Serves as an active member on the school improvement planning committee • Participates or chairs the Professional Development Committee 	<ul style="list-style-type: none"> • Serves as a mentor, model or coach for colleagues • Maintains all required documentation • Follows school and district policies and procedures

Possible Sources of Evidence

Standard 9: Professional Collaboration

The teacher has effective working relationships with students, parents, school colleagues, and community members.

Professional Commitment			
<ul style="list-style-type: none"> • Mentor log • Vision, mission and goals posted or accessible • Professional Growth Plan • School services and needs • Professional learning log (PD, research, journal articles, etc.) • Newsletters • Parent/Community activities planned 	<ul style="list-style-type: none"> • Professional Development Committee member or Chair - documentation of participation • Participates in professional learning community structure and meetings (meeting/ attendance log; meeting notes; documented discussions/recommendations) • Student activity sponsor log • Parent/community contact log 	<ul style="list-style-type: none"> • Attendance at school-wide functions (concerts, plans, family reading nights, sports events, etc.) - log • Mentor training log • Reflective journal • Documented strategies for parent/community outreach • Example student, parent, colleague, and community surveys 	<ul style="list-style-type: none"> • Documentation of leadership roles • Various meetings - notes and agendas • Documented recommendations or changes • Participate in parent conferences, parent-teacher organizations, etc. (log or documentation)
Professional Practice			
<ul style="list-style-type: none"> • Builds relationships with colleagues • Participates as a member of the professional learning community within the school • Assists with assessing the progress or revising the mission, vision and goals • Advocates for changes that support student learning and well-being 	<ul style="list-style-type: none"> • Participates in school-wide activities and events (parent conferences, parent teacher org, etc.) • Serves as a mentor for colleagues • Implements and evaluates partnership strategies • Sponsors student activities • Creates school-community partnerships 	<ul style="list-style-type: none"> • Welcomes and encourages family/community classroom participation and support. • Collaborates with families to support student learning and development. • Engages in two-way culturally appropriate communication with families and communities • Serves as the point-of-contact or school-based resource in developing partnerships 	<ul style="list-style-type: none"> • Mentors and models strategies for outreach • Shares new information and learning with colleagues • Conducts meetings and learning sessions for parents /community • Provides opportunities for parents/community members to participate in classroom activities

Sample Parent Survey Questions (for teacher)

1. My child's teacher has fair routines, procedures and rules.
 - Rarely
 - Sometimes
 - Usually
 - Always

2. My child's teacher creates a good environment for learning.
 - Rarely
 - Sometimes
 - Usually
 - Always

3. My child's teacher requires hard work.
 - Rarely
 - Sometimes
 - Usually
 - Always

4. My child's teacher provides help with things my child does not understand.
 - Rarely
 - Sometimes
 - Usually
 - Always

5. My child's teacher knows when my child works hard and does good work.
 - Rarely
 - Sometimes
 - Usually
 - Always

6. My child's teacher engages my child in class activities.
 - Rarely
 - Sometimes
 - Usually
 - Always

7. My child's teacher is fair when grading work.
 - Rarely
 - Sometimes
 - Usually
 - Always

8. My child's teacher regularly gives feedback on work.

- Rarely
- Sometimes
- Usually
- Always

9. My child's teacher is able to meet the particular learning needs of my child.

- Rarely
- Sometimes
- Usually
- Always

10. My child's teacher has high expectations.

- Rarely
- Sometimes
- Usually
- Always

Sample Survey Question Alignment

Survey Question	Teacher Standards
1. My child's teacher has fair routines, procedures and rules.	(5.1) (5.2) (5.3)
2. My child's teacher creates a good environment for learning.	(2.1) (2.3) (4.3) (5.3) (6.2) (7.6) (9.2)
3. My child's teacher requires hard work.	(1.1) (3.3) (4.1) (6.4)
4. My child's teacher provides help with things my child does not understand.	(2.1) (2.5)
5. My child's teacher knows when my child works hard and does good work.	(2.2) (5.3) (7.1) (7.2) (7.5)
6. My child's teacher engages my child in class activities.	(1.2) (1.3)
7. My child's teacher is fair when grading work.	(2.3) (7.1) 7.2)
8. My child's teacher regularly gives feedback on work.	(2.2) (6.1) (7.3) (7.5)
9. My child's teacher is able to meet the particular learning needs of my child.	(2.1) (2.3) (2.4) (2.5) (2.6) (3.2) (7.4) (9.2)
10. My child's teacher has high expectations.	(2.2) (5.2) (6.3) (7.3)

Key: Standard 1, Quality Indicator 1 = (1.1)

Growth Plan

Educator Growth Plan

(Based on the Data Team Process Model)

Professional Growth Plan for _____
Name
Date
School
Subject
Academic Year

Identify Indicator: _____
Standard Number and Name
Quality Indicator Number and Name

Briefly describe why this indicator was selected
 (Include whether this indicator aligns to a CSIP
 and/or BIP improvement goal)

<p>1. FOCUS <i>Based on evidence generated from the growth guide, determine strengths and a key opportunity for growth. This opportunity for growth then becomes the priority – the FOCUS – for your growth plan.</i></p>	<p>2. GOAL <i>Create a goal statement addressing the FOCUS. This goal statement should include these essential qualities: specific, measureable, achievable, relevant, and timely. What will be the result indicators?</i></p>
<p>3. STRATEGY <i>Describe the specific strategy(ies) to be implemented that will address the goal statement. This strategy should provide the best plan for effectively addressing the FOCUS and include clear action steps and timeline.</i></p>	<p>4. RESULTS <i>What was the outcome of the strategy? Based on progress monitoring, provide the data that supports that the outcome of the strategy has effectively addressed the FOCUS.</i></p>

Professional Growth Plan for _____
Name
Date
School
Subject
Academic Year

Identify Indicator: _____
Standard Number and Name
Quality Indicator Number and Name

Briefly describe why this indicator was selected
 (Include whether this indicator aligns to a CSIP
 and/or BIP improvement goal)

<p>1. PLAN: State the professional learning goal or objective. <i>Is driven by an opportunity for growth as identified from the growth guide and include <u>when</u> and <u>how</u> the results will be measured, e.g., "To accomplish the identified professional growth target, _____ will implement differentiated instructional strategies as measured by..."</i></p>	<p>2. DO: What processes or strategies will be used to accomplish the goal? How will the strategies be measured? <i>Think of this as an improvement theory that identifies the expected outcomes, i.e., if the educator does x, y, and z, then the stated PL objective will be accomplished.</i></p>
<p>3. STUDY: What do the data tell us? What do the data not tell us? <i>Does the data indicate that the opportunity for growth has been addressed? Has the professional growth target been met?</i></p>	<p>4. ACT: How will positive results be sustained? <i>How might the growth that has been achieved be sustained? What impact has occurred as a result of this growth?</i></p>

Summative Evaluation Form

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Teacher Evaluation Summative Report

Date: _____

Teacher: _____

Probationary: _____

Permanent: _____

School: _____

Subject: _____

Academic Year: _____

Standard 1: Content Knowledge Aligned with Appropriate Instruction	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Teacher effectively plans for the delivery of the essential content of the discipline <input type="checkbox"/> Subject matter learning activities are meaningful and engaging for students <input type="checkbox"/> Students demonstrate mastery and application of content			
Standard 1 Comments:			
Standard 2: Student Learning Growth and Development	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Teacher uses theories and student information to design meaningful lessons <input type="checkbox"/> Teacher's instructional strategies use current theories of growth and development <input type="checkbox"/> Students' level of growth and development is the foundation for new learning			
Standard 2 Comments:			
Standard 3: Curriculum Implementation	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Teacher designs lessons aligned with state (Common Core) and district standards <input type="checkbox"/> Teacher facilitates student learning based on state and district standards <input type="checkbox"/> Students master essential learning objectives based on state and district standards			
Standard 3 Comments:			
Standard 4: Critical Thinking	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Teacher lesson design and use of instructional resources promotes critical thinking <input type="checkbox"/> Teacher's instructional strategies promote critical thinking and problem-solving <input type="checkbox"/> Students demonstrate their ability to think critically and problem-solve			
Standard 4 Comments:			
Standard 5: Positive Classroom Environment	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> The rules, routines and structures create an environment conducive to learning <input type="checkbox"/> Teacher's strategies create a positive classroom environment conducive to learning <input type="checkbox"/> Students are self-directed, exhibit positive relationships and are engaged in learning			
Standard 5 Comments:			
Standard 6: Effective Communication	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Non-verbal communication (written/electronic) is effective, correct and appropriate <input type="checkbox"/> Teacher demonstrates correct and appropriate communication <input type="checkbox"/> Students exhibit correct and appropriate communication			
Standard 6 Comments:			
Standard 7: Student Assessment and Data Analysis	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Maintains accurate data on each student's progress based on multiple data points <input type="checkbox"/> Teacher effectively collects and uses student data to inform and improve instruction <input type="checkbox"/> Students are knowledgeable of their own progress and plan personal learning goals			
Standard 7 Comments:			

Standard 8: Self-Assessment and Improvement	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Maintains a professional growth to document the application of new knowledge and skills <input type="checkbox"/> Teacher engages in professional learning to improve practice and increase student learning <input type="checkbox"/> Teacher follows district policies and procedures regarding ethical practices & responsibilities <input type="checkbox"/> Teacher maintains positive relationships with students, staff, parents, patrons, administrators, and supervisors.			
Standard 8 Comments:			
Standard 9: Professional Collaboration	**Area of Concern	*Growth Opportunity	Meets Expectation
<input type="checkbox"/> Teacher engages with colleagues to promote the district/school vision, mission and goals <input type="checkbox"/> Teacher works collaboratively regarding improvements in student learning and well-being			
Standard 9 Comments:			

*A "Growth Opportunity" rating on a standard results in a Growth Plan for that area.

**An "Area of Concern" rating on a standard results in an Improvement Plan for that area.

Growth Opportunities

Academic Year: _____

Indicator and Rationale	Baseline Assessment	Goal (Target related to selected indicator)	Results (Outcome of implemented strategies)	Follow-Up Assessment
#1	Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2			Emerging (0-2) <input type="checkbox"/> 0 <input type="checkbox"/> 1 <input type="checkbox"/> 2

_____ is rated as _____ for the _____ school year.
Teacher's Name *Effectiveness Rating*

Overall Comments:

Recommend for Re-Employment

- Develop a new or revised growth plan based on new indicators or a continuation of the same indicators.
- Develop an improvement plan linked to indicators. This must include specific target dates and timelines that must be met in order for re-employment to continue.

Do Not Recommend for Re-Employment

New Teacher Feedback Forms

MISSOURI'S EDUCATOR EVALUATION SYSTEM

YEAR 1

Prior to the Beginning of the School Year

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.1 – Content Knowledge

Description: The mentee prepares lessons to guide students to a deeper understanding of content through planned instruction that reflects an accuracy of content knowledge

Reflection:

Standard 2.3 – Theory of Learning

Description: The mentee’s planned learning activities are designed based on foundational and current learning theories and consistent with best-practice

Reflection:

Standard 3.1 – Implementing the Curriculum

Description: The mentee designs learning experiences appropriate for district curriculum and assessments

Reflection:

Standard 4.2 – Instructional Resources

Description: The mentee’s lesson design includes the use of instructional resources and the appropriate use of technology

Reflection:

Standard 6.1 – Verbal and Non-Verbal Communication

Description: The mentee demonstrates effective verbal communication skills as well as non-verbal communication (written, posted, electronic, etc.)

Reflection:

Standard 8.3 – Professional Responsibilities

Description: The mentee understands school procedures and policies and adheres to all current school procedures and district policies as stated in the district’s / school’s code of conduct

Reflection:

Standard 9.1 – Induction and Collegial Activities

Description: The mentee meets regularly with their mentor and fully participates in the district/school induction process, documenting support and growth in mentor logs aligned to the state’s mentor standards

Reflection:

Mentee’s Signature

Date

Mentor’s Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

First Month of the School Year

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.2 Engaging in Content

Description: The mentee identifies and uses engagement strategies to keep students interested and engaged in the content

Reflection:

Standard 2.1 Student Development (see also 2.6)

Description: The mentee assesses student personalities and abilities in order to design and make instructional decisions based on developmental factors

Reflection:

Standard 5.1 Classroom Management

Description: The mentee uses basic classroom management techniques to address misbehavior and avoid disruptions in instruction to keep students generally interested and engaged in their learning

Reflection:

Standard 5.2 Time, Space, Transitions, and Activities

Description: The mentee designs routines that support effective management of time, space, transitions and activities

Reflection:

Standard 6.2 Sensitivity to Student Differences (see also 2.6)

Description: The mentee exhibits understanding, sensitivity and empathy toward student needs and differences

Reflection:

Standard 7.1 Use of Assessments

Description: The mentee demonstrates the use of formal and informal student assessments to address specific learning goals and modifications

Reflection:

Standard 9.1 – Induction and Collegial Activities

Description: The mentee meets regularly with their mentor and fully participates in the district/school induction process, documenting support and growth in mentor logs aligned to the state's mentor standards

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

2nd – 3rd Months of the School Year (Quarter 1)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 2.2 Student Goals

Description: The mentee establishes classroom routines and procedures that highlight student responsibility based on clear expectations

Reflection:

Standard 4.1 Critical Thinking Strategies

Description: The mentee demonstrates the use of various types of instructional strategies and appropriate resources resulting in student engagement in active learning to develop critical thinking and problem solving skills

Reflection:

Standard 4.3 Cooperative, Small Group and Independent Learning

Description: The mentee effectively manages students and learning activities in both individual and collaborative situations

Reflection:

Standard 5.2 Time, Space, Transitions, and Activities

Description: The mentee designs routines that support effective management of time, space, transitions and activities

Reflection:

Standard 7.3 Student-Led Assessments

Description: The mentee orientates students to various formats of assessment connecting each to particular types of knowledge/skills

Reflection:

Standard 7.5 Communicates Student Progress

Description: The mentee maintains confidential records of student work and performance that are in order, organized and current

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

4th – 5th Month of School (Quarter 2)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.5 Diverse Social and Cultural Perspectives

Description: The mentee identifies areas of potential bias in their lesson design and demonstrates the importance and appreciation of a variety of perspectives

Reflection:

Standard 2.4 Differentiated Lesson Design (see also 3.3)

Description: The mentee can articulate important characteristics and needs of their students as they apply to learning and designs lessons and activities based on these needs

Reflection:

Standard 3.2 Lessons for Diverse Learners

Description: The mentee uses learning activities that recognize individual needs of diverse learners and variations in learning styles and performance

Reflection:

Standard 6.1 Verbal and Non-Verbal Communication

Description: The mentee demonstrates effective and correct verbal and non-verbal communication

Reflection:

Standard 7.2 Assessment Data to Improve Learning

Description: The mentee collects data information and assessment results for instructional planning and decision-making

Reflection:

Standard 7.5 Communicates Student Progress

Description: The mentee maintains confidential records of student work and performance that are in order, organized and current

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

6th Month of School (Mid-Year)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 2.5 Use of Student's Prior Experience

Description: The mentee plans and uses various assessment strategies to determine individual experiences, intelligences, strengths and needs

Reflection:

Standard 5.2 Time, Space, Transitions, and Activities

Description: The mentee adjusts routines as needed to support effective management of time, space, transitions and activities

Reflection:

Standard 7.4 Effects of Instruction

Description: The mentee uses collects information through observation of classroom interactions, higher order questioning, and analysis of student work and uses information to adjust class instruction to impact learning

Reflection:

Standard 7.6 Collaborative Data Analysis

Description: The mentee maintains data analysis information and participates in data team training or works with a mentor and/or colleagues on data analysis

Reflection:

Standard 8.1 Self-Assessment and Improvement

Description: The mentee engages in self-assessment, reflection and problem-solving to enhance the impact on student learning

Reflection:

Standard 9.2 Collaborating to Meet Student Needs

Description: The mentee works collaboratively with colleagues to build relationships to more fully understand services and support needs in the school

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

7th – 8th Month of School (Quarter 3)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.2 Engaging in Content

Description: The mentee monitors and adjusts instructional strategies to maintain student engagement and interest

Reflection:

Standard 2.2 Student Goals

Description: The mentee uses classroom routines and procedures to promote student responsibility in setting clear personal goals and monitoring progress

Reflection:

Standard 4.3 Cooperative, Small Group and Independent Learning

Description: The mentee effectively manages students and learning activities in both individual and collaborative situations

Reflection:

Standard 7.2 Assessment Data to Improve Learning

Description: The mentee collects data information and assessment results for instructional planning and decision-making

Reflection:

Standard 7.5 Communicating Student Progress

Description: The mentee maintains confidential records of student work and performance and uses them when communicating student status and progress

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

9th – 10th Month of School (Quarter 4)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 2.5 Use of Student’s Prior Experience

Description: The mentee plans and uses various assessment strategies to determine individual experiences, intelligences, strengths and needs

Reflection:

Standard 7.4 Effects of Instruction

Description: The mentee collects information through observation of classroom interactions, higher order questioning, and analysis of student work and reflects on impact of class instruction on learning

Reflection:

Standard 7.6 Collaborative Data Analysis

Description: The mentee maintains and uses data analysis information, participates in data team training and works with a mentor and/or colleagues on data analysis to benefit student learning

Reflection:

Standard 8.1 Self-Assessment and Improvement

Description: The mentee engages in self-assessment and problem-solving to reflect on their overall impact on student learning and documents appropriately in a professional development plan or growth plan

Reflection:

Standard 9.1 Induction & Collegial Activities

Description: The mentee meets regularly with a mentor to reflect on strengths and growth opportunities for next year and documents appropriately in mentor logs and/or professional development plans

Reflection:

Mentee’s Signature

Date

Mentor’s Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 1

End of School

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 8.1 Self-Assessment and Improvement

Description: The mentee's professional development plan documents self-assessment and reflection strategies used throughout the year and engages in self-assessment and problem-solving to begin planning for next year

Reflection:

Standard 8.2 Professional Learning

Description: The mentee uses mentor as a source of information and becomes aware of available professional learning resources; professional growth plan has been maintained and documents focus and priority areas drawing on the first year and planning for the second year

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

Prior to the Beginning of the School Year

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.1 – Content Knowledge

Description: The mentee prepares lessons to guide students to a deeper understanding of content through planned instruction that reflects an accuracy of content knowledge

Reflection:

Standard 1.3 Disciplinary Research and Inquiry Methodologies

Description: The mentee demonstrates an understanding of research and inquiry methodologies

Reflection:

Standard 3.1 – Implementing the Curriculum

Description: The mentee designs coherent learning objectives and experiences appropriate for district curriculum and assessments

Reflection:

Standard 4.2 – Instructional Resources

Description: The mentee's lesson design includes the use of instructional resources and the appropriate use of technology

Reflection:

Standard 9.1 – Induction and Collegial Activities

Description: The mentee meets regularly with the mentor to plan for the second year

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

First Month of the School Year

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.2 Engaging in Content

Description: The mentee identifies and uses engagement strategies to keep students interested and engaged in the content

Reflection:

Standard 1.4 Interdisciplinary Instruction

Description: The mentee makes connections between various content areas which are logical and add to overall learning resulting in students understand the meaning of inter-disciplinary content connections

Reflection:

Standard 2.6 Language, Culture, Family, Community Values

Description: The mentee collects and reviews demographic and biographical data of students and modifies instructions and learning activities based on particular student characteristics

Reflection:

Standard 5.1 Classroom Management

Description: The mentee uses basic classroom management techniques to address misbehavior and avoid disruptions in instruction to keep students generally interested and engaged in their learning

Reflection:

Standard 5.2 Time, Space, Transitions, and Activities

Description: The mentee designs routines that support effective management of time, space, transitions and activities

Reflection:

Standard 6.4 Technology and Media Communication Tools

Description: The mentee plans for and uses technology and media communication tools to enhance the learning process resulting in students using technology effectively during instructional activities

Reflection:

Standard 7.1 Use of Assessments

Description: The mentee demonstrates the use of formal and informal student assessments to address specific learning goals and modifications

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

2nd – 3rd Months of the School Year (Quarter 1)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 2.2 Student Goals

Description: The mentee establishes classroom routines and procedures that highlight student responsibility based on clear expectations

Reflection:

Standard 4.1 Critical Thinking Strategies

Description: The mentee demonstrates the use of various types of instructional strategies and appropriate resources resulting in student engagement in active learning to develop critical thinking and problem solving skills

Reflection:

Standard 4.3 Cooperative, Small Group and Independent Learning

Description: The mentee effectively manages students and learning activities in both individual and collaborative situations

Reflection:

Standard 5.2 Time, Space, Transitions, and Activities

Description: The mentee designs routines that support effective management of time, space, transitions and activities

Reflection:

Standard 7.3 Student-Led Assessments

Description: The mentee orientates students to various formats of assessment connecting each to particular types of knowledge/skills

Reflection:

Standard 7.5 Communicates Student Progress

Description: The mentee maintains confidential records of student work and performance that are in order, organized and current

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

4th – 5th Month of School (Quarter 2)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 3.2 Lessons for Diverse Learners

Description: The mentee uses learning activities that recognize individual needs of diverse learners and variations in learning styles and performance

Reflection:

Standard 3.3 Instructional Goals and DI Strategies

Description: The mentee assesses lesson plans relative to long and short-term goals to accomplish curriculum standards and delivers instruction demonstrating differentiation strategies

Reflection:

Standard 5.3 Instructional Goals and DI Strategies

Description: The mentee engages in practices to learn the culture of the school and community to create a classroom learning environment structured to build positive student relationships and culture

Reflection:

Standard 7.2 Assessment Data to Improve Learning

Description: The mentee collects data information and assessment results for instructional planning and decision-making

Reflection:

Standard 7.5 Communicates Student Progress

Description: The mentee maintains confidential records of student work and performance that are in order, organized and current

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

6th Month of School (Mid-Year)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 2.5 Use of Student's Prior Experience

Description: The mentee plans and uses various assessment strategies to determine individual experiences, intelligences, strengths and needs

Reflection:

Standard 7.4 Effects of Instruction

Description: The mentee collects information through observation of classroom interactions, higher order questioning, and analysis of student work and uses information to adjust class instruction to impact learning

Reflection:

Standard 7.6 Collaborative Data Analysis

Description: The mentee maintains data analysis information and participates in data team training or works with a mentor and/or colleagues on data analysis

Reflection:

Standard 8.1 Self-Assessment and Improvement

Description: The mentee engages in self-assessment, reflection and problem-solving to enhance the impact on student learning

Reflection:

Standard 9.3 Cooperative Partnerships Supporting Learning

Description: The mentee engages in opportunities to develop relationships with students, families and the community and works to understand concerns and needs regarding student learning and well-being

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

7th – 8th Month of School (Quarter 3)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 1.2 Engaging in Content

Description: The mentee monitors and adjusts instructional strategies to maintain student engagement and interest

Reflection:

Standard 6.3 Speaking, Writing and Other Media

Description: The mentee plans and uses classroom activities which include, where appropriate, learner expression in speaking, writing, listening and the use of other media adhering to district policy

Reflection:

Standard 7.2 Assessment Data to Improve Learning

Description: The mentee collects data information and assessment results for instructional planning and decision-making

Reflection:

Standard 7.5 Communicating Student Progress

Description: The mentee maintains confidential records of student work and performance and uses them when communicating student status and progress

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

9th – 10th Month of School (Quarter 4)

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 7.4 Effects of Instruction

Description: The mentee collects information through observation of classroom interactions, higher order questioning, and analysis of student work and reflects on impact of class instruction on learning

Reflection:

Standard 7.6 Collaborative Data Analysis

Description: The mentee maintains and uses data analysis information, participates in data team training and works with a mentor and/or colleagues on data analysis to benefit student learning

Reflection:

Standard 8.1 Self-Assessment and Improvement

Description: The mentee engages in self-assessment and problem-solving to reflect on their overall impact on student learning and documents appropriately in a professional development plan or growth plan

Reflection:

Standard 9.1 Induction & Collegial Activities

Description: The mentee meets regularly with a mentor to reflect on strengths and growth opportunities for next year and documents appropriately in mentor logs and/or professional development plans

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

YEAR 2

End of the School Year

Academic Year _____ - _____

Teacher: _____

Subject/Grade Level: _____

Standard 8.1 Self-Assessment and Improvement

Description: The mentee's professional development plan documents self-assessment and reflection strategies used throughout the year and engages in self-assessment and problem-solving to begin planning for next year

Reflection:

Standard 8.2 Professional Learning

Description: The mentee uses mentor as a source of information and becomes aware of available professional learning resources; professional growth plan has been maintained and documents focus and priority areas drawing on the first year and planning for the second year

Reflection:

Mentee's Signature

Date

Mentor's Signature

Date

Signatures indicate that the mentee and mentor have discussed these areas.

Summative for New Teachers

MISSOURI'S EDUCATOR EVALUATION SYSTEM

1st & 2nd Year Teacher Evaluation Summative Report

Academic Year _____ -- _____

Teacher: _____ School: _____

<p>Standard 7: Student Assessment and Data Analysis</p>	<p>***Area of Concern</p>	<p>**Growth Opportunity</p>	<p>Meets Expectation</p>
<p><input type="checkbox"/> Maintains accurate data on each student's progress based on multiple data points <input type="checkbox"/> Teacher effectively collects and uses student data to inform and improve instruction <input type="checkbox"/> Students are knowledgeable of their own progress and plan personal learning goals</p>			
<p>*Standard 7 Comments:</p>			

Research and Proven Practices

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Links to Research and Resources

Introduction

Numerous sources and bodies of research informed the development of Missouri's teacher and leader standards, professional continuum, professional frames and the model Educator Evaluation System. Examples of the research and some of the resources are provided. These may serve as a foundational understanding of the Educator Evaluation System, as well as provide further development regarding an understanding of effective evaluation processes.

National Standards

Missouri's teacher standards have been informed by the CCSSO's Interstate Teacher Assessment and Support Consortium (InTASC) standards through a gap analysis conducted by McREL. The National Board for Professional Teaching Standards also informed the development of Missouri's Teacher Standards. The leader standards have been closely aligned to the Educational Leadership Policy Standards: ISLLC 2008.

References and Research

Many bodies of research and theory were used to guide the development of Missouri's standards, professional continuum, and professional frames and the initial version of the model Educator Evaluation System. Some of these with appropriate links are provided.

Mentoring

There are seven Essential Principles of Effective Evaluation. One of the seven addresses the importance of the probationary period. Missouri's Mentor Standards provide guidance in creating successful mentor programs. The Administrator Mentor Program is a DESE sponsored initiative to support new principals, assistant principals, career education directors, special education directors and superintendents.

Links to Research and Resources

Missouri's Standards were informed by and aligned to the following national standards references.

Introduction to the Literature Review of the Missouri Teacher Professional Practice Standards

This review of the literature that supports the Missouri Standards and Quality Indicators was conducted by RMC Research Corporation (<http://www.rmcresearchcorporation.com/>). The review provides a brief summary of high-quality evidence in support of each of the specific performance elements that comprise Missouri's Teacher Standards and Quality Indicators. The review includes summaries of pertinent research, references for those who would like to read more about the actual studies, additional resources, and related research. The review can serve as source of professional development to assist teachers in their focus and growth on particular indicators.

Included in this review are references for the following standards and quality indicators:

Standard 1: Content knowledge aligned with appropriate instruction

- Quality Indicator 1 – Content knowledge and academic language
- Quality Indicator 2 – Student engagement in subject matter
- Quality Indicator 3 – Disciplinary research and inquiry methodologies
- Quality Indicator 4 – Interdisciplinary instruction
- Quality Indicator 5 – Diverse social and cultural perspectives

Standard 2: Student Learning, Growth and Development

- Quality Indicator 1 – Cognitive, social, emotional and physical development
- Quality Indicator 2 – Student goals
- Quality Indicator 3 – Theory of learning
- Quality Indicator 4 – Differentiated lesson design
- Quality Indicator 5 – Prior experiences, multiple intelligences, strengths and needs
- Quality Indicator 6 – Language, culture, family and knowledge of community values

Standard 3: Curriculum Implementation

- Quality Indicator 1 – Implementation of curriculum standards
- Quality Indicator 2 – Lessons for diverse learners
- Quality Indicator 3 – Instructional goals and differentiated instructional strategies

Standard 4: Critical Thinking

- Quality Indicator 1 – Instructional strategies leading to student engagement in problem-solving and critical thinking
- Quality Indicator 2 – Appropriate use of instructional resources to enhance student learning
- Quality Indicator 3 – Cooperative, small group and independent learning

Standard 5: Positive Classroom Environment

- Quality Indicator 1 – Classroom management techniques
- Quality Indicator 2 – Management of time, space, transitions, and activities
- Quality Indicator 3 – Classroom, school and community culture

Standard 6: Effective Communication

- Quality Indicator 1 – Verbal and nonverbal communication
- Quality Indicator 2 – Sensitivity to culture, gender, intellectual and physical differences
- Quality Indicator 3 – Learner expression in speaking, writing and other media
- Quality Indicator 4 – Technology and media communication tools

Standard 7: Student Assessment and Data Analysis

- Quality Indicator 1 – Effective use of assessments
- Quality Indicator 2 – Assessment data to improve learning
- Quality Indicator 3 – Student-led assessment strategies
- Quality Indicator 4 – Effect of instruction on individual/class learning
- Quality Indicator 5 – Communication of student progress and maintaining records
- Quality Indicator 6 – Collaborative data analysis

Standard 8: Professionalism

- Quality Indicator 1 – Self- assessment and improving
- Quality Indicator 2 – Professional learning
- Quality Indicator 3 – Professional rights, responsibilities and ethical practices

Standard 9: Professional Collaboration

- Quality Indicator 1 – Induction and collegial activities
- Quality Indicator 2 – Collaborating to meet student needs
- Quality Indicator 3 – Cooperative partnerships in support of student learning

MO Standard	Evaluative Criteria for Teacher Professional Practice
1.1	<p data-bbox="346 276 1270 308">Teacher delivers content knowledge and increases academic language</p> <p data-bbox="346 332 1890 446">Aligns with <i>InTASC Standard #4: Content Knowledge</i>. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners.</p> <p data-bbox="346 462 1921 771">Several studies have found that deep content-area knowledge, specifically in math, appear to positively impact student achievement (Clotfelter, et al., March 2007, October 2007; Goldhaber & Brewer 1999; Harris & Sass, 2007; Hill, et al., 2005). The National Council for Accreditation of Teacher Education (NCATE, 1996) noted that “many studies confirm that the best teachers have mastered their subjects, understand the learning process, and are experts in a wide range of teaching methods.” Shulman (1987) asserts that effective teachers must understand purpose, subject matter structures, and ideas within and outside the discipline, and understand it in multiple ways. Stevenson and Stigler (1992) suggest that highly qualified teachers have a cognitive command of the subject matter, structure information logically for students, consistently monitor student performance, and provide students with immediate feedback.</p> <p data-bbox="346 812 1932 1039">Danielson (1996, 2006) states that good teachers have a thorough understanding of the curriculum and an understanding of what methods and materials can be used to complement essential concepts. Knowledge of content and pedagogy are appropriately different for teachers of different levels. The balance between content and pedagogy at different levels is critical; i.e. the content of reading does not change but the pedagogy does whereas in an area like science both the content and pedagogy change. Through deep knowledge of content the teacher knows how to transform the instructional design into a sequence of activities and exercises that make it accessible to students.</p> <p data-bbox="346 1079 504 1112"><i>References:</i></p> <p data-bbox="346 1128 1869 1242">Clotfelter, C. New York: Summit Books.</p>
1.2	<p>Teacher engages students in subject matter</p> <p>Aligns with <i>InTASC Standard #4: Content Knowledge</i>. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners.</p> <p>Danielson (1996, 2006) established that content includes not only factual information but all aspects of a subject, including concepts, principles, relationships, methods of inquiry, and outstanding issues. Teachers who know their subjects also know how to ask the right questions and how to handle conceptual development. A teacher's knowledge of content and pedagogy is reflected in an awareness of common student misconceptions and how these should be handled.</p> <p>Research shows that students perform better academically when teachers ask focused questions, provide immediate</p>

feedback, and engage students in discussion and review of content (Bielefeldt, 1990; Brophy & Good, 1986; Evertson & Harris, 1992; Gottfried & Gottfried, 1991; Levine & Lezotte, 1990; Martens & Kelly, 1993; McCarthy, Webb, & Hancock, 1995; Sammons, Hillman, & Mortimore, 1995; Wang, Haertel, & Walberg, 1993-94).

1.3	<p data-bbox="344 196 1159 228">Teacher engages students in methods of inquiry and research</p> <p data-bbox="344 250 1892 363">Aligns with <i>InTASC Standard #8: Instructional Strategies</i>. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to access and appropriately apply information.</p> <p data-bbox="344 386 1944 727">Several studies have found that effective teaching emphasizes the importance of higher-order thinking skills such as inquiry and research (Brophy & Good, 1986; Ellis & Worthington, 1994; McLaughlin & Talbert 1993; Snapp & Glover, 1990; Wenglinsky, 2001). A meta-analysis by Redfield and Rousseau (1981) concluded that the predominant use of higher-level questions during instruction yielded positive gains on tests of both factual recall and application of thinking skills. Hyde and Bizar (1989) found that teachers who value student thinking structure their classrooms to give students time to think, problems that are worthy of thinking about, and other students with whom to think. Several studies cited in <i>Tennessee’s Framework for Evaluation and Professional Growth: Comprehensive Assessment</i> (2009) found that students perform better academically when they have teachers that ask focused questions, provide immediate feedback, and engage students in discussion and review of content.</p> <p data-bbox="344 776 499 808"><i>References:</i></p> <p data-bbox="344 816 1850 881">Brophy, J. ------------	---

1.4	Teacher makes interdisciplinary content connections
	Aligns with InTASC Standard #5: Innovative Applications of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical/creative thinking and collaborative problem solving related to authentic local and global issues.
	<p>Several studies (Black, 1997; Gregson, 1992; Jacobs, 1989; Stemmer, Brown & Smith, 1992) have found that teachers who integrate workplace readiness skills into content area instruction and select workplace problems to illustrate how academic skills are applied in real world settings enable students to relate the learning material back to other courses or workplace applications and increase achievement. Rogers and Freiberg (1994) found that experiential learning that includes self-discovery and real life experiences enhance student achievement. Interdisciplinary/ cross-curricular teaching provides a meaningful way in which students can use knowledge learned in one context as a knowledge base in other contexts in and out of school (Collins, Brown, & Newman, 1990).</p> <p><i>References:</i></p> <p>Black, Susan. (1997, August). Branches of knowledge. <i>The American School Board Journal</i>, 35-37.</p> <p>Collins, A., Brown, J. S., & Newman, S. E. (1989). 1.5	Teacher incorporates global and real world learning activities
	Aligns with <i>InTASC Standard #5: Innovative Applications of Content</i>. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical/creative thinking and collaborative problem solving related to authentic local and global issues.
	<p>Gay (2003, p. 4) states that culturally responsive teachers “validate, facilitate, liberate and empower ethnically diverse students by simultaneously cultivating their cultural integrity, individual abilities, and academic success.” Kemp and Hall (1992) state that such teachers are better prepared to provide a variety of opportunities for students to apply and use knowledge and skills in different learning situations.</p> <p><i>References:</i> Gay, G. (2003). Introduction: Planting seeds to harvest fruits. In G. Gay (Ed.), <i>Becoming multicultural educators: Personal journey toward professional agency</i> (pp. 1–16). San Francisco: Jossey-Bass. Kemp, L., & Hall, A. H. (1992). <i>Impact of effective teaching research on student achievement and teacher performance: Equity and access implications for quality education</i>. Jackson, MS: Jackson State University. (ERIC Document Reproduction Service No. ED 348 360).</p>
2.1	Teacher uses developmental factors and theories to guide instruction
	Aligns with <i>InTASC Standard #8: Instructional Strategies</i>. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to access and appropriately apply information.
	<p>Research points to the fact that aspects of development—neural, cognitive, social, psychological, physical, and ethical have far-reaching effects on children’s ability to learn (Bransford, Brown, & Cocking, 2002; Shonkoff & Phillips, 2000). It is essential that educators know the “typical” patterns of human development in order to understand what to expect of students at different ages (preschool/kindergarten, primary, intermediate, junior high school, and high school)and to plan age-appropriate instruction based on various teaching and instructional models that optimize students’ ability to engage with and learn from the curriculum (Rothstein, 1990).</p> <p><i>References:</i> Bransford, J. D., Brown, A. L., & Cocking, R. (2002). <i>How people learn: Brain, mind, experience, and school</i>. Washington, DC: National Academies Press.</p>

	<p>Rothstein, P. (1990). <i>Educational psychology</i>. New York: McGraw-Hill.</p> <p>Shonkoff, J. P., & Phillips, D. A. (Eds.). (2000). <i>From neurons to neighborhoods: The science of early childhood development</i>. Washington, DC: National Academy Press.</p>
2.2	Teacher encourages student responsibility for their own learning
	Aligns with <i>InTASC Standard #1: Learner Development</i>. The teacher understands how children learn and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
	<p>The research and theoretical base for creating a classroom environment where students take greater responsibility for their learning shows that students achieve at higher levels when they are more self-reliant, self-directed in their learning, are more motivated to learn, and are more efficient in their learning (Hom & Murphy, 1983). Students that better understand their strengths and weaknesses as learners can leverage their strengths in learning situations (Blakey & Spence, 1990).</p> <p><i>References:</i></p> <p>Blakey, E., & Spence, S. (1990). <i>Developing metacognition</i>. Syracuse, NY: ERIC Clearinghouse on Information Resources. [ED327218]</p> <p>Hom, H. L., & Murphy, M. D. (1985). Low need achievers' performance: The positive impact of a self- determined goal. <i>Personality and Social Psychology Bulletin</i>, 11,275-285.</p>
2.3	Teacher applies theories of learning to differentiate instruction
	Aligns with <i>InTASC Standard #2: Learning Differences</i>. The teacher uses understanding of individual differences and diverse communities to ensure inclusive learning environments that allow each learner to reach his/her full potential.
	<p>Danielson (1996) asserts that understanding the developmental context of the subject matter being taught enables teachers to construct instructional goals appropriate to students with particular needs. It also allows them to observe important pattern of development of students within a content area, which is particularly important in the areas of science and math at all levels and literature and social sciences at the high school level. Research validates that the use various instructional methods that form the basis of differentiated instruction, including:</p> <ul style="list-style-type: none"> • Using effective classroom management procedures;

	<ul style="list-style-type: none"> • Promoting student engagement and motivation; • Assessing student readiness; • Responding to learning styles; • Grouping students for instruction; and • Teaching to the student's <i>zone of proximal development</i>. <p>(Allan & Tomlinson, 2000; Ellis & Worthington, 1994; Vygotsky, 1978)</p> <p>Kemp and Hall (1992) found that teachers who adjust the difficulty level of material to student ability have higher rates of achievement in their classes. In a more recent three-year study, scholars found the differentiated instruction consistently yielded positive results across a broad range of targeted groups (McQuarrie, McRae, & Stack-Cutler, 2008).</p> <p><i>References:</i></p> <p>Allan, S. D., & Tomlinson, C. A. (2000). <i>Leadership for differentiating schools and classrooms</i>. Alexandria, VA: Association for Supervision and Curriculum Development.</p> <p>Danielson, C. (1996). <i>Enhancing professional practice: A framework for teaching</i>. Alexandria, VA: Association for Supervision and Curriculum Development.</p> <p>Ellis, E. S., & Worthington, L. A. (1994). <i>Research synthesis on effective teaching principles and the design of quality tools for educators</i> (Technical Report No. 5). Eugene: University of Oregon, National Center to Improve the Tools of Educators.</p> <p>Kemp, L., & Hall, A. H. (1992). <i>Impact of effective teaching research on student achievement and teacher performance: Equity and access implications for quality education</i>. Jackson, MS: Jackson State University. (ERIC Document Reproduction Service No. ED 348 360).</p> <p>McQuarrie, L., McRae, P., & Stack-Cutler, H. (2008). <i>Differentiated instruction provincial research review</i>. Edmonton: Alberta Initiative for School Improvement.</p> <p>Vygotsky, L. S., (1978). <i>Mind in society: The development of higher psychological processes</i>. Cambridge, MA: Harvard University Press.</p>
2.4	<p>Teacher respects and values each student’s learning needs</p> <hr/> <p>Aligns with <i>INTASC Standard #2: Learning Differences</i>. The teacher uses understanding of individual differences and diverse communities to ensure inclusive learning environments that allow each learner to reach his/her full potential.</p> <hr/> <p>The existing differentiated instruction model is rooted in cognitive psychology and is based on research linking student achievement with a teacher’s ability to consistently adjust content to meet the student’s individual learning needs (McTigh</p>

& Brown, 2005; Tieso, 2003; Tomlinson, 1999, 2001, 2003, 2004, 2005). Rock et al. (2008) provides an overview of various studies that document classroom and school-wide changes from traditional classroom instruction to differentiated instruction and the resulting increases in student motivation, engagement and achievement. A research summary by Dunn et. al (2010) describes how students learn and how effective teachers should and could apply the concepts of universal design, differentiated instruction, and embedded learning opportunities into their classrooms.

Several studies (Chatterton 2005; Dono 2004; Levy 2009) found that approximately 30 percent of students learn substantially more when text is accompanied by visual information. Other students learn best through the use of hands-on materials or activities (Fine, 2002) or through the completion of independent tasks (DeBello 1985; Giannitti 1988).

2.5	<p>Teacher designs lessons based on prior experiences, learning styles, multiple intelligences, strengths and needs</p> <p>Aligns with InTASC Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse communities to ensure inclusive learning environments that allow each learner to reach his/her full potential.</p> <p>Danielson (1996, 2007) asserts that excellent teachers carefully monitor their students. Such monitoring provides plenty of information about individual student achievements and challenges, and also provides a great deal of information about the effectiveness, appropriateness, and appeal of the curriculum.</p> <p>An increasing number of teachers are adopting an approach incorporating Gardner’s (1993, 1999) “Multiple Intelligence (MI) theory” which suggests there are a number of types of intelligence rather than just what has been traditionally considered in the measurement of IQ. This often results in improved teaching performance and classrooms that meet the needs of more students. Kaplan and Saccuzzo (2001) further define intelligence as the general potential, independent of prior knowledge.</p> <p>A 2008 study (Burton, Douglas, & Reese-Durham) examined how Multiple Intelligences and Direct Instruction as teaching strategies affect the achievement scores of students enrolled in an eighth grade mathematics class. The results suggested that performance on a post-mathematics assessment for students exposed to MI scored was considerably higher (25.48 points) compared to those taught using Direct Instruction (17.25).</p> <p><i>References:</i></p> <p>Burton, K. S., Douglas, O., & Reese-Durham, N. (2008). The effects of the multiple intelligence teaching strategy on the academic achievement of eighth grade math students. <i>Journal of Instructional Psychology</i>, 35(2), 182+.</p> <p>Danielson, C. 2.6	<p>Teacher designs instruction with considerations for language, culture and family and community values</p> <p>Aligns with <i>InTASC Standard #2: Learning Differences</i>. The teacher uses understanding of individual differences and diverse communities to ensure inclusive learning environments that allow each learner to reach his/her full potential.</p> <p>Several studies have found evidence that instruction should ensure sensitivity to student culture and agree on the need for teachers to have a deep understanding of the subjects they teach so that they can create the multiple representations necessary to address the diversity of prior experiences and understandings present in their classrooms (Au, 1998; Ladson-Billings, 1994; McDiarmid, 1995; Moll, 1998; Ruddell, 1997; Schmidt, 2005).</p> <p>Gay's (2000) work on cultural responsive teaching showed that African, Asian, Latino, and Native American students will perform better on multiple measures of achievement when teaching is filtered through their own cultural experiences and frames of reference. She noted that key components of of culturally responsive teaching include teacher caring, teacher attitudes and expectations, formal and informal multicultural curriculum, culturally informed classroom discourse, and cultural congruity in teaching and learning strategies.</p> <p><i>References:</i></p> <p>Au, L. J. (1998). Social constructivism and the school literacy learning of students with diverse backgrounds. <i>Journal of Literacy Research</i>, 30, 297-319.</p> <p>Gay, G. (2000). <i>Culturally responsive teaching: Theory, research, and practice</i>. New York: Teacher's College Press.</p> <p>Ladson-Billings, G. (1994). <i>The dreamkeepers: Successful teachers of African American children</i>. San Francisco: Jossey-Bass.</p> <p>McDiarmid, G. W. (1995). <i>Realizing new learning for all students: A framework for the professional development of Kentucky teachers</i>. Shanahan & F. V. Rodriguez-Brown (Eds.), <i>Forty-seventh yearbook of the National Reading Conference</i> (pp. 59-75). Chicago, IL: National Reading Conference.</p>

	<p>Ruddell, M. R. (1997). <i>Teaching content reading and writing</i> (2nd ed.). New York: Wiley.</p> <p>Schmidt, P. R. (2005, December). <i>Culturally responsive instruction: Promoting literacy in secondary content areas</i>. Naperville, IL: Learning Point Associates. Available from http://www.learningpt.org/literacy/adolescent/cri.pdf</p>
3.1	<p>Teacher designs learning experiences that align to curriculum standards</p> <p>Aligns with <i>InTASC Standard #7: Planning for Instruction</i>. The teacher draws upon knowledge of content areas, cross disciplinary skills, learners, the community, and pedagogy to plan instruction that supports every student in meeting rigorous learning goals.</p> <p>Danielson (1996, 2007) describes good teachers as having a thorough understanding of the curriculum and knowledge of what methods and materials can be used to complement essential concepts. Knowledge of content and pedagogy are appropriately different for teachers of different levels. The balance between content and pedagogy at different levels are critical; i.e. the content of reading does not change but the pedagogy does whereas in an area like science both the content and pedagogy change. Through deep knowledge of content the teacher knows how to transform the instructional design into a sequence of activities and exercises that make it accessible to students.</p> <p><i>References:</i></p> <p>Danielson, C. (1996). <i>Enhancing professional practice: A framework for teaching</i>. Alexandria, VA: Association for Supervision and Curriculum Development.</p> <p>Danielson, C. (2007). <i>Enhancing professional practice: A framework for teaching</i>. Alexandria, VA: Association for Supervision and Curriculum Development.</p>
3.2	<p>Teacher uses lessons and activities to meet the diverse needs of learners</p> <p>Aligns with <i>InTASC Standard #2: Learning Differences</i>. The teacher uses understanding of individual differences and diverse communities to ensure inclusive learning environments that allow each learner to reach his/her full potential.</p> <p>Zeichner (1992) summarized the extensive literature describing successful teaching approaches for diverse populations and categorized the key elements for effective teaching for ethnic- and language-minority students. In addition, several studies (Au, 1998; Ball & McDiarmid, 1989; Fuchs et. al., 1997; Ladson-Billings, 1994; Moll, 1998; Ruddell, 1997) have found evidence that elementary instruction should ensure sensitivity to student culture and agree on the need for teachers to have a deep understanding of the subjects they teach so that they can create the multiple representations necessary to address the diversity of prior experiences and understandings present in their classrooms. Extensive research on the benefits of using diverse teaching strategies for diverse learners can also be found in Saravia-Shore (2008).</p>

Danielson (1996, 2007) asserts that teachers who understand the developmental context of the subject matter are better prepared to construct instructional goals appropriate to students with special needs and can observe important patterns of student development within a content area. These patterns of development are particularly important in science and mathematics at all levels, and literature and social sciences at the high school level.

<p>3.3</p>	<p>Teacher evaluates lessons relative to long and short-term learning goals</p> <p>Aligns with <i>InTASC Standard #6: Assessment</i>. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to document learner progress, and to inform the teacher’s ongoing planning and instruction.</p> <p>Several studies have found that student achievement improves when learning goals and objectives are clearly defined, displayed prominently, and have an articulated relationship to both instructional activities and student assessment (Behr & Bachelor, 1981; Deal & Peterson, 1993; Hallinger & Heck, 1996; Sammons, Hillman, & Mortimore, 1995). Haberman (1995) found that effective teachers incorporate the “big picture”, including long term goals, daily practice, engaging students, fostering teacher student rapport, expecting and understanding the range of differences among students.</p> <p><i>References:</i> Behr, G., & Bachelor, B. (1981). <i>Identifying effective schools: A case study involving black racially isolated minority schools and instructional accomplishments/information systems</i>. <p>4.1</p>	<p>Teacher promotes critical thinking and problem-solving skills</p> <p>Aligns with <i>InTASC Standard #8: Instructional Strategies</i>. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.</p> <p>Research shows that there is a link between critical thinking skills and increased student achievement. In studies of NAEP score data, Wenglinsky (2002, 2003, 2004) found that teaching critical thinking is associated with higher test scores. Meta-analysis conducted by Hattie (2009) showed that a problem-solving teaching approach yielded a medium effect size ($d =$</p>

	<p>0.61) on student achievement. According to Hembree (1992), the teacher characteristic with the most positive effect on students' performance was specialist training in heuristic methods ($d = 0.71$). The methods include, for example, Pólya's (1945) four phases of: (1) understanding the problem, (2) obtaining a plan of the solution, (3) carrying out the problem, and (4) examining the solutions obtained. Problem-solving methods can also have a positive influence on student interpersonal outcomes. Almeida and Denham (1984) reported positive effects of interpersonal cognitive problem solving skills on behavioral adjustment and social behaviors (see also Denham & Almeida, 1987).</p> <p><i>References:</i></p> <p>Almeida, M. C., & Denham, S. A. (1984, April). <i>Interpersonal cognitive problem-solving: A meta analysis</i>. 4.3	<p>Teacher employs individual and collaborative learning strategies</p> <p>Aligns with <i>InTASC Standard #8: Instructional Strategies</i>. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.</p> <p>Hattie (2009) notes that there seems to be universal agreement that cooperative learning is effective, especially when contrasted with competitive and individualistic learning. Meta-analyses that compared cooperative learned versus heterogeneous classes showed a medium effect size of $d = 0.41$. The effect size for cooperative learning versus individualistic learning was $d = 0.59$. Cooperative learning was found to have a prime effect on enhancing interest and problem solving provided it is set up with high levels of peer involvement. Marzano et al. (2001) also cite several studies on the benefits of cooperative learning, particularly when a variety of criteria are used for grouping students. Flexible grouping strategies have been found to yield positive results on student learning (Castle, Deniz, & Tortora, 2005). A review of literature on self-regulated learning (Zumbrunn, Tadlock, & Roberts, 2011) showed that learning strategies such as independent reading practice were a valuable predictor of students' reading comprehension scores.</p> <p><i>References:</i> Castle, S., Deniz, C., & Tortora, M. (2005, February). Flexible grouping and student learning in a high-needs school. <i>Education and Urban Society</i>, 37(2), 139-150. Available from http://eus.sagepub.com/content/37/2/139 Hattie, J. 5.1	<p data-bbox="344 250 1940 293">Teacher uses motivation and engagement strategies to positively impact the classroom environment</p> <p data-bbox="344 310 1940 418">Aligns with <i>InTASC Standard #3: Learning Environments</i>. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self motivation.</p> <p data-bbox="344 443 1940 667">A report from the Center on Education Policy discusses various research-based dimensions of student motivation (Usher & Kober, 2012). Studies have shown that higher student motivation to learn is linked not only to better academic performance, but to greater conceptual understanding, satisfaction with school, self-esteem, social adjustment, and to lower dropout rates (Gottfried, 1985; Gottfried, 2009; Ryan & Deci, 2000, 2009). Pintrich (2003) found that if a student believes, for whatever reason, that he or she has limited capacity for learning or feels unlikely to succeed, that student will not be as academically motivated.</p> <p data-bbox="344 716 1940 1019">Reviews of the literature on student engagement show that higher levels of engagement in school are linked to improved student performance. Research studies cited by Klem and Connell (2004) found student engagement a “robust predictor of student achievement and behavior in school, regardless of socioeconomic status.” (p. 262). Students engaged in school are more likely to earn higher grades and test scores and have lower drop-out rates. Wang and Holcombe (2010) note that a growing body of research “also suggests that the social, instructional, and organizational climate of schools influences both students’ engagement and their academic achievement” and cite various studies that illuminate this point. Additional research supporting the use of engagement strategies can be found in Akey (2006); Marzano (2007); and the National Center for School Engagement (2006).</p> <p data-bbox="344 1068 499 1092"><i>References:</i></p> <p data-bbox="344 1109 1940 1174">Akey, T. 5.2	<p>Teacher effectively manages time, space, transitions, and activities</p> <p>Aligns with <i>InTASC Standard #3: Learning Environments</i>. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self motivation.</p> <p>In <i>Classroom Management That Works: Research-Based Strategies for Every Teacher</i>, Marzano et. al (2003) note that research over the past 30 years shows classroom management to be one of the critical ingredients of effective teaching. Based on their meta-analysis, Marzano and colleagues found that classes in which effective classroom management techniques are used have student engagement rates that are .617 standard deviations higher than engagement rates in classes where effective management techniques are not employed. This translates into a 23-percentile point increase in engagement. Classes with effective classroom management techniques reach achievement levels that are .521 standard</p>

	<p>deviations higher than the achievement in classes without effective management techniques. This translates into a 20-percentile point increase in achievement. Marzano concluded that “effective classroom management has a powerful impact on students.” (p. 10).</p> <p><i>Reference:</i> Marzano, R. J., Marzano, J. S., & Pickering, D. J. (2003). <i>Classroom management that works: Research-based strategies for every teacher</i>. Alexandria, VA: Association for Supervision and Curriculum Development. Available from http://www.ascd.org/publications/books/103027.aspx</p>
<p>5.3</p>	<p>Teacher promotes a positive classroom environment and classroom and school culture</p> <p>Aligns with <i>InTASC Standard #3: Learning Environments</i>. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self motivation.</p> <p>Pickett and Fraser (2010) cite several studies that point to the impacts of positive classroom learning environments on student learning. They note that analyses of large databases, collected as part of the National Assessment of Educational Progress (NAEP), found that the classroom and school environment was a strong predictor of both student achievement and attitudes.</p> <p><i>Reference:</i> Pickett, L., & Frader, B. (2010, January). Creating and assessing positive classroom learning environments. <i>Childhood Education</i>, January 1, 2010. <p>6.1</p>	<p>Teacher is dedicated to the consistent use of correct, effective verbal and non-verbal communication</p> <p>Aligns with <i>InTASC Standard #3: Learning Environments</i>. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self motivation.</p> <p>Haskins (2000) studied the concept of pedagogical communication as a means by which teachers could enhance credibility in the classroom. Pedagogical communication was defined as “a process of communication used by teachers to advance educational subject matter.” (Haskins, 2000). Research suggests that behaviors such as effective use of vocal variation (e.g., changes in rate, inflection, volume, movement) or visual variation (e.g., change in facial expressions, eye contact,</p>

gestures) may increase students' cognitive and affective learning (Gorham, 1988; Richmond, Gohan, & McCrosky, 1987). Additionally, the ways in which a teacher communicates information, including delivering a message as free as possible of errors (e.g., grammar, pronunciation, enunciation) bears heavily on students' perceptions of teacher competence (Kearney & Plax, 1999). Other studies have shown that students taught by teachers with greater verbal ability learn more and show more academic success than those taught by teachers with lower verbal skills (Stronge, 2002; Rowan, Chang, & Miller, 1997; Wenglinsky, 2000).

Research on improving instruction for English language learners (ELLs) demonstrates the importance teachers using clear and effective communication. Students learn best when teachers enunciate clearly, add gestures, draw pictures when appropriate, write clearly and legibly, rephrase or paraphrase in shorter sentences and simpler syntax, avoid idioms and slang words, provide frequent summations of the salient points of a lesson, and emphasize key vocabulary words (Reed and Railsback, 2003). According to Samson and Collins (2012), teachers of ELLs should have an understanding of the linguistic demands of tasks and skills to address the role of academic language in their instruction.

6.2	<p>Teacher is sensitive to differences in culture, gender, intellectual and physical abilities</p> <p>Aligns with <i>InTASC Standard #2: Learning Differences</i>. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.</p> <p>Many effective instructional approaches build on students' backgrounds to further the development of their abilities. Zittleman (2004) found, for example, that when teachers became aware of gender-biased behaviors in their teaching and altered these behaviors to reflect equitable instructional practices, gender gaps in student interaction and learning diminished.</p> <p>Research has also shown that students learn more when their classrooms are compatible with their own cultural and linguistic experience (Au, 1980; Jordan, 1984, 1985, 1995; National Coalition of Advocates for Students, 1988; Trueba & Delgado-Gaitan, 1985). Students may experience confusion and anxiety, become inattentive or unable to seek the teacher's attention or participate in discussions when the norms of interaction and communication in a classroom are very different from those to which students have been accustomed. By acknowledging students' cultural norms and expectations concerning communication and social interaction, teachers can appropriately guide student participation in instructional activities.</p> <p>Villegas and Lucas (2002) found that an affirming attitude toward students from culturally different backgrounds significantly impacts students' learning, belief in self, and overall academic performance. They cited the works of several researchers who concluded that teachers' attitudes towards students shape the expectations they have of the degree to which students can learn (Irvine, 1990; Pang & Sablan, 1998). Affirming attitudes have been shown to support student achievement (Ladson-Billings, 1994; Lucas, Henze, & Donato, 1990; Nieto, 1996). According to Delpit (1995), teachers who respect cultural differences are more apt to believe that students from nondominant groups are capable learners, even when these children enter school with ways of thinking, talking, and behaving that differ from the dominant cultural norms.</p>

6.3	<p>Teacher supports and expands safe, free and respectful learning expression</p> <p>Aligns with <i>INTASC Standard #3: Learning Environments</i>. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self motivation.</p>

	<p>Educational research supports creating an atmosphere of mutual respect and support in the classroom, where students feels safe in expressing concerns or asking questions, and where tolerance and a sense of common identity and community are supported (Shepard, 2000; Stronge 2002; Wilen et al., 2004). Impacts of a positive classroom emotional climate on student engagement and academic achievement are documented in Reyes, et al. (2102) where the authors note that “teachers in classrooms high in classroom emotional climate are aware of their students’ emotional and academic needs and respond to their students by choosing age-appropriate activities that both encourage self-expression and cater to their interests and points of view.”</p> <p><i>References:</i></p> <p>Reyes, M. R., Brackett, M. A., Rivers, S. E., White, M., & Salovey, P. (2012, March 5). 7.2	<p>Teacher uses assessment data to improve student learning</p> <p>Aligns with <i>InTASC Standard #6: Assessment</i>. The teacher understands and uses multiple methods of assessments to engage learners in their own growth, to monitor learner progress, and guide the teacher’s and learner’s decision making.</p> <p>The Institute of Education Sciences (IES) Practice Guide, <i>Using Student Achievement Data to Support Instructional Decision Making</i> (2009), cites several studies on the importance of making data part of an ongoing cycle of instructional improvement and offers recommendations on how teachers can use assessment data to improve student learning. According to Safer and Fleishman (2005), research has demonstrated that when teachers use student progress monitoring, students learn more, teacher decision making improves, and students become aware of their own performance. A significant body of research conducted over the past 30 years has shown that student progress monitoring is a reliable and valid predictor of subsequent performance on a variety of outcome measures.</p>

7.3	<p>Teacher involves students in self-assessment strategies</p> <p>Aligns with <i>INTASC Standard #6: Assessment</i>. The teacher understands and uses multiple methods of assessments to engage learners in their own growth, to monitor learner progress, and guide the teacher’s and learner’s decision making.</p> <p>Lavery (2008) found that that use of student self-evaluation had a medium effect ($d = 0.62$) on student learning. Self-evaluation was defined as “setting standards and using them for self-judgment,” such as checking work before handing it in to the teacher. The Institute of Education Sciences (IES) Practice Guide, <i>Using Student Achievement Data to Support Instructional Decision Making</i> (2009), cites several studies on the importance of involving students in self-assessment. According to Black et al. (2003), students are best prepared to learn from their own achievement data when they understand the learning objectives and when they receive data in a user friendly format. Additional studies showing an association between involving students in self-assessment and student achievement include Declos & Harrington (1991) and Schunk (1996).</p> <p><i>References:</i></p> <p>Black, P., Harrison, C., Lee, C., Marshall, B., & William, D. (2003). <i>Assessment for learning: Putting it into practice</i>. Maidenhead, UK: Open University Press.</p> <p>Declos, V. R., & Harrington, C. (1991). <p>7.6</p>	<p>Teacher commits to collaborative work sharing and analyzing data on student performance</p> <p>Aligns with <i>InTASC Standard #6: Assessment</i>. The teacher understands and uses multiple methods of assessments to engage learners in their own growth, to monitor learner progress, and guide the teacher’s and learner’s decision making.</p> <p>The Institute of Education Sciences (IES) Practice Guide, <i>Using Student Achievement Data to Support Instructional Decision Making</i> (2009), cites several studies on the importance of teachers working collaboratively to share and analyze data on student performance. When teachers interpret data collaboratively in grade-level or department-specific teams, they can begin to adopt some common instructional and assessment practices as well as common expectations for student performance (Fiarman, 2007; Halverson, Prichett, & Watson, 2007; Halverson et al., 2007). According to IES, collaboration also allows teachers to “develop a collective understanding of the needs of individual students in their school, so that they can work as an organization to provide support for all students” (Hamilton et al., 2009, p. 14). Teacher participation in professional learning communities (PLCs) had a positive effect on student learning, according to a literature review conducted by Vescio, Ross, and Adams (2005). Several studies reviewed showed that student learning was enhanced when teachers participated in data-directed dialogue and adjusted instruction to meet the needs of their students (Strahan, 2003; Phillips, 2003).</p> <p>Good and Jackson (2007) examined the impact of the Data Collaborative Model (DMC) on student achievement through the Texas Assessment of Knowledge and Skills (TAKS). The DCM includes assessing students, reflecting on data, professional dialogue and professional development for teachers, interventions for students based on data results, and re-assessing to measure the impact of the changes made in both teacher practice and student interventions. Results showed a statistically significant difference in the state assessment mathematics passing rate for campuses which understood and used the DCM process and tools at a “high” level for a consecutive 3-year period compared to those having a lower level of understanding and usage of the DCM process and tools during the same time period.</p> <p><i>References:</i></p>

8.1	<p>Teacher engages in self-assessment and reflection to improve professional practice</p> <p>Aligns with <i>InTASC Standard #9: Professional Learning and Ethical Practice</i>. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.</p> <p>Several studies assert that reflection fosters continuous improvement of teaching and learning that ultimately results in increased student achievement (DuFour & Eaker, 1998; Hawley & Valli, 1999; Ingvarson, Meiers, & Beavis, 2005; Osterman & Kottkamp, 2004). Larrivee (2000) states that “when teachers become reflective practitioners, they move beyond a knowledge base of discrete skills to a stage where they integrate and modify skills to fit special contexts, the ability to create personal solutions to problems, and to invent new strategies.” Two studies (Cohen & Hill, 1998; U.S. Department of Education, 2000) found that the most effective professional development sessions provide teachers time to collaborate with one another and to discuss their professional development experience. Garet, et al. (2001) point to self-reflection as essential component of effective professional development.</p> <p>Meta-analysis conducted by Hattie (2009) found that microteaching followed by analysis and discussion, typically used in</p>

	<p>on-campus clinical experiences for teacher preparation students, resulted in a high effect size ($d = 0.88$) on student achievement. Laboratory experiences and microteaching are effective for in-service teachers as well, but are not typically utilized.</p> <p><i>References:</i></p> <p>Cohen, D. K., & Hill, H. C. 8.2	<p>Teacher uses available resources to support professional learning</p> <p>Aligns with <i>InTASC Standard #9: Professional Learning and Ethical Practice</i>. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.</p>

	<p>A recent literature review (Yoon, Duncan, Lee, & Shapley, 2008) on the effects of teachers’ professional development on student achievement found an medium effect size ($d = 0.54$). Teachers who receive substantial professional development, an average of 49 hours, were able to boost their students’ achievement by about 21 percentile points. Timperley, et al. (2007) reviewed 72 studies that assessed the effects of professional development on student outcomes and found an overall effect size of $d = 0.66$, considered a moderate effect.</p> <p><i>References:</i> Timperley, H., Wilson, A., Barrar, H., & Fung, I. (2007). <i>Teacher professional learning and development: Best evidence synthesis iteration</i>. Auckland, New Zealand: Ministry of Education. Yoon, K. S., Duncan, T., Lee, S. W. Y., Scarloss, B., & Shapley, K. L. (2008, March). <i>The effects of teachers’ professional development on student achievement: Findings from a systematic review of evidence</i>. <p>8.3</p>	<p>Teacher aligns practice to district policies and school structures</p> <p>Aligns with <i>InTASC Standard #9: Professional Learning and Ethical Practice</i>. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on other (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.</p> <p>Fullan (1991), Howley & Brown (2001), and Newmann, King, & Youngs (2001) have established the importance of school structures and policies to successful school improvement and reform. Cotton (1995, 2000) cites the importance of teachers’ use of building and district curriculum resources for instructional planning and conducting periodic curriculum alignment and review efforts to ensure alignment with school and district goals and policies. Cotton also stressed the importance collaborative curriculum planning and decision making to ensure schoolwide continuity across grade levels and courses so that teachers understand where they fit in with the curriculum.</p> <p>A study of Chicago elementary schools showed that those with stronger instructional program coherence had higher gains in student achievement (Newman, Smith, Allenswork, & Bryk, 2001). Kedro (2004) also found that student achievement is positively affected by a “combination of a shared districtwide vision to improve teaching and learning; extensive professional development; data-driven decision making; and consistent instruction across the district that, is, <i>instructional program coherence</i>” (p. 30).</p>

9.1	<p>Teacher participates in building the vision, mission, values and goals through work with their mentor</p> <p>Aligns with <i>InTASC Standard #10: Leadership and Collaboration</i>. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.</p> <p>Strong, Fletcher, and Villar (2004) suggest that comprehensive induction (i.e., regular meetings in addition to other structured learning opportunities) supports new teachers’ development of skills and abilities more rapidly, thus minimizing the time it takes to reach the level of more experienced peers. Several small-scale studies (Huling-Austin, 1990; Odell & Ferraro, 1992) reported that induction and mentoring programs improved new teacher quality. Similarly, a handful of studies (Schaffer, Stringfield, & Wolffe, 1992; Weiss & Weiss, 1999) found that such programs improve new teacher effectiveness.</p> <p>More recently, the US Department of Education funded Mathematic Policy Research of Princeton, New Jersey to investigate the impacts of induction and mentoring programs on retention, classroom practices, and student achievement. This randomized controlled study collected data from 1,009 beginning teachers in 418 schools in 17 large, urban, low-income public school districts and followed the teachers for three years. The study (Glazerman et al., 2010) found no</p>

significant differences between the student achievements of the teachers in either treatment or control groups after their first two years. However, student achievement of treatment teachers was significantly higher after three years for a small sub-set of teachers whose students had both pretest and posttest scores. Ingersoll and Strong (2011) summarized the student achievement as “equivalent to moving the average student from the 50th percentile to the 54th percentile in reading and to the 58th percentile in math” due to the significant improvement of teachers’ effectiveness.

Instructional coaching has also emerged as a promising strategy for increasing student achievement (Kohler, Crilly, Shearer, & Goode, 2001; Alliance for Excellent Education, 2006). Results of one study (Garcia, Jones, Holland, & Mundy, n.d.) found increased student achievement for students whose teachers received site-based coaching, particularly in 6th grade mathematics and reading, 7th grade writing, and 8th grade science and social studies. Research also indicates that teachers who are supported by instructional coaches are more likely to implement newly-learned instructional strategies (Barr, Simmons, & Zarrow, 2003; Coggins, Stoddard, & Cutler, 2003; WestEd, 2000).

Leithwood, Louis, Anderson, and Wahlstrom (2004) suggest that an interconnected system of leadership has the potential to positively affect student learning. Marks and Printy (2003) found student achievement to be substantial in schools implementing integrated and shared leadership models.

<p>9.2</p>	<p>Teacher knows how to work with others across the system to identify and provide needed support services</p> <p>Aligns with <i>InTASC Standard #10: Leadership and Collaboration</i>. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, and other school professionals, and community members to ensure learner growth, and to advance the professions.</p> <p>Aligns with <i>InTASC Standard #2: Learning Differences</i>. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards. 2(f) The teacher accesses resources, supports and specialized assistance and services to meet particular learning differences or needs.</p> <p>Research on effective schools and effective teachers has identified the types of monitoring efforts shown to be effective, including reviewing student performance data to ensure early identification and support for students with learning difficulties and making summaries of student performance available to all staff for use in planning and intervention (Betts, Zau, & Rice, 2003; Block & Burns, 1976; Blum & Butler, 1985; Brophy & Good, 1986; Charles A. Dana Center, 1999; Cotton, 2000; Designs for Change, 1998; Foegen et al., 2007; Lein, Johnson, & Ragland, 1997; Levine & Lezotte, 1995; McTighe, 2008; Porter & Brophy, 1988; Stronge, Ward, Tucker, & Hindman, 2007; Yesseldyke & Bolt, 2007).</p>

Fuchs and Fuchs' (2002) analysis of research on student progress monitoring found that when teachers use systematic progress monitoring to track student progress in reading, mathematics, or spelling, they are better able to identify students in need of additional or different types of classroom instruction. They are also better equipped to design enhanced instructional programs that result in increased student achievement. Fuchs, Deno, and Mirkin (1984) conducted a study in the New York City Public Schools where two groups of teachers were tracked for 18 weeks, with only one group systematically monitoring student performance. Students whose teachers employed a curriculum-based measurement (CBM) process had statistically significant better achievement results than students of teachers who did not employ a CBM process.

9.3	<p>Teacher develops relationships and cooperative partnerships with students, families and the community</p> <p>Aligns with <i>InTASC Standard #10: Leadership and Collaboration</i>. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.</p> <p>Several studies have found that when teachers develop supportive relationships with students, students become more engaged in that they work harder in the classroom, persevere in the face of difficulties, accept teacher direction and criticism, cope better with stress, and are more attentive in the classroom (Little & Kobak, 2003; Midgley, Feldlaufer, & Eccles, 1989; Ridley, McWilliams, & Oates, 2000; Skinner & Belmont, 1993; Wentzel, 1999). A meta-analysis conducted by Cornelius-White (2007) showed a high effect size ($d = 0.72$) for teacher-student relationships and increased student achievement. A series of studies conducted by the National Network of Partnership Schools (Epstein, 2005) showed increased student achievement in mathematics at schools where teachers implemented math homework that required parent-child interactions and offered math materials for families to take home (Sheldon & Epstein, 2005a). A review of literature on family involvement with students on reading indicated that, across grade levels, interventions to involve families in reading and language arts positively affected students' reading skills and scores (Sheldon & Epstein, 2005b).</p> <p>Research has shown that when parents experience relationships with teachers characterized by mutuality, warmth, and respect, students achieve more, demonstrate increased motivation to achieve, and exhibit higher levels of emotional,</p>

social, and behavioral adjustment (Fan & Chen, 2001; Henderson & Mapp, 2002; Marcon, 1999; Reynolds, 1991). Hughes and Kwok (2007) conducted a study of the influence of student-teacher and parent-teacher relationships on lower achieving readers' engagement in the primary grades. They found that early elementary students gained more in reading achievement when they and their parents experienced supportive relationships with teachers. Findings suggested that an increased focus on helping teachers connect with students and their parents is one means of helping children at risk of academic failure get off to a good start. Caspe, et al., (2011) found that to be effective, teachers must be prepared to collaborate with families to support student success. Students benefit in many ways when teachers understand families and communicate and build relationships with them.

Research and Proven Practices of Dr. Robert Marzano

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Introduction to the research of Robert J. Marzano

Robert J. Marzano, Ph.D., is cofounder and chief executive officer of Marzano Research Laboratory in Englewood, Colorado. A leading researcher in education, he is a speaker, trainer and author of more than 30 books and 150 articles on instruction, assessment, writing and implementing standards, cognition, effective leadership and school intervention. Marzano's practical translation of the most current education research and theory into classroom strategies are internationally known and widely practiced by teachers and administrators.

The Marzano classroom strategies are articulated in *The Art and Science of Teaching*. A crosswalk of these strategies and the Missouri Teaching Standards and Quality Indicators is provided to demonstrate which Marzano strategies support each particular Missouri Quality Indicators. A document which ranks Missouri's Quality Indicators by number of strategies they align with is also provided as a quick reference. Finally, the Growth Guide of each Quality Indicator is provided with the appropriate Marzano strategies and supporting evidence for that strategy. This might provide further clarification of Missouri's quality indicators for the teacher and suggest appropriate research-based strategies to support these indicators.

Marzano, R. (2007). *The art and science of teaching: A comprehensive framework for effective instruction*. Alexandria, VA: The Association for Supervision and Curriculum Development (ASCD).

Missouri QI Ranked by Marzano Strategies

Missouri Indicator	# of Marzano strategies	Missouri Quality Indicator Description
Standard 2.5	34	Prior experiences, learning styles, multiple intelligences, strengths and needs
Standard 1.2	24	Engaging students in subject matter
Standard 5.1	24	Classroom management, motivation, and engagement
Standard 1.1	23	Content knowledge and academic language
Standard 5.2	18	Managing time, space, transitions, and activities
Standard 6.4	18	Technology and media communication tools
Standard 2.1	17	Cognitive, social, emotional and physical development
Standard 2.4	16	Meeting the needs of every student
Standard 4.1	15	Instructional strategies leading to student engagement in problem-solving and critical thinking
Standard 3.2	12	Develop lessons for diverse learners
Standard 4.3	11	Cooperative learning
Standard 5.3	10	Classroom, School and Community Culture
Standard 6.3	10	Learner expression in speaking, writing and other media
Standard 2.6	8	Language, culture, family and knowledge of community values
Standard 3.3	8	Analyze instructional goals and differentiated instructional strategies
Standard 1.4	7	Interdisciplinary instruction
Standard 1.5	6	Diverse social and cultural perspectives
Standard 2.2	5	Student Goals
Standard 7.5	5	Communication of Student Progress and Maintaining Records
Standard 8.1	5	Self-Assessment and Improvement
Standard 8.2	5	Professional Learning
Standard 4.2	4	Appropriate use of instructional resources to enhance student learning
Standard 6.1	4	Verbal and nonverbal communication
Standard 7.4	4	Effect of instruction on individual/class learning
Standard 1.3	3	Disciplinary research and inquiry methodologies
Standard 2.3	3	Theory of Learning
Standard 7.1	3	Effective Use of Assessments
Standard 7.3	3	Student led Assessment Strategies
Standard 7.6	3	Collaborative Data Analysis Process
Standard 9.1	3	Roles, Responsibilities, and Collegial Activities
Standard 9.2	3	Collaborating with historical, cultural, political and social context to meet the needs of students
Standard 6.2	2	Sensitivity to culture, gender, intellectual and physical differences
Standard 7.2	2	Assessment Data to Improve Learning
Standard 8.3	2	Professional rights, responsibilities and ethical practices
Standard 9.3	2	Cooperative Partnerships in support of student learning
Standard 3.1	1	Implementation of curriculum standards

Marzano, R. (2007). *The art and science of teaching: A comprehensive framework for effective instruction*. Alexandria, VA: The Association for Supervision and Curriculum Development (ASCD).

Teacher Growth Guide 1.1 – Marzano Strategies

Standard 1: Content knowledge aligned with appropriate instruction.

The teacher understands the central concepts, structures, and tools of inquiry of the discipline(s) and creates learning experiences that make these aspects of subject matter meaningful and engaging for students.

Quality Indicator 1: Content knowledge and academic language

Emerging		Developing		Proficient		Distinguished	
1E1) The emerging teacher...		1D1) The developing teacher also...		1P1) The proficient teacher also...		1S1) The distinguished teacher also...	
Knows and can demonstrate breadth and depth of content knowledge and communicates the meaning of academic language.		Delivers accurate content learning experiences using supplemental resources and incorporates academic language into learning activities.		Infuses new information into instructional units and lessons displaying solid knowledge of the important concepts of the discipline.		Has mastery of taught subjects and continually infuses new research-based content knowledge into instruction.	
Score = 0	1	2	3	4	5	6	7
(MDQ) Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The Teacher Provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			

MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students	
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally	Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 3.20 The teacher engages students in revision of previous knowledge about content addressed in previous lessons	
Teacher Engages whole class in examination of how the current lesson changed perceptions about the previous content and has students explain how their understanding has changed	Student Makes corrections to information previously recorded about content Explains previous error or misconceptions they had about content
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks	
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students	Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted

MDQ 5.25 The teacher uses academic games and inconsequential competition to maintain student engagement	
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games	Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content
MDQ 5.26 The teacher uses response rate techniques to maintain student engagement in questions	
Teacher Uses wait time, response cards, and raised hands to respond to questions Uses choral response, technology to track responses and response chaining	Student Or entire class responds to questions posed by the teacher Can describe their thinking about specific questions posed by the teacher
MDQ 5.27 The teacher uses physical movement to maintain student engagement	
Teacher Uses standing up, stretching, voting with feet, give-one-get-one, acting out or modeling Has students move to a part of the room that represents their answer	Student Engage in physical activities designed by the teacher Can explain how physical movement keeps their interest and helps them learn
MDQ 5.28 The teacher uses pacing techniques to maintain students' engagement	
Teacher Employs crisp transitions from one activity to another Alters pace appropriately (i.e. speeds up or slows down as appropriate)	Student Quickly adapts to transitions and re-engages when a new activity is begun Students describe the pace as not too slow and not too fast
MDQ 5.29 The teacher demonstrates intensity and enthusiasm for the content in a variety of ways	
Teacher Describes personal experiences that relate to content Signals excitement for content through physical gestures, voice tone, dramatization Overtly adjusts energy level	Student Says teacher likes the content and likes teaching it Attention level increases when the teacher demonstrates enthusiasm and intensity
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement	
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class	Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better
MDQ 5.31 The teacher provides students with opportunities to relate what is being addressed in class to their personal interests	
Teacher Is aware of student interests and makes connections between these and content Structures activities that ask students to make connections between content and interests Appears encouraging and interested in connections between content and interests	Student Engages in activities that require them to make connections between interests and content Explains how making connections helps them understand content better
MDQ 5.32 The teacher uses unusual or intriguing information about the content in a manner that enhances student engagement	
Teacher Provides interesting facts and details about the content Encourages students to identify interesting information about the content Uses activities like "believe it or not" or guest speakers	Student Attention increases when unusual information is provided about the content Explains how unusual information makes them more interested in content

Teacher Growth Guide 1.2 – Marzano Strategies

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 2: Student engagement in subject matter

Emerging		Developing		Proficient		Distinguished	
1E2) The emerging teacher... Chooses from multiple sources to engage student interest and activity in the content.		1D2) The developing teacher also... Uses a variety of differentiated instructional strategies which purposefully engage students in content.		1P2) The proficient teacher also... Uses specific instructional strategies to engage students and advance each individual student’s learning as evidenced by student data.		1S2) The distinguished teacher also... Moves fluidly between differentiated instructional strategies based on the unique learning needs and situations of the students resulting in deeper student knowledge and understanding in the content area.	
Score = 0	1	2	3	4	5	6	7
(MDQ) Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The Teacher Provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			
MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students							
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally				Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points			

MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.16 As appropriate, the teacher designs homework to deepen students' knowledge of informational content or to practice a skill, strategy or process	
Teacher Communicates clear purpose for homework Extends an activity that was begun in class to provide student with more time Crafts an assignment to allow students to practice and deepen knowledge independently	Student Can describe how homework will deepen understanding of informational content or help them to practice a skill, strategy or process Ask clarifying questions of the homework that help them understand the purpose
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better
MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses	
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses	Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks	
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students	Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance

MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted
MDQ 5.25 The teacher uses academic games and inconsequential competition to maintain student engagement	
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games	Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content
MDQ 5.26 The teacher uses response rate techniques to maintain student engagement in questions	
Teacher Uses wait time, response cards, and raised hands to respond to questions Uses choral response, technology to track responses and response chaining	Student Or entire class responds to questions posed by the teacher Can describe their thinking about specific questions posed by the teacher
MDQ 5.27 The teacher uses physical movement to maintain student engagement	
Teacher Uses standing up, stretching, voting with feet, give-one-get-one, acting out or modeling Has students move to a part of the room that represents their answer	Student Engage in physical activities designed by the teacher Can explain how physical movement keeps their interest and helps them learn
MDQ 5.28 The teacher uses pacing techniques to maintain students' engagement	
Teacher Employs crisp transitions from one activity to another Alters pace appropriately (i.e. speeds up or slows down as appropriate)	Student Quickly adapts to transitions and re-engages when a new activity is begun Students describe the pace as not too slow and not too fast
MDQ 5.29 The teacher demonstrates intensity and enthusiasm for the content in a variety of ways	
Teacher Describes personal experiences that relate to content Signals excitement for content through physical gestures, voice tone, dramatization Overtly adjusts energy level	Student Says teacher likes the content and likes teaching it Attention level increases when the teacher demonstrates enthusiasm and intensity
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement	
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class	Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better
MDQ 5.31 The teacher provides students with opportunities to relate what is being addressed in class to their personal interests	
Teacher Is aware of student interests and makes connections between these and content Structures activities that ask students to make connections between content and interests Appears encouraging and interested in connections between content and interests	Student Engages in activities that require them to make connections between interests and content Explains how making connections helps them understand content better
MDQ 5.32 The teacher uses unusual or intriguing information about the content in a manner that enhances student engagement	
Teacher Provides interesting facts and details about the content Encourages students to identify interesting information about the content Uses activities like "believe it or not" or guest speakers	Student Attention increases when unusual information is provided about the content Explains how unusual information makes them more interested in content

Teacher Growth Guide 1.3 – Marzano Strategies

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 3: Disciplinary research and inquiry methodologies

Emerging		Developing		Proficient		Distinguished	
1E3) The emerging teacher... Introduces students to various methods of inquiry and research methodologies.		1D3) The developing teacher also... Employs student- inquiry instructional approaches to build capacity for all students on research methodologies.		1P3) The proficient teacher also... Develops strategies to engage students in the processes of inquiry and research pertinent to the discipline being taught.		1S3) The distinguished teacher also... Acquires and shares new knowledge on inquiry and research methodologies that improve student learning.	
Score = 0	1	2	3	4	5	6	7
(MDQ) Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses							
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses				Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses			
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses							
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing				Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed			
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks							
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students				Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance			

Teacher Growth Guide 1.4 – Marzano Strategies

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 4: Interdisciplinary instruction

Emerging		Developing		Proficient		Distinguished	
1E4) The emerging teacher... Demonstrates the ability to make interdisciplinary content connections during instruction.		1D4) The developing teacher also... Implements meaningful interdisciplinary learning experiences that require students to apply disciplinary knowledge.		1P4) The proficient teacher also... Develops and implements interdisciplinary projects that guide students in analyzing the complexities of an issue or question using perspectives from varied disciplines.		1S4) The distinguished teacher also... Connects current interdisciplinary themes to their discipline(s) and weaves those themes into meaningful learning experiences through collaboration with students, colleagues, and/or real-world partners.	
Score = 0	1	2	3	4	5	6	7
(MDQ) Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action							
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students				Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted			
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement							
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class				Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better			
MDQ 5.32 The teacher uses unusual or intriguing information about the content in a manner that enhances student engagement							
Teacher Provides interesting facts and details about the content Encourages students to identify interesting information about the content Uses activities like “believe it or not” or guest speakers				Student Attention increases when unusual information is provided about the content Explains how unusual information makes them more interested in content			
MDQ 7.33 The teacher uses behaviors associated with “with-it-ness” to maintain adherence to rules and procedures							
Teacher Physically occupies all quadrants of the room / proactively addresses inflammatory situations Scans the entire room; makes eye contact; deals with potential sources of disruption				Student Recognizes that the teacher is aware of their behavior Describes the teacher as aware of what is going on or has eyes in the back of their head			

MDQ 7.34 The teacher applies consequences for not following rules and procedures consistently and fairly	
<p>Teacher</p> <p>Use nonverbal signs for inappropriate behavior (eye contact; proximity; tap desk; shake head)</p> <p>Uses verbal signals for inappropriate behavior (says stop; says rule is broken)</p> <p>Uses contingency consequences; involves home; direct cost consequences</p>	<p>Student</p> <p>Ceases inappropriate behavior when signaled to do so</p> <p>Accepts consequences as a part of the way the class is conducted</p> <p>Can describe the teacher as fair in the application of rules</p>
MDQ 7.35 The teacher consistently and fairly acknowledges adherence to rules and procedures	
<p>Teacher</p> <p>Uses verbal & non-verbal signals (smile; nod of head; high five; says thank you)</p> <p>Notifies home with compliment; uses reward or certificate of merit; token economies</p>	<p>Student</p> <p>Appears appreciative of the teacher's acknowledgement</p> <p>Number of students adhering to rules increases</p>
MDQ 8.38 The teacher behaves in an objective and controlled manner	
<p>Teacher</p> <p>Does not exhibit extremes in positive or negative emotions; is calm and controlled</p> <p>Does not demonstrate personal offense at misbehavior or inflammatory issues</p>	<p>Student</p> <p>Is settled by the teacher's calm behavior</p> <p>Describes the teacher as in control of self and class; does not hold grudges or take personally</p>

Teacher Growth Guide 1.5 – Marzano Strategies

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 5: Diverse social and cultural perspectives

Emerging		Developing		Proficient		Distinguished	
1E5) The emerging teacher...		1D5) The developing teacher also...		1P5) The proficient teacher also		1S5) The distinguished teacher also...	
Facilitates students' ability to develop balanced, diverse social and cultural perspectives by recognizing personal bias in lesson design.		Designs instruction that incorporates global perspectives about national/regional/ethnic contributions to, and cultural differences/interpretations of the discipline.		Builds background knowledge from a variety of perspectives critical to fostering innovation, solving global challenges, and assuring a healthy democracy.		Facilitates student action to address real-world problems from a variety of perspectives related to the discipline that improves their community and/or world.	
Score = 0	1	2	3	4	5	6	7
(MDQ) Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses							
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses				Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses			
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses							
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing				Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed			
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks							
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students				Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance			
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement							
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class				Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better			
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community							
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons				Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background			

MDQ 8.37 When appropriate, the teacher uses verbal and nonverbal behavior that indicates caring for students

Teacher

Compliments on academic/personal accomplishments; uses informal conversations

Uses humor, smiles, nods, puts hands on shoulders when appropriate

Student

Describes teacher as someone who cares about them

Responds to verbal and nonverbal interactions

Teacher Growth Guide 2.1 – Marzano Strategies

Standard 2: Student Learning, Growth and Development

The teacher understands how students learn, develop and differ in their approaches to learning. The teacher provides learning opportunities that are adapted to diverse learners and support the intellectual, social, and personal development of all students.

Quality Indicator 1: Cognitive, social, emotional and physical development

Emerging		Developing		Proficient		Distinguished	
2E1) The emerging teacher... Knows how to address developmental factors when making instructional decisions.		2D1) The developing teacher also... Applies understanding of child/adolescent growth and development markers to implement instruction that fosters development in students.		2P1) The proficient teacher also... Uses knowledge of individual growth and development to monitor and chart learner’s progress toward goals in each domain to meet current needs and lead to the next level of development.		2S1) The distinguished teacher also... Models and shares with colleagues an effective, continuous instructional cycle that assesses individual performance, identifies needs and provides instruction promoting individual advancement in each domain.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 1.2 The Teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			

MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information	
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members	Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages	
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity	Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn
MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students	
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally	Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better

MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background

Teacher Growth Guide 2.2 – Marzano Strategies

Standard 2: Student Learning, Growth and Development

Quality Indicator 2: Student goals

Emerging		Developing		Proficient		Distinguished	
2E2) The emerging teacher... Facilitates students' understanding of taking personal responsibility for their own learning.		2D2) The developing teacher also Uses strategies to enable students to set short- and long-term goals helping them to organize and reflect on their own learning.		2P2) The proficient teacher also... Use strategies to assist students in evaluating and modifying personal learning goals based on personal performance data.		2S2) The distinguished teacher also... Acquires and shares new knowledge on strategies for enabling students to expand and assume control of their own learning.	
Score = 0	1	2	3	4	5	6	7
(MDQ) Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MDQ 1.3 The teacher provides students with recognition of their current status and their knowledge gain relative to the learning goal							
Teacher Acknowledges students who have achieved a certain score; made gains in knowledge/skill Celebrates success with a show of hands, certification of success, notify parent, applause				Student Shows signs of pride regarding their accomplishments in the class Say they want to continue making progress			
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process							
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning				Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning			
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses							
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses				Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses			

Teacher Growth Guide 2.3 – Marzano Strategies

Standard 2: Student Learning, Growth and Development

Quality Indicator 3: Theory of learning

Emerging		Developing		Proficient		Distinguished	
2E3) The emerging teacher... Applies theories of learning to create well-planned and delivered instruction.		2D3) The developing teacher also... Implements research-based instruction focused on production of learning for individual students.		2P3) The proficient teacher also... Delivers instruction that effectively produces learning gains for every student based on effective plans, grounded in theory/research, and designed to meet individual needs.		2S3) The distinguished teacher also... Continuously modifies instruction based on his/her own and emerging research and shares effective practices and modifications with colleagues.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 6.4 The teacher reviews expectations regarding rules and procedures to ensure their effective execution							
Teacher Involves students in class routines and reminds them of rules and procedures Uses class meeting to review rules and procedures; provides cues/signals when to use them Asks students to restate or explain rules and procedures				Student Follow clear routines and can describe established rules and procedures Describe the classroom as an orderly place Recognize cues/signals from teachers and can regulate their own behavior			
MDQ 6.5 The teacher organizes the physical layout of the classroom to facilitate movement and focus on learning							
Teacher Physical layout has clear traffic patterns and easy access to materials and centers Decorated to enhance learning Bulletin boards relate to current content and student work is displayed				Student Moves easily about the room and can easily focus on instruction Makes use of materials and learning centers Attends to examples of their displayed work and information on bulletin boards			
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			

MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information	
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members	Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages	
Teacher Uses preview questions, reminds students what they know, provides an advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity	Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn
MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students	
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally	Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better

MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence

Teacher Growth Guide 2.4 – Marzano Strategies

Standard 2: Student Learning, Growth and Development

Quality Indicator 4: Differentiated lesson design

Emerging		Developing		Proficient		Distinguished	
2E4) The emerging teacher... Designs and implements instruction that considers the needs of students.		2D4) The developing teacher also... Designs and implements instruction that enables students to learn, grow, and develop because their needs are met in a positive learning environment.		2P4) The proficient teacher also... Through design and instruction, establishes an inviting and nurturing educational environment by creating a trusting relationship with students that engages them in learning.		2S4) The distinguished teacher also... Plans and cultivates the unique skills and talents of every child and encourages them to ask questions, take risks and enjoy learning.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 6.4 The teacher reviews expectations regarding rules and procedures to ensure their effective execution							
Teacher Involves students in class routines and reminds them of rules and procedures Uses class meeting to review rules and procedures; provides cues/signals when to use them Asks students to restate or explain rules and procedures				Student Follow clear routines and can describe established rules and procedures Describe the classroom as an orderly place Recognize cues/signals from teachers and can regulate their own behavior			
MDQ 6.5 The teacher organizes the physical layout of the classroom to facilitate movement and focus on learning							
Teacher Physical layout has clear traffic patterns and easy access to materials and centers Decorated to enhance learning Bulletin boards relate to current content and student work is displayed				Student Moves easily about the room and can easily focus on instruction Makes use of materials and learning centers Attends to examples of their displayed work and information on bulletin boards			
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			

MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students	
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally	Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better
MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted

MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background
MDQ 8.37 When appropriate, the teacher uses verbal and nonverbal behavior that indicates caring for students	
Teacher Compliments on academic/personal accomplishments; uses informal conversations Uses humor, smiles, nods, puts hands on shoulders when appropriate	Student Describes teacher as someone who cares about them Responds to verbal and nonverbal interactions
MDQ 8.38 The teacher behaves in an objective and controlled manner	
Teacher Does not exhibit extremes in positive or negative emotions; is calm and controlled Does not demonstrate personal offense at misbehavior or inflammatory issues	Student Is settled by the teacher's calm behavior Describes the teacher as in control of self and class; does not hold grudges or take personally
MDQ 9.39 The teacher exhibits behaviors that demonstrate value and respect for low expectancy students	
Teacher Provides low expectancy with nonverbal indications they are respected and valued Makes eye contact, smiles, appropriate physical contact, playful dialogue Does not allow negative comments about low expectancy students Knows which students are the low expectancy students	Student Says teacher cares for all students Treats other students with respect
MDQ 9.40 The teacher asks questions of low expectancy students with the same frequency and depth as high expectancy students	
Teacher Makes sure low expectancy students are asked questions at the same rate Makes sure low expectancy students are asked complex questions at the same rate	Student Say the teacher expects everyone to participate Say the teachers asks difficult questions of every student
MDQ 9.41 The teacher probes incorrect answers of low expectancy students in the same manner as that of the high expectancy students	
Teacher Asks for further explanation; allows them to collect their thoughts and goes back to them Rephrases questions when low expectancy students provide an incorrect answer Breaks a question into smaller and simpler parts when questions are answered incorrectly	Student Say teacher won't let you off the hook and won't give up on you Says teacher helps them answer questions successfully

Teacher Growth Guide 2.5 – Marzano Strategies

Standard 2: Student Learning, Growth and Development

Quality Indicator 5: Prior experiences, multiple intelligences, strengths and needs

Emerging		Developing		Proficient		Distinguished	
2E5) The emerging teacher... Delivers a variety of lesson activities that address students' prior experiences, multiple intelligences, strengths and needs.		2D5) The developing teacher also... Creates and delivers lessons and instructional activities that address the individual needs of all learners and variation in prior knowledge and experiences, multiple intelligences, strengths, and needs.		2P5) The proficient teacher also... Adapts strategies to meet individual student needs based on student performance data and where the child is developmentally, cognitively, physically, and affectively to advance knowledge and skill development.		2S5) The distinguished teacher also... Acquires and shares authentic strategies for actively involving every student in advancing their own learning, building on their unique experience, intelligence, strengths and needs.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			

MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students	
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally	Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.16 As appropriate, the teacher designs homework to deepen students' knowledge of informational content or to practice a skill, strategy or process	
Teacher Communicates clear purpose for homework Extends an activity that was begun in class to provide student with more time Crafts an assignment to allow students to practice and deepen knowledge independently	Student Can describe how homework will deepen understanding of informational content or help them to practice a skill, strategy or process Ask clarifying questions of the homework that help them understand the purpose
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better
MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim

MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 3.20 The teacher engages students in revision of previous knowledge about content addressed in previous lessons	
Teacher Engages whole class in examination of how the current lesson changed perceptions about the previous content and has students explain how their understanding has changed	Student Makes corrections to information previously recorded about content Explains previous error or misconceptions they had about content
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses	
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses	Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks	
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students	Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted
MDQ 5.25 The teacher uses academic games and insequential competition to maintain student engagement	
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games	Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content
MDQ 5.26 The teacher uses response rate techniques to maintain student engagement in questions	
Teacher Uses wait time, response cards, and raised hands to respond to questions Uses choral response, technology to track responses and response chaining	Student Or entire class responds to questions posed by the teacher Can describe their thinking about specific questions posed by the teacher
MDQ 5.27 The teacher uses physical movement to maintain student engagement	
Teacher Uses standing up, stretching, voting with feet, give-one-get-one, acting out or modeling Has students move to a part of the room that represents their answer	Student Engage in physical activities designed by the teacher Can explain how physical movement keeps their interest and helps them learn
MDQ 5.28 The teacher uses pacing techniques to maintain students' engagement	
Teacher Employs crisp transitions from one activity to another Alters pace appropriately (i.e. speeds up or slows down as appropriate)	Student Quickly adapts to transitions and re-engages when a new activity is begun Students describe the pace as not too slow and not too fast

MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement	
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class	Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better
MDQ 5.31 The teacher provides students with opportunities to relate what is being addressed in class to their personal interests	
Teacher Is aware of student interests and makes connections between these and content Structures activities that ask students to make connections between content and interests Appears encouraging and interested in connections between content and interests	Student Engages in activities that require them to make connections between interests and content Explains how making connections helps them understand content better
MDQ 5.32 The teacher uses unusual or intriguing information about the content in a manner that enhances student engagement	
Teacher Provides interesting facts and details about the content Encourages students to identify interesting information about the content Uses activities like “believe it or not” or guest speakers	Student Attention increases when unusual information is provided about the content Explains how unusual information makes them more interested in content
MDQ 8.36 The teacher uses students’ interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background
MDQ 8.37 When appropriate, the teacher uses verbal and nonverbal behavior that indicates caring for students	
Teacher Compliments on academic/personal accomplishments; uses informal conversations Uses humor, smiles, nods, puts hands on shoulders when appropriate	Student Describes teacher as someone who cares about them Responds to verbal and nonverbal interactions
MDQ 8.38 The teacher behaves in an objective and controlled manner	
Teacher Does not exhibit extremes in positive or negative emotions; is calm and controlled Does not demonstrate personal offense at misbehavior or inflammatory issues	Student Is settled by the teacher’s calm behavior Describes the teacher as in control of self and class; does not hold grudges or take personally
MDQ 9.39 The teacher exhibits behaviors that demonstrate value and respect for low expectancy students	
Teacher Provides low expectancy with nonverbal indications they are respected and valued Makes eye contact, smiles, appropriate physical contact, playful dialogue Does not allow negative comments about low expectancy students Knows which students are the low expectancy students	Student Says teacher cares for all students Treats other students with respect
MDQ 9.40 The teacher asks questions of low expectancy students with the same frequency and depth as high expectancy students	
Teacher Makes sure low expectancy students are asked questions at the same rate Makes sure low expectancy students are asked complex questions at the same rate	Student Says the teacher expects everyone to participate Says the teachers asks difficult questions of every student
MDQ 9.41 The teacher probes incorrect answers of low expectancy students in the same manner as that of the high expectancy students	
Teacher Asks for further explanation; allows them to collect their thoughts and goes back to them Rephrases questions when low expectancy students provide an incorrect answer Breaks a question into smaller and simpler parts when questions are answered incorrectly	Student Says teacher won’t let you off the hook and won’t give up on you Says teacher helps them answer questions successfully

Teacher Growth Guide 2.6 – Marzano Strategies

Standard 2: Student Learning, Growth and Development

Quality Indicator 6: Language, culture, family and knowledge of community values

Emerging		Developing		Proficient		Distinguished	
2E6) The emerging teacher... Reviews demographic and biographical data of students to determine the variety of learning needs.		2D6) The developing teacher also... Modifies instruction in response to how students' learning is influenced by individual experience, talents, and prior learning, as well as language, culture, family and community values.		2P6) The proficient teacher also... Creates a learning climate which respects individual differences by using teaching approaches that incorporate and are sensitive to the multiple experiences of learners, their family, culture, and community.		2S6) The distinguished teacher also... Connects instruction to students' experiences creating a trusting environment by employing strategies that respect differing cultures and draws explicit connections during instruction / assignments that are related to students' experiences and culture.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 6.4 The teacher reviews expectations regarding rules and procedures to ensure their effective execution							
Teacher Involves students in class routines and reminds them of rules and procedures Uses class meeting to review rules and procedures; provides cues/signals when to use them Asks students to restate or explain rules and procedures				Student Follow clear routines and can describe established rules and procedures Describe the classroom as an orderly place Recognize cues/signals from teachers and can regulate their own behavior			
MDQ 6.5 The teacher organizes the physical layout of the classroom to facilitate movement and focus on learning							
Teacher Physical layout has clear traffic patterns and easy access to materials and centers Decorated to enhance learning Bulletin boards relate to current content and student work is displayed				Student Moves easily about the room and can easily focus on instruction Makes use of materials and learning centers Attends to examples of their displayed work and information on bulletin boards			
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement							
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class				Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better			
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community							
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons				Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background			

MDQ 8.37 When appropriate, the teacher uses verbal and nonverbal behavior that indicates caring for students	
Teacher Compliments on academic/personal accomplishments; uses informal conversations Uses humor, smiles, nods, puts hands on shoulders when appropriate	Student Describes teacher as someone who cares about them Responds to verbal and nonverbal interactions
MDQ 9.39 The teacher exhibits behaviors that demonstrate value and respect for low expectancy students	
Teacher Provides low expectancy with nonverbal indications they are respected and valued Makes eye contact, smiles, appropriate physical contact, playful dialogue Does not allow negative comments about low expectancy students Knows which students are the low expectancy students	Student Says teacher cares for all students Treats other students with respect
MDQ 9.40 The teacher asks questions of low expectancy students with the same frequency and depth as high expectancy students	
Teacher Makes sure low expectancy students are asked questions at the same rate Makes sure low expectancy students are asked complex questions at the same rate	Student Say the teacher expects everyone to participate Say the teachers asks difficult questions of every student
MDQ 9.41 The teacher probes incorrect answers of low expectancy students in the same manner as that of the high expectancy students	
Teacher Asks for further explanation; allows them to collect their thoughts and goes back to them Rephrases questions when low expectancy students provide an incorrect answer Breaks a question into smaller and simpler parts when questions are answered incorrectly	Student Say teacher won't let you off the hook and won't give up on you Says teacher helps them answer questions successfully

Teacher Growth Guide 3.1 – Marzano Strategies

Standard 3: Curriculum Implementation

The teacher recognizes the importance of long-range planning and curriculum development. The teacher develops, implements, and evaluates curriculum based upon student, district and state standards data.

Quality Indicator 1: Implementation of curriculum standards

Emerging		Developing		Proficient		Distinguished	
3E1) The emerging teacher... Makes informed decisions about instructional objects aligned to district mapping and pacing guides.		3D1) The developing teacher also... Consistently delivers a variety of learning experiences that are appropriate for curriculum and are aligned with state and district curriculum and assessments.		3P1) The proficient teacher also... Uses state/district curriculum guides with enough facility to anticipate skill gaps and/or misconceptions of students in order to deliver effective instruction.		3S1) The distinguished teacher also... Participates and/or demonstrates leadership for the evaluation and development of curriculum aligned to national, state, and district curriculum and assessments.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			

Teacher Growth Guide 3.2 – Marzano Strategies

Standard 3: Curriculum Implementation

Quality Indicator 2: Lessons for diverse learners

Emerging		Developing		Proficient		Distinguished	
3E2) The emerging teacher... Implements lessons and activities aligned to the curriculum that recognizes the individual needs of diverse learners		3D2) The developing teacher also... Consistently implements lessons and activities that address the needs of diverse learners and responds to ongoing analysis of student performance based on multiple assessments and analysis of student needs.		3P2) The proficient teacher also... Evaluates the effectiveness of a variety of instructional strategies based on multiple assessment data, curriculum and an analysis of student needs.		3S2) The distinguished teacher also... Participates and/or demonstrates leadership in the development of instructional strategies and interventions to accomplish instructional goals based on multiple assessment data, curriculum and an analysis of student needs.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MDQ 1.3 The teacher provides students with recognition of their current status and their knowledge gain relative to the learning goal							
Teacher Acknowledges students who have achieved a certain score; made gains in knowledge/skill Celebrates success with a show of hands, certification of success, notify parent, applause				Student Shows signs of pride regarding their accomplishments in the class Say they want to continue making progress			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students							
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally				Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points			
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information							
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment				Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions			

MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses	
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses	Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background

Teacher Growth Guide 3.3 – Marzano Strategies

Standard 3: Curriculum Implementation

Quality Indicator 3: Instructional goals and differentiated instructional strategies

Emerging		Developing		Proficient		Distinguished	
3E3) The emerging teacher... Uses differentiated instructional strategies to address student learning needs in meeting the objectives of the curriculum.		3D3) The developing teacher also... Systematically selects differentiated instructional strategies and content to meet student needs and enhance learning.		3P3) The proficient teacher also... Adjusts instructional goals and time and modifies instructional strategies, and content to meet students' needs and enhance learning.		3S3) The distinguished teacher also... Leads colleagues in discussions of instructional goals to identify methods for modifying instructional strategies, content, and adjusting time to meet students' needs and enhance learning.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences							
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding				Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better			
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency							
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can				Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence			
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses							
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses				Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses			

Marzano, Robert. J. (2007). The Art and Science of Teaching. Virginia: The Association for Supervision and Curriculum Development (ASCD).

MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed
MDQ 5.26 The teacher uses response rate techniques to maintain student engagement in questions	
Teacher Uses wait time, response cards, and raised hands to respond to questions Uses choral response, technology to track responses and response chaining	Student Or entire class responds to questions posed by the teacher Can describe their thinking about specific questions posed by the teacher
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background

Teacher Growth Guide 4.1 – Marzano Strategies

Standard 4: Critical Thinking

The teacher uses a variety of instructional strategies to encourage students’ critical thinking, problem solving, and performance skills.

Quality Indicator 1: Instructional strategies leading to student engagement in problem-solving and critical thinking

Emerging		Developing		Proficient		Distinguished	
4E1) The emerging teacher...		4D1) The developing teacher also...		4P1) The proficient teacher also...		4S1) The distinguished teacher also...	
Selects various types of instructional strategies and appropriate resources to achieve instructional goals and teach students critical thinking skills.		Assures student growth with frequent instructional opportunities for students to use critical thinking and problem solving skills.		Effectively applies a range of instructional techniques that require students to think critically and problem-solve.		Fluently uses a range of instructional techniques that require critical thinking; serves as a leader by offering constructive assistance and modeling the use of strategies, materials and technology to maximize learning.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			
MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students							
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally				Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points			

MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information	
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment	Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.16 As appropriate, the teacher designs homework to deepen students' knowledge of informational content or to practice a skill, strategy or process	
Teacher Communicates clear purpose for homework Extends an activity that was begun in class to provide student with more time Crafts an assignment to allow students to practice and deepen knowledge independently	Student Can describe how homework will deepen understanding of informational content or help them to practice a skill, strategy or process Ask clarifying questions of the homework that help them understand the purpose
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses	
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses	Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed

MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks

Teacher

Circulates the room and provides easy access to himself/herself

Volunteers resources and guidance as needed by entire class, groups, or individual students

Student

Seeks out the teacher for advice and guidance

Can explain how the teacher provides assistance and guidance

Teacher Growth Guide 4.2 – Marzano Strategies

Standard 4: Critical Thinking

Quality Indicator 2: Appropriate use of instructional resources to enhance student learning

Emerging		Developing		Proficient		Distinguished	
4E2) The emerging teacher... Uses a variety of instructional resources to enhance the teaching and learning process.		4D2) The developing teacher also... Purposefully selects and uses a variety of developmentally appropriate instructional resources to enhance academic performance and technological literacy.		4P2) The proficient teacher also... Assesses the effectiveness of instructional resources and developmentally appropriate instructional activities and adapts for promoting complex thinking and technological skills.		4S2) The distinguished teacher also... Applies research-based instructional resources including technology to enhance their own teaching, as well as being a potential resource to others.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks							
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students				Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance			
MDQ 5.25 The teacher uses academic games and inconsequential competition to maintain student engagement							
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games				Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content			

Teacher Growth Guide 4.3 – Marzano Strategies

Standard 4: Critical Thinking

Quality Indicator 3: Cooperative, small group and independent learning

Emerging		Developing		Proficient		Distinguished	
4E3) The emerging teacher... Employs individual and cooperative learning activities to promote critical thinking skills.		4D3) The developing teacher also... Uses a variety of learning situations, such as independent, small group and whole class to enhance individual and collective critical thinking skills.		4P3) The proficient teacher also... Effectively combines flexible and varied independent, cooperative and whole-class learning situations and applies grouping strategies to maximize student understanding and learning.		4S3) The distinguished teacher also... Models and/or shares with others the effective use of flexible and varied independent, collaborative and whole-class learning situations.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information							
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment				Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions			
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process							
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning				Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning			
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge							
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process				Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers			
MDQ 3.16 As appropriate, the teacher designs homework to deepen students' knowledge of informational content or to practice a skill, strategy or process							
Teacher Communicates clear purpose for homework Extends an activity that was begun in class to provide student with more time Crafts an assignment to allow students to practice and deepen knowledge independently				Student Can describe how homework will deepen understanding of informational content or help them to practice a skill, strategy or process Ask clarifying questions of the homework that help them understand the purpose			

MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses	
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses	Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted
MDQ 5.25 The teacher uses academic games and inconsequential competition to maintain student engagement	
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games	Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement	
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class	Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better
MDQ 5.31 The teacher provides students with opportunities to relate what is being addressed in class to their personal interests	
Teacher Is aware of student interests and makes connections between these and content Structures activities that ask students to make connections between content and interests Appears encouraging and interested in connections between content and interests	Student Engages in activities that require them to make connections between interests and content Explains how making connections helps them understand content better

Teacher Growth Guide 5.1 – Marzano Strategies

Standard 5: Positive Classroom Environment

The teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages active engagement in learning, positive social interaction, and self-motivation.

Quality Indicator 1: Classroom Management Techniques

Emerging		Developing		Proficient		Distinguished	
5E1) The emerging teacher... Demonstrates basic classroom management techniques and addresses misbehavior to avoid the disruption of instruction.		5D1) The developing teacher also... Uses effective classroom management techniques including addressing misbehavior promptly and effectively with the least disruption of instruction.		5P1) The proficient teacher also... Adapts and develops classroom management techniques that address all student misbehavior ensuring little or no disruption of instruction.		5S1) The distinguished teacher also... Shares with others effective classroom management techniques that reduce the likelihood of misbehavior ensuring little or no disruptions to instruction.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MDQ 1.3 The teacher provides students with recognition of their current status and their knowledge gain relative to the learning goal							
Teacher Acknowledges students who have achieved a certain score; made gains in knowledge/skill Celebrates success with a show of hands, certification of success, notify parent, applause				Student Shows signs of pride regarding their accomplishments in the class Say they want to continue making progress			
MDQ 6.4 The teacher reviews expectations regarding rules and procedures to ensure their effective execution							
Teacher Involves students in class routines and reminds them of rules and procedures Uses class meeting to review rules and procedures; provides cues/signals when to use them Asks students to restate or explain rules and procedures				Student Follow clear routines and can describe established rules and procedures Describe the classroom as an orderly place Recognize cues/signals from teachers and can regulate their own behavior			
MDQ 6.5 The teacher organizes the physical layout of the classroom to facilitate movement and focus on learning							
Teacher Physical layout has clear traffic patterns and easy access to materials and centers Decorated to enhance learning Bulletin boards relate to current content and student work is displayed				Student Moves easily about the room and can easily focus on instruction Makes use of materials and learning centers Attends to examples of their displayed work and information on bulletin boards			

MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action	
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students	Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted
MDQ 5.25 The teacher uses academic games and inconsequential competition to maintain student engagement	
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games	Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content
MDQ 5.26 The teacher uses response rate techniques to maintain student engagement in questions	
Teacher Uses wait time, response cards, and raised hands to respond to questions Uses choral response, technology to track responses and response chaining	Student Or entire class responds to questions posed by the teacher Can describe their thinking about specific questions posed by the teacher
MDQ 5.27 The teacher uses physical movement to maintain student engagement	
Teacher Uses standing up, stretching, voting with feet, give-one-get-one, acting out or modeling Has students move to a part of the room that represents their answer	Student Engage in physical activities designed by the teacher Can explain how physical movement keeps their interest and helps them learn
MDQ 5.28 The teacher uses pacing techniques to maintain students' engagement	
Teacher Employs crisp transitions from one activity to another Alters pace appropriately (i.e. speeds up or slows down as appropriate)	Student Quickly adapts to transitions and re-engages when a new activity is begun Students describe the pace as not too slow and not too fast
MDQ 5.29 The teacher demonstrates intensity and enthusiasm for the content in a variety of ways	
Teacher Describes personal experiences that relate to content Signals excitement for content through physical gestures, voice tone, dramatization Overtly adjusts energy level	Student Says teacher likes the content and likes teaching it Attention level increases when the teacher demonstrates enthusiasm and intensity
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement	
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class	Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better
MDQ 5.31 The teacher provides students with opportunities to relate what is being addressed in class to their personal interests	
Teacher Is aware of student interests and makes connections between these and content Structures activities that ask students to make connections between content and interests Appears encouraging and interested in connections between content and interests	Student Engages in activities that require them to make connections between interests and content Explains how making connections helps them understand content better
MDQ 5.32 The teacher uses unusual or intriguing information about the content in a manner that enhances student engagement	
Teacher Provides interesting facts and details about the content Encourages students to identify interesting information about the content Uses activities like "believe it or not" or guest speakers	Student Attention increases when unusual information is provided about the content Explains how unusual information makes them more interested in content
MDQ 7.33 The teacher uses behaviors associated with "with-it-ness" to maintain adherence to rules and procedures	
Teacher Physically occupies all quadrants of the room / proactively addresses inflammatory situations Scans the entire room; makes eye contact; deals with potential sources of disruption	Student Recognizes that the teacher is aware of their behavior Describes the teacher as aware of what is going on or has eyes in the back of their head

MDQ 7.34 The teacher applies consequences for not following rules and procedures consistently and fairly	
Teacher Use nonverbal signs for inappropriate behavior (eye contact; proximity; tap desk; shake head) Uses verbal signals for inappropriate behavior (says stop; says rule is broken) Uses contingency consequences; involves home; direct cost consequences	Student Ceases inappropriate behavior when signaled to do so Accepts consequences as a part of the way the class is conducted Can describe the teacher as fair in the application of rules
MDQ 7.35 The teacher consistently and fairly acknowledges adherence to rules and procedures	
Teacher Uses verbal & non-verbal signals (smile; nod of head; high five; says thank you) Notifies home with compliment; uses reward or certificate of merit; token economies	Student Appears appreciative of the teacher's acknowledgement Number of students adhering to rules increases
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background
MDQ 8.37 When appropriate, the teacher uses verbal and nonverbal behavior that indicates caring for students	
Teacher Compliments on academic/personal accomplishments; uses informal conversations Uses humor, smiles, nods, puts hands on shoulders when appropriate	Student Describes teacher as someone who cares about them Responds to verbal and nonverbal interactions
MDQ 8.38 The teacher behaves in an objective and controlled manner	
Teacher Does not exhibit extremes in positive or negative emotions; is calm and controlled Does not demonstrate personal offense at misbehavior or inflammatory issues	Student Is settled by the teacher's calm behavior Describes the teacher as in control of self and class; does not hold grudges or take personally
MDQ 9.39 The teacher exhibits behaviors that demonstrate value and respect for low expectancy students	
Teacher Provides low expectancy with nonverbal indications they are respected and valued Makes eye contact, smiles, appropriate physical contact, playful dialogue Does not allow negative comments about low expectancy students Knows which students are the low expectancy students	Student Says teacher cares for all students Treats other students with respect
MDQ 9.40 The teacher asks questions of low expectancy students with the same frequency and depth as high expectancy students	
Teacher Makes sure low expectancy students are asked questions at the same rate Makes sure low expectancy students are asked complex questions at the same rate	Student Say the teacher expects everyone to participate Say the teachers asks difficult questions of every student
MDQ 9.41 The teacher probes incorrect answers of low expectancy students in the same manner as that of the high expectancy students	
Teacher Asks for further explanation; allows them to collect their thoughts and goes back to them Rephrases questions when low expectancy students provide an incorrect answer Breaks a question into smaller and simpler parts when questions are answered incorrectly	Student Say teacher won't let you off the hook and won't give up on you Says teacher helps them answer questions successfully
MD4.55 The teacher interacts with other teachers in a positive manner to promote and support student learning	
Teacher Works cooperatively with appropriate school personnel to address issues impact learning Establishes working relationships that demonstrate integrity, confidentiality, respect, flexibility, fairness and trust	Teacher Accesses available expertise and resources to support student learning needs Describes positive interactions with colleagues to promote and support student learning Describes situations where negative conversations of other teachers have been extinguished

MD4.56 The teacher interacts with students and parents in a positive manner to foster learning and promote positive home/school relationships

Teacher

Fosters collaborative partnerships with parents to enhance student success in a manner that demonstrate integrity, confidentiality, respect, flexibility, fairness and trust

Ensures consistent and timely communication with parents regarding expectations & progress

Encourages parent involvement in classroom and school activities

Demonstrates awareness and sensitivity to social, cultural and language backgrounds

Teacher

Uses multiple means and modalities to communicate with families

Responds to requests for support, assistance and/or clarification promptly

Respects and maintains confidentiality of student/family information

Teacher Growth Guide 5.2 – Marzano Strategies

Standard 5: Positive Classroom Environment

Quality Indicator 2: Management of time, space, transitions, and activities

Emerging		Developing		Proficient		Distinguished	
5E2) The emerging teacher... Manages time, space, transitions, and activities in their classroom.		5D2) The developing teacher also... Effectively manages time, space, transitions, and activities to create an environment that enhances student engagement.		5P2) The proficient teacher also... Organizes, allocates, and manages time, space, transitions and activities to promote continuous student engagement and high levels of productivity.		5S2) The distinguished teacher also... Shares with others effective strategies for managing time, space, transitions and activities to promote continuous student engagement and high levels of productivity.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 6.4 The teacher reviews expectations regarding rules and procedures to ensure their effective execution							
Teacher Involves students in class routines and reminds them of rules and procedures Uses class meeting to review rules and procedures; provides cues/signals when to use them Asks students to restate or explain rules and procedures				Student Follow clear routines and can describe established rules and procedures Describe the classroom as an orderly place Recognize cues/signals from teachers and can regulate their own behavior			
MDQ 6.5 The teacher organizes the physical layout of the classroom to facilitate movement and focus on learning							
Teacher Physical layout has clear traffic patterns and easy access to materials and centers Decorated to enhance learning Bulletin boards relate to current content and student work is displayed				Student Moves easily about the room and can easily focus on instruction Makes use of materials and learning centers Attends to examples of their displayed work and information on bulletin boards			
MDQ 5.24 The teacher scans the room making note of when students are not engaged and takes overt action							
Teacher Notices when specific students or groups are not engaged Notices when energy levels in the room is low; takes action to re-engage students				Student Appears aware that the teacher is taking note of their engagement level Tries to increase their level of engagement when prompted			

MDQ 5.25 The teacher uses academic games and inconsequential competition to maintain student engagement	
Teacher Uses structured games (Jeopardy; family feud) and impromptu games to increase engagement Uses friendly competition along with classroom games	Student Engages in games with some enthusiasm Can explain how games keep their interest and help them learn and remember content
MDQ 5.26 The teacher uses response rate techniques to maintain student engagement in questions	
Teacher Uses wait time, response cards, and raised hands to respond to questions Uses choral response, technology to track responses and response chaining	Student Or entire class responds to questions posed by the teacher Can describe their thinking about specific questions posed by the teacher
MDQ 5.27 The teacher uses physical movement to maintain student engagement	
Teacher Uses standing up, stretching, voting with feet, give-one-get-one, acting out or modeling Has students move to a part of the room that represents their answer	Student Engage in physical activities designed by the teacher Can explain how physical movement keeps their interest and helps them learn
MDQ 5.28 The teacher uses pacing techniques to maintain students' engagement	
Teacher Employs crisp transitions from one activity to another Alters pace appropriately (i.e. speeds up or slows down as appropriate)	Student Quickly adapts to transitions and re-engages when a new activity is begun Students describe the pace as not too slow and not too fast
MDQ 5.29 The teacher demonstrates intensity and enthusiasm for the content in a variety of ways	
Teacher Describes personal experiences that relate to content Signals excitement for content through physical gestures, voice tone, dramatization Overtly adjusts energy level	Student Says teacher likes the content and likes teaching it Attention level increases when the teacher demonstrates enthusiasm and intensity
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement	
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class	Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better
MDQ 5.31 The teacher provides students with opportunities to relate what is being addressed in class to their personal interests	
Teacher Is aware of student interests and makes connections between these and content Structures activities that ask students to make connections between content and interests Appears encouraging and interested in connections between content and interests	Student Engages in activities that require them to make connections between interests and content Explains how making connections helps them understand content better
MDQ 5.32 The teacher uses unusual or intriguing information about the content in a manner that enhances student engagement	
Teacher Provides interesting facts and details about the content Encourages students to identify interesting information about the content Uses activities like "believe it or not" or guest speakers	Student Attention increases when unusual information is provided about the content Explains how unusual information makes them more interested in content
MDQ 7.33 The teacher uses behaviors associated with "with-it-ness" to maintain adherence to rules and procedures	
Teacher Physically occupies all quadrants of the room / proactively addresses inflammatory situations Scans the entire room; makes eye contact; deals with potential sources of disruption	Student Recognizes that the teacher is aware of their behavior Describes the teacher as aware of what is going on or has eyes in the back of their head
MDQ 7.34 The teacher applies consequences for not following rules and procedures consistently and fairly	
Teacher Use nonverbal signs for inappropriate behavior (eye contact; proximity; tap desk; shake head) Uses verbal signals for inappropriate behavior (says stop; says rule is broken) Uses contingency consequences; involves home; direct cost consequences	Student Ceases inappropriate behavior when signaled to do so Accepts consequences as a part of the way the class is conducted Can describe the teacher as fair in the application of rules

MDQ 7.35 The teacher consistently and fairly acknowledges adherence to rules and procedures	
Teacher Uses verbal & non-verbal signals (smile; nod of head; high five; says thank you) Notifies home with compliment; uses reward or certificate of merit; token economies	Student Appears appreciative of the teacher's acknowledgement Number of students adhering to rules increases
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background
MDQ 8.38 The teacher behaves in an objective and controlled manner	
Teacher Does not exhibit extremes in positive or negative emotions; is calm and controlled Does not demonstrate personal offense at misbehavior or inflammatory issues	Student Is settled by the teacher's calm behavior Describes the teacher as in control of self and class; does not hold grudges or take personally
MD4.55 The teacher interacts with other teachers in a positive manner to promote and support student learning

<p>Teacher</p> <p>Participates in school activities and events as appropriate to support students & families</p> <p>Serves on school/district committees and participates in PD opportunities</p> <p>Works to achieve school and district improvement goals</p>	

Teacher Growth Guide 6.1 – Marzano Strategies

Standard 6: Effective Communication

The teacher models effective verbal, nonverbal, and media communication techniques with students, colleagues and parents to foster active inquiry, collaboration, and supportive interaction in the classroom.

Quality Indicator 1: Verbal and nonverbal communication

Emerging		Developing		Proficient		Distinguished	
6E1) The emerging teacher... Uses correct, effective verbal and non-verbal communication skills.		6D1) The developing teacher also... Consistently uses and fosters correct, effective verbal and nonverbal communication, including strategies to communicate with students whose first language is not Standard English or whose disability requires specific forms of communication.		6P1) The proficient teacher also... Evaluates the impact of and strategies for the correct and effective use of verbal and nonverbal communication.		6S1) The distinguished teacher also... Shares with others strategies for ensuring correct, effective verbal and nonverbal communication in their school and throughout the community.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 8.37 When appropriate, the teacher uses verbal and nonverbal behavior that indicates caring for students							
Teacher Compliments on academic/personal accomplishments; uses informal conversations Uses humor, smiles, nods, puts hands on shoulders when appropriate				Student Describes teacher as someone who cares about them Responds to verbal and nonverbal interactions			
MDQ 9.39 The teacher exhibits behaviors that demonstrate value and respect for low expectancy students							
Teacher Provides low expectancy with nonverbal indications they are respected and valued Makes eye contact, smiles, appropriate physical contact, playful dialogue Does not allow negative comments about low expectancy students Knows which students are the low expectancy students				Student Says teacher cares for all students Treats other students with respect			
MDQ 9.40 The teacher asks questions of low expectancy students with the same frequency and depth as high expectancy students							
Teacher Makes sure low expectancy students are asked questions at the same rate Makes sure low expectancy students are asked complex questions at the same rate				Student Say the teacher expects everyone to participate Say the teachers asks difficult questions of every student			
MDQ 9.41 The teacher probes incorrect answers of low expectancy students in the same manner as that of the high expectancy students							
Teacher Asks for further explanation; allows them to collect their thoughts and goes back to them Rephrases questions when low expectancy students provide an incorrect answer Breaks a question into smaller and simpler parts when questions are answered incorrectly				Student Say teacher won't let you off the hook and won't give up on you Says teacher helps them answer questions successfully			

Teacher Growth Guide 6.2 – Marzano Strategies

Standard 6: Effective Communication

Quality Indicator 2: Sensitivity to culture, gender, intellectual and physical differences

Emerging		Developing		Proficient		Distinguished	
6E2) The emerging teacher... Is aware of personal bias in regard to differences in culture, gender, intellectual, and physical ability in classroom and its impact on student learning.		6D2) The developing teacher also... Demonstrates and promotes sensitivity to differences in culture, gender, intellectual, and physical ability in classroom communication and in responses to students' communications.		6P2) The proficient teacher also... Helps students to develop a respect for all through sensitivity to cultural, gender, intellectual and physical ability differences in classroom communication.		6S2) The distinguished teacher also... Promotes a respect for all and sensitivity to cultural, gender, intellectual and physical ability differences throughout the school and community.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 5.30 The teacher uses friendly controversy techniques to maintain student engagement							
Teacher Structures mini-debates about the content Has students examine multiple perspectives and opinions about the content Elicits different opinions on content from members of the class				Student Engages in friendly controversy activities with enhanced engagement Describes friendly controversy activities as stimulating, fun, etc. Explains how friendly controversy helped them understand content better			
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community							
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons				Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background			

Teacher Growth Guide 6.3 – Marzano Strategies

Standard 6: Effective Communication

Quality Indicator 3: Learner expression in speaking, writing and other media

Emerging		Developing		Proficient		Distinguished	
6E3) The emerging teacher... Supports and expands learner expression in speaking, writing, listening, and other media ensuring it adheres to district policy.		6D3) The developing teacher also... Develops students in directing their own safe, free and respectful expression in speaking, writing, listening, and other media ensuring it adheres to district policy.		6P3) The proficient teacher also... Promotes respect, safe and free expression in the school and the larger school community ensuring it adheres to district policy.		6S3) The distinguished teacher also... Shares with others strategies for promoting respect, safe and free expression in the school and the larger school community ensuring it adheres to district policy.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information							
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment				Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions			
MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught							
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences				Student Volunteers answers to inferential questions Provides explanations and proofs for inferences			
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways							
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics				Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson			

MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better
MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim
MDQ 3.20 The teacher engages students in revision of previous knowledge about content addressed in previous lessons	
Teacher Engages whole class in examination of how the current lesson changed perceptions about the previous content and has students explain how their understanding has changed	Student Makes corrections to information previously recorded about content Explains previous error or misconceptions they had about content
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed
MDQ 8.36 The teacher uses students' interests and background to produce a climate of acceptance and community	
Teacher Has side discussions with students about events in their lives or topics of interest Builds student interests into lessons	Student Describes teacher as someone who knows them & is interested in them; accepts them Responds that teacher demonstrates understanding of their interests and background

Teacher Growth Guide 6.4 – Marzano Strategies

Standard 6: Effective Communication

Quality Indicator 4: Technology and media communication tools

Emerging		Developing		Proficient		Distinguished	
6E4) The emerging teacher... Demonstrates knowledge and understanding of technology and media communication tools for purposeful instruction.		6D4) The developing teacher also... Implements instruction that encourages technology and media communication tools use for learning and models those techniques.		6P4) The proficient teacher also... Facilitates the students' effective use of technology and media communication tools.		6S4) The distinguished teacher also... Either mentors, or assists students in mentoring, members of the school and community in the use of technology and media communication tools.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 2.6 The teacher identifies a lesson or part of a lesson as involving important (critical or non-critical) information to which students should pay particular attention							
Teacher Explains why upcoming content is important Cues students using tone of voice, body position or level of excitement				Student Can describe the level of importance and why it is important to pay attention to it Visibly adjusts their level of engagement			
MDQ 2.7 The teacher organizes students into small groups to facilitate the processing of new information							
Teacher Has established routines for student grouping and student interaction in groups Uses ad hoc groups including dyads, triads, and small groups up to 5 members				Student Moves into groups in orderly fashion and understands appropriate expectations and Visibly adjusts their level of engagement			
MDQ 2.8 The teacher engages students in activities that help them link what they already know to the new content about to be addressed and facilitates these linkages							
Teacher Uses preview questions, reminds students what they know, provides and advance organizer Has students brainstorm, uses anticipation guide and/or motivational hook/launching activity				Student Can explain linkages or prior knowledge and make predictions about upcoming content Engages in previewing activities and can give a purpose for what they are about to learn			
MDQ 2.9 Based on student needs, the teacher breaks the content into small chunks (i.e. digestible bites) of information that can be easily processed by students							
Teacher Stops at strategic points in a verbal presentation, video, presentation or demonstration or as students are reading information or aloud orally				Student Can explain why the teacher is stopping at various points Appears to know what is expected of them when the teacher stops at strategic points			
MDQ 2.10 During breaks in the presentation of content, the teacher engages students in summarizing, prediction and questioning to process new information							
Teacher Has group members summarize new information Employs process strategies like jigsaw, reciprocal teaching and concept attainment				Student Volunteer predictions, clarification questions, and can explain what they just learned Groups discuss content asking and answering questions with each other or making predictions			

MDQ 2.11 The teacher asks inferential questions or engages students in activities that require elaborative inferences that go beyond what was explicitly taught	
Teacher Asks explicit questions requiring students to make elaborate inferences about content Asks students to explain or defend their inferences Presents situations or problems that require inferences	Student Volunteers answers to inferential questions Provides explanations and proofs for inferences
MDQ 2.12 The teacher engages students in activities that help them record their understanding of new content in linguistic ways and/or represent the content in nonlinguistic ways	
Teacher Asks students to summarize the information or generate notes identifying critical information Asks students to create graphic organizers, pictures, pictographs, flow charts, or mnemonics	Student Summaries, notes and nonlinguistic representations include critical content Can explain main points of the lesson
MDQ 2.13 The teacher engages students in activities that help them reflect on their learning and the learning process	
Teacher Asks students to state or record what they are clear about or what they are confused about Asks students to describe how hard they tried and how they could've enhanced their learning	Student Can explain confusion or clarity and describe how hard they tried Can explain what they could have done to enhance their learning
MDQ 3.14 The teacher engages students in a brief review of content that highlights the critical information	
Teacher Begins lesson with a brief review of content Reviews using summary, using previous information, demonstration, or brief practice test	Student Can describe the previous content on which the new lesson is based Response to class activities indicate they recall previous content
MDQ 3.15 The teacher uses grouping in ways that facilitate practicing and deepening knowledge	
Teacher Organizes into groups with the expressed idea of deepening knowledge of informal content Organizes into groups with the expressed idea of practicing a skill, strategy or process	Student Can explain how group work supports their learning When in groups, asks others questions or obtains feedback for their peers
MDQ 3.16 As appropriate, the teacher designs homework to deepen students' knowledge of informational content or to practice a skill, strategy or process	
Teacher Communicates clear purpose for homework Extends an activity that was begun in class to provide student with more time Crafts an assignment to allow students to practice and deepen knowledge independently	Student Can describe how homework will deepen understanding of informational content or help them to practice a skill, strategy or process Ask clarifying questions of the homework that help them understand the purpose
MDQ 3.17 When content is informational, the teacher helps students deepen their knowledge by examining similarities and differences	
Teacher Uses comparison, classifying, analogy or metaphor activities Asks students to summarize what they learned or explain how this helped their understanding	Student Can explain and identify similarities and differences Can explain how similarities and differences help them understand the content better
MDQ 3.18 When content is informational, the teacher helps students deepen their knowledge by examining their own reasoning or the logic of the information as presented to them	
Teacher Asks students to examine errors or informal fallacies (faulty logic, attacks, weak references) Asks students to examine the strength of support presented for a claim	Student Can describe errors or informal fallacies in information Can explain the overall structure of an argument presented to support a claim
MDQ 3.19 When the content involves a skill, strategy or process, the teacher engages students in practice activities that help them develop fluency	
Teacher Engages students in massed and distributed activities appropriate to current ability Uses guided practice if students can't perform skill/strategy/process; independent if they can	Student Performs the skill, strategy or process with increased confidence Performs the skill, strategy or process with increased competence
MDQ 3.20 The teacher engages students in revision of previous knowledge about content addressed in previous lessons	
Teacher Engages whole class in examination of how the current lesson changed perceptions about the previous content and has students explain how their understanding has changed	Student Makes corrections to information previously recorded about content Explains previous error or misconceptions they had about content

MDQ 4.21 The teacher organizes the class in such a way as to facilitate students working on complex tasks that require them to generate and test hypotheses	
Teacher Establishes the need to generate and test hypotheses Organizes students into groups to generate and test hypotheses	Student Can describe the importance of generating and testing hypotheses Can explain how groups support their learning and help them generate and test hypotheses
MDQ 4.22 The teacher engages them in complex tasks (decision-making, problem-solving, experimental inquiry, investigation) that require them to generate and test hypotheses	
Teacher Engages students with explicit tasks (decision-making, problem-solving, investigation, etc.) Facilitates students generating their own or group task requiring generating and testing	Student Clearly are working on tasks and can explain the hypothesis they are testing Can explain whether their hypothesis was confirmed or disconfirmed
MDQ 4.23 The teacher acts as a resource provider and guide as students engage in cognitively complex tasks	
Teacher Circulates the room and provides easy access to himself/herself Volunteers resources and guidance as needed by entire class, groups, or individual students	Student Seeks out the teacher for advice and guidance Can explain how the teacher provides assistance and guidance

Teacher Growth Guide 7.1 – Marzano Strategies

Standard 7: Student Assessment and Data Analysis

The teacher understands and uses formative and summative assessment strategies to assess the learner’s progress and uses both classroom and standardized assessment data to plan ongoing instruction. The teacher monitors the performance of each student and devises instruction to enable students to grow and develop, making adequate academic progress.

Quality Indicator 1: Effective use of assessments

Emerging		Developing		Proficient		Distinguished	
7E1) The emerging teacher... Demonstrates the use of formal and informal assessments to determine progress towards specific learning goals.		7D1) The developing teacher also... Effectively uses multiple formal and informal student assessments to address specific learning goals, including modifications for students with special needs.		7P1) The proficient teacher also... Identifies student’s prior knowledge, progress during instruction and achievement at the end of an instructional unit to demonstrate individual and whole class learning.		7S1) The distinguished teacher also... Shares knowledge and expertise with others on the effective use of assessments to generate data demonstrating progress toward individual and whole class learning.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MDQ 1.3 The teacher provides students with recognition of their current status and their knowledge gain relative to the learning goal							
Teacher Acknowledges students who have achieved a certain score; made gains in knowledge/skill Celebrates success with a show of hands, certification of success, notify parent, applause				Student Shows signs of pride regarding their accomplishments in the class Say they want to continue making progress			

Teacher Growth Guide 7.2 – Marzano Strategies

Standard 7: Student Assessment and Data Analysis

Quality Indicator 2: Assessment data to improve learning

Emerging		Developing		Proficient		Distinguished	
7E2) The emerging teacher... Demonstrates basic strategies for accessing, analyzing and appropriately using information and assessment results to improve learning activities.		7D2) The developing teacher also... Reviews student trend data and growth in learning through a comparison of student work (i.e. pre-/post- test results or similar mechanisms) to inform instructional decisions.		7P2) The proficient teacher also... Uses tools such as rubrics, scoring guides, performance analyses, etc., that clearly identify the knowledge and skills intended for students to acquire in well-defined learning goals.		7S2) The distinguished teacher also... Is able to model and/or share information and expertise with others on the use of a wide variety of assessments and evidence that they improved the effectiveness of instruction.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			

Teacher Growth Guide 7.3 – Marzano Strategies

Standard 7: Student Assessment and Data Analysis

Quality Indicator 3: Student-led assessment strategies

Emerging		Developing		Proficient		Distinguished	
7E3) The emerging teacher... Uses assessment strategies and timely descriptive feedback to involve learners in some personal-goal setting and self-assessment activities		7D3) The developing teacher also... Purposefully teaches students to use assessment data to think about their own learning, including setting personal learning goals.		7P3) The proficient teacher also... Adjusts and adapts strategies for teaching students how to use assessment data in thinking about their own learning, including setting personal goals, based on unique student strengths, needs and learning styles.		7S3) The distinguished teacher also... Model for others how to provide timely descriptive feedback and the engaging of students in establishing personal learning goals, self-assessment, and using evidence to report on their own progress to the teacher, parents, and others.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric

MDQ 1.3 The teacher provides students with recognition of their current status and their knowledge gain relative to the learning goal							
Teacher Acknowledges students who have achieved a certain score; made gains in knowledge/skill Celebrates success with a show of hands, certification of success, notify parent, applause				Student Shows signs of pride regarding their accomplishments in the class Say they want to continue making progress			

Teacher Growth Guide 7.4 – Marzano Strategies

Standard 7: Student Assessment and Data Analysis

Quality Indicator 4: Effect of instruction on individual/class learning

Emerging		Developing		Proficient		Distinguished	
7E4) The emerging teacher... Observes the effect of class instruction on individual and whole class learning.		7D4) The developing teacher also... Collects relevant information and data about current instruction to plan future instruction.		7P4) The proficient teacher also... Engages in ongoing assessment of progress of individual students and whole class in order to advance each individual's learning of instructional objectives through modifications to instructional strategies.		7S4) The distinguished teacher also... Is capable of modeling for others the use of ongoing, consistent assessment throughout the instructional process to gather data about the effect of instruction to enhance individual and class achievement.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MD3.51 The teacher determines how effective a lesson or unit of instruction was in terms of enhancing student achievement & identifies causes of success or difficulty							
Teacher Gathers and keeps records of his or her evaluations of individual lessons/units Explains the strengths and weaknesses of specific units/lessons Explains the alignment of the assessment tasks and the learning goals							
MD3.52 The teacher determines the effectiveness of specific instructional strategies regarding the achievement of subgroups of students and identifies reasons for discrepancies							
Teacher Gathers/keeps evidence of the effects of specific classroom strategies and behaviors on specific categories of students Provides a written analysis on specific causes of success or difficulty							

Teacher Growth Guide 7.5 – Marzano Strategies

Standard 7: Student Assessment and Data Analysis

Quality Indicator 5: Communication of student progress and maintaining records

Emerging		Developing		Proficient		Distinguished	
7E5) The emerging teacher... Communicates general information about student progress knowledgeably, responsibly, and ethically based on appropriate indicators, to students, families, and/or colleagues.		7D5) The developing teacher also... Uses evidence to communicate student progress, knowledgeably and responsibly, based on appropriate indicators.		7P5) The proficient teacher also... Uses holistic evidence from multiple data points to detail student achievement continuously throughout instruction.		7S5) The distinguished teacher also... Is able to mentor colleagues in the use of student performance evidence and managing records to effectively communicate student progress.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.1 The teacher provides a clearly stated learning goal accompanied by scale or rubric that describes levels of performance relative to the learning goal							
Teacher Posts a learning goal so all students can see it Uses a goal that is a clear statement of knowledge/information, not an activity or assignment Makes reference to the goal throughout the lesson and may use a scale or rubric				Student Can explain the learning goal and how current activities relate to it Can explain the levels of performance articulated in the scale or rubric			
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MDQ 1.3 The teacher provides students with recognition of their current status and their knowledge gain relative to the learning goal							
Teacher Acknowledges students who have achieved a certain score; made gains in knowledge/skill Celebrates success with a show of hands, certification of success, notify parent, applause				Student Shows signs of pride regarding their accomplishments in the class Say they want to continue making progress			
MD3.51 The teacher determines how effective a lesson or unit of instruction was in terms of enhancing student achievement & identifies causes of success or difficulty							
Teacher Gathers and keeps records of his or her evaluations of individual lessons/units Explains the strengths and weaknesses of specific units/lessons				Explains the alignment of the assessment tasks and the learning goals			
MD3.52 The teacher determines the effectiveness of specific instructional strategies regarding the achievement of subgroups of students and identifies reasons for discrepancies							
Teacher Gathers/keeps evidence of the effects of specific classroom strategies and behaviors on specific categories of students Provides a written analysis on specific causes of success or difficulty							

Teacher Growth Guide 7.6 – Marzano Strategies

Standard 7: Student Assessment and Data Analysis

Quality Indicator 6: Collaborative data analysis

Emerging		Developing		Proficient		Distinguished	
7E6) The emerging teacher... Engages in a collaborative process of data analysis with colleagues at the grade, department and school level.		7D6) The developing teacher also... Works in teams to share and analyze data to measure accomplishment of curricular goals to inform grade-department level and/or school-wide decisions.		7P6) The proficient teacher also... Helps to establish, maintain and/or participate in professional learning communities to share and analyze data to measure accomplishment of curricular goals and plan for curricular modification.		7S6) The distinguished teacher also... Acts in a leadership position when working in teams to share and analyze data to measure accomplishment of curricular goals and to use this information to inform his/her instruction.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MDQ 1.2 The teacher facilitates tracking of student progress on one or more learning goals using a formative approach to assessment							
Teacher Helps students track their individual progress on the learning goal Uses formal/informal means to assign scores to students (class) on scale or rubric				Student Can describe their status relative to the learning goal using the rubric or scale Systematically updates their status on the learning goal			
MD3.51 The teacher determines how effective a lesson or unit of instruction was in terms of enhancing student achievement & identifies causes of success or difficulty							
Teacher Gathers and keeps records of his or her evaluations of individual lessons/units Explains the strengths and weaknesses of specific units/lessons Explains the alignment of the assessment tasks and the learning goals							
MD3.52 The teacher determines the effectiveness of specific instructional strategies regarding the achievement of subgroups of students and identifies reasons for discrepancies							
Teacher Gathers/keeps evidence of the effects of specific classroom strategies and behaviors on specific categories of students Provides a written analysis on specific causes of success or difficulty							

Teacher Growth Guide 8.1 – Marzano Strategies

Standard 8: Professionalism

The teacher is a reflective practitioner who continually assesses the effects of choices and actions on others. The teacher actively seeks out opportunities to grow professionally in order to improve learning for all students.

Quality Indicator 1: Self-assessment and improvement

Emerging		Developing		Proficient		Distinguished	
8E1) The emerging teacher...		8D1) The developing teacher also...		8P1) The proficient teacher also...		8S1) The distinguished teacher also...	
Generally uses self-assessment and problem-solving strategies to reflect on practice in order to influence students' growth and learning..		Consistently engages in reflective practice and consistently applies this to his/her instructional process and to modify future instruction		Continuously engages in a variety of self-assessment and problem-solving strategies which have implications for student growth and learning, within the classroom and the larger school environment.		Models and/or serves as a mentor, in how to engage in reflective practice and in the use of, policies about, and training for using assessment data and other sources of information about student performance.	
Score = 0	1	2	3	4	5	6	7
Not Using	Beginning		Developing		Applying		Innovating
Strategy is called for but not exhibited	Strategy is done incorrectly or with parts missing		Strategy is done correctly		Strategy is done correctly and its impact/effectiveness monitored		Adapts/creates new strategies for unique student needs/situations
MD3.50 The teacher identifies specific strategies and behaviors on which to improve from Domain 1							
Teacher Identifies specific areas of strength and weakness within domain 1 Specifically identifies focus areas for improvement							
MD3.51 The teacher determines how effective a lesson or unit of instruction was in terms of enhancing student achievement & identifies causes of success or difficulty							
Teacher Gathers and keeps records of his or her evaluations of individual lessons/units Explains the strengths and weaknesses of specific units/lessons Explains the alignment of the assessment tasks and the learning goals							
MD3.52 The teacher determines the effectiveness of specific instructional strategies regarding the achievement of subgroups of students and identifies reasons for discrepancies							
Teacher Gathers/keeps evidence of the effects of specific classroom strategies and behaviors on specific categories of students Provides a written analysis on specific causes of success or difficulty							
MD3.53 The teacher develops a written growth and development plan with specific and measurable goals, action steps, manageable timelines & appropriate resources							
Teacher Constructs a growth plan outlining measurable goals, action steps, timelines and resources				Describes the growth plan and can articulate progress			

MD3.54 The teacher monitors and charts progress toward goals using established action plans, key milestones and timelines	
Teacher Outlines a method for charting progress toward established goals supported by evidence Can describe progress toward meeting the goals outlined in the plan supported by evidence	
MD4.57 The teacher seeks help and input from colleagues regarding specific classroom strategies and behaviors	
Teacher Keeps track of specific situations during which he/she sought mentorship Actively seeks help and input in PLC meetings	Teacher Actively seeks help and input from appropriate school personnel to address issues that impact instruction
MD4.58 The teacher provides other teachers with help and input regarding specific classroom strategies and behaviors	
Teacher Keeps track of specific situations during which he/she mentored other teachers Contributes and shares expertise and new ideas with colleagues to enhance learning	Teacher Serves as a role model regarding specific classroom strategies and behaviors Describes situations in which he/she has mentored colleagues

Teacher Growth Guide 8.2 – Marzano Strategies

Standard 8: Professionalism

Quality Indicator 2: Professional learning

Emerging		Developing		Proficient		Distinguished	
8E2) The emerging teacher... Is aware of and utilizes resources available for professional learning.		8D2) The developing teacher also... Applies knowledge gained from a variety of sources to the benefit of students in the classroom.		8P2) The proficient teacher also... Shares new knowledge and expertise with colleagues to benefit the learning of students in multiple classrooms.		8S2) The distinguished teacher also... Evaluates, procures and creates resources for professional development and actively participates in professional development in the larger professional community.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations

MD3.53 The teacher develops a written growth and development plan with specific and measureable goals, action steps, manageable timelines & appropriate resources							
Teacher Constructs a growth plan outlining measureable goals, action steps, timelines and resources Describes the growth plan and can articulate progress							
MD3.54 The teacher monitors and charts progress toward goals using established action plans, key milestones and timelines							
Teacher Outlines a method for charting progress toward established goals supported by evidence				Can describe progress toward meeting the goals outlined in the plan supported by evidence			

Teacher Growth Guide 8.3 – Marzano Strategies

Standard 8: Professionalism

Quality Indicator 3: Professional rights, responsibilities and ethical practices

Emerging			Developing		Proficient		Distinguished	
8E3) The emerging teacher... Demonstrates professionalism and ethical behavior by adhering to the code of conduct and aligning classroom practices to district policies and school procedures.			8D3) The developing teacher also... Consistently exhibits professionalism in all situations and ensures that classroom practices align to district policies and school procedures.		8P3) The proficient teacher also... Assists colleagues by consistently modeling professionalism throughout the school and district and the broader community.		8S3) The distinguished teacher also... Influences the framing, revision and advocating of policies and procedures that promotes ethical and professional behavior of all educators.	
Score = 0	1	2	3	4	5	6	7	
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations	
MD4.58 The teacher provides other teachers with help and input regarding specific classroom strategies and behaviors								
Teacher Keeps track of specific situations during which he/she mentored other teachers Contributes and shares expertise and new ideas with colleagues to enhance learning					Teacher Serves as a role model regarding specific classroom strategies and behaviors Describes situations in which he/she has mentored colleagues			
MD4.60 The teacher is aware of the district's and school's initiatives and participates in them in accordance with his or her talents and availability								
Teacher Participates in school activities and events as appropriate to support students & families Serves on school/district committees and participates in PD opportunities Works to achieve school and district improvement goals					Teacher			

Teacher Growth Guide 9.1 – Marzano Strategies

Standard 9: Professional Collaboration

The teacher has effective working relationships with students, parents, school colleagues, and community members.

Quality Indicator 1: Induction and collegial activities

Emerging		Developing		Proficient		Distinguished	
9E1) The emerging teacher... Engages in supporting the school’s vision, mission, values and goals, participates in curriculum and staff development, and works with their trained mentor to strengthen relationships in the school and community.		9D1) The developing teacher also... Contributes to achieving the mission, vision, values and goals, including monitoring and evaluating progress toward these goals, and other school improvement efforts.		9P1) The proficient teacher also... Actively engages in relationship building efforts in the school, district and community and contributes and shares knowledge and expertise in order to assist in the collective improvement of professional practice.		9S1) The distinguished teacher also... Informally (or formally as a mentor) is available as a resource to colleagues in the school and/or district in achieving a shared mission, vision, values and goals and relationship building efforts through collegial activities and the induction process.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MD4.58 The teacher provides other teachers with help and input regarding specific classroom strategies and behaviors							
Teacher Keeps track of specific situations during which he/she mentored other teachers Contributes and shares expertise and new ideas with colleagues to enhance learning				Teacher Serves as a role model regarding specific classroom strategies and behaviors Describes situations in which he/she has mentored colleagues			
MD4.59 The teacher is aware of the district’s and school’s rules and procedures and adheres to them							
Teacher Performs assigned duties and follows policies, regulations, and procedures Maintains accurate records and fulfills responsibilities in a timely manner				Teacher Understands legal issues related to students and families and demonstrates personal integrity			
MD4.60 The teacher is aware of the district’s and school’s initiatives and participates in them in accordance with his or her talents and availability							
Teacher Participates in school activities and events as appropriate to support students & families Serves on school/district committees and participates in PD opportunities Works to achieve school and district improvement goals				Teacher			

Teacher Growth Guide 9.2 – Marzano Strategies

Standard 9: Professional Collaboration

Quality Indicator 2: Collaborating to meet student needs

Emerging		Developing		Proficient		Distinguished	
9E2) The emerging teacher... Identifies ways to work with others across the system to provide needed services to support individual learners.		9D2) The developing teacher also... Works with colleagues and administrators at the school level and in the larger professional community to develop strategic, school-based systems to address student needs.		9P2) The proficient teacher also... Consistently works with colleagues and administrators to develop strategic, school-based systems to address student needs and assists in monitoring the effectiveness of those systems.		9S2) The distinguished teacher also... Is capable of taking a leadership role or serving as an informal resource in working with the larger professional community in how to work with others across the system to identify and provide needed services to support individual learners.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MD4.55 The teacher interacts with other teachers in a positive manner to promote and support student learning							
Teacher Works cooperatively with appropriate school personnel to address issues impact learning Establishes working relationships that demonstrate integrity, confidentiality, respect, flexibility, fairness and trust				Teacher Accesses available expertise and resources to support student learning needs Describes positive interactions with colleagues to promote and support student learning Describes situations where negative conservations of other teachers have been extinguished			
MD4.56 The teacher interacts with students and parents in a positive manner to foster learning and promote positive home/school relationships							
Teacher Fosters collaborative partnerships with parents to enhance student success in a manner that demonstrate integrity, confidentiality, respect, flexibility, fairness and trust Ensures consistent and timely communication with parents regarding expectations & progress Encourages parent involvement in classroom and school activities				Teacher Uses multiple means and modalities to communicate with families Responds to requests for support, assistance and/or clarification promptly Respects and maintains confidentiality of student/family information Demonstrates awareness and sensitivity to social, cultural and language background			
MD4.58 The teacher provides other teachers with help and input regarding specific classroom strategies and behaviors							
Teacher Keeps track of specific situations during which he/she mentored other teachers Contributes and shares expertise and new ideas with colleagues to enhance learning				Teacher Serves as a role model regarding specific classroom strategies and behaviors Describes situations in which he/she has mentored colleagues			

Teacher Growth Guide 9.3 – Marzano Strategies

Standard 9: Professional Collaboration

Quality Indicator 3: Cooperative partnerships in support of student learning

Emerging		Developing		Proficient		Distinguished	
9E3) The emerging teacher... Develops relationships with colleagues and cooperative partnerships with students and families to support students' learning and well-being.		9D3) The developing teacher also... With colleagues, creates and cultivates new partnerships with students, families and community members to support students' learning and well-being.		9P3) The proficient teacher also... Consistently engages with colleagues and administrators at the school and district level to develop, maintain and further partnerships with students, families and community members to support students' learning and well-being.		9S3) The distinguished teacher also... Takes an active leadership role or serve as an informal resource at the school and district level in developing partnerships with students, families and community members to support students' learning and well-being.	
Score = 0	1	2	3	4	5	6	7
Not Using Strategy is called for but not exhibited	Beginning Strategy is done incorrectly or with parts missing		Developing Strategy is done correctly		Applying Strategy is done correctly and its impact/effectiveness monitored		Innovating Adapts/creates new strategies for unique student needs/situations
MD4.55 The teacher interacts with other teachers in a positive manner to promote and support student learning							
Teacher Works cooperatively with appropriate school personnel to address issues impact learning Establishes working relationships that demonstrate integrity, confidentiality, respect, flexibility, fairness and trust				Teacher Accesses available expertise and resources to support student learning needs Describes positive interactions with colleagues to promote and support student learning Describes situations where negative conservations of other teachers have been extinguished			
MD4.56 The teacher interacts with students and parents in a positive manner to foster learning and promote positive home/school relationships							
Teacher Fosters collaborative partnerships with parents to enhance student success in a manner that demonstrate integrity, confidentiality, respect, flexibility, fairness and trust Ensures consistent and timely communication with parents regarding expectations & progress Encourages parent involvement in classroom and school activities Demonstrates awareness and sensitivity to social, cultural and language backgrounds				Teacher Uses multiple means and modalities to communicate with families Responds to requests for support, assistance and/or clarification promptly Respects and maintains confidentiality of student/family information			

Research and Proven Practices of Dr. John Hattie

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Introduction to the research of John Hattie

John Hattie is a Professor of Education and Director of the Visible Learning Labs, University of Auckland, New Zealand. He has piloted more than 30 million dollars in research grants, has published over 350 articles, 300 conference papers, twelve books and supervised close to 200 thesis students. As creator of asTTle (Assessment Tools for Teaching and Learning) and Director of the Visible Learning Laboratories, Dr. Hattie is recognized and highly regarded worldwide for his research in education, including the field of assessment and evaluation. His book, *Visible Learning: A Synthesis of Over 800 Meta-Analyses on Achievement* has attracted considerable attention across the professional educator world.

Visible Learning is the result of 15 years of research into the influences on achievement in school-aged students. Dr. Hattie's meta-analysis of more than 800 meta-analyses has been recognized as a singular landmark in educational research and the single largest assembly of research in the world, which lead to the development of the Visible Learning concept. Dr. Hattie's study aggregated, correlated and ranked those factors that most improved learning outcomes. Meta-analysis showed that feedback, followed by a student's prior cognitive ability and the trust built by teachers with their students, as the most important factors in effective learning.

A crosswalk is provided here linking Missouri's Teacher Standards and Quality Indicators to the influences articulated in the research of John Hattie. In addition, a quick reference document is provided which articulates rankings of aligned quality indicators. This might provide suggestion as to which of Missouri's Quality Indicators for the teacher could potentially provide greater impact on student achievement.

Hattie, J. (2009). *Visible learning: A synthesis of over 800 meta-analyses relating to achievement*. New York: Routledge.

Title	Description	ST 1					ST 2						ST 3			ST 4			ST 5			ST 6				ST 7						ST 8			ST 9		
		1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3
Direct Instruction (d=0.82)	Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice	x	x		x				x		x				x				x	x						x											
Comprehensive Interventions for LDS (d=0.77)	Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition	x	x	x	x	x		x	x		x		x		x																						
Teacher Clarity (d=0.75)	Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions	x							x		x		x									x				x				x							
Reciprocal Teaching (d=0.74)	Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.	x			x													x						x	x				x								
Acceleration (d=0.72)	Very bright students (gifted) being accelerated through curricula																																				

Title	Description	ST 1					ST 2						ST 3			ST 4			ST 5			ST 6				ST 7						ST 8			ST 9			
		1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3	
Providing Worked Examples (d=0.57)	A form of demonstrating to students what success looks like; typically consist of a problem statement and the appropriate steps to a solution. Three steps: introductory phase, acquisition/training phase, test phase (assess learning). Reduces cognitive load for students such that they concentrate on the processes that lead to the correct answer and not just providing an answer.	x							x		x		x																									
Peer tutoring (d=0.55)	Students teaching each other (peer-explaining, peer-checking, peer-assessing); students move to being teachers of themselves										x							x											x									
Class environment (cohesion) (d=0.53)	Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains									x	x	x						x	x		x		x						x									x
Peer effects (d=0.53)	Helping, tutoring, providing friendship, giving feedback, increasing the feeling as school is a place they want to come											x						x			x				x													
Challenge of Goals (d=0.52)	Students being given challenging yet achievable learning goals; teachers set challenging rather than “do your best:		x			x						x						x																				

Title	Description	ST 1					ST 2						ST 3			ST 4			ST 5			ST 6				ST 7						ST 8			ST 9					
		1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3			
Mastery Learning (d=0.50)	Tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes		x		x				x		x																													
Student disposition to learn (d=0.48)	Student motivation; students feeling in control of their learning experience; removing de-motivators						x	x			x								x																					
Questioning (d=0.41)	Most effective questions are high order “why, how and which is best” questions that cause students to really think; they need to be given time and do better in pairs than alone; important to analyze the questions students ask, too		x		x											x									x															
Advance organizers (d=0.37)	Bridging from previous knowledge to whatever is to be learned; linking old and new information; summary of material in advance and is referred back to often		x								x																													
Bilingual programs (d=0.37)	Two languages are used as a medium of instruction rather than immersion programs where students are instructed in one											x																												

Title	Description	ST 1					ST 2						ST 3			ST 4			ST 5			ST 6				ST 7						ST 8			ST 9								
		1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3						
Computer-assisted instruction (d=0.37)	Effects for this are gradually rising as instruction becomes more interactive, engaging and better designed; use of computers are more effective when there is a diversity of teaching strategies; teacher is pre-trained; multiple opportunities for learning; student is in control of learning; peer learning is optimized								x									x				x																					
Simulations and games (d=0.33)	Using a model or game to engage students in learning								x									x				x																					
Instructional media (d=0.30)	Using state of the art visuals; media								x									x				x																					
Testing (d=0.30)	Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective		x						x	x									x																								

Teacher Growth Guide 1.1 – Hattie Research

Standard 1: Content knowledge aligned with appropriate instruction.

The teacher understands the central concepts, structures, and tools of inquiry of the discipline(s) and creates learning experiences that make these aspects of subject matter meaningful and engaging for students.

Quality Indicator 1: Content knowledge and academic language

Emerging		Developing		Proficient		Distinguished	
1E1) The emerging teacher...		1D1) The developing teacher also...		1P1) The proficient teacher also...		1S1) The distinguished teacher also...	
Knows and can demonstrate breadth and depth of content knowledge and communicates the meaning of academic language.		Delivers accurate content learning experiences using supplemental resources and incorporates academic language into learning activities.		Infuses new information into instructional units and lessons displaying solid knowledge of the important concepts of the discipline.		Has mastery of taught subjects and continually infuses new research-based content knowledge into instruction.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice. Students' work is marked in class and they may do corrective work.							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							
Reciprocal Teaching (.74 effective size)							
Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.							
Providing Worked Examples (.57 effect size)							
A form of demonstrating to students what success looks like; typically consist of a problem statement and the appropriate steps to a solution. Three steps: introductory phase, acquisition/training phase, test phase (assess learning). Reduces cognitive load for students such that they concentrate on the processes that lead to the correct answer and not just providing an answer.							

Homework (.29 effect size)

Involves “tasks assigned to students by teachers that are meant to be carried out during non-school hours.” Effects twice as large for high as for junior high, and twice as large again for junior high as for elementary. Smallest effects in math. Largest in science and social studies with English in the middle. Effects greater for higher than lower ability students. Homework for some reinforces that they cannot learn by themselves. Can undermine motivation and internalize incorrect routines and strategies.

Growth Guide 1.2 – Hattie Research

Standard 1: Content knowledge, including varied perspectives, aligned with appropriate instruction.

Quality Indicator 2: Student engagement in subject matter

Emerging		Developing		Proficient		Distinguished	
1E2) The emerging teacher...		1D2) The developing teacher also...		1P2) The proficient teacher also...		1S2) The distinguished teacher also...	
Chooses from multiple sources to engage student interest and activity in the content.		Uses a variety of differentiated instructional strategies which purposefully engage students in content.		Uses specific instructional strategies to engage students and advance each individual student's learning as evidenced by student data.		Moves fluidly between differentiated instructional strategies based on the unique learning needs and situations of the students resulting in deeper student knowledge and understanding in the content area.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Spaced vs. Mass practice (.71 effect size)							
Frequency of different learning opportunities; three to four exposures to learning over several days before learning occurs. Spacing the practice of skills over a long period of time.							
Meta-cognitive strategies (.69 effect size)							
Thinking about thinking; plan how to approach a given learning task; evaluate progress; monitor comprehension. Includes knowledge about when and how to use particular strategies for learning or for problem-solving. Self-questioning is another meta-cognitive strategy.							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Self-verbalization / self-questioning (.64 effect size)							
Provides assistance in searching for needed information and increased understanding of the messages of the material to be learned. The internal dialogue of the learner is made verbal.							
Concept Mapping (.60 effect size)							
Involves development of graphical representations of the conceptual structure of content to be learned. Importance of concept mapping is in its emphasis on summarizing main ideas in what is to be learned. Assists in synthesizing and identifying major ideas, themes, and interrelationships.							
Challenge of Goals (.52 effect size)							
Students being given challenging yet achievable learning goals; teachers set challenging rather than "do your best:"							

Hattie, John. (2009) Visible Learning: A Synthesis of over 800 meta-analyses relating to Achievement. New York: Routledge.

Mastery Learning (.50 effect size)

Tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes

Questioning (.41 effect size)

Most effective questions are high order “why, how and which is best” questions that cause students to really think; they need to be given time and do better in pairs than alone; important to analyze the questions students ask, too

Advance Organizers (.37 effect size)

Bridging from previous knowledge to whatever is to be learned; linking old and new information; summary of material in advance that puts some sort of structure to it and is referred back to often

Testing (.30 effect size)

Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective

Homework (.29 effect size: Elementary .15 effect size; High School .64 effect size)

Positive effect is negatively related to duration; does not help with time management; problem-solving type is less effective due to the need for feedback; Involves “tasks assigned to students by teachers that are meant to be carried out during non-school hours.” Effects twice as large for high as for junior high, and twice as large again for junior high as for elementary. Smallest effects in math. Largest in science and social studies with English in the middle. Effects greater for higher than lower ability students. Homework for some reinforces that they cannot learn by themselves. Can undermine motivation and internalize incorrect routines and strategies.

Growth Guide 1.3 – Hattie Research

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 3: Disciplinary research and inquiry methodologies

Emerging			Developing		Proficient		Distinguished
1E3) The emerging teacher... Introduces students to various methods of inquiry and research methodologies.			1D3) The developing teacher also... Employs student- inquiry instructional approaches to build capacity for all students on research methodologies.		1P3) The proficient teacher also... Develops strategies to engage students in the processes of inquiry and research pertinent to the discipline being taught.		1S3) The distinguished teacher also... Acquires and shares new knowledge on inquiry and research methodologies that improve student learning.
Score = 0	1	2	3	4	5	6	7
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Homework (.29 effect size: Elementary .15 effect size; High School .64 effect size)							
Positive effect is negatively related to duration; does not help with time management; problem-solving type is less effective due to the need for feedback; Involves “tasks assigned to students by teachers that are meant to be carried out during non-school hours.” Effects twice as large for high as for junior high, and twice as large again for junior high as for elementary. Smallest effects in math. Largest in science and social studies with English in the middle. Effects greater for higher than lower ability students. Homework for some reinforces that they cannot learn by themselves. Can undermine motivation and internalize incorrect routines and strategies.							

Growth Guide 1.4 – Hattie Research

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 4: Interdisciplinary instruction

Emerging		Developing		Proficient		Distinguished	
1E4) The emerging teacher... Demonstrates the ability to make interdisciplinary content connections during instruction.		1D4) The developing teacher also... Implements meaningful interdisciplinary learning experiences that require students to apply disciplinary knowledge.		1P4) The proficient teacher also... Develops and implements interdisciplinary projects that guide students in analyzing the complexities of an issue or question using perspectives from varied disciplines.		1S4) The distinguished teacher also... Connects current interdisciplinary themes to their discipline(s) and weaves those themes into meaningful learning experiences through collaboration with students, colleagues, and/or real-world partners.	
Score = 0	1	2	3	4	5	6	7
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Reciprocal Teaching (.74 effect size)							
Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.							
Self-verbalization / self-questioning (.64 effect size)							
Provides assistance in searching for needed information and increased understanding of the messages of the material to be learned. The internal dialogue of the learner is made verbal.							
Challenge of Goals (.52 effect size)							
Students being given challenging yet achievable learning goals; teachers set challenging rather than “do your best:							
Mastery Learning (.50 effect size)							
tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes							
Questioning (.41 effect size)							
Most effective questions are high order “why, how and which is best” questions that cause students to really think; they need to be given time and do better in pairs than alone; important to analyze the questions students ask, too							

Growth Guide 1.5 – Hattie Research

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 5: Diverse social and cultural perspectives

Emerging		Developing		Proficient		Distinguished	
1E5) The emerging teacher... Facilitates students’ ability to develop balanced, diverse social and cultural perspectives by recognizing personal bias in lesson design		1D5) The developing teacher also... Designs instruction that incorporates global perspectives about national/regional/ethnic contributions to, and cultural differences/interpretations of the discipline.		1P5) The proficient teacher also Builds background knowledge from a variety of perspectives critical to fostering innovation, solving global challenges, and assuring a healthy democracy.		1S5) The distinguished teacher also... Facilitates student action to address real-world problems from a variety of perspectives related to the discipline that improves their community and/or world.	
Score = 0	1	2	3	4	5	6	7
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Homework (.29 effect size)							
Involves “tasks assigned to students by teachers that are meant to be carried out during non-school hours.” Effects twice as large for high as for junior high, and twice as large again for junior high as for elementary. Smallest effects in math. Largest in science and social studies with English in the middle. Effects greater for higher than lower ability students. Homework for some reinforces that they cannot learn by themselves. Can undermine motivation and internalize incorrect routines and strategies.							

Growth Guide 2.1 – Hattie Research

Standard 2: Student Learning, Growth and Development

The teacher understands how students learn, develop and differ in their approaches to learning. The teacher provides learning opportunities that are adapted to diverse learners and support the intellectual, social, and personal development of all students.

Quality Indicator 1: Cognitive, social, emotional and physical development

Emerging		Developing		Proficient		Distinguished	
2E1) The emerging teacher... Knows how to address developmental factors when making instructional decisions.		2D1) The developing teacher also... Applies understanding of child/adolescent growth and development markers to implement instruction that fosters development in students.		2P1) The proficient teacher also... Uses knowledge of individual growth and development to monitor and chart learner’s progress toward goals in each domain to meet current needs and lead to the next level of development.		2S1) The distinguished teacher also... Models and shares with colleagues an effective, continuous instructional cycle that assesses individual performance, identifies needs and provides instruction promoting individual advancement in each domain.	
Score = 0	1	2	3	4	5	6	7
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Teacher-Student relationships (.72 effect size)							
Interestingly, “when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students.” “Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student.” Facilitate student development by demonstrating that they care for the learning of each as a person							
Concept Mapping (.60 effect size)							
Involves development of graphical representations of the conceptual structure of content to be learned. Importance of concept mapping is in its emphasis on summarizing main ideas in what is to be learned. Assists in synthesizing and identifying major ideas, themes, and interrelationships.							

Study Skills (.59 effect size)

Develop task-related skills (note taking, summarizing); self-management learning skills (planning, monitoring, tactics, strategies); and non-cognitive features of learning like motivation/self-concept

Student disposition to learn (.48 effect size)

Student motivation; students feeling in control of their learning experience; removing de-motivators

Advance organizers (.37 effect size)

Bridging from previous knowledge to whatever is to be learned; linking old and new information; summary of material in advance and is referred back to often

Testing (.30 effect size)

Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective

Growth Guide 2.2 – Hattie Research

Standard 2: Student Learning, Growth and Development

Quality Indicator 2: Student goals

Emerging		Developing		Proficient		Distinguished	
2E2) The emerging teacher... Facilitates students' understanding of taking personal responsibility for their own learning.		2D2) The developing teacher also Uses strategies to enable students to set short- and long-term goals helping them to organize and reflect on their own learning.		2P2) The proficient teacher also... Use strategies to assist students in evaluating and modifying personal learning goals based on personal performance data.		2S2) The distinguished teacher also... Acquires and shares new knowledge on strategies for enabling students to expand and assume control of their own learning.	
Score = 0	1	2	3	4	5	6	7
Self-reported grades (1.44 effect size)							
Students knowledgeable about their chance of success; awareness of what they know about a subject and how they will likely perform							
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Teacher-Student relationships (.72 effect size)							
Interestingly, "when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students." "Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student." Facilitate student development by demonstrating that they care for the learning of each as a person							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Study Skills (.59 effect size)							
Develop task-related skills (note taking, summarizing); self-management learning skills (planning, monitoring, tactics, strategies); and non-cognitive features of learning like motivation/self-concept							
Student disposition to learn (.48 effect size)							
Student motivation; students feeling in control of their learning experience; removing de-motivators							
Testing (.30 effect size)							
Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective							

Growth Guide 2.3 – Hattie Research

Standard 2: Student Learning, Growth and Development

Quality Indicator 3: Theory of learning

Emerging		Developing		Proficient		Distinguished	
2E3) The emerging teacher... Applies theories of learning to create well-planned and delivered instruction.		2D3) The developing teacher also... Implements research-based instruction focused on production of learning for individual students.		2P3) The proficient teacher also... Delivers instruction that effectively produces learning gains for every student based on effective plans, grounded in theory/research, and designed to meet individual needs.		2S3) The distinguished teacher also... Continuously modifies instruction based on his/her own and emerging research and shares effective practices and modifications with colleagues.	
Score = 0	1	2	3	4	5	6	7
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Instructional Quantity (.84 effect size)							
The time (hours) in which the student is actively taught							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							
Spaced vs. Mass practice (.71 effect size)							
Frequency of different learning opportunities; three to four exposures to learning over several days before learning occurs. Spacing the practice of skills over a long period of time.							
Meta-cognitive strategies (.69 effect size)							
Thinking about thinking; plan how to approach a given learning task; evaluate progress; monitor comprehension. Self-questioning is an example.							
Self-verbalization / self-questioning (.64 effect size)							
Provides assistance in searching for needed information and increased understanding of the messages of the material to be learned. The internal dialogue of the learner is made verbal.							

Concept Mapping (.60 effect size)
Involves development of graphical representations of the conceptual structure of content to be learned. Importance of concept mapping is in its emphasis on summarizing main ideas in what is to be learned. Assists in synthesizing and identifying major ideas, themes, and interrelationships.
Providing Worked Examples (.57 effect size)
A form of demonstrating to students what success looks like; typically consist of a problem statement and the appropriate steps to a solution. Three steps: introductory phase, acquisition/training phase, test phase (assess learning). Reduces cognitive load for students such that they concentrate on the processes that lead to the correct answer and not just providing an answer.
Mastery Learning (.50 effect size)
Tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes
Advance Organizers (.37 effect size)
Bridging from previous knowledge to whatever is to be learned; linking old and new information; summary of material in advance that puts some sort of structure to it and is referred back to often
Computer-assisted instruction (.37 effect size)
Effects for this are gradually rising as instruction becomes more interactive, engaging and better designed; use of computers are more effective when there is a diversity of teaching strategies; teacher is pre-trained; multiple opportunities for learning; student is in control of learning; peer learning is optimized
Simulations and games (.33 effect size)
Using a model or game to engage students in learning
Instructional media (.30 effect size)
Using state of the art visuals; media

Growth Guide 2.4 – Hattie Research

Standard 2: Student Learning, Growth and Development

Quality Indicator 4: Differentiated lesson design

Emerging		Developing		Proficient		Distinguished	
2E4) The emerging teacher... Designs and implements instruction that considers the needs of students.		2D4) The developing teacher also... Designs and implements instruction that enables students to learn, grow, and develop because their needs are met in a positive learning environment.		2P4) The proficient teacher also... Through design and instruction, establishes an inviting and nurturing educational environment by creating a trusting relationship with students that engages them in learning.		2S4) The distinguished teacher also... Plans and cultivates the unique skills and talents of every child and encourages them to ask questions, take risks and enjoy learning.	
Score = 0	1	2	3	4	5	6	7
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Teacher-Student relationships (.72 effect size)							
Interestingly, “when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students.” “Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student.” Facilitate student development by demonstrating that they care for the learning of each as a person							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							

Growth Guide 2.5 – Hattie Research

Standard 2: Student Learning, Growth and Development

Quality Indicator 5: Prior experiences, multiple intelligences, strengths and needs

Emerging		Developing		Proficient		Distinguished	
2E5) The emerging teacher... Delivers a variety of lesson activities that address students' prior experiences, multiple intelligences, strengths and needs.		2D5) The developing teacher also... Creates and delivers lessons and instructional activities that address the individual needs of all learners and variation in prior knowledge and experiences, multiple intelligences, strengths, and needs.		2P5) The proficient teacher also... Adapts strategies to meet individual student needs based on student performance data and where the child is developmentally, cognitively, physically, and affectively to advance knowledge and skill development.		2S5) The distinguished teacher also... Acquires and shares authentic strategies for actively involving every student in advancing their own learning, building on their unique experience, intelligence, strengths and needs.	
Score = 0	1	2	3	4	5	6	7
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							
Teacher-Student relationships (.72 effect size)							
Interestingly, "when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students." "Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student." Facilitate student development by demonstrating that they care for the learning of each as a person							

Meta-cognitive strategies (.69 effect size)
Thinking about thinking; plan how to approach a given learning task; evaluate progress; monitor comprehension. Includes knowledge about when and how to use particular strategies for learning or for problem-solving. Self-questioning is another meta-cognitive strategy.
Remediation Feedback (.65 effect size)
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)
Self-verbalization / self-questioning (.64 effect size)
Provides assistance in searching for needed information and increased understanding of the messages of the material to be learned. The internal dialogue of the learner is made verbal.
Study Skills (.59 effect size)
Develop task-related skills (note taking, summarizing); self-management learning skills (planning, monitoring, tactics, strategies); and non-cognitive features of learning like motivation/self-concept
Providing Worked Examples (.57 effect size)
A form of demonstrating to students what success looks like; typically consist of a problem statement and the appropriate steps to a solution. Three steps: introductory phase, acquisition/training phase, test phase (assess learning). Reduces cognitive load for students such that they concentrate on the processes that lead to the correct answer and not just providing an answer.
Class environment (cohesion) (.53 effect size)
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains
Challenge of Goals (.52 effect size)
Students being given challenging yet achievable learning goals; teachers set challenging rather than "do your best:
Mastery Learning (.50 effect size)
Tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes
Student disposition to learn (.48 effect size)
Student motivation; students feeling in control of their learning experience; removing de-motivators
Testing (.30 effect size)
Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective

Growth Guide 2.6 – Hattie Research

Standard 2: Student Learning, Growth and Development

Quality Indicator 6: Language, culture, family and knowledge of community values

Emerging		Developing		Proficient		Distinguished	
2E6) The emerging teacher... Reviews demographic and biographical data of students to determine the variety of learning needs.		2D6) The developing teacher also... Modifies instruction in response to how students' learning is influenced by individual experience, talents, and prior learning, as well as language, culture, family and community values.		2P6) The proficient teacher also... Creates a learning climate which respects individual differences by using teaching approaches that incorporate and are sensitive to the multiple experiences of learners, their family, culture, and community.		2S6) The distinguished teacher also... Connects instruction to students' experiences creating a trusting environment by employing strategies that respect differing cultures and draws explicit connections during instruction / assignments that are related to students' experiences and culture.	
Score = 0	1	2	3	4	5	6	7
Teacher-Student relationships (.72 effect size)							
Interestingly, "when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students." "Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student." Facilitate student development by demonstrating that they care for the learning of each as a person							
Home Factors (.57 effect size)							
Includes issues such as social class, help with homework, extent to which the learner's education is thought to be important; includes measures of the socio-psychological environment and intellectual stimulation in the home. Most highly correlated factors with achievement were maternal involvement, variety and play materials.							
Peer tutoring (.55 effect size)							
Students teaching each other (peer-explaining, peer-checking, peer-assessing); students move to being teachers of themselves							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Peer effects (.53 effect size)							
Helping, tutoring, providing friendship, giving feedback, increasing the feeling as school is a place they want to come							
Parent Involvement (.51 effect size)							
Parent aspirations were the most important influence on student achievement whereas external rewards, homework surveillance, negative control and restrictions for unsatisfactory grades. Overall the higher hopes/expectations of parents the greater the students' academic achievement							
Bilingual programs (.37 effect size)							
Two languages are used as a medium of instruction rather than immersion programs where students are instructed in one							

Growth Guide 3.1 – Hattie Research

Standard 3: Curriculum Implementation

The teacher recognizes the importance of long-range planning and curriculum development. The teacher develops, implements, and evaluates curriculum based upon student, district and state standards data.

Quality Indicator 1: Implementation of curriculum standards

Emerging			Developing		Proficient		Distinguished
3E1) The emerging teacher... Makes informed decisions about instructional objects aligned to district mapping and pacing guides.			3D1) The developing teacher also... Consistently delivers a variety of learning experiences that are appropriate for curriculum and are aligned with state and district curriculum and assessments.		3P1) The proficient teacher also... Uses state/district curriculum guides with enough facility to anticipate skill gaps and/or misconceptions of students in order to deliver effective instruction.		3S1) The distinguished teacher also... Participates and/or demonstrates leadership for the evaluation and development of curriculum aligned to national, state, and district curriculum and assessments.
Not Present = 0	Weak = 1	Strong = 2	Weak = 3	Strong = 4	Weak = 5	Strong = 6	Exemplary = 7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							
Providing Worked Examples (.57 effect size)							
A form of demonstrating to students what success looks like; typically consist of a problem statement and the appropriate steps to a solution. Three steps: introductory phase, acquisition/training phase, test phase (assess learning). Reduces cognitive load for students such that they concentrate on the processes that lead to the correct answer and not just providing an answer.							

Growth Guide 3.2 – Hattie Research

Standard 3: Curriculum Implementation

Quality Indicator 2: Develop lessons for diverse learners

Emerging			Developing		Proficient		Distinguished
3E2) The emerging teacher... Implements lessons and activities aligned to the curriculum that recognizes the individual needs of diverse learners			3D2) The developing teacher also... Consistently implements lessons and activities that address the needs of diverse learners and responds to ongoing analysis of student performance based on multiple assessments and analysis of student needs.		3P2) The proficient teacher also... Evaluates the effectiveness of a variety of instructional strategies based on multiple assessment data, curriculum and an analysis of student needs.		3S2) The distinguished teacher also... Participates and/or demonstrates leadership in the development of instructional strategies and interventions to accomplish instructional goals based on multiple assessment data, curriculum and an analysis of student needs.
Not Present = 0	Weak = 1	Strong = 2	Weak = 3	Strong = 4	Weak = 5	Strong = 6	Exemplary = 7
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Acceleration (.72 effect size)							
Very bright students (gifted) being accelerated through curricula							
Testing (.30 effect size)							
Testing by itself is not as effective as remediation/feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective							

Growth Guide 3.3 – Hattie Research

Standard 3: Curriculum Implementation

Quality Indicator 3: Instructional goals and differentiated instructional strategies

Emerging		Developing		Proficient		Distinguished	
3E3) The emerging teacher... Uses differentiated instructional strategies to address student learning needs in meeting the objectives of the curriculum.		3D3) The developing teacher also... Systematically selects differentiated instructional strategies and content to meet student needs and enhance learning.		3P3) The proficient teacher also... Adjusts instructional goals and time and modifies instructional strategies, and content to meet students' needs and enhance learning.		3S3) The distinguished teacher also... Leads colleagues in discussions of instructional goals to identify methods for modifying instructional strategies, content, and adjusting time to meet students' needs and enhance learning.	
Score = 0	1	2	3	4	5	6	7
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Instructional Quantity (.84 effect size)							
The time (hours) in which the student is actively taught							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Comprehensive Interventions for LDS (.77 effect size)							
Combine direct instruction with strategy instruction with extended, deliberate practice; emphasis on meta-cognition							
Acceleration (.72 effect size)							
Very bright students (gifted) being accelerated through curricula							
Professional Development on student achievement (.51 effect size)							
Staff development and staff training sessions; Most effective included observations on actual classroom methods, microteaching, video/audio feedback, and practice							

Growth Guide 4.1 – Hattie Research

Standard 4: Critical Thinking

The teacher uses a variety of instructional strategies to encourage students' critical thinking, problem solving, and performance skills.

Quality Indicator 1: Instructional strategies leading to student engagement in problem-solving and critical thinking

Emerging		Developing		Proficient		Distinguished	
4E1) The emerging teacher... Selects various types of instructional strategies and appropriate resources to achieve instructional goals and teach students critical thinking skills.		4D1) The developing teacher also... Assures student growth with frequent instructional opportunities for students to use critical thinking and problem solving skills.		4P1) The proficient teacher also... Effectively applies a range of instructional techniques that require students to think critically and problem-solve.		4S1) The distinguished teacher also... Fluently uses a range of instructional techniques that require critical thinking; serves as a leader by offering constructive assistance and modeling the use of strategies, materials and technology to maximize learning.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Challenge of Goals (.52 effect size)							
Students being given challenging yet achievable learning goals; teachers set challenging rather than “do your best”							
Questioning (.41 effect size)							
Most effective questions are high order “why, how and which is best” questions that cause students to really think; they need to be given time and do better in pairs than alone; important to analyze the questions students ask, too							

Growth Guide 4.2 – Hattie Research

Standard 4: Critical Thinking

Quality Indicator 2: Appropriate use of instructional resources to enhance student learning

Emerging		Developing		Proficient		Distinguished	
4E2) The emerging teacher... Uses a variety of instructional resources to enhance the teaching and learning process.		4D2) The developing teacher also... Purposefully selects and uses a variety of developmentally appropriate instructional resources to enhance academic performance and technological literacy.		4P2) The proficient teacher also... Assesses the effectiveness of instructional resources and developmentally appropriate instructional activities and adapts for promoting complex thinking and technological skills.		4S2) The distinguished teacher also... Applies research-based instructional resources including technology to enhance their own teaching, as well as being a potential resource to others.	
Score = 0	1	2	3	4	5	6	7
Computer-assisted instruction (.37 effect size)							
Effects for this are gradually rising as instruction becomes more interactive, engaging and better designed; use of computers are more effective when there is a diversity of teaching strategies; teacher is pre-trained; multiple opportunities for learning; student is in control of learning; peer learning is optimized							
Simulations and games (.33 effect size)							
Using a model or game to engage students in learning							
Instructional media (.30 effect size)							
Using state of the art visuals; media							

Growth Guide 4.3 – Hattie Research

Standard 4: Critical Thinking

Quality Indicator 3: Cooperative, small group and independent learning

Emerging		Developing		Proficient		Distinguished	
4E3) The emerging teacher... Employs individual and cooperative learning activities to promote critical thinking skills.		4D3) The developing teacher also... Uses a variety of learning situations, such as independent, small group and whole class to enhance individual and collective critical thinking skills.		4P3) The proficient teacher also... Effectively combines flexible and varied independent, cooperative and whole-class learning situations and applies grouping strategies to maximize student understanding and learning.		4S3) The distinguished teacher also... Models and/or shares with others the effective use of flexible and varied independent, collaborative and whole-class learning situations.	
Score = 0	1	2	3	4	5	6	7
Reciprocal Teaching (.74 effective size)							
Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.							
Cooperative vs. Individualistic Learning (.59 effect size)							
Most powerful when students have acquired sufficient background knowledge to be involved in discussion and learning w/peers. Most useful when learning concepts, verbal problem-solving, spatial problem-solving, retention and memory. Effects increase with age.							
Peer tutoring (.55 effect size)							
Students teaching each other (peer-explaining, peer-checking, peer-assessing); students move to being teachers of themselves							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Peer effects (.53 effect size)							
Helping, tutoring, providing friendship, giving feedback, increasing the feeling as school is a place they want to come							

Growth Guide 5.1 – Hattie Research

Standard 5: Positive Classroom Environment

The teacher uses an understanding of individual/group motivation and behavior to create a learning environment that encourages active engagement in learning, positive social interaction, and self-motivation.

Quality Indicator 1: Classroom management techniques

Emerging		Developing		Proficient		Distinguished	
5E1) The emerging teacher... Demonstrates basic classroom management techniques and addresses misbehavior to avoid the disruption of instruction.		5D1) The developing teacher also... Uses effective classroom management techniques including addressing misbehavior promptly and effectively with the least disruption of instruction.		5P1) The proficient teacher also... Adapts and develops classroom management techniques that address all student misbehavior ensuring little or no disruption of instruction.		5S1) The distinguished teacher also... Shares with others effective classroom management techniques that reduce the likelihood of misbehavior ensuring little or no disruptions to instruction.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Student disposition to learn (.48 effect size)							
Student motivation; students feeling in control of their learning experience; removing de-motivators							

Growth Guide 5.2 – Hattie Research

Standard 5: Positive Classroom Environment

Quality Indicator 2: Managing time, space, transitions, and activities

Emerging		Developing		Proficient		Distinguished	
5E2) The emerging teacher... Manages time, space, transitions, and activities in their classroom.		5D2) The developing teacher also... Effectively manages time, space, transitions, and activities to create an environment that enhances student engagement.		5P2) The proficient teacher also... Organizes, allocates, and manages time, space, transitions and activities to promote continuous student engagement and high levels of productivity.		5S2) The distinguished teacher also... Shares with others effective strategies for managing time, space, transitions and activities to promote continuous student engagement and high levels of productivity.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Instructional Quantity (.84 effect size)							
The time (hours) in which the student is actively taught							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Computer-assisted instruction (.37 effect size)

Using state of the art visuals; media							

Growth Guide 5.3 – Hattie Research

Standard 5: Positive Classroom Environment

Quality Indicator 3: Classroom, school and community culture

Emerging		Developing		Proficient		Distinguished	
5E3) The emerging teacher Builds awareness of the culture of the school and community in order to influence student relationships and build an effective classroom learning environment.		5D3) The developing teacher also... Develops a positive culture in the classroom and school to positively affect student relationships and learning.		5P3) The proficient teacher also... Maintains and enhances a positive culture in the classroom and school, creating a classroom environment which promotes positive student relationships and learning.		5S3) The distinguished teacher also... Actively engages students in discussing and evaluating the culture of the classroom, school and community to positively impact relationships and learning.	
Score = 0	1	2	3	4	5	6	7
Teacher-Student relationships (.72 effect size)							
Interestingly, “when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students.” “Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student.” Facilitate student development by demonstrating that they care for the learning of each as a person							
Home Factors (.57 effect size)							
Includes issues such as social class, help with homework, extent to which the learner’s education is thought to be important; includes measures of the socio-psychological environment and intellectual stimulation in the home. Most highly correlated factors with achievement were maternal involvement, variety and play materials.							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Peer effects (.53 effect size)							
Helping, tutoring, providing friendship, giving feedback, increasing the feeling as school is a place they want to come							
Parent Involvement (.51 effect size)							
Parent aspirations were the most important influence on student achievement whereas external rewards, homework surveillance, negative control and restrictions for unsatisfactory grades. Overall the higher hopes/expectations of parents the greater the students’ academic achievement							

Growth Guide 6.1 – Hattie Research

Standard 6: Effective Communication

The teacher models effective verbal, nonverbal, and media communication techniques with students, colleagues and parents to foster active inquiry, collaboration, and supportive interaction in the classroom.

Quality Indicator 1: Verbal and nonverbal communication

Emerging		Developing		Proficient		Distinguished	
6E1) The emerging teacher... Uses correct, effective verbal and non-verbal communication skills.		6D1) The developing teacher also... Consistently uses and fosters correct, effective verbal and nonverbal communication, including strategies to communicate with students whose first language is not Standard English or whose disability requires specific forms of communication.		6P1) The proficient teacher also... Evaluates the impact of and strategies for the correct and effective use of verbal and nonverbal communication.		6S1) The distinguished teacher also... Shares with others strategies for ensuring correct, effective verbal and nonverbal communication in their school and throughout the community.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							
Questioning (.41 effect size)							
Most effective questions are high order “why, how and which is best” questions that cause students to really think; they need to be given time and do better in pairs than alone; important to analyze the questions students ask, too							
Bilingual programs (.37 effect size)							
Two languages are used as a medium of instruction rather than immersion programs where students are instructed in one							

Growth Guide 6.2 – Hattie Research

Standard 6: Effective Communication

Quality Indicator 2: Sensitivity to culture, gender, intellectual and physical differences

Emerging		Developing		Proficient		Distinguished	
6E2) The emerging teacher... Is aware of personal bias in regard to differences in culture, gender, intellectual, and physical ability in classroom and its impact on student learning.		6D2) The developing teacher also... Demonstrates and promotes sensitivity to differences in culture, gender, intellectual, and physical ability in classroom communication and in responses to students' communications.		6P2) The proficient teacher also... Helps students to develop a respect for all through sensitivity to cultural, gender, intellectual and physical ability differences in classroom communication.		6S2) The distinguished teacher also... Promotes a respect for all and sensitivity to cultural, gender, intellectual and physical ability differences throughout the school and community.	
Score = 0	1	2	3	4	5	6	7
Teacher-Student relationships (.72 effect size)							
Interestingly, “when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students.” “Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student.” Facilitate student development by demonstrating that they care for the learning of each as a person							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Home Factors (.57 effect size)							
Includes issues such as social class, help with homework, extent to which the learner’s education is thought to be important; includes measures of the socio-psychological environment and intellectual stimulation in the home. Most highly correlated factors with achievement were maternal involvement, variety and play materials.							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Parent Involvement (.51 effect size)							
Parent aspirations were the most important influence on student achievement whereas external rewards, homework surveillance, negative control and restrictions for unsatisfactory grades. Overall the higher hopes/expectations of parents the greater the students’ academic achievement							
Bilingual programs (.37 effect size)							
Two languages are used as a medium of instruction rather than immersion programs where students are instructed in one							

Growth Guide 6.3 – Hattie Research

Standard 6: Effective Communication

Quality Indicator 3: Learner expression in speaking, writing and other media

Emerging		Developing		Proficient		Distinguished	
6E3) The emerging teacher... Supports and expands learner expression in speaking, writing, listening, and other media ensuring it adheres to district policy.		6D3) The developing teacher also... Develops students in directing their own safe, free and respectful expression in speaking, writing, listening, and other media ensuring it adheres to district policy.		6P3) The proficient teacher also... Promotes respect, safe and free expression in the school and the larger school community ensuring it adheres to district policy.		6S3) The distinguished teacher also... Shares with others strategies for promoting respect, safe and free expression in the school and the larger school community ensuring it adheres to district policy.	
Score = 0	1	2	3	4	5	6	7
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Reciprocal Teaching (.74 effective size)							
Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.							
Self-verbalization / self-questioning (.64 effect size)							
Provides assistance in searching for needed information and increased understanding of the messages of the material to be learned. The internal dialogue of the learner is made verbal.							
Peer effects (.53 effect size)							
Helping, tutoring, providing friendship, giving feedback, increasing the feeling as school is a place they want to come							
Bilingual programs (.37 effect size)							
Two languages are used as a medium of instruction rather than immersion programs where students are instructed in one							

Growth Guide 6.4 – Hattie Research

Standard 6: Utilizing Effective Communication

Quality Indicator 4: Technology and media communication tools

Emerging		Developing		Proficient		Distinguished	
6E4) The emerging teacher... Demonstrates knowledge and understanding of technology and media communication tools for purposeful instruction.		6D4) The developing teacher also... Implements instruction that encourages technology and media communication tools use for learning and models those techniques.		6P4) The proficient teacher also... Facilitates the students' effective use of technology and media communication tools.		6S4) The distinguished teacher also... Either mentors, or assists students in mentoring, members of the school and community in the use of technology and media communication tools.	
Score = 0	1	2	3	4	5	6	7
Reciprocal Teaching (.74 effect size)							
Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.							
Computer-assisted instruction (.37 effect size)							
Effects for this are gradually rising as instruction becomes more interactive, engaging and better designed; use of computers are more effective when there is a diversity of teaching strategies; teacher is pre-trained; multiple opportunities for learning; student is in control of learning; peer learning is optimized							
Simulations and games (.33 effect size)							
Using a model or game to engage students in learning							
Instructional media (.30 effect size)							
Using state of the art visuals; media							

Growth Guide 7.1 – Hattie Research

Standard 7: Student Assessment and Data Analysis

The teacher understands and uses formative and summative assessment strategies to assess the learner’s progress and uses both classroom and standardized assessment data to plan ongoing instruction. The teacher monitors the performance of each student and devises instruction to enable students to grow and develop, making adequate academic progress.

Quality Indicator 1: Effective use of assessments

Emerging		Developing		Proficient		Distinguished	
7E1) The emerging teacher... Demonstrates the use of formal and informal assessments to determine progress towards specific learning goals.		7D1) The developing teacher also... Effectively uses multiple formal and informal student assessments to address specific learning goals, including modifications for students with special needs.		7P1) The proficient teacher also... Identifies student’s prior knowledge, progress during instruction and achievement at the end of an instructional unit to demonstrate individual and whole class learning.		7S1) The distinguished teacher also... Shares knowledge and expertise with others on the effective use of assessments to generate data demonstrating progress toward individual and whole class learning.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Direct Instruction (.82 effect size)							
Active learning in class. Seven steps include: Define learning intentions; aware of and know success criteria of performance; building commitment and engagement in the learning task; presentation of the lesson; guided practice (work is marked and corrective work); closure; and independent practice							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Mastery Learning (.50 effect size)							
Tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes							
Testing (.30 effect size)							
Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective							

Growth Guide 7.2 – Hattie Research

Standard 7: Student Assessment and Data Analysis

Quality Indicator 2: Assessment data to improve learning

Emerging		Developing		Proficient		Distinguished	
7E2) The emerging teacher... Demonstrates basic strategies for accessing, analyzing and appropriately using information and assessment results to improve learning activities.		7D2) The developing teacher also... Reviews student trend data and growth in learning through a comparison of student work (i.e. pre-/post- test results or similar mechanisms) to inform instructional decisions.		7P2) The proficient teacher also... Uses tools such as rubrics, scoring guides, performance analyses, etc., that clearly identify the knowledge and skills intended for students to acquire in well-defined learning goals.		7S2) The distinguished teacher also... Is able to model and/or share information and expertise with others on the use of a wide variety of assessments and evidence that they improved the effectiveness of instruction.	
Score = 0	1	2	3	4	5	6	7
Self-reported grades (1.44 effect size)							
Students knowledgeable about their chance of success; awareness of what they know about a subject and how they will likely perform							
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Student disposition to learn (.48 effect size)							
Student motivation; students feeling in control of their learning experience; removing de-motivators							
Testing (.30 effect size)							
Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective							

Growth Guide 7.3 – Hattie Research

Standard 7: Student Assessment and Data Analysis

Quality Indicator 3: Student-led assessment strategies

Emerging		Developing		Proficient		Distinguished	
7E3) The emerging teacher...		7D3) The developing teacher also...		7P3) The proficient teacher also...		7S3) The distinguished teacher also...	
Uses assessment strategies and timely descriptive feedback to involve learners in some personal-goal setting and self-assessment activities		Purposefully teaches students to use assessment data to think about their own learning, including setting personal learning goals.		Adjusts and adapts strategies for teaching students how to use assessment data in thinking about their own learning, including setting personal goals, based on unique student strengths, needs and learning styles.		Model for others how to provide timely descriptive feedback and the engaging of students in establishing personal learning goals, self-assessment, and using evidence to report on their own progress to the teacher, parents, and others.	
Score = 0	1	2	3	4	5	6	7
Self-reported grades (1.44 effect size)							
Students knowledgeable about their chance of success; awareness of what they know about a subject and how they will likely perform							
Piagetian Programs (1.28 effect size)							
Students knowing the ways in which they think and how it is constrained by their stages of development (sensorimotor stage, preoperational stage, concrete operational stage and formal operational stage)							
Students prior cognitive ability (1.04 effect size)							
Student understanding of their level of achievement and self-reported grades (includes: IQ and similar measures)							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Reciprocal Teaching (.74 effective size)							
Teaching cognitive strategies intended to lead to improved learning outcomes. Emphasis on teachers enabling students to learn and use strategies such as summarizing, questioning, clarifying, and predicting. Dialogue between teacher and students around text. Students take turns as teacher and lead dialogue to bring meaning to written word with assistance to learn to monitor their own learning and thinking.							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Peer tutoring (.55 effect size)							
Students teaching each other (peer-explaining, peer-checking, peer-assessing); students move to being teachers of themselves							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Student disposition to learn (.48 effect size)							
Student motivation; students feeling in control of their learning experience; removing de-motivators							

Growth Guide 7.4 – Hattie Research

Standard 7: Student Assessment and Data Analysis

Quality Indicator 4: Effect of instruction on individual/class learning

Emerging		Developing		Proficient		Distinguished	
7E4) The emerging teacher... Observes the effect of class instruction on individual and whole class learning.		7D4) The developing teacher also... Collects relevant information and data about current instruction to plan future instruction.		7P4) The proficient teacher also... Engages in ongoing assessment of progress of individual students and whole class in order to advance each individual's learning of instructional objectives through modifications to instructional strategies.		7S4) The distinguished teacher also... Is capable of modeling for others the use of ongoing, consistent assessment throughout the instructional process to gather data about the effect of instruction to enhance individual and class achievement.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Remediation Feedback (.65 effect size)							
Diagnosing what students find difficult and getting students to fix it; improving performance on an assessment (feed forward)							
Mastery Learning (.50 effect size)							
Tests and retests of easy material; high pass mark; extra work and retest for those who do not pass or on weak material; numerous feedback loops based on small units of well-defined appropriately sequenced outcomes							
Testing (.30 effect size)							
Testing by itself is not as effective as remediation / feedback where the test is used to find what the student needs to improve and they then do corrective work; should provide feedback to teacher to be really effective							

Growth Guide 7.5 – Hattie Research

Standard 7: Student Assessment and Data Analysis

Quality Indicator 5: Communication of student progress and maintaining records

Emerging		Developing		Proficient		Distinguished	
7E5) The emerging teacher...		7D5) The developing teacher also...		7P5) The proficient teacher also...		7S5) The distinguished teacher also...	
Communicates general information about student progress knowledgeably, responsibly, and ethically based on appropriate indicators, to students, families, and/or colleagues.		Uses evidence to communicate student progress, knowledgeably and responsibly, based on appropriate indicators.		Uses holistic evidence from multiple data points to detail student achievement continuously throughout instruction.		Is able to mentor colleagues in the use of student performance evidence and managing records to effectively communicate student progress.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Teacher Clarity (.75 effect size)							
Important for the teacher to communicate the intention of the lesson and the notion of what success means for these intentions							

Growth Guide 7.6 – Hattie Research

Standard 7: Student Assessment and Data Analysis

Quality Indicator 6: Collaborative data analysis process

Emerging		Developing		Proficient		Distinguished	
7E6) The emerging teacher... Engages in a collaborative process of data analysis with colleagues at the grade, department and school level.		7D6) The developing teacher also... Works in teams to share and analyze data to measure accomplishment of curricular goals to inform grade-department level and/or school-wide decisions.		7P6) The proficient teacher also... Helps to establish, maintain and/or participate in professional learning communities to share and analyze data to measure accomplishment of curricular goals and plan for curricular modification.		7S6) The distinguished teacher also... Acts in a leadership position when working in teams to share and analyze data to measure accomplishment of curricular goals and to use this information to inform his/her instruction.	
Score = 0	1	2	3	4	5	6	7
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Professional Development on student achievement (.51 effect size)							
Staff development and staff training sessions; Most effective included observations on actual classroom methods, microteaching, video/audio feedback, and practice							

Growth Guide 8.1 – Hattie Research

Standard 8: Professionalism

The teacher is a reflective practitioner who continually assesses the effects of choices and actions on others. The teacher actively seeks out opportunities to grow professionally in order to improve learning for all students.

Quality Indicator 1: Self-assessment and improvement

Emerging		Developing		Proficient		Distinguished	
8E1) The emerging teacher...		8D1) The developing teacher also...		8P1) The proficient teacher also...		8S1) The distinguished teacher also...	
Generally uses self-assessment and problem-solving strategies to reflect on practice in order to influence students' growth and learning.		Consistently engages in reflective practice and consistently applies this to his/her instructional process and to modify future instruction.		Continuously engages in a variety of self-assessment and problem-solving strategies which have implications for student growth and learning, within the classroom and the larger school environment.		Models and/or serves as a mentor, in how to engage in reflective practice and in the use of, policies about, and training for using assessment data and other sources of information about student performance.	
Score = 0	1	2	3	4	5	6	7
Instructional Quality (1.00 effect size)							
Teachers ability to identify essential representations of the subject; guide learning through classroom interactions; monitor learning and provide feedback; attend to affective attributes; and influence student outcomes; Includes students view of the teaching quality.							
Providing Formative Evaluation (.90 effect size)							
Feedback on teacher performance; willingness to see negative evidence; students telling teachers how much/well they have learned							
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Professional Development on student achievement (.51 effect size)							
Staff development and staff training sessions; Most effective included observations on actual classroom methods, microteaching, video/audio feedback, and practice							

Growth Guide 8.2 – Hattie Research

Standard 8: Professionalism

Quality Indicator 2: Professional learning

Emerging			Developing		Proficient		Distinguished
8E2) The emerging teacher... Is aware of and utilizes resources available for professional learning.			8D2) The developing teacher also... Applies knowledge gained from a variety of sources to the benefit of students in the classroom.		8P2) The proficient teacher also... Shares new knowledge and expertise with colleagues to benefit the learning of students in multiple classrooms.		8S2) The distinguished teacher also... Evaluates, procures and creates resources for professional development and actively participates in professional development in the larger professional community.
Score = 0	1	2	3	4	5	6	7
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Professional Development on student achievement (.51 effect size)							
Staff development and staff training sessions; Most effective included observations on actual classroom methods, microteaching, video/audio feedback, and practice							

Growth Guide 8.3 – Hattie Research

Standard 8: Professionalism

Quality Indicator 3: Professional rights, responsibilities and ethical practices

Emerging			Developing		Proficient		Distinguished	
8E3) The emerging teacher... Demonstrates professionalism and ethical behavior by adhering to the code of conduct and aligning classroom practices to district policies and school procedures.			8D3) The developing teacher also... Consistently exhibits professionalism in all situations and ensures that classroom practices align to district policies and school procedures.		8P3) The proficient teacher also... Assists colleagues by consistently modeling professionalism throughout the school and district and the broader community.		8S3) The distinguished teacher also... Influences the framing, revision and advocating of policies and procedures that promotes ethical and professional behavior of all educators.	
Score = 0	1	2	3	4	5	6	7	

Growth Guide 9.1 – Hattie Research

Standard 9: Professional Collaboration

The teacher has effective working relationships with students, parents, school colleagues, and community members.

Quality Indicator 1: Induction and collegial activities

Emerging			Developing		Proficient		Distinguished
9E1) The emerging teacher... Engages in supporting the school’s vision, mission, values and goals, participates in curriculum and staff development, and works with their trained mentor to strengthen relationships in the school and community.			9D1) The developing teacher also... Contributes to achieving the mission, vision, values and goals, including monitoring and evaluating progress toward these goals, and other school improvement efforts.		9P1) The proficient teacher also... Actively engages in relationship building efforts in the school, district and community and contributes and shares knowledge and expertise in order to assist in the collective improvement of professional practice.		9S1) The distinguished teacher also... Informally (or formally as a mentor) is available as a resource to colleagues in the school and/or district in achieving a shared mission, vision, values and goals and relationship building efforts through collegial activities and the induction process.
Score = 0	1	2	3	4	5	6	7
Micro Teaching (.88 effect size)							
Conducting mini-lessons and engaging in discussions about the lesson; often involves video-taping							
Professional Development on student achievement (.51 effect size)							
Staff development and staff training sessions; Most effective included observations on actual classroom methods, microteaching, video/audio feedback, and practice							

Growth Guide 9.2 – Hattie Research

Standard 9: Professional Collaboration

Quality Indicator 2: Collaborating to meet student needs

Emerging		Developing		Proficient		Distinguished	
9E2) The emerging teacher...		9D2) The developing teacher also...		9P2) The proficient teacher also...		9S2) The distinguished teacher also...	
Identifies ways to work with others across the system to provide needed services to support individual learners.		Works with colleagues and administrators at the school level and in the larger professional community to develop strategic, school-based systems to address student needs.		Consistently works with colleagues and administrators to develop strategic, school-based systems to address student needs and assists in monitoring the effectiveness of those systems.		Is capable of taking a leadership role or serving as an informal resource in working with the larger professional community in how to work with others across the system to identify and provide needed services to support individual learners.	
Score = 0	1	2	3	4	5	6	7

Growth Guide 9.3 – Hattie Research

Standard 9: Professional Collaboration

Quality Indicator 3: Cooperative partnerships in support of student learning

Emerging		Developing		Proficient		Distinguished	
9E3) The emerging teacher... Develops relationships with colleagues and cooperative partnerships with students and families to support students' learning and well-being.		9D3) The developing teacher also... With colleagues, creates and cultivates new partnerships with students, families and community members to support students' learning and well-being.		9P3) The proficient teacher also... Consistently engages with colleagues and administrators at the school and district level to develop, maintain and further partnerships with students, families and community members to support students' learning and well-being.		9S3) The distinguished teacher also... Takes an active leadership role or serve as an informal resource at the school and district level in developing partnerships with students, families and community members to support students' learning and well-being.	
Score = 0	1	2	3	4	5	6	7
Teacher-Student relationships (.72 effect size)							
Interestingly, “when students, parents, teachers and principals were asked about what influences student achievement, all BUT the teachers emphasized the relationships between the teachers and the students.” “Building relationships implies agency, efficacy, respect by the teacher for what the student brings to the class (from home, culture, and peers) and recognition of the life of the student.” Facilitate student development by demonstrating that they care for the learning of each as a person							
Class environment (cohesion) (.53 effect size)							
Positive classroom climate; the sense that the teacher and the students are working toward positive learning gains							
Parent Involvement (.51 effect size)							
Parent aspirations were the most important influence on student achievement whereas external rewards, homework surveillance, negative control and restrictions for unsatisfactory grades. Overall the higher hopes/expectations of parents the greater the students' academic achievement							

Proven Practices from Teach Like a Champion by Dr. Doug Lemov

MISSOURI'S EDUCATOR EVALUATION SYSTEM

Introduction to Teach Like a Champion

Doug Lemov is a managing director of Uncommon Schools and oversees its True North network. He also trains teachers and school leaders at the sixteen Uncommon schools and nationally. He was the former president of School Performance, an organization that assisted schools in their use of data to drive the decisions they make. He was vice president for accountability at the State University of New York Charter Schools Institute and founder and principal of the Academy of the Pacific Rim Charter School in Boston.

Doug Lemov's Book *Teach Like a Champion* is about the tools of the teaching craft. It describes the tools necessary for success in all classrooms, particularly those with the most challenging student populations.

Throughout my career working in urban public schools as a teacher, trainer, consultant, and administrator, I've had the privilege of watching many champion teachers, often in situations that would overwhelm most of us. These outstanding teachers routinely do what a thousand hand-wringing social programs have found impossible: close the achievement gap between the rich and poor, transform students at risk of failure into achievers and believers, and rewrite the equation of opportunity. And while each of these teachers is unique, their teaching holds certain elements in common.

Basing his work on the books *Built to Last* and *Good to Great* by Jim Collins, Doug Lemov focused on the techniques that appeared to separate the great teacher from the teacher that is merely good. The techniques described are presented in concrete, specific and actionable ways to allow for immediate use by teachers in any classroom. The book also includes a DVD with video clips of teachers using the techniques.

Lemov, Doug. (2010) Teach Like a Champion: 49 Techniques that put students on the path to college. San Francisco, CA: Jossey-Bass.

Lemov: Teach Like a Champion		ST 1					ST 2						ST 3			ST 4			ST 5				ST 6				ST 7						ST 8			ST 9		
Technique	Key Idea / Description	1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3				
24. Pepper	Use fast paced, group-orientated activities to review familiar information and foundational skills.		X																																			
25. Wait Time	Delay a few strategic seconds after you finish asking a question and before you ask a student to begin to answer it.		X																																			
26. Everybody Writes	Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.		X	X	X	X																X	X	X														
27. Vegas	A moment during class when you might observe some production values: music, lights, rhythm, dancing.		X							X								X	X	X					X													
Creating A Strong Classroom Culture																																						
28. Entry Routine	Make a habit out of what's efficient, productive, and scholarly after the greeting and as students take their seats and class begins.									X	X							X	X	X	X																	
29. Do Now	A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.		X							X								X	X	X																		
30. Tight Transitions	Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.		X							X	X							X	X	X																		
31. Binder Control	Care enough about and the importance of what you teach to build a system for the storage, organization and recall of what students have learned.			X

32. SLANT	Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.		X							X					X				X		X																	
33. On Your Mark	Show students how to prepare for a lesson to begin and expect them to do so every day.							X		X					X				X	X	X																	
34. Seat Signals	Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.									X									X	X	X	X																
35. Props	Public praise for students who demonstrate excellence or exemplify virtues.									X									X		X															X		
Setting & Maintaining High Behavioral Expectations																																						
36. 100 Percent	There's one acceptable percentage of students following a direction: 100%. Less and your authority is subject to interpretation, situation, and motivation.									X									X										X									
37. What To Do	Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as asked to do so easily.									X									X	X	X	X															X	
38. Strong Voice	Establish control, command and benign authority that make the use of excessive consequences unnecessary.									X									X	X	X										X		X					
39. Do It Again	Doing it again and doing it right or better or perfect is often the best consequence.								X	X									X										X	X								

Lemov: Teach Like a Champion		ST 1					ST 2						ST 3			ST 4			ST 5				ST 6				ST 7						ST 8			ST 9				
Technique	Key Idea / Description	1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3			
40. Sweat The Details	To reach the highest standards, you must create the perception of order.									X									X																			X		
41. Threshold	When students cross the threshold into the classroom, you must remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.									X									X	X	X	X																		
42. No Warnings	Use minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.									X									X	X	X																	X		
Building Character And Trust																																								
43. Positive Framing	Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.					X				X					X				X		X																X			
44. Precise Praise	Use positive reinforcement as a powerful classroom tool									X									X		X																X			
45. Warm/ Strict	At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).									X									X															X			X			
46. The J Factor	Find and promote the joy of learning to achieve a happy and high-achieving classroom.									X									X		X													X						

Lemov: Teach Like a Champion		ST 1					ST 2						ST 3			ST 4			ST 5				ST 6				ST 7						ST 8			ST 9					
Technique	Key Idea / Description	1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3				
47. Emotional Constancy	Model the modulation of emotions (no explosions) and tie emotions to student achievement not the emotions of students you teach.									X																													X	X	X
48. Explain Everything	Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).									X					X				X																					X	
49. Normalize Error	Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.							X	X	X	X	X							X																						X
Improving Your Pacing																																									
Change the Pace	Use a variety of activities to accomplish the lesson's objective and move from one to the other throughout the course of a lesson.	X	X	X	X	X								X	X		X	X								X														X	
Brighten Lines	Make learning activities begin and end crisply and clearly.	X	X											X						X																					
All Hands	Shift rapidly among and involving a wide array of participants.	X	X					X						X				X		X	X																				
Every Minute Matters	Keep a series of short learning activities ready to you're prepared when a two minute opportunity emerges.	X	X							X				X			X																							X	
Look Forward	Use mild suspense to create tension, excitement and anticipation	X	X	X	X															X	X																			X	
Work the Clock	Count time down, parcel it out in highly specific increments often announcing an allotted time for each activity.	X	X							X	X								X

Technique	Key Idea / Description	1	2	3	4	5	1	2	3	4	5	6	1	2	3	1	2	3	1	2	3	1	2	3	4	1	2	3	4	5	6	1	2	3	1	2	3			
Challenging Students To Think Critically																																								
One At A Time	Ask only one question at a time, not a sequence of them.			X	X									X	X																									
Simple To Complex	Initially engage students' thinking about a topic in contained, concrete ways and then push them to think more deeply and broadly.		X	X	X	X				X				X		X																								
Verbatim (No Bait & Switch)	When repeating a question, be sure to ask it exactly the same way.															X																								
Clear and Concise	Make questions as clear and concise as possible.															X																								
Stock Questions	Use similar sequences of questioning applied over and over in different settings.			X	X											X																								
Hit Rate	The rate at which students answer questions correctly should not be 100% (unless reviewing, questions should be harder) nor should it be below 2 out of 3 (there is a problem with how material was presented or the alignment of questions to that material since students are not showing you mastery).			X			X			X	X			X		X																					X	X		X

Doug Lemov separates his techniques into 9 separate categories.

The charts below indicate how many Missouri Indicators align to techniques in each of the categories.

Setting High Academic Expectations		35 MO Indicators
2. Right Is Right	Set and defend a high standard of correctness in your classroom	8
4. Format Matters	It's not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.	8
5. Without Apology	The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.	8
1. No Opt Out	A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.	7
3. Stretch It	A sequence of learning does not end with the right answer; reward right answers with follow up questions that extend knowledge and test for reliability (DI)	4

Planning That Ensures Academic Achievement		58 MO Indicators
10. Double Plan	It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	15
6. Begin with the End	Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and how these three fit into a larger sequence of objectives that leads to mastery.	14
7. 4 Ms	A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).	13
11. Draw The Map	Control the physical environment to support the specific lesson goal for the day	7
9. Shortest Path	All things being equal, the simplest explanation or strategy is the best; opt for the most direct route from point to point.	5
8. Post It	Lesson objective is posted in a visible location – same location every day – and identifies your purpose for teaching that day.	4

Structuring & Delivering Your Lessons		68 MO Indicators
18. Check For Understanding	Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	13
21. Take A Stand	Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	11
13. Name The Steps	Subdivide complex skills into component tasks and build knowledge up systematically.	8
16. Break It Down	In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	8
17. Ratio	Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	8
12. The Hook	A short introductory moment that captures what's interesting and engaging about the material and puts it out in front.	6
20. Exit Ticket	Use a single question or short sequence of problems to solve at the close of a class to check for understanding that provides strong data and critical insights.	4
14. Board = Paper	Students learning how to be good students by learning to take notes and retain a record of their knowledge.	4
15. Circulate	Moving strategically around the room during all parts of a lesson.	3
19. At Bats	Lessons should include as many repetitions as possible.	3

Engaging Students In Your Lessons		25 MO Indicators
26. Everybody Writes	Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.	8
27. Vegas	A moment during class when you might observe some production values: music, lights, rhythm, dancing.	6
22. Cold Call	In order to make engaged participation the expectation, call on students regardless of whether they have raised their hands.	4
23. Call And Response	Use group choral response – you ask; they answer in unison – to build a culture of energetic, positive engagement.	3
24. Pepper	Use fast paced, group-orientated activities to review familiar information and foundational skills.	2
25. Wait Time	Delay a few strategic seconds after you finish asking a question and before you ask a student to begin answer it.	2

Creating A Strong Classroom Culture		42 MO Indicators
33. On Your Mark	Show students how to prepare for a lesson to begin and expect them to do so every day.	7
28. Entry Routine	Make a habit out of what's efficient, productive, and scholarly after the greeting and as students take their seats and class begins.	6
30. Tight Transitions	Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.	6
32. SLANT	Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	6
29. Do Now	A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.	5
34. Seat Signals	Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.	5
35. Props	Public praise for students who demonstrate excellence or exemplify virtues.	4
31. Binder Control	Care enough about and the importance of what you teach to build a system for the storage, organization and recall of what students have learned.	3

Setting & Maintaining High Behavioral Expectations		34 MO Indicators
37. What To Do	Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as asked to do so easily.	6
38. Strong Voice	Establish control, command and benign authority that make the use of excessive consequences unnecessary.	6
39. Do It Again	Doing it again and doing it right or better or perfect is often the best consequence.	5
41. Threshold	When students cross the threshold into the classroom, you must remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.	5
42. No Warnings	Use minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.	5
36. 100 Percent	There's one acceptable percentage of students following a direction: 100%. Less and your authority is subject to interpretation, situation, and motivation.	4
40. Sweat The Details	To reach the highest standards, you must create the perception of order.	3

Building Character And Trust		39 MO Indicators
49. Normalize Error	Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	9
43. Positive Framing	Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.	6
44. Precise Praise	Use positive reinforcement as a powerful classroom tool	6
45. Warm/Strict	At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).	5
48. Explain Everything	Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).	5
46. The J Factor	Find and promote the joy of learning to achieve a happy and high-achieving classroom.	4
47. Emotional Constancy	Model the modulation of emotions (no explosions) and tie emotions to student achievement not the emotions of students you teach.	4

Improving Your Pacing		41 MO Indicators
Change the Pace	Use a variety of activities to accomplish the lesson's objective and move from one to the other throughout the course of a lesson.	11
All Hands	Shift rapidly among and involving a wide array of participants.	8
Look Forward	Use mild suspense to create tension, excitement and anticipation	7
Every Minute Matters	Keep a series of short learning activities ready to you're prepared when a two minute opportunity emerges.	6
Work the Clock	Count time down, parcel it out in highly specific increments often announcing an allotted time for each activity.	5
Brighten Lines	Make learning activities begin and end crisply and clearly.	4

Challenging Students To Think Critically		29 MO Indicators
Hit Rate	The rate at which students answer questions correctly should not be 100% (unless reviewing, questions should be harder) nor should it be below 2 out of 3 (there is a problem with how material was presented or the alignment of questions to that material since students are not showing you mastery).	9
Simple To Complex	Initially engage students' thinking about a topic in contained, concrete ways and then push them to think more deeply and broadly.	8
One At A Time	Ask only one question at a time, not a sequence of them.	5
Stock Questions	Use similar sequences of questioning applied over and over in different settings.	3
Verbatim (No Bait & Switch)	When repeating a question, be sure to ask it exactly the same way.	2
Clear and Concise	Make questions as clear and concise as possible.	2

Growth Guide 1.1 – Teach Like a Champion Techniques

Standard 1: Content knowledge aligned with appropriate instruction.

The teacher understands the central concepts, structures, and tools of inquiry of the discipline(s) and creates learning experiences that make these aspects of subject matter meaningful and engaging for students.

Quality Indicator 1: Content knowledge and academic language

Emerging			Developing		Proficient		Distinguished
1E1) The emerging teacher... Knows and can demonstrate breadth and depth of content knowledge and communicates the meaning of academic language.			1D1) The developing teacher also... Delivers accurate content learning experiences using supplemental resources and incorporates academic language into learning activities.		1P1) The proficient teacher also... Infuses new information into instructional units and lessons displaying solid knowledge of the important concepts of the discipline.		1S1) The distinguished teacher also... Has mastery of taught subjects and continually infuses new research-based content knowledge into instruction.
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out							
A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique2: Right is Right							
Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique4: Format Matters							
It's not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 5: Without Apology							
The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			

Technique 6: Begin with the End	
Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.	
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity	Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)
Technique 7: 4 Ms	
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).	
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).	Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)
Technique 12: The Hook	
A short introductory moment that captures what's interesting and engaging about the material and puts it out in front.	
Teacher Prepare students to be brought into the content; use a brief story, analogy, prop, media, status challenge, etc to engage student attention and build interest	Student Is inspired and excited about the content that is about to be learned Willingly takes the first step into the learning
Technique 13: Name the Steps	
Subdivide complex skills into component tasks and build knowledge up systematically.	
Teacher Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)	Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content
Technique 16: Break it Down	
In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).	Student Commits error but whose learning is then facilitated to result in a correct answer
Technique 17: Ratio	
Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	
Teacher Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that proceeded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).	Student Engages in increased doses of cognitive work as soon as they are ready (but not before) Engages in larger and larger shares of the right work – focused and productive

Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
<p>Teacher</p> <p>Check for understanding and do something about it "right away"</p> <p>Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery)</p> <p>Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.</p>	<p>Student</p> <p>Gives off data on the degree of their understanding and mastery of content through the answers they provide</p>
Technique 21: Take a Stand	
Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	
<p>Teacher</p> <p>Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture).</p> <p>Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).</p>	<p>Student</p> <p>Actively engages in the ideas around them by making judgments about the answers their peers provide.</p> <p>Are open to having their ideas be assessed by peers as well</p>
Change the Pace	
Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson	
<p>Teacher</p> <p>People of all ages tend to lose focus after ten minutes, so do something new to engage them.</p> <p>Creation an illusion of speed by using a variety throughout the lesson</p>	<p>Student</p> <p>Is energized as a part of the learning process</p> <p>Feels as if they are moving quickly from activity to activity</p>
Brighten Lines	
Draw bright clear lines at the beginning and end of a lesson	
<p>Teacher</p> <p>Beginnings and endings that are clearly visible are more likely to be perceived as reference points and creates the perception you have done multiple, discrete thing.</p>	<p>Student</p> <p>Experiences the "starts" and "stops" of different lesson activities</p>
All Hands	
Shift rapidly among and involving a wide array of participants	
<p>Teacher</p> <p>Shifting among participants creates a reference point which signals that something has changed, something has begun or ended.</p> <p>Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with</p>	<p>Student</p> <p>Feels engaged along with other students in the classroom</p>
Every Minute Matters	
Time is water in the desert, a teacher's most precious resource; You can always be teaching	
<p>Teacher</p> <p>Keep a series of short learning activities ready so you're prepared when a two-minute opportunity emerges (end of class, in the hallway, waiting for buses, etc.).</p>	<p>Student</p> <p>Experiences no wasted time; comes to understand that the learning process is one in which every minute counts</p>
Look Forward	
Mild suspense creates tension, excitement and anticipation around learning	
<p>Teacher</p> <p>Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective</p>	<p>Student</p> <p>Is motivated to see the learning through to the end (how it turns out)</p> <p>Wants to know what is coming next</p>

Work the Clock

Time: count it down, parcel it out in highly specific increments, announce an allotted time for each activity

Teacher

Mix in frequent countdowns to pace the class in completing tasks and emphasize the importance of each second; continually set goals for your class's speed in meeting expectations

Student

Is better able to keep up with the learning objectives and with the flow of the lesson
Experience a sense of accomplishment as they work through each increment

Growth Guide 1.2 – Teach Like a Champion Techniques

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 2: Student engagement in subject matter

Emerging		Developing		Proficient		Distinguished	
1E2) The emerging teacher... Chooses from multiple sources to engage student interest and activity in the content.		1D2) The developing teacher also... Uses a variety of differentiated instructional strategies which purposefully engage students in content.		1P2) The proficient teacher also... Uses specific instructional strategies to engage students and advance each individual student’s learning as evidenced by student data.		1S2) The distinguished teacher also... Moves fluidly between differentiated instructional strategies based on the unique learning needs and situations of the students resulting in deeper student knowledge and understanding in the content area.	
Score = 0	1	2	3	4	5	6	7
Technique 12: The Hook A short introductory moment that captures what’s interesting and engaging about the material and puts it out in front.							
Teacher Prepare students to be brought into the content; use a brief story, analogy, prop, media, status challenge, etc to engage student attention and build interest				Student Is inspired and excited about the content that is about to be learned Willingly takes the first step into the learning			
Technique 21: Take a Stand Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.							
Teacher Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture). Don’t ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).				Student Actively engages in the ideas around them by making judgments about the answers their peers provide. Are open to having their ideas be assessed by peers as well			
Technique 22: Cold Call In order to make engaged participation the expectation, call on students regardless of whether they have raised their hands.							
Teacher Choose one student to speak the answer out loud while all students answer in their minds Allows you to check for understanding effectively and systematically increases speed in terms of pacing and rate at which material is covered, and distribute work broadly and more fully. It is predictive (students come to expect it); is systematic (universal and impersonal); is positive (students know you think they can answer the question); is a scaffold to deeper learning (start with simple and move to progressively harder).				Student All students answer in their minds because they think they are about to be called on. Knows that the teacher thinks they can answer the question.			

Technique 23: Call and Response	
Use group choral response – you ask; they answer in unison – to build a culture of energetic, positive engagement.	
Teacher Use to accomplish academic review and reinforcement, high-energy fun, and behavioral reinforcement. Types include repeat, report, reinforce, review and solve.	Student Provides answers with other classmates.
Technique 24: Pepper	
Use fast paced, group-orientated activities to review familiar information and foundational skills.	
Teacher Toss questions to a group of students quickly; if its right, teacher asks another student a new question; if it's wrong the same questions is asked to a new student. Maintain a fast pace and be unpredictable.	Student Answers question randomly as a part of a group of students receiving teacher questions given quickly and unpredictably.
Technique 25: Wait Time	
Delay a few strategic seconds after you finish asking a question and before you ask a student to begin answer it.	
Teacher Use of 3-5 seconds increases length and correctness of responses; decreases number of failures; increases number of volunteers; and increases use of evidence. Use narration during the wait time period to incent and reinforce specific behaviors most productive to students.	Student Generates richer, more reflective and well developed answers during the wait time
Technique 26: Everybody Writes	
Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.	
Teacher Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.	Student Is challenged intellectually and is engaged The quality of the ideas and their writing improves
Technique 27: Vegas	
A moment during class when you might observe some production values: music, lights, rhythm, dancing.	
Teacher Use it to reinforce not just academics but the day's learning objective; its upbeat but often short, sweet and on point – once it's done, it's done.	Student Is more highly engaged due to the excitement, the spontaneity and fun of learning
Technique 29: Do Now	
A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.	
Teacher Effectively uses this by ensuring students can complete it without directions or discussion with others; takes three to five minutes; creates a written product; and previews the day's lesson.	Student Is hard at work even before you fully enter the room or into the lesson Is productive during every minute and ready for instruction when you start; has done the anticipatory set and is thinking about what is coming.
Technique 30: Tight Transitions	
Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.	
Teacher Protects the most important resource: time. Teach transitions in steps (maybe even number them); use point to point movement (identify a location that students move to and then stop); to focus on speed, practice transitions against the clock (motivates students to improve); control what students say during the transition (if they are quick enough, it can be done in silence); and provide consistent enforcement (always do it the right way). *this applies to the movement of materials as well as students	Student Knows exactly what to do, where to do it, and how to do it and can do it quickly without needing additional information from the teacher

Technique 32: SLANT	
Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	
Teacher Serves as shorthand for reminding students to be attentive and ready learners. Develop non-verbal signals allowing you to remind them without interrupting what you're otherwise doing.	Student Understands what the letters of the acronym means and can successfully adjust their behavior to comply with the direction for each.
Change the Pace	
Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson	
Teacher People of all ages tend to lose focus after ten minutes, so do something new to engage them. Creation an illusion of speed by using a variety throughout the lesson	Student Is energized as a part of the learning process Feels as if they are moving quickly from activity to activity
Brighten Lines	
Draw bright clear lines at the beginning and end of a lesson	
Teacher Beginnings and endings that are clearly visible are more likely to be perceived as reference points and creates the perception you have done multiple, discrete thing.	Student Experiences the "starts" and "stops" of different lesson activities
All Hands	
Shift rapidly among and involving a wide array of participants	
Teacher Shifting among participants creates a reference point which signals that something has changed, something has begun or ended. Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with	Student Feels engaged along with other students in the classroom
Every Minute Matters	
Time is water in the desert, a teacher's most precious resource; You can always be teaching	
Teacher Keep a series of short learning activities ready so you're prepared when a two-minute opportunity emerges (end of class, in the hallway, waiting for buses, etc.).	Student Experiences no wasted time; comes to understand that the learning process is one in which every minute counts
Look Forward	
Mild suspense creates tension, excitement and anticipation around learning	
Teacher Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective	Student Is motivated to see the learning through to the end (how it turns out) Wants to know what is coming next
Work the Clock	
Time: count it down, parcel it out in highly specific increments, announce an allotted time for each activity	
Teacher Mix in frequent countdowns to pace the class in completing tasks and emphasize the importance of each second; continually set goals for your class's speed in meeting expectations	Student Is better able to keep up with the learning objectives and with the flow of the lesson Experience a sense of accomplishment as they work through each increment
Simple to Complex	
Ask questions that progress from simple to complex	
Teacher Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly	Student Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public

Growth Guide 1.3 – Teach Like a Champion Techniques

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 3: Disciplinary research and inquiry methodologies

Emerging		Developing		Proficient		Distinguished	
1E3) The emerging teacher... Introduces students to various methods of inquiry and research methodologies.		1D3) The developing teacher also... Employs student- inquiry instructional approaches to build capacity for all students on research methodologies.		1P3) The proficient teacher also... Develops strategies to engage students in the processes of inquiry and research pertinent to the discipline being taught.		1S3) The distinguished teacher also... Acquires and shares new knowledge on inquiry and research methodologies that improve student learning.	
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique2: Right is Right Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique 6: Begin with the End Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique7: 4 Ms A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			

Lemov, Doug. (2010) Teach Like a Champion: 49 Techniques that put students on the path to college. San Francisco, CA: Jossey-Bass.

Technique 13: Name the Steps	
Subdivide complex skills into component tasks and build knowledge up systematically.	
Teacher Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)	Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content
Technique 16: Break it Down	
In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).	Student Commits error but whose learning is then facilitated to result in a correct answer
Technique 17: Ratio	
Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	
Teacher Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that preceded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).	Student Engages in increased doses of cognitive work as soon as they are ready (but not before) Engages in larger and larger shares of the right work – focused and productive
Technique 21: Take a Stand	
Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	
Teacher Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture). Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).	Student Actively engages in the ideas around them by making judgments about the answers their peers provide. Are open to having their ideas be assessed by peers as well
Technique 22: Cold Call	
In order to make engaged participation the expectation, call on students regardless of whether they have raised their hands.	
Teacher Choose one student to speak the answer out loud while all students answer in their minds Allows you to check for understanding effectively and systematically increases speed in terms of pacing and rate at which material is covered, and distribute work broadly and more fully. It is predictive (students come to expect it); is systematic (universal and impersonal); is positive (students know you think they can answer the question); is a scaffold to deeper learning (start with simple and move to progressively harder).	Student All students answer in their minds because they think they are about to be called on. Knows that the teacher thinks they can answer the question.
Technique 26: Everybody Writes	
Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.	
Teacher Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.	Student Is challenged intellectually and is engaged The quality of the ideas and their writing improves

Technique 31: Binder Control	
Care enough about and the importance of what you teach to build a system for the storage, organization and recall of what students have learned.	
Teacher Have a required place for notes; have the required place be in a binder (ideally provided by you that maybe even stays in the classroom at night); have a required format for organizing papers (perhaps assign a number to all materials).	Student Maintains all notes and materials in an organized manner consistent with all of the other students.
Change the Pace	
Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson	
Teacher People of all ages tend to lose focus after ten minutes, so do something new to engage them. Creation an illusion of speed by using a variety throughout the lesson	Student Is energized as a part of the learning process Feels as if they are moving quickly from activity to activity
Look Forward	
Mild suspense creates tension, excitement and anticipation around learning	
Teacher Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective	Student Is motivated to see the learning through to the end (how it turns out) Wants to know what is coming next
One at a Time	
Ask one question at a time	
Teacher Although questions tend to come in sequences, ask only one question at a time to help students focus on developing one idea at a time and to focus you on questioning with a specific goal or purpose in mind.	Student Develops one idea at a time in response to the specific question you asked
Simple to Complex	
Ask questions that progress from simple to complex	
Teacher Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly	Student Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public
Stock Questions	
Similar sequences of questions applied over and over in different settings	
Teacher Don't make questions up as you go, instead decide to ask a sequence of questions	Student Answers are linked to answers provided before and after the one they answered
Hit Rate	
The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)	
Teacher If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.	Student Is challenged with questions that are not too hard or unfair, but are not too easy either Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 1.4 – Teach Like a Champion Techniques

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 4: Interdisciplinary instruction

Emerging		Developing		Proficient		Distinguished	
1E4) The emerging teacher... Demonstrates the ability to make interdisciplinary content connections during instruction.		1D4) The developing teacher also... Implements meaningful interdisciplinary learning experiences that require students to apply disciplinary knowledge.		1P4) The proficient teacher also... Develops and implements interdisciplinary projects that guide students in analyzing the complexities of an issue or question using perspectives from varied disciplines.		1S4) The distinguished teacher also... Connects current interdisciplinary themes to their discipline(s) and weaves those themes into meaningful learning experiences through collaboration with students, colleagues, and/or real-world partners.	
Score = 0	1	2	3	4	5	6	7
Technique 6: Begin with the End							
Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique 7: 4 Ms							
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 12: The Hook							
A short introductory moment that captures what's interesting and engaging about the material and puts it out in front.							
Teacher Prepare students to be brought into the content; use a brief story, analogy, prop, media, status challenge, etc to engage student attention and build interest				Student Is inspired and excited about the content that is about to be learned Willingly takes the first step into the learning			
Technique 13: Name the Steps							
Subdivide complex skills into component tasks and build knowledge up systematically.							
Teacher Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)				Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content			

Lemov, Doug. (2010) Teach Like a Champion: 49 Techniques that put students on the path to college. San Francisco, CA: Jossey-Bass.

Technique 16: Break it Down	
In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).	Student Commits error but whose learning is then facilitated to result in a correct answer
Technique 17: Ratio	
Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	
Teacher Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that preceded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).	Student Engages in increased doses of cognitive work as soon as they are ready (but not before) Engages in larger and larger shares of the right work – focused and productive
Technique 26: Everybody Writes	
Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.	
Teacher Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.	Student Is challenged intellectually and is engaged The quality of the ideas and their writing improves
Change the Pace	
Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson	
Teacher People of all ages tend to lose focus after ten minutes, so do something new to engage them. Creation an illusion of speed by using a variety throughout the lesson	Student Is energized as a part of the learning process Feels as if they are moving quickly from activity to activity
Look Forward	
Mild suspense creates tension, excitement and anticipation around learning	
Teacher Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective	Student Is motivated to see the learning through to the end (how it turns out) Wants to know what is coming next
One at a Time	
Ask one question at a time	
Teacher Although questions tend to come in sequences, ask only one question at a time to help students focus on developing one idea at a time and to focus you on questioning with a specific goal or purpose in mind.	Student Develops one idea at a time in response to the specific question you asked
Simple to Complex	
Ask questions that progress from simple to complex	
Teacher Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly	Student Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public

Stock Questions

Similar sequences of questions applied over and over in different settings

Teacher

Don't make questions up as you go, instead decide to ask a sequence of questions

Student

Answers are linked to answers provided before and after the one they answered

Growth Guide 1.5 – Teach Like a Champion Techniques

Standard 1: Content knowledge aligned with appropriate instruction.

Quality Indicator 5: Diverse social and cultural perspectives

Emerging		Developing		Proficient		Distinguished	
1E5) The emerging teacher... Facilitates students’ ability to develop balanced, diverse social and cultural perspectives by recognizing personal bias in lesson design.		1D5) The developing teacher also... Designs instruction that incorporates global perspectives about national/regional/ethnic contributions to, and cultural differences/interpretations of the discipline.		1P5) The proficient teacher also Builds background knowledge from a variety of perspectives critical to fostering innovation, solving global challenges, and assuring a healthy democracy.		1S5) The distinguished teacher also... Facilitates student action to address real-world problems from a variety of perspectives related to the discipline that improves their community and/or world.	
Score = 0	1	2	3	4	5	6	7
Technique 16: Break it Down In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student’s knowledge back up from a point of partial understanding.							
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).				Student Commits error but whose learning is then facilitated to result in a correct answer			
Technique 21: Take a Stand Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.							
Teacher Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture). Don’t ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).				Student Actively engages in the ideas around them by making judgments about the answers their peers provide. Are open to having their ideas be assessed by peers as well			
Technique 26: Everybody Writes Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.							
Teacher Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.				Student Is challenged intellectually and is engaged The quality of the ideas and their writing improves			

Technique 43: Positive Framing

Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.

Teacher

Live in the now (in public: in front of your class or when a lesson is underway); assume the best instead of ill intention (it could be the result of distraction, lack of practice, or genuine misunderstanding instead of ill intention); allow plausible anonymity (don't call someone out until you have to); build momentum and narrate the positive (make the positive the normal or status quo); challenge (build competition into the day); talk expectations and aspirations (the goal is for them to leave you and move on to bigger and better things).

Student

Is encouraged to do their best without being threatened by penalty unless it becomes absolutely necessary
Does not experience embarrassment or harassment
Experience positive reaction even when being corrected

Change the Pace

Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson

Teacher

People of all ages tend to lose focus after ten minutes, so do something new to engage them.
Creation an illusion of speed by using a variety throughout the lesson

Student

Is energized as a part of the learning process
Feels as if they are moving quickly from activity to activity

Simple to Complex

Ask questions that progress from simple to complex

Teacher

Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly

Student

Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public

Growth Guide 2.1 – Teach Like a Champion Techniques

Standard 2: Student Learning, Growth and Development

The teacher understands how students learn, develop and differ in their approaches to learning. The teacher provides learning opportunities that are adapted to diverse learners and support the intellectual, social, and personal development of all students.

Quality Indicator 1: Cognitive, social, emotional and physical development

Emerging		Developing		Proficient		Distinguished	
2E1) The emerging teacher... Knows how to address developmental factors when making instructional decisions.		2D1) The developing teacher also... Applies understanding of child/adolescent growth and development markers to implement instruction that fosters development in students.		2P1) The proficient teacher also... Uses knowledge of individual growth and development to monitor and chart learner’s progress toward goals in each domain to meet current needs and lead to the next level of development.		2S1) The distinguished teacher also... Models and shares with colleagues an effective, continuous instructional cycle that assesses individual performance, identifies needs and provides instruction promoting individual advancement in each domain.	
Score = 0	1	2	3	4	5	6	7
Technique7: 4 Ms A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it’s the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 10: Double Plan It’s as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with “You” on one side and “Them” on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			

Technique 11: Draw the Map	
Control the physical environment to support the specific lesson goal for the day	
Teacher Include space planning as a part of lesson planning. Think about the way you want students' bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating	Student Environment around them supports learning; walls communicate information and motivation about learning
Technique 16: Break it Down	
In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).	Student Commits error but whose learning is then facilitated to result in a correct answer
Technique 17: Ratio	
Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	
Teacher Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that preceded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).	Student Engages in increased doses of cognitive work as soon as they are ready (but not before) Engages in larger and larger shares of the right work – focused and productive
Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
Teacher Check for understanding and do something about it "right away" Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.	Student Gives off data on the degree of their understanding and mastery of content through the answers they provide
Technique 19: At Bats	
Lessons should include as many repetitions as possible.	
Teacher Go until they can do it on their own; use multiple variations and formats; grab opportunities for enrichment and differentiation;	Student Participates in repetition of essential concepts as a strategy for achieving mastery Increases confidence that they know the content
Technique 44: Precise Praise	
Use positive reinforcement as a powerful classroom tool	
Teacher Differentiate acknowledgment and praise (acknowledge when expectations have been met and praise when the exceptional has been achieved); praise and acknowledge loud – fix soft; praise must be genuine (address praise and correction specifically to those who need to receive it – don't use the praise of one student to serve as the correction of another).	Student Understands that meeting expectation will be acknowledged but that receiving praise is reserved for when exceptional work has been demonstrated

Technique 45: Warm / Strict	
At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).	
Teacher Warmth and strictness are not opposites: explain to students why you are doing what you are doing; distinguish between the behavior and the person; demonstrate that a consequence is temporary, once over it is immediately in the past; use warm, nonverbal behavior	Student Understands that they are held to very high standards that will be enforced by someone who genuinely cares about them.
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
Teacher Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.	Student Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.
All Hands	
Shift rapidly among and involving a wide array of participants	
Teacher Shifting among participants creates a reference point which signals that something has changed, something has begun or ended. Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with	Student Feels engaged along with other students in the classroom
Hit Rate	
The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)	
Teacher If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.	Student Is challenged with questions that are not too hard or unfair, but are not too easy either Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 2.2 – Teach Like a Champion Techniques

Standard 2: Student Learning, Growth and Development

Quality Indicator 2: Student goals

Emerging		Developing		Proficient		Distinguished	
2E2) The emerging teacher... Facilitates students’ understanding of taking personal responsibility for their own learning.		2D2) The developing teacher also Uses strategies to enable students to set short- and long-term goals helping them to organize and reflect on their own learning.		2P2) The proficient teacher also... Use strategies to assist students in evaluating and modifying personal learning goals based on personal performance data.		2S2) The distinguished teacher also... Acquires and shares new knowledge on strategies for enabling students to expand and assume control of their own learning.	
Score = 0	1	2	3	4	5	6	7
Technique4: Format Matters							
It’s not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 5: Without Apology							
The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students’ response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			
Technique 14: Board = Paper							
Students learning how to be good students by learning to take notes and retain a record of their knowledge.							
Teacher Have students take exact notes of what you put on the board as a starting point to their capturing their own increasing knowledge Provide exact direction and then increasing flexibility				Student Learn to capture own learning by first copying exactly what the teacher puts down; move on to making internal decisions about what to capture Increases in own discretion of what is important to capture and how they capture			

Technique 17: Ratio	
Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	
<p>Teacher</p> <p>Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that preceded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).</p>	<p>Student</p> <p>Engages in increased doses of cognitive work as soon as they are ready (but not before)</p> <p>Engages in larger and larger shares of the right work – focused and productive</p>
Technique 21: Take a Stand	
Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	
<p>Teacher</p> <p>Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture).</p> <p>Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).</p>	<p>Student</p> <p>Actively engages in the ideas around them by making judgments about the answers their peers provide.</p> <p>Are open to having their ideas be assessed by peers as well</p>
Technique 33: On Your Mark	
Show students how to prepare for a lesson to begin and expect them to do so every day.	
<p>Teacher</p> <p>Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need "before" class begins; and include homework (most important thing students do that is unsupervised by a teacher).</p>	<p>Student</p> <p>Can successfully prepare themselves for learning.</p>
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
<p>Teacher</p> <p>Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.</p>	<p>Student</p> <p>Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.</p>

Growth Guide 2.3 – Teach Like a Champion Techniques

Standard 2: Student Learning, Growth and Development

Quality Indicator 3: Theory of learning

Emerging		Developing		Proficient		Distinguished	
2E3) The emerging teacher... Applies theories of learning to create well-planned and delivered instruction.		2D3) The developing teacher also... Implements research-based instruction focused on production of learning for individual students.		2P3) The proficient teacher also... Delivers instruction that effectively produces learning gains for every student based on effective plans, grounded in theory/research, and designed to meet individual needs.		2S3) The distinguished teacher also... Continuously modifies instruction based on his/her own and emerging research and shares effective practices and modifications with colleagues.	
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique 5: Without Apology The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			
Technique 16: Break it Down In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.							
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).				Student Commits error but whose learning is then facilitated to result in a correct answer			

Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
<p>Teacher</p> <p>Check for understanding and do something about it "right away"</p> <p>Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery)</p> <p>Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.</p>	<p>Student</p> <p>Gives off data on the degree of their understanding and mastery of content through the answers they provide</p>
Technique 39: Do It Again	
Doing it again and doing it right or better or perfect is often the best consequence.	
<p>Teacher</p> <p>Practice helping students to improve; frame it as "good – better – best" sets a standard of excellence by challenging students positively to show you their best at something</p> <p>Have students go back and try again as soon as you know the level of execution won't meet the standard you have set</p>	<p>Student</p> <p>Improves their own performance; experiences greater levels of success</p> <p>Students improve at something without feeling like their being punished or doing it out of compliance</p>
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
<p>Teacher</p> <p>Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.</p>	<p>Student</p> <p>Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.</p>
Every Minute Matters	
Time is water in the desert, a teacher's most precious resource; You can always be teaching	
<p>Teacher</p> <p>Keep a series of short learning activities ready so you're prepared when a two-minute opportunity emerges (end of class, in the hallway, waiting for buses, etc.).</p>	<p>Student</p> <p>Experiences no wasted time; comes to understand that the learning process is one in which every minute counts</p>
Work the Clock	
Time: count it down, parcel it out in highly specific increments, announce an allotted time for each activity	
<p>Teacher</p> <p>Mix in frequent countdowns to pace the class in completing tasks and emphasize the importance of each second; continually set goals for your class's speed in meeting expectations</p>	<p>Student</p> <p>Is better able to keep up with the learning objectives and with the flow of the lesson</p> <p>Experience a sense of accomplishment as they work through each increment</p>
Simple to Complex	
Ask questions that progress from simple to complex	
<p>Teacher</p> <p>Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly</p>	<p>Student</p> <p>Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public</p>
Hit Rate	
The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)	
<p>Teacher</p> <p>If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.</p>	<p>Student</p> <p>Is challenged with questions that are not too hard or unfair, but are not too easy either</p> <p>Stretches their thinking without being impossible; students are bored with easy content</p>

Growth Guide 2.4 – Teach Like a Champion Techniques

Standard 2: Student Learning, Growth and Development

Quality Indicator 4: Differentiated lesson design

Emerging		Developing		Proficient		Distinguished	
2E4) The emerging teacher... Designs and implements instruction that considers the needs of students.		2D4) The developing teacher also... Designs and implements instruction that enables students to learn, grow, and develop because their needs are met in a positive learning environment.		2P4) The proficient teacher also... Through design and instruction, establishes an inviting and nurturing educational environment by creating a trusting relationship with students that engages them in learning.		2S4) The distinguished teacher also... Plans and cultivates the unique skills and talents of every child and encourages them to ask questions, take risks and enjoy learning.	
Score = 0	1	2	3	4	5	6	7
Technique 10: Double Plan It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with “You” on one side and “Them” on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 11: Draw the Map Control the physical environment to support the specific lesson goal for the day							
Teacher Include space planning as a part of lesson planning. Think about the way you want students’ bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating				Student Environment around them supports learning; walls communicate information and motivation about learning			
Technique 15: Circulate Moving strategically around the room during all parts of a lesson.							
Teacher Break the plane between the front of the room and where the students sit (within first 5 minutes of a class); full access required (able to be next to any student without interrupting your teaching); engage when you circulate (work the room, don’t just stand there); move systematically (universally and impersonally but unpredictably); and position for power (face as much of the class as much as possible and leverage the use of blind spots – where you can see them and they know it but they can’t see you).				Student Knows the teacher is able to move where he/she wants and that they control the room Feels as if the teacher is always accessible; knows that they as student are easily accessible to the teacher as well no matter where they sit in their classroom Has a full sense that this is the teacher’s room			

Technique 22: Cold Call	
In order to make engaged participation the expectation, call on students regardless of whether they have raised their hands.	
Teacher Choose one student to speak the answer out loud while all students answer in their minds Allows you to check for understanding effectively and systematically increases speed in terms of pacing and rate at which material is covered, and distribute work broadly and more fully. It is predictive (students come to expect it); is systematic (universal and impersonal); is positive (students know you think they can answer the question); is a scaffold to deeper learning (start with simple and move to progressively harder).	Student All students answer in their minds because they think they are about to be called on. Knows that the teacher thinks they can answer the question.
Technique 23: Call and Response	
Use group choral response – you ask; they answer in unison – to build a culture of energetic, positive engagement.	
Teacher Use to accomplish academic review and reinforcement, high-energy fun, and behavioral reinforcement. Types include repeat, report, reinforce, review and solve.	Student Provides answers with other classmates.
Technique 27: Vegas	
A moment during class when you might observe some production values: music, lights, rhythm, dancing.	
Teacher Use it to reinforce not just academics but the day’s learning objective; its upbeat but often short, sweet and on point – once it’s done, it’s done.	Student Is more highly engaged due to the excitement, the spontaneity and fun of learning
Technique 28: Entry Routine	
Make efficiency, productivity, and scholarly the habit after the greeting and as students take their seats and class begins.	
Teacher Have students pick up materials instead of you passing them out (it is quicker); be sure students know where to sit; turn in homework the same way every day; and a Do Now gets students busy and the lesson underway.	Student Comes in, picks up needed materials, turns in homework, sits in their seat and immediately begins on the day’s objective. Knows that efficiency, productivity and being scholarly is the habit in this classroom
Technique 29: Do Now	
A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.	
Teacher Effectively uses this by ensuring students can complete it without directions or discussion with others; takes three to five minutes; creates a written product; and previews the day’s lesson.	Student Is hard at work even before you fully enter the room or into the lesson Is productive during every minute and ready for instruction when you start; has done the anticipatory set and is thinking about what is coming.
Technique 30: Tight Transitions	
Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.	
Teacher Protects the most important resource: time. Teach transitions in steps (maybe even number them); use point to point movement (identify a location that students move to and then stop); to focus on speed, practice transitions against the clock (motivates students to improve); control what students say during the transition (if they are quick enough, it can be done in silence); and provide consistent enforcement (always do it the right way). *this applies to the movement of materials as well as students	Student Knows exactly what to do, where to do it, and how to do it and can do it quickly without needing additional information from the teacher
Technique 32: SLANT	
Key behaviors that maximize students’ ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	
Teacher Serves as shorthand for reminding students to be attentive and ready learners. Develop non-verbal signals allowing you to remind them without interrupting what you’re otherwise doing.	Student Understands what the letters of the acronym means and can successfully adjust their behavior to comply with the direction for each.

Technique 33: On Your Mark	
Show students how to prepare for a lesson to begin and expect them to do so every day.	
Teacher Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need “before” class begins; and include homework (most important thing students do that is unsupervised by a teacher).	Student Can successfully prepare themselves for learning.
Technique 34: Seat Signals	
Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.	
Teacher Develop a set of signals for common needs in order to not become distracted from teaching: manage requests without interrupting instruction; be explicit and consistent about the signals to be used; make signals specific and unambiguous to prevent them from being a distraction; and be clear about when they can be used and when they can't	Student Signals requests from their seats and can receive the teacher's approval nonverbally for common needs (e.g. pencil sharpener, tissue, bathroom, water, etc.)
Technique 35: Props	
Public praise from the class for students who demonstrate excellence or exemplify virtues (also called “shout-outs” or “ups”)	
Teacher Can cue a prop in one second; can be visceral (non-verbal and without a message); is universal (everyone joins in); its tone is lively and fun; is evolving (students can suggest and develop ideas)	Student Gives props the right way: crisply, quickly and enthusiastically for peers Receives props from classmates for doing something excellent or virtuous
Technique 36: 100 Percent	
There's one acceptable percentage of students following a direction: 100%. Less and your authority is subject to interpretation, situation, and motivation.	
Teacher Sets a standard, not a goal, of 100% compliance; culture of compliance is both positive and more importantly invisible (matter of habit). Most sustainable form of compliance is one that for both teacher and student is about achievement, not an empty exercise in teacher power. To get 100% compliance use the least invasive form of intervention (in order try nonverbal intervention, positive group correction, anonymous individual correction, private individual correction, lightning-quick public correction, and consequence); rely on firm, calm finesse (complying is an exercise in purpose, not power: you emphasize compliance when you invent ways to maximize visibility, be seen looking, avoid marginal compliance, and leverage the power of unacknowledged behavioral opportunities).	Student Does as they are asked without ever seeming to think about it (out of habit). Learns how to do rituals and routines right. Engages in 100% compliance because it promotes their own achievement, not because it is about the teacher's power Does not comply in order to please the teacher but to promote their own learning
Technique 37: What To Do	
Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as they have been asked to do so easily.	
Teacher Make directions routinely useful and easy to follow. They should be specific (focus on manageable and precisely described actions); concrete (involve clear, actionable steps that any student knows how to do); sequential (describes a sequence of actionable steps); and observable (things the teacher can plainly see and verify).	Student A larger portion of non-compliance occurs because of incompetence, not defiance Incompetence requires direction in order to become competent allowing the student to move from non-compliant to compliant.
Technique 38: Strong Voice	
Manifestation of the unique power of individuals and their ability to earn respect and credibility, build relationships, and exude confidence and poise.	
Teacher Establish control, command and benign authority that make the use of excessive consequences unnecessary. This includes an economy of language (focus students on what is most important and nothing more); do not talk over (wait until there is no other talking or rustling); do not engage (avoid engaging in other topics until you have satisfactorily resolved the topic you initiated); square up/stand still (turn, with two feet and two shoulders to face the object of your words directly); and use quiet power (when you get nervous, anxious and upset, drop your voice and make students strain to listen-exude poise and calm even if you aren't feeling it).	Student Feels as if they are being taught by someone who is in control of their learning. Sees the teachers as someone who can control their emotions, is credible and worthy of respect.

Technique 39: Do It Again Doing it again and doing it right or better or perfect is often the best consequence.	
Teacher Practice helping students to improve; frame it as “good – better – best” sets a standard of excellence by challenging students positively to show you their best at something Have students go back and try again as soon as you know the level of execution won’t meet the standard you have set	Student Improves their own performance; experiences greater levels of success Students improve at something without feeling like their being punished or doing it out of compliance
Technique 40: Sweat the Details To reach the highest standards, you must create the perception of order.	
Teacher Clean up clutter, keep desk rows tidy, make sure shirts are tucked in and hats off, Change students’ perception of your classroom by making it seem an orderly, organized place where it is hard to imagine disorder rearing its head	Student If they think the front line of their struggle to test the rules is seeing what color socks they can get away with under uniform guidelines, they are far less likely to consider other ways to test the rules
Technique 41: Threshold When students cross the threshold into the classroom, remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.	
Teacher With culture, getting it right and keeping it right is easier than fixing it once it’s gone wrong Greet students in the threshold of the door, remind them where they are (with you) and your expectations and demands of them This establishes a personal connection with students and reinforces classroom expectations	Student Hard at work just a few seconds after hitting the door Knows the teacher cares personally for them and recalls what the expectations and routines are going to be; experiences and participates in a culture of learning when in your room
Technique 42: No Warnings Using minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.	
Teacher Take action rather than get angry: act early (use minor interventions to prevent major ones); act reliably (be predictably consistent); act proportionately (start small when the misbehavior is small). Giving a warning is not taking action; it is threatening to take action; once you determine a behavior is the result of disobedience (it’s deliberate) rather than incompetence, a consequence is better than a warning. Issue consequences: be calm, poised and impersonal; be incremental; and be private when you can and public when you must	Student Does not behave to please you, but demonstrates the correct behaviors to better themselves, and to be the best they can be and get the most out of school Experiences help and clarity when they demonstrate incompetence Experiences incremental consequences when they demonstrate disobedience
Technique 43: Positive Framing Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.	
Teacher Live in the now (in public: in front of your class or when a lesson is underway); assume the best instead of ill intention (it could be the result of distraction, lack of practice, or genuine misunderstanding instead of ill intention); allow plausible anonymity (don’t call someone out until you have to); build momentum and narrate the positive (make the positive the normal or status quo); challenge (build competition into the day); talk expectations and aspirations (the goal is for them to leave you and move on to bigger and better things).	Student Is encouraged to do their best without being threatened by penalty unless it becomes absolutely necessary Does not experience embarrassment or harassment Experience positive reaction even when being corrected
Technique 44: Precise Praise Use positive reinforcement as a powerful classroom tool	
Teacher Differentiate acknowledgment and praise (acknowledge when expectations have been met and praise when the exceptional has been achieved); praise and acknowledge loud – fix soft; praise must be genuine (address praise and correction specifically to those who need to receive it – don’t use the praise of one student to serve as the correction of another).	Student Understands that meeting expectation will be acknowledged but that receiving praise is reserved for when exceptional work has been demonstrated

Technique 45: Warm / Strict	
At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).	
Teacher Warmth and strictness are not opposites: explain to students why you are doing what you are doing; distinguish between the behavior and the person; demonstrate that a consequence is temporary, once over it is immediately in the past; use warm, nonverbal behavior	Student Understands that they are held to very high standards that will be enforced by someone who genuinely cares about them.
Technique 46: The J-Factor	
Find and promote the joy of learning to achieve a happy and high-achieving classroom.	
Teacher Uses fun and games to draw on a kid's love for challenges, competition and play; makes kids feel they belong and are a part of "us"; uses drama, song and dance to raise spirits and establish collective identity; invokes humor to make happy and fulfilled students; and uses suspense and surprise to make the classroom an adventure.	Student Experiences the joy and enjoyment of learning Realizes that learning can be fun and exciting and yet controlled and productive
Technique 47: Emotional Constancy	
Model the modulation of emotions (no explosions) and tie emotions to student achievement not the emotions of students you teach.	
Teacher Earn students' trust by having them know you are always under control. Provide an emotional rudder to help students return to productivity as soon as possible when emotions run hot.	Student Success, in the long run, is about a consistent relationship with productive behaviors
Technique 48: Explain Everything	
Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).	
Teacher Deliberately make your expectations clear, rational and logical. The rationale behind decisions made in students' interest and the way that adults think on behalf of children is made clear; it happens well in advance of a behavior that needs fixing or after the fixing has resulted in the meeting of expectations.	Student Understands the logic behind rules and expectations designed for their betterment; understands that group success depends on everyone's participation.
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
Teacher Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.	Student Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.
All Hands	
Shift rapidly among and involving a wide array of participants	
Teacher Shifting among participants creates a reference point which signals that something has changed, something has begun or ended. Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with	Student Feels engaged along with other students in the classroom
Work the Clock	
Time: count it down, parcel it out in highly specific increments, announce an allotted time for each activity	
Teacher Mix in frequent countdowns to pace the class in completing tasks and emphasize the importance of each second; continually set goals for your class's speed in meeting expectations	Student Is better able to keep up with the learning objectives and with the flow of the lesson Experience a sense of accomplishment as they work through each increment

Hit Rate

The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)

Teacher

If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.

Student

Is challenged with questions that are not too hard or unfair, but are not too easy either
Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 2.5 – Teach Like a Champion Techniques

Standard 2: Student Learning, Growth and Development

Quality Indicator 5: Prior experiences, multiple intelligences, strengths and needs

Emerging		Developing		Proficient		Distinguished	
2E5) The emerging teacher... Delivers a variety of lesson activities that address students’ prior experiences, multiple intelligences, strengths and needs.		2D5) The developing teacher also... Creates and delivers lessons and instructional activities that address the individual needs of all learners and variation in prior knowledge and experiences, multiple intelligences, strengths, and needs.		2P5) The proficient teacher also... Adapts strategies to meet individual student needs based on student performance data and where the child is developmentally, cognitively, physically, and affectively to advance knowledge and skill development.		2S5) The distinguished teacher also... Acquires and shares authentic strategies for actively involving every student in advancing their own learning, building on their unique experience, intelligence, strengths and needs.	
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out							
A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique3: Stretch It							
A sequence of learning does not end with the right answer; reward right answers with follow up questions that extend knowledge and test for reliability (Differentiated Instruction)							
Teacher Respond to a right answer by asking a different/tougher question that builds and extends Use questioning to make sure that a right answer is repeatable (ask how or why; ask for another way to answer; ask for a better word; ask for evidence; ask students to integrate a related skill; ask students to apply the same skill in a new setting)				Student Knows how to get similar right answers again and again Explains their thinking or applies knowledge in new ways Pushed in a way that’s directly responsive to what they’ve shown they can already do			
Technique4: Format Matters							
It’s not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 5: Without Apology							
The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students’ response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult. They discover interest in content they might not have thought would be interesting			

Lemov, Doug. (2010) Teach Like a Champion: 49 Techniques that put students on the path to college. San Francisco, CA: Jossey-Bass.

Technique7: 4 Ms	
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).	
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).	Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)
Technique 9: Shortest Path	
All things being equal, the simplest explanation or strategy is the best; opt for the most direct route from point to point.	
Teacher Mastery of the objective is the main criterion and the best strategy for achieving it is what gets you to mastery best and fastest.	Student Is focused on the lesson objectivity; Experiences reduced distractions
Technique 10: Double Plan	
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other	Student What students will do during the lesson? Taking notes? Writing Summaries?
Technique 11: Draw the Map	
Control the physical environment to support the specific lesson goal for the day	
Teacher Include space planning as a part of lesson planning. Think about the way you want students' bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating	Student Environment around them supports learning; walls communicate information and motivation about learning
Technique 16: Break it Down	
In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).	Student Commits error but whose learning is then facilitated to result in a correct answer
Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
Teacher Check for understanding and do something about it "right away" Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.	Student Gives off data on the degree of their understanding and mastery of content through the answers they provide
Technique 23: Call and Response	
Use group choral response – you ask; they answer in unison – to build a culture of energetic, positive engagement.	
Teacher Use to accomplish academic review and reinforcement, high-energy fun, and behavioral reinforcement. Types include repeat, report, reinforce, review and solve.	Student Provides answers with other classmates.

Technique 49: Normalize Error

Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.

Teacher

Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.

Student

Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.

Simple to Complex

Ask questions that progress from simple to complex

Teacher

Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly

Student

Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public

Growth Guide 2.6 – Teach Like a Champion Techniques

Standard 2: Student Learning, Growth and Development

Quality Indicator 6: Language, culture, family and knowledge of community values

Emerging		Developing		Proficient		Distinguished	
2E6) The emerging teacher... Reviews demographic and biographical data of students to determine the variety of learning needs.		2D6) The developing teacher also... Modifies instruction in response to how students' learning is influenced by individual experience, talents, and prior learning, as well as language, culture, family and community values.		2P6) The proficient teacher also... Creates a learning climate which respects individual differences by using teaching approaches that incorporate and are sensitive to the multiple experiences of learners, their family, culture, and community.		2S6) The distinguished teacher also... Connects instruction to students' experiences creating a trusting environment by employing strategies that respect differing cultures and draws explicit connections during instruction / assignments that are related to students' experiences and culture.	
Score = 0	1	2	3	4	5	6	7
Technique 21: Take a Stand Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.							
Teacher Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture). Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).				Student Actively engages in the ideas around them by making judgments about the answers their peers provide. Are open to having their ideas be assessed by peers as well			
Technique 28: Entry Routine Make efficiency, productivity, and scholarly the habit after the greeting and as students take their seats and class begins.							
Teacher Have students pick up materials instead of you passing them out (it is quicker); be sure students know where to sit; turn in homework the same way every day; and a Do Now gets students busy and the lesson underway.				Student Comes in, picks up needed materials, turns in homework, sits in their seat and immediately begins on the day's objective. Knows that efficiency, productivity and being scholarly is the habit in this classroom			
Technique 30: Tight Transitions Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.							
Teacher Protects the most important resource: time. Teach transitions in steps (maybe even number them); use point to point movement (identify a location that students move to and then stop); to focus on speed, practice transitions against the clock (motivates students to improve); control what students say during the transition (if they are quick enough, it can be done in silence); and provide consistent enforcement (always do it the right way). *this applies to the movement of materials as well as students				Student Knows exactly what to do, where to do it, and how to do it and can do it quickly without needing additional information from the teacher			

Lemov, Doug. (2010) Teach Like a Champion: 49 Techniques that put students on the path to college. San Francisco, CA: Jossey-Bass.

Technique 44: Precise Praise

Use positive reinforcement as a powerful classroom tool

Teacher

Differentiate acknowledgment and praise (acknowledge when expectations have been met and praise when the exceptional has been achieved); praise and acknowledge loud – fix soft; praise must be genuine (address praise and correction specifically to those who need to receive it – don't use the praise of one student to serve as the correction of another).

Student

Understands that meeting expectation will be acknowledged but that receiving praise is reserved for when exceptional work has been demonstrated

Growth Guide 3.1 – Teach Like a Champion Techniques

Standard 3: Curriculum Implementation

The teacher recognizes the importance of long-range planning and curriculum development. The teacher develops, implements, and evaluates curriculum based upon student, district and state standards data.

Quality Indicator 1: Implementation of curriculum standards

Emerging		Developing		Proficient		Distinguished	
3E1) The emerging teacher... Makes informed decisions about instructional objects aligned to district mapping and pacing guides.		3D1) The developing teacher also... Consistently delivers a variety of learning experiences that are appropriate for curriculum and are aligned with state and district curriculum and assessments.		3P1) The proficient teacher also... Uses state/district curriculum guides with enough facility to anticipate skill gaps and/or misconceptions of students in order to deliver effective instruction.		3S1) The distinguished teacher also... Participates and/or demonstrates leadership for the evaluation and development of curriculum aligned to national, state, and district curriculum and assessments.	
Score = 0	1	2	3	4	5	6	7
Technique 6: Begin with the End Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique7: 4 Ms A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 8: Post It Lesson objective is posted in a visible location – same location every day – and identifies your purpose for teaching that day.							
Teacher Clearly communicate to anyone entering your room the intent of your lesson Particularly helpful for walk-throughs and other mechanisms for feedback on performance				Student Knows what the teacher is trying to do in the lesson for that day and works more intentionally toward that goal			
Technique 9: Shortest Path All things being equal, the simplest explanation or strategy is the best; opt for the most direct route from point to point.							
Teacher Mastery of the objective is the main criterion and the best strategy for achieving it is what gets you to mastery best and fastest.				Student Is focused on the lesson objectivity; Experiences reduced distractions			

Technique 10: Double Plan	
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	
<p>Teacher</p> <p>Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other</p>	<p>Student</p> <p>What students will do during the lesson? Taking notes? Writing Summaries?</p>
Technique 12: The Hook	
A short introductory moment that captures what's interesting and engaging about the material and puts it out in front.	
<p>Teacher</p> <p>Prepare students to be brought into the content; use a brief story, analogy, prop, media, status challenge, etc to engage student attention and build interest</p>	<p>Student</p> <p>Is inspired and excited about the content that is about to be learned</p> <p>Willingly takes the first step into the learning</p>
Technique 13: Name the Steps	
Subdivide complex skills into component tasks and build knowledge up systematically.	
<p>Teacher</p> <p>Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)</p>	<p>Student</p> <p>Learn steps and use this road map as they progress towards mastery (competence)</p> <p>Explains the process while another student does the process. Provides a process that the student can use as they work to remember content</p>

Growth Guide 3.2 – Teach Like a Champion Techniques

Standard 3: Curriculum Implementation

Quality Indicator 2: Lessons for diverse learners

Emerging		Developing		Proficient		Distinguished	
3E2) The emerging teacher... Implements lessons and activities aligned to the curriculum that recognizes the individual needs of diverse learners		3D2) The developing teacher also... Consistently implements lessons and activities that address the needs of diverse learners and responds to ongoing analysis of student performance based on multiple assessments and analysis of student needs.		3P2) The proficient teacher also... Evaluates the effectiveness of a variety of instructional strategies based on multiple assessment data, curriculum and an analysis of student needs.		3S2) The distinguished teacher also... Participates and/or demonstrates leadership in the development of instructional strategies and interventions to accomplish instructional goals based on multiple assessment data, curriculum and an analysis of student needs.	
Score = 0	1	2	3	4	5	6	7
Technique4: Format Matters It's not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 18: Check for Understanding Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.							
Teacher Check for understanding and do something about it "right away" Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.				Student Gives off data on the degree of their understanding and mastery of content through the answers they provide			
Technique 20: Exit Ticket Use a single question or short sequence of problems to solve at the close of a class to check for understanding that provides strong data and critical insights.							
Teacher Refine your next lesson based on the data from the exit ticket These are quick (one to three questions); they're designed to yield data (fairly simple and focus on one key part of the objective); and make for great Do Nows (technique 29).				Student Looks at the data from the exit ticket to understand how well they mastered the key part of the objective and to inform what else they need to know.			

Technique 32: SLANT	
Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	
Teacher Serves as shorthand for reminding students to be attentive and ready learners. Develop non-verbal signals allowing you to remind them without interrupting what you're otherwise doing.	Student Understands what the letters of the acronym means and can successfully adjust their behavior to comply with the direction for each.
Change the Pace	
Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson	
Teacher People of all ages tend to lose focus after ten minutes, so do something new to engage them. Creation an illusion of speed by using a variety throughout the lesson	Student Is energized as a part of the learning process Feels as if they are moving quickly from activity to activity
Brighten Lines	
Draw bright clear lines at the beginning and end of a lesson	
Teacher Beginnings and endings that are clearly visible are more likely to be perceived as reference points and creates the perception you have done multiple, discrete thing.	Student Experiences the "starts" and "stops" of different lesson activities
All Hands	
Shift rapidly among and involving a wide array of participants	
Teacher Shifting among participants creates a reference point which signals that something has changed, something has begun or ended. Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with	Student Feels engaged along with other students in the classroom
Every Minute Matters	
Time is water in the desert, a teacher's most precious resource; You can always be teaching	
Teacher Keep a series of short learning activities ready so you're prepared when a two-minute opportunity emerges (end of class, in the hallway, waiting for buses, etc.).	Student Experiences no wasted time; comes to understand that the learning process is one in which every minute counts
Simple to Complex	
Ask questions that progress from simple to complex	
Teacher Effective questions initially engages students' thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly	Student Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public
Hit Rate	
The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)	
Teacher If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.	Student Is challenged with questions that are not too hard or unfair, but are not too easy either Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 3.3 – Teach Like a Champion Techniques

Standard 3: Curriculum Implementation

Quality Indicator 3: Instructional goals and differentiated instructional strategies

Emerging		Developing		Proficient		Distinguished	
3E3) The emerging teacher... Uses differentiated instructional strategies to address student learning needs in meeting the objectives of the curriculum.		3D3) The developing teacher also... Systematically selects differentiated instructional strategies and content to meet student needs and enhance learning.		3P3) The proficient teacher also... Adjusts instructional goals and time and modifies instructional strategies, and content to meet students' needs and enhance learning.		3S3) The distinguished teacher also... Leads colleagues in discussions of instructional goals to identify methods for modifying instructional strategies, content, and adjusting time to meet students' needs and enhance learning.	
Score = 0	1	2	3	4	5	6	7
Technique2: Right is Right Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique3: Stretch It A sequence of learning does not end with the right answer; reward right answers with follow up questions that extend knowledge and test for reliability (Differentiated Instruction)							
Teacher Respond to a right answer by asking a different/tougher question that builds and extends Use questioning to make sure that a right answer is repeatable (ask how or why; ask for another way to answer; ask for a better word; ask for evidence; ask students to integrate a related skill; ask students to apply the same skill in a new setting)				Student Knows how to get similar right answers again and again Explains their thinking or applies knowledge in new ways Pushed in a way that's directly responsive to what they've shown they can already do			
Technique 5: Without Apology The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			
Technique 6: Begin with the End Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			

Technique7: 4 Ms	
A great lesson objective and therefore a great lesson should be Manageable, Measurable, Made first, and Most important on the path to college (Todd McKee).	
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measurable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).	Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)
Technique 8: Post It	
Lesson objective is posted in a visible location – same location every day – and identifies your purpose for teaching that day.	
Teacher Clearly communicate to anyone entering your room the intent of your lesson Particularly helpful for walk-throughs and other mechanisms for feedback on performance	Student Knows what the teacher is trying to do in the lesson for that day and works more intentionally toward that goal
Technique 10: Double Plan	
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other	Student What students will do during the lesson? Taking notes? Writing Summaries?
Technique 12: The Hook	
A short introductory moment that captures what's interesting and engaging about the material and puts it out in front.	
Teacher Prepare students to be brought into the content; use a brief story, analogy, prop, media, status challenge, etc to engage student attention and build interest	Student Is inspired and excited about the content that is about to be learned Willingly takes the first step into the learning
Technique 13: Name the Steps	
Subdivide complex skills into component tasks and build knowledge up systematically.	
Teacher Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)	Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content
Technique 17: Ratio	
Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.	
Teacher Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that preceded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).	Student Engages in increased doses of cognitive work as soon as they are ready (but not before) Engages in larger and larger shares of the right work – focused and productive

Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
<p>Teacher</p> <p>Check for understanding and do something about it "right away"</p> <p>Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery)</p> <p>Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.</p>	<p>Student</p> <p>Gives off data on the degree of their understanding and mastery of content through the answers they provide</p>
Technique 19: At Bats	
Lessons should include as many repetitions as possible.	
<p>Teacher</p> <p>Go until they can do it on their own; use multiple variations and formats; grab opportunities for enrichment and differentiation;</p>	<p>Student</p> <p>Participates in repetition of essential concepts as a strategy for achieving mastery</p> <p>Increases confidence that they know the content</p>
Technique 21: Take a Stand	
Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	
<p>Teacher</p> <p>Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture).</p> <p>Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).</p>	<p>Student</p> <p>Actively engages in the ideas around them by making judgments about the answers their peers provide.</p> <p>Are open to having their ideas be assessed by peers as well</p>
Technique 33: On Your Mark	
Show students how to prepare for a lesson to begin and expect them to do so every day.	
<p>Teacher</p> <p>Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need "before" class begins; and include homework (most important thing students do that is unsupervised by a teacher).</p>	<p>Student</p> <p>Can successfully prepare themselves for learning.</p>
Technique 43: Positive Framing	
Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.	
<p>Teacher</p> <p>Live in the now (in public: in front of your class or when a lesson is underway); assume the best instead of ill intention (it could be the result of distraction, lack of practice, or genuine misunderstanding instead of ill intention); allow plausible anonymity (don't call someone out until you have to); build momentum and narrate the positive (make the positive the normal or status quo); challenge (build competition into the day); talk expectations and aspirations (the goal is for them to leave you and move on to bigger and better things).</p>	<p>Student</p> <p>Is encouraged to do their best without being threatened by penalty unless it becomes absolutely necessary</p> <p>Does not experience embarrassment or harassment</p> <p>Experience positive reaction even when being corrected</p>
Technique 48: Explain Everything	
Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).	
<p>Teacher</p> <p>Deliberately make your expectations clear, rational and logical.</p> <p>The rationale behind decisions made in students' interest and the way that adults think on behalf of children is made clear; it happens well in advance of a behavior that needs fixing or after the fixing has resulted in the meeting of expectations.</p>	<p>Student</p> <p>Understands the logic behind rules and expectations designed for their betterment; understands that group success depends on everyone's participation.</p>

Change the Pace

Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson

Teacher

People of all ages tend to lose focus after ten minutes, so do something new to engage them.

Creation an illusion of speed by using a variety throughout the lesson

Student

Is energized as a part of the learning process

Feels as if they are moving quickly from activity to activity

One at a Time

Ask one question at a time

Teacher

Although questions tend to come in sequences, ask only one question at a time to help students focus on developing one idea at a time and to focus you on questioning with a specific goal or purpose in mind.

Student

Develops one idea at a time in response to the specific question you asked

Growth Guide 4.1 – Teach Like a Champion Techniques

Standard 4: Critical Thinking

The teacher uses a variety of instructional strategies to encourage students’ critical thinking, problem solving, and performance skills.

Quality Indicator 1: Instructional strategies leading to student engagement in problem-solving and critical thinking

Emerging		Developing		Proficient		Distinguished	
4E1) The emerging teacher... Selects various types of instructional strategies and appropriate resources to achieve instructional goals and teach students critical thinking skills.		4D1) The developing teacher also... Assures student growth with frequent instructional opportunities for students to use critical thinking and problem solving skills.		4P1) The proficient teacher also... Effectively applies a range of instructional techniques that require students to think critically and problem-solve.		4S1) The distinguished teacher also... Fluently uses a range of instructional techniques that require critical thinking; serves as a leader by offering constructive assistance and modeling the use of strategies, materials and technology to maximize learning.	
Score = 0	1	2	3	4	5	6	7
Technique 13: Name the Steps Subdivide complex skills into component tasks and build knowledge up systematically.							
Teacher Identify the steps; make them sticky (memorable and stick in students’ minds); build the steps; use two stairways (explaining the process and doing the process)				Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content			
One at a Time Ask one question at a time							
Teacher Although questions tend to come in sequences, ask only one question at a time to help students focus on developing one idea at a time and to focus you on questioning with a specific goal or purpose in mind.				Student Develops one idea at a time in response to the specific question you asked			
Simple to Complex Ask questions that progress from simple to complex							
Teacher Effective questions initially engages students’ thinking about a topic in contained and concrete ways and then pushes them to think more deeply and broadly				Student Activates their memory of relevant facts and details to support their opinions; develops and reflects on ideas, turning them into insights before being called on to share them in public			
Verbatim (No Bait and Switch) Changing a question							
Teacher When repeating a question for a student and/or class, avoid changing a question after a student has raised their hand and is formulating an answer. Even a slight change in syntax can alter the question.				Student Hear and consider questions and participate based on thoughtful reflection because the question asked remained constant			

Clear and Concise Used to improve the clarity of a question	
Teacher Start with a question word (who, when, what, where, why or how); limit to two clauses (rigorous and demanding but limited to two clauses); write them in advance when they matter (script them as a part of lesson planning); ask an actual question (not making a statement with a question mark); and assume the answer (state it in a way that assumes someone can answer it).	Student Is not held accountable for a wrong answer when the actual problem was the way the question was asked Can formulate better questions themselves
Stock Questions Similar sequences of questions applied over and over in different settings	
Teacher Don't make questions up as you go, instead decide to ask a sequence of questions	Student Answers are linked to answers provided before and after the one they answered
Hit Rate The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)	
Teacher If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.	Student Is challenged with questions that are not too hard or unfair, but are not too easy either Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 4.2 – Teach Like a Champion Techniques

Standard 4: Critical Thinking

Quality Indicator 2: Appropriate use of instructional resources to enhance student learning

Emerging		Developing		Proficient		Distinguished	
4E2) The emerging teacher... Uses a variety of instructional resources to enhance the teaching and learning process.		4D2) The developing teacher also... Purposefully selects and uses a variety of developmentally appropriate instructional resources to enhance academic performance and technological literacy.		4P2) The proficient teacher also... Assesses the effectiveness of instructional resources and developmentally appropriate instructional activities and adapts for promoting complex thinking and technological skills.		4S2) The distinguished teacher also... Applies research-based instructional resources including technology to enhance their own teaching, as well as being a potential resource to others.	
Score = 0	1	2	3	4	5	6	7
Technique 6: Begin with the End Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique7: 4 Ms A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 13: Name the Steps Subdivide complex skills into component tasks and build knowledge up systematically.							
Teacher Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)				Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content			
Change the Pace Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson							
Teacher People of all ages tend to lose focus after ten minutes, so do something new to engage them. Creation an illusion of speed by using a variety throughout the lesson				Student Is energized as a part of the learning process Feels as if they are moving quickly from activity to activity			

Every Minute Matters

Time is water in the desert, a teacher's most precious resource; You can always be teaching

Teacher

Keep a series of short learning activities ready so you're prepared when a two-minute opportunity emerges (end of class, in the hallway, waiting for buses, etc.).

Student

Experiences no wasted time; comes to understand that the learning process is one in which every minute counts

Growth Guide 4.3 – Teach Like a Champion Techniques

Standard 4: Critical Thinking

Quality Indicator 3: Cooperative, small group and independent learning

Emerging		Developing		Proficient		Distinguished	
4E3) The emerging teacher... Employs individual and cooperative learning activities to promote critical thinking skills.		4D3) The developing teacher also... Uses a variety of learning situations, such as independent, small group and whole class to enhance individual and collective critical thinking skills.		4P3) The proficient teacher also... Effectively combines flexible and varied independent, cooperative and whole-class learning situations and applies grouping strategies to maximize student understanding and learning.		4S3) The distinguished teacher also... Models and/or shares with others the effective use of flexible and varied independent, collaborative and whole-class learning situations.	
Score = 0	1	2	3	4	5	6	7
Technique 7: 4 Ms A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 10: Double Plan It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 11: Draw the Map Control the physical environment to support the specific lesson goal for the day							
Teacher Include space planning as a part of lesson planning. Think about the way you want students' bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating				Student Environment around them supports learning; walls communicate information and motivation about learning			

Technique 21: Take a Stand	
Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	
<p>Teacher</p> <p>Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture).</p> <p>Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).</p>	<p>Student</p> <p>Actively engages in the ideas around them by making judgments about the answers their peers provide.</p> <p>Are open to having their ideas be assessed by peers as well</p>
Change the Pace	
Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson	
<p>Teacher</p> <p>People of all ages tend to lose focus after ten minutes, so do something new to engage them.</p> <p>Creation an illusion of speed by using a variety throughout the lesson</p>	<p>Student</p> <p>Is energized as a part of the learning process</p> <p>Feels as if they are moving quickly from activity to activity</p>
All Hands	
Shift rapidly among and involving a wide array of participants	
<p>Teacher</p> <p>Shifting among participants creates a reference point which signals that something has changed, something has begun or ended.</p> <p>Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with</p>	<p>Student</p> <p>Feels engaged along with other students in the classroom</p>

Growth Guide 5.1 – Teach Like a Champion Techniques

Standard 5: Positive Classroom Environment

The teacher uses an understanding of individual/group motivation and behavior to create a learning environment that encourages active engagement in learning, positive social interaction, and self-motivation.

Quality Indicator 1: Classroom management techniques

Emerging		Developing		Proficient		Distinguished	
5E1) The emerging teacher... Demonstrates basic classroom management techniques and addresses misbehavior to avoid the disruption of instruction.		5D1) The developing teacher also... Uses effective classroom management techniques including addressing misbehavior promptly and effectively with the least disruption of instruction.		5P1) The proficient teacher also... Adapts and develops classroom management techniques that address all student misbehavior ensuring little or no disruption of instruction.		5S1) The distinguished teacher also... Shares with others effective classroom management techniques that reduce the likelihood of misbehavior ensuring little or no disruptions to instruction.	
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique3: Stretch It A sequence of learning does not end with the right answer; reward right answers with follow up questions that extend knowledge and test for reliability (Differentiated Instruction)							
Teacher Respond to a right answer by asking a different/tougher question that builds and extends Use questioning to make sure that a right answer is repeatable (ask how or why; ask for another way to answer; ask for a better word; ask for evidence; ask students to integrate a related skill; ask students to apply the same skill in a new setting)				Student Knows how to get similar right answers again and again Explains their thinking or applies knowledge in new ways Pushed in a way that’s directly responsive to what they’ve shown they can already do			
Technique 9: Shortest Path All things being equal, the simplest explanation or strategy is the best; opt for the most direct route from point to point.							
Teacher Mastery of the objective is the main criterion and the best strategy for achieving it is what gets you to mastery best and fastest.				Student Is focused on the lesson objectivity; Experiences reduced distractions			

Technique 10: Double Plan	
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other	Student What students will do during the lesson? Taking notes? Writing Summaries?
Technique 11: Draw the Map	
Control the physical environment to support the specific lesson goal for the day	
Teacher Include space planning as a part of lesson planning. Think about the way you want students' bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating	Student Environment around them supports learning; walls communicate information and motivation about learning
Technique 15: Circulate	
Moving strategically around the room during all parts of a lesson.	
Teacher Break the plane between the front of the room and where the students sit (within first 5 minutes of a class); full access required (able to be next to any student without interrupting your teaching); engage when you circulate (work the room, don't just stand there); move systematically (universally and impersonally but unpredictably); and position for power (face as much of the class as much as possible and leverage the use of blind spots – where you can see them and they know it but they can't see you).	Student Knows the teacher is able to move where he/she wants and that they control the room Feels as if the teacher is always accessible; knows that they as student are easily accessible to the teacher as well no matter where they sit in their classroom Has a full sense that this is the teacher's room
Technique 19: At Bats	
Lessons should include as many repetitions as possible.	
Teacher Go until they can do it on their own; use multiple variations and formats; grab opportunities for enrichment and differentiation	Student Participates in repetition of essential concepts as a strategy for achieving mastery Increases confidence that they know the content
Technique 20: Exit Ticket	
Use a single question or short sequence of problems to solve at the close of a class to check for understanding that provides strong data and critical insights.	
Teacher Refine your next lesson based on the data from the exit ticket These are quick (one to three questions); they're designed to yield data (fairly simple and focus on one key part of the objective); and make for great Do Nows (technique 29).	Student Looks at the data from the exit ticket to understand how well they mastered the key part of the objective and to inform what else they need to know.
Technique 22: Cold Call	
In order to make engaged participation the expectation, call on students regardless of whether they have raised their hands.	
Teacher Choose one student to speak the answer out loud while all students answer in their minds Allows you to check for understanding effectively and systematically increases speed in terms of pacing and rate at which material is covered, and distribute work broadly and more fully. It is predictive (students come to expect it); is systematic (universal and impersonal); is positive (students know you think they can answer the question); is a scaffold to deeper learning (start with simple and move to progressively harder).	Student All students answer in their minds because they think they are about to be called on. Knows that the teacher thinks they can answer the question.
Technique 24: Pepper	
Use fast paced, group-orientated activities to review familiar information and foundational skills.	
Teacher Toss questions to a group of students quickly; if its right, teacher asks another student a new question; if it's wrong the same questions is asked to a new student. Maintain a fast pace and be unpredictable.	Student Answers question randomly as a part of a group of students receiving teacher questions given quickly and unpredictably.

Technique 25: Wait Time	
Delay a few strategic seconds after you finish asking a question and before you ask a student to begin answer it.	
Teacher Use of 3-5 seconds increases length and correctness of responses; decreases number of failures; increases number of volunteers; and increases use of evidence. Use narration during the wait time period to incent and reinforce specific behaviors most productive to students.	Student Generates richer, more reflective and well developed answers during the wait time
Technique 26: Everybody Writes	
Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.	
Teacher Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.	Student Is challenged intellectually and is engaged The quality of the ideas and their writing improves
Technique 27: Vegas	
A moment during class when you might observe some production values: music, lights, rhythm, dancing.	
Teacher Use it to reinforce not just academics but the day's learning objective; it's upbeat but often short, sweet and on point – once it's done, it's done.	Student Is more highly engaged due to the excitement, the spontaneity and fun of learning
Technique 28: Entry Routine	
Make efficiency, productivity, and scholarly the habit after the greeting and as students take their seats and class begins.	
Teacher Have students pick up materials instead of you passing them out (it is quicker); be sure students know where to sit; turn in homework the same way every day; and a Do Now gets students busy and the lesson underway.	Student Comes in, picks up needed materials, turns in homework, sits in their seat and immediately begins on the day's objective. Knows that efficiency, productivity and being scholarly is the habit in this classroom
Technique 29: Do Now	
A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.	
Teacher Effectively uses this by ensuring students can complete it without directions or discussion with others; takes three to five minutes; creates a written product; and previews the day's lesson.	Student Is hard at work even before you fully enter the room or into the lesson Is productive during every minute and ready for instruction when you start; has done the anticipatory set and is thinking about what is coming.
Technique 30: Tight Transitions	
Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.	
Teacher Protects the most important resource: time. Teach transitions in steps (maybe even number them); use point to point movement (identify a location that students move to and then stop); to focus on speed, practice transitions against the clock (motivates students to improve); control what students say during the transition (if they are quick enough, it can be done in silence); and provide consistent enforcement (always do it the right way). (this applies to the movement of materials as well as students)	Student Knows exactly what to do, where to do it, and how to do it and can do it quickly without needing additional information from the teacher
Technique 32: SLANT	
Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	
Teacher Serves as shorthand for reminding students to be attentive and ready learners. Develop non-verbal signals allowing you to remind them without interrupting what you're otherwise doing.	Student Understands what the letters of the acronym means and can successfully adjust their behavior to comply with the direction for each.

Technique 33: On Your Mark	
Show students how to prepare for a lesson to begin and expect them to do so every day.	
Teacher Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need “before” class begins; and include homework (most important thing students do that is unsupervised by a teacher).	Student Can successfully prepare themselves for learning.
Technique 34: Seat Signals	
Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.	
Teacher Develop a set of signals for common needs in order to not become distracted from teaching: manage requests without interrupting instruction; be explicit and consistent about the signals to be used; make signals specific and unambiguous to prevent them from being a distraction; and be clear about when they can be used and when they can't	Student Signals requests from their seats and can receive the teacher's approval nonverbally for common needs (e.g. pencil sharpener, tissue, bathroom, water, etc.)
Technique 35: Props	
Public praise from the class for students who demonstrate excellence or exemplify virtues (also called “shout-outs” or “ups”)	
Teacher Can cue a prop in one second; can be visceral (non-verbal and without a message); is universal (everyone joins in); its tone is lively and fun; is evolving (students can suggest and develop ideas);	Student Gives props the right way: crisply, quickly and enthusiastically for peers Receives props from classmates for doing something excellent or virtuous
Technique 36: 100 Percent	
There's one acceptable percentage of students following a direction: 100%. Less and your authority is subject to interpretation, situation, and motivation.	
Teacher Sets a standard, not a goal, of 100% compliance; culture of compliance is both positive and more importantly invisible (matter of habit). Most sustainable form of compliance is one that for both teacher and student is about achievement, not an empty exercise in teacher power. To get 100% compliance use the least invasive form of intervention (in order try nonverbal intervention, positive group correction, anonymous individual correction, private individual correction, lightning-quick public correction, and consequence); rely on firm, calm finesse (complying is an exercise in purpose, not power: you emphasize compliance when you invent ways to maximize visibility, be seen looking, avoid marginal compliance, and leverage the power of unacknowledged behavioral opportunities).	Student Does as they are asked without ever seeming to think about it (out of habit). Learns how to do rituals and routines right. Engages in 100% compliance because it promotes their own achievement, not because it is about the teacher's power Does not comply in order to please the teacher but to promote their own learning
Technique 37: What To Do	
Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as they have been asked to do so easily.	
Teacher Make directions routinely useful and easy to follow. They should be specific (focus on manageable and precisely described actions); concrete (involve clear, actionable steps that any student knows how to do); sequential (describes a sequence of actionable steps); and observable (things the teacher can plainly see and verify).	Student A larger portion of non-compliance occurs because of incompetence, not defiance Incompetence requires direction in order to become competent allowing the student to move from non-compliant to compliant.
Technique 38: Strong Voice	
Manifestation of the unique power of individuals and their ability to earn respect and credibility, build relationships, and exude confidence and poise.	
Teacher Establish control, command and benign authority that make the use of excessive consequences unnecessary. This includes an economy of language (focus students on what is most important and nothing more); do not talk over (wait until there is no other talking or rustling); do not engage (avoid engaging in other topics until you have satisfactorily resolved the topic you initiated); square up/stand still (turn, with two feet and two shoulders to face the object of your words directly); and use quiet power (when you get nervous, anxious and upset, drop your voice and make students strain to listen-exude poise and calm even if you aren't feeling it).	Student Feels as if they are being taught by someone who is in control of their learning. Sees the teachers as someone who can control their emotions, is credible and worthy of respect.

Technique 39: Do It Again Doing it again and doing it right or better or perfect is often the best consequence.	
Teacher Practice helping students to improve; frame it as “good – better – best” sets a standard of excellence by challenging students positively to show you their best at something Have students go back and try again as soon as you know the level of execution won’t meet the standard you have set	Student Improves their own performance; experiences greater levels of success Students improve at something without feeling like their being punished or doing it out of compliance
Technique 40: Sweat the Details To reach the highest standards, you must create the perception of order.	
Teacher Clean up clutter, keep desk rows tidy, make sure shirts are tucked in and hats off, Change students’ perception of your classroom by making it seem an orderly, organized place where it is hard to imagine disorder rearing its head	Student If they think the front line of their struggle to test the rules is seeing what color socks they can get away with under uniform guidelines, they are far less likely to consider other ways to test the rules
Technique 41: Threshold When students cross the threshold into the classroom, remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.	
Teacher With culture, getting it right and keeping it right is easier than fixing it once it’s gone wrong Greet students in the threshold of the door, remind them where they are (with you) and your expectations and demands of them This establishes a personal connection with students and reinforces classroom expectations	Student Hard at work just a few seconds after hitting the door Knows the teacher cares personally for them and recalls what the expectations and routines are going to be; experiences and participates in a culture of learning when in your room
Technique 42: No Warnings Using minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.	
Teacher Take action rather than get angry: act early (use minor interventions to prevent major ones); act reliably (be predictably consistent); act proportionately (start small when the misbehavior is small). Giving a warning is not taking action; it is threatening to take action; once you determine a behavior is the result of disobedience (it’s deliberate) rather than incompetence, a consequence is better than a warning. Issue consequences: be calm, poised and impersonal; be incremental; and be private when you can and public when you must	Student Does not behave to please you, but demonstrates the correct behaviors to better themselves, and to be the best they can be and get the most out of school Experiences help and clarity when they demonstrate incompetence Experiences incremental consequences when they demonstrate disobedience
Technique 43: Positive Framing Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.	
Teacher Live in the now (in public: in front of your class or when a lesson is underway); assume the best instead of ill intention (it could be the result of distraction, lack of practice, or genuine misunderstanding instead of ill intention); allow plausible anonymity (don’t call someone out until you have to); build momentum and narrate the positive (make the positive the normal or status quo); challenge (build competition into the day); talk expectations and aspirations (the goal is for them to leave you and move on to bigger and better things).	Student Is encouraged to do their best without being threatened by penalty unless it becomes absolutely necessary Does not experience embarrassment or harassment Experience positive reaction even when being corrected
Technique 44: Precise Praise Use positive reinforcement as a powerful classroom tool	
Teacher Differentiate acknowledgment and praise (acknowledge when expectations have been met and praise when the exceptional has been achieved); praise and acknowledge loud – fix soft; praise must be genuine (address praise and correction specifically to those who need to receive it – don’t use the praise of one student to serve as the correction of another).	Student Understands that meeting expectation will be acknowledged but that receiving praise is reserved for when exceptional work has been demonstrated

Technique 45: Warm / Strict	
At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).	
Teacher Warmth and strictness are not opposites: explain to students why you are doing what you are doing; distinguish between the behavior and the person; demonstrate that a consequence is temporary, once over it is immediately in the past; use warm, nonverbal behavior	Student Understands that they are held to very high standards that will be enforced by someone who genuinely cares about them.
Technique 46: The J-Factor	
Find and promote the joy of learning to achieve a happy and high-achieving classroom.	
Teacher Uses fun and games to draw on a kid's love for challenges, competition and play; makes kids feel they belong and are a part of "us"; uses drama, song and dance to raise spirits and establish collective identity; invokes humor to make happy and fulfilled students; and uses suspense and surprise to make the classroom an adventure.	Student Experiences the joy and enjoyment of learning Realizes that learning can be fun and exciting and yet controlled and productive
Technique 48: Explain Everything	
Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).	
Teacher Deliberately make your expectations clear, rational and logical. The rationale behind decisions made in students' interest and the way that adults think on behalf of children is made clear; it happens well in advance of a behavior that needs fixing or after the fixing has resulted in the meeting of expectations.	Student Understands the logic behind rules and expectations designed for their betterment; understands that group success depends on everyone's participation.
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
Teacher Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.	Student Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.
Look Forward	
Mild suspense creates tension, excitement and anticipation around learning	
Teacher Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective	Student Is motivated to see the learning through to the end (how it turns out) Wants to know what is coming next
Work the Clock	
Time: count it down, parcel it out in highly specific increments, announce an allotted time for each activity	
Teacher Mix in frequent countdowns to pace the class in completing tasks and emphasize the importance of each second; continually set goals for your class's speed in meeting expectations	Student Is better able to keep up with the learning objectives and with the flow of the lesson Experience a sense of accomplishment as they work through each increment

Growth Guide 5.2 – Teach Like a Champion Techniques

Standard 5: Positive Classroom Environment

Quality Indicator 2: Management of time, space, transitions, and activities

Emerging		Developing		Proficient		Distinguished	
5E2) The emerging teacher... Manages time, space, transitions, and activities in their classroom.		5D2) The developing teacher also... Effectively manages time, space, transitions, and activities to create an environment that enhances student engagement.		5P2) The proficient teacher also... Organizes, allocates, and manages time, space, transitions and activities to promote continuous student engagement and high levels of productivity.		5S2) The distinguished teacher also... Shares with others effective strategies for managing time, space, transitions and activities to promote continuous student engagement and high levels of productivity.	
Score = 0	1	2	3	4	5	6	7
Technique 8: Post It							
Lesson objective is posted in a visible location – same location every day – and identifies your purpose for teaching that day.							
Teacher Clearly communicate to anyone entering your room the intent of your lesson Particularly helpful for walk-throughs and other mechanisms for feedback on performance				Student Knows what the teacher is trying to do in the lesson for that day and works more intentionally toward that goal			
Technique 10: Double Plan							
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with “You” on one side and “Them” on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 11: Draw the Map							
Control the physical environment to support the specific lesson goal for the day							
Teacher Include space planning as a part of lesson planning. Think about the way you want students’ bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating				Student Environment around them supports learning; walls communicate information and motivation about learning			

Technique 15: Circulate Moving strategically around the room during all parts of a lesson.	
Teacher Break the plane between the front of the room and where the students sit (within first 5 minutes of a class); full access required (able to be next to any student without interrupting your teaching); engage when you circulate (work the room, don't just stand there); move systematically (universally and impersonally but unpredictably); and position for power (face as much of the class as much as possible and leverage the use of blind spots – where you can see them and they know it but they can't see you).	Student Knows the teacher is able to move where he/she wants and that they control the room Feels as if the teacher is always accessible; knows that they as student are easily accessible to the teacher as well no matter where they sit in their classroom Has a full sense that this is the teacher's room
Technique 27: Vegas A moment during class when you might observe some production values: music, lights, rhythm, dancing.	
Teacher Use it to reinforce not just academics but the day's learning objective; its upbeat but often short, sweet and on point – once it's done, it's done.	Student Is more highly engaged due to the excitement, the spontaneity and fun of learning
Technique 28: Entry Routine Make efficiency, productivity, and scholarly the habit after the greeting and as students take their seats and class begins.	
Teacher Have students pick up materials instead of you passing them out (it is quicker); be sure students know where to sit; turn in homework the same way every day; and a Do Now gets students busy and the lesson underway.	Student Comes in, picks up needed materials, turns in homework, sits in their seat and immediately begins on the day's objective. Knows that efficiency, productivity and being scholarly is the habit in this classroom
Technique 29: Do Now A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.	
Teacher Effectively uses this by ensuring students can complete it without directions or discussion with others; takes three to five minutes; creates a written product; and previews the day's lesson.	Student Is hard at work even before you fully enter the room or into the lesson Is productive during every minute and ready for instruction when you start; has done the anticipatory set and is thinking about what is coming.
Technique 30: Tight Transitions Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.	
Teacher Protects the most important resource: time. Teach transitions in steps (maybe even number them); use point to point movement (identify a location that students move to and then stop); to focus on speed, practice transitions against the clock (motivates students to improve); control what students say during the transition (if they are quick enough, it can be done in silence); and provide consistent enforcement (always do it the right way). *this applies to the movement of materials as well as students	Student Knows exactly what to do, where to do it, and how to do it and can do it quickly without needing additional information from the teacher
Technique 31: Binder Control Care enough about and the importance of what you teach to build a system for the storage, organization and recall of what students have learned.	
Teacher Have a required place for notes; have the required place be in a binder (ideally provided by you that maybe even stays in the classroom at night); have a required format for organizing papers (perhaps assign a number to all materials).	Student Maintains all notes and materials in an organized manner consistent with all of the other students.
Technique 33: On Your Mark Show students how to prepare for a lesson to begin and expect them to do so every day.	
Teacher Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need "before" class begins; and include homework (most important thing students do that is unsupervised by a teacher).	Student Can successfully prepare themselves for learning.

Technique 34: Seat Signals	
Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.	
Teacher Develop a set of signals for common needs in order to not become distracted from teaching; manage requests without interrupting instruction; be explicit and consistent about the signals to be used; make signals specific and unambiguous to prevent them from being a distraction; and be clear about when they can be used and when they can't	Student Signals requests from their seats and can receive the teacher's approval nonverbally for common needs (e.g. pencil sharpener, tissue, bathroom, water, etc.)
Technique 37: What To Do	
Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as they have been asked to do so easily.	
Teacher Make directions routinely useful and easy to follow. They should be specific (focus on manageable and precisely described actions); concrete (involve clear, actionable steps that any student knows how to do); sequential (describes a sequence of actionable steps); and observable (things the teacher can plainly see and verify).	Student A larger portion of non-compliance occurs because of incompetence, not defiance. Incompetence requires direction in order to become competent allowing the student to move from non-compliant to compliant.
Technique 38: Strong Voice	
Manifestation of the unique power of individuals and their ability to earn respect and credibility, build relationships, and exude confidence and poise.	
Teacher Establish control, command and benign authority that make the use of excessive consequences unnecessary. This includes an economy of language (focus students on what is most important and nothing more); do not talk over (wait until there is no other talking or rustling); do not engage (avoid engaging in other topics until you have satisfactorily resolved the topic you initiated); square up/stand still (turn, with two feet and two shoulders to face the object of your words directly); and use quiet power (when you get nervous, anxious and upset, drop your voice and make students strain to listen-exude poise and calm even if you aren't feeling it).	Student Feels as if they are being taught by someone who is in control of their learning. Sees the teachers as someone who can control their emotions, is credible and worthy of respect.
Technique 41: Threshold	
When students cross the threshold into the classroom, remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.	
Teacher With culture, getting it right and keeping it right is easier than fixing it once it's gone wrong. Greet students in the threshold of the door, remind them where they are (with you) and your expectations and demands of them. This establishes a personal connection with students and reinforces classroom expectations	Student Hard at work just a few seconds after hitting the door. Knows the teacher cares personally for them and recalls what the expectations and routines are going to be; experiences and participates in a culture of learning when in your room
Technique 42: No Warnings	
Using minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.	
Teacher Take action rather than get angry: act early (use minor interventions to prevent major ones); act reliably (be predictably consistent); act proportionately (start small when the misbehavior is small). Giving a warning is not taking action; it is threatening to take action; once you determine a behavior is the result of disobedience (it's deliberate) rather than incompetence, a consequence is better than a warning. Issue consequences: be calm, poised and impersonal; be incremental; and be private when you can and public when you must	Student Does not behave to please you, but demonstrates the correct behaviors to better themselves, and to be the best they can be and get the most out of school. Experiences help and clarity when they demonstrate incompetence. Experiences incremental consequences when they demonstrate disobedience
Brighten Lines	
Draw bright clear lines at the beginning and end of a lesson	
Teacher Beginnings and endings that are clearly visible are more likely to be perceived as reference points and creates the perception you have done multiple, discrete things.	Student Experiences the "starts" and "stops" of different lesson activities

All Hands

Shift rapidly among and involving a wide array of participants

Teacher

Shifting among participants creates a reference point which signals that something has changed, something has begun or ended.

Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with

Student

Feels engaged along with other students in the classroom

Growth Guide 5.3 – Teach Like a Champion Techniques

Standard 5: Positive Classroom Environment

Quality Indicator 3: Classroom, school and community culture

Emerging		Developing		Proficient		Distinguished	
5E3) The emerging teacher Builds awareness of the culture of the school and community in order to influence student relationships and build an effective classroom learning environment.		5D3) The developing teacher also... Develops a positive culture in the classroom and school to positively affect student relationships and learning.		5P3) The proficient teacher also... Maintains and enhances a positive culture in the classroom and school, creating a classroom environment which promotes positive student relationships and learning.		5S3) The distinguished teacher also... Actively engages students in discussing and evaluating the culture of the classroom, school and community to positively impact relationships and learning.	
Score= 0	1	2	3	4	5	6	7
Technique2: Right is Right Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique 11: Draw the Map Control the physical environment to support the specific lesson goal for the day							
Teacher Include space planning as a part of lesson planning. Think about the way you want students' bodies engaged in a lesson as well as their minds. You have to be able to get anywhere in the room and within a foot of any student at all times. The walls in the rooms should avoid overstimulation and distraction; walls should be functional not just decorative and motivating				Student Environment around them supports learning; walls communicate information and motivation about learning			
Technique 14: Board = Paper Students learning how to be good students by learning to take notes and retain a record of their knowledge.							
Teacher Have students take exact notes of what you put on the board as a starting point to their capturing their own increasing knowledge Provide exact direction and then increasing flexibility				Student Learn to capture own learning by first copying exactly what the teacher puts down; move on to making internal decisions about what to capture Increases in own discretion of what is important to capture and how they capture			
Technique 27: Vegas A moment during class when you might observe some production values: music, lights, rhythm, dancing.							
Teacher Use it to reinforce not just academics but the day's learning objective; it's upbeat but often short, sweet and on point – once it's done, it's done.				Student Is more highly engaged due to the excitement, the spontaneity and fun of learning			

Technique 28: Entry Routine	
Make efficiency, productivity, and scholarly the habit after the greeting and as students take their seats and class begins.	
Teacher Have students pick up materials instead of you passing them out (it is quicker); be sure students know where to sit; turn in homework the same way every day; and a Do Now gets students busy and the lesson underway.	Student Comes in, picks up needed materials, turns in homework, sits in their seat and immediately begins on the day's objective. Knows that efficiency, productivity and being scholarly is the habit in this classroom
Technique 29: Do Now	
A short activity written on the board or on desks before students enter that clearly states what to work on and eliminates excuses leading to distractions.	
Teacher Effectively uses this by ensuring students can complete it without directions or discussion with others; takes three to five minutes; creates a written product; and previews the day's lesson.	Student Is hard at work even before you fully enter the room or into the lesson Is productive during every minute and ready for instruction when you start; has done the anticipatory set and is thinking about what is coming.
Technique 30: Tight Transitions	
Quick or routine movement from place to place or activity to activity that students can execute without extensive narration by the teacher.	
Teacher Protects the most important resource: time. Teach transitions in steps (maybe even number them); use point to point movement (identify a location that students move to and then stop); to focus on speed, practice transitions against the clock (motivates students to improve); control what students say during the transition (if they are quick enough, it can be done in silence); and provide consistent enforcement (always do it the right way). *this applies to the movement of materials as well as students	Student Knows exactly what to do, where to do it, and how to do it and can do it quickly without needing additional information from the teacher
Technique 31: Binder Control	
Care enough about and the importance of what you teach to build a system for the storage, organization and recall of what students have learned.	
Teacher Have a required place for notes; have the required place be in a binder (ideally provided by you that maybe even stays in the classroom at night); have a required format for organizing papers (perhaps assign a number to all materials).	Student Maintains all notes and materials in an organized manner consistent with all of the other students.
Technique 32: SLANT	
Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	
Teacher Serves as shorthand for reminding students to be attentive and ready learners. Develop non-verbal signals allowing you to remind them without interrupting what you're otherwise doing.	Student Understands what the letters of the acronym means and can successfully adjust their behavior to comply with the direction for each.
Technique 33: On Your Mark	
Show students how to prepare for a lesson to begin and expect them to do so every day.	
Teacher Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need "before" class begins; and include homework (most important thing students do that is unsupervised by a teacher).	Student Can successfully prepare themselves for learning.
Technique 34: Seat Signals	
Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.	
Teacher Develop a set of signals for common needs in order to not become distracted from teaching: manage requests without interrupting instruction; be explicit and consistent about the signals to be used; make signals specific and unambiguous to prevent them from being a distraction; and be clear about when they can be used and when they can't	Student Signals requests from their seats and can receive the teacher's approval nonverbally for common needs (e.g. pencil sharpener, tissue, bathroom, water, etc.)

Technique 35: Props	
Public praise from the class for students who demonstrate excellence or exemplify virtues (also called “shout-outs” or “ups”)	
<p>Teacher</p> <p>Can cue a prop in one second; can be visceral (non-verbal and without a message); is universal (everyone joins in); its tone is lively and fun; is evolving (students can suggest and develop ideas);</p>	<p>Student</p> <p>Gives props the right way: crisply, quickly and enthusiastically for peers Receives props from classmates for doing something excellent or virtuous</p>
Technique 37: What To Do	
Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as they have been asked to do so easily.	
<p>Teacher</p> <p>Make directions routinely useful and easy to follow. They should be specific (focus on manageable and precisely described actions); concrete (involve clear, actionable steps that any student knows how to do); sequential (describes a sequence of actionable steps); and observable (things the teacher can plainly see and verify).</p>	<p>Student</p> <p>A larger portion of non-compliance occurs because of incompetence, not defiance Incompetence requires direction in order to become competent allowing the student to move from non-compliant to compliant.</p>
Technique 38: Strong Voice	
Manifestation of the unique power of individuals and their ability to earn respect and credibility, build relationships, and exude confidence and poise.	
<p>Teacher</p> <p>Establish control, command and benign authority that make the use of excessive consequences unnecessary. This includes an economy of language (focus students on what is most important and nothing more); do not talk over (wait until there is no other talking or rustling); do not engage (avoid engaging in other topics until you have satisfactorily resolved the topic you initiated); square up/stand still (turn, with two feet and two shoulders to face the object of your words directly); and use quiet power (when you get nervous, anxious and upset, drop your voice and make students strain to listen-exude poise and calm even if you aren't feeling it).</p>	<p>Student</p> <p>Feels as if they are being taught by someone who is in control of their learning. Sees the teachers as someone who can control their emotions, is credible and worthy of respect.</p>
Technique 41: Threshold	
When students cross the threshold into the classroom, remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.	
<p>Teacher</p> <p>With culture, getting it right and keeping it right is easier than fixing it once it's gone wrong Greet students in the threshold of the door, remind them where they are (with you) and your expectations and demands of them This establishes a personal connection with students and reinforces classroom expectations</p>	<p>Student</p> <p>Hard at work just a few seconds after hitting the door Knows the teacher cares personally for them and recalls what the expectations and routines are going to be; experiences and participates in a culture of learning when in your room</p>
Technique 42: No Warnings	
Using minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.	
<p>Teacher</p> <p>Take action rather than get angry: act early (use minor interventions to prevent major ones); act reliably (be predictably consistent); act proportionately (start small when the misbehavior is small). Giving a warning is not taking action; it is threatening to take action; once you determine a behavior is the result of disobedience (it's deliberate) rather than incompetence, a consequence is better than a warning. Issue consequences: be calm, poised and impersonal; be incremental; and be private when you can and public when you must</p>	<p>Student</p> <p>Does not behave to please you, but demonstrates the correct behaviors to better themselves, and to be the best they can be and get the most out of school Experiences help and clarity when they demonstrate incompetence Experiences incremental consequences when they demonstrate disobedience</p>

Technique 43: Positive Framing	
Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.	
<p>Teacher</p> <p>Live in the now (in public: in front of your class or when a lesson is underway); assume the best instead of ill intention (it could be the result of distraction, lack of practice, or genuine misunderstanding instead of ill intention); allow plausible anonymity (don't call someone out until you have to); build momentum and narrate the positive (make the positive the normal or status quo); challenge (build competition into the day); talk expectations and aspirations (the goal is for them to leave you and move on to bigger and better things).</p>	<p>Student</p> <p>Is encouraged to do their best without being threatened by penalty unless it becomes absolutely necessary</p> <p>Does not experience embarrassment or harassment</p> <p>Experience positive reaction even when being corrected</p>
Technique 44: Precise Praise	
Use positive reinforcement as a powerful classroom tool	
<p>Teacher</p> <p>Differentiate acknowledgment and praise (acknowledge when expectations have been met and praise when the exceptional has been achieved); praise and acknowledge loud – fix soft; praise must be genuine (address praise and correction specifically to those who need to receive it – don't use the praise of one student to serve as the correction of another).</p>	<p>Student</p> <p>Understands that meeting expectation will be acknowledged but that receiving praise is reserved for when exceptional work has been demonstrated</p>
Technique 46: The J-Factor	
Find and promote the joy of learning to achieve a happy and high-achieving classroom.	
<p>Teacher</p> <p>Uses fun and games to draw on a kid's love for challenges, competition and play; makes kids feel they belong and are a part of "us"; uses drama, song and dance to raise spirits and establish collective identity; invokes humor to make happy and fulfilled students; and uses suspense and surprise to make the classroom an adventure.</p>	<p>Student</p> <p>Experiences the joy and enjoyment of learning</p> <p>Realizes that learning can be fun and exciting and yet controlled and productive</p>
All Hands	
Shift rapidly among and involving a wide array of participants	
<p>Teacher</p> <p>Shifting among participants creates a reference point which signals that something has changed, something has begun or ended.</p> <p>Manage questions, requests, and comments that are off task or persist on a topic you are ready to dispense with</p>	<p>Student</p> <p>Feels engaged along with other students in the classroom</p>
Look Forward	
Mild suspense creates tension, excitement and anticipation around learning	
<p>Teacher</p> <p>Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective</p>	<p>Student</p> <p>Is motivated to see the learning through to the end (how it turns out)</p> <p>Wants to know what is coming next</p>

Growth Guide 6.1 – Teach Like a Champion Techniques

Standard 6: Effective Communication

The teacher models effective verbal, nonverbal, and media communication techniques with students, colleagues and parents to foster active inquiry, collaboration, and supportive interaction in the classroom.

Quality Indicator 1: Verbal and nonverbal communication

Emerging		Developing		Proficient		Distinguished	
6E1) The emerging teacher... Uses correct, effective verbal and non-verbal communication skills.		6D1) The developing teacher also... Consistently uses and fosters correct, effective verbal and nonverbal communication, including strategies to communicate with students whose first language is not Standard English or whose disability requires specific forms of communication.		6P1) The proficient teacher also... Evaluates the impact of and strategies for the correct and effective use of verbal and nonverbal communication.		6S1) The distinguished teacher also... Shares with others strategies for ensuring correct, effective verbal and nonverbal communication in their school and throughout the community.	
Score = 0	1	2	3	4	5	6	7
Technique 5: Without Apology The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			
Technique 8: Post It Lesson objective is posted in a visible location – same location every day – and identifies your purpose for teaching that day.							
Teacher Clearly communicate to anyone entering your room the intent of your lesson Particularly helpful for walk-throughs and other mechanisms for feedback on performance				Student Knows what the teacher is trying to do in the lesson for that day and works more intentionally toward that goal			
Technique 9: Shortest Path All things being equal, the simplest explanation or strategy is the best; opt for the most direct route from point to point.							
Teacher Mastery of the objective is the main criterion and the best strategy for achieving it is what gets you to mastery best and fastest.				Student Is focused on the lesson objectivity; Experiences reduced distractions			

Technique 10: Double Plan	
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other	Student What students will do during the lesson? Taking notes? Writing Summaries?
Technique 12: The Hook	
A short introductory moment that captures what's interesting and engaging about the material and puts it out in front.	
Teacher Prepare students to be brought into the content; use a brief story, analogy, prop, media, status challenge, etc to engage student attention and build interest	Student Is inspired and excited about the content that is about to be learned Willingly takes the first step into the learning
Technique 28: Entry Routine	
Make efficiency, productivity, and scholarly the habit after the greeting and as students take their seats and class begins.	
Teacher Have students pick up materials instead of you passing them out (it is quicker); be sure students know where to sit; turn in homework the same way every day; and a Do Now gets students busy and the lesson underway.	Student Comes in, picks up needed materials, turns in homework, sits in their seat and immediately begins on the day's objective. Knows that efficiency, productivity and being scholarly is the habit in this classroom
Technique 34: Seat Signals	
Develop a set of signals for common needs, especially those that require or allow students to get out of their seats.	
Teacher Develop a set of signals for common needs in order to not become distracted from teaching: manage requests without interrupting instruction; be explicit and consistent about the signals to be used; make signals specific and unambiguous to prevent them from being a distraction; and be clear about when they can be used and when they can't	Student Signals requests from their seats and can receive the teacher's approval nonverbally for common needs (e.g. pencil sharpener, tissue, bathroom, water, etc.)
Technique 37: What To Do	
Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as they have been asked to do so easily.	
Teacher Make directions routinely useful and easy to follow. They should be specific (focus on manageable and precisely described actions); concrete (involve clear, actionable steps that any student knows how to do); sequential (describes a sequence of actionable steps); and observable (things the teacher can plainly see and verify).	Student A larger portion of non-compliance occurs because of incompetence, not defiance Incompetence requires direction in order to become competent allowing the student to move from non-compliant to compliant.
Technique 41: Threshold	
When students cross the threshold into the classroom, remind them of the expectations: establish rapport, set the tone, and reinforce the first steps in a routine that makes excellence habitual.	
Teacher With culture, getting it right and keeping it right is easier than fixing it once it's gone wrong Greet students in the threshold of the door, remind them where they are (with you) and your expectations and demands of them This establishes a personal connection with students and reinforces classroom expectations	Student Hard at work just a few seconds after hitting the door Knows the teacher cares personally for them and recalls what the expectations and routines are going to be; experiences and participates in a culture of learning when in your room
One at a Time	
Ask one question at a time	
Teacher Although questions tend to come in sequences, ask only one question at a time to help students focus on developing one idea at a time and to focus you on questioning with a specific goal or purpose in mind.	Student Develops one idea at a time in response to the specific question you asked

Verbatim (No Bait and Switch)

Changing a question

Teacher

When repeating a question for a student and/or class, avoid changing a question after a student has raised their hand and is formulating an answer. Even a slight change in syntax can alter the question.

Student

Hear and consider questions and participate based on thoughtful reflection because the question asked remained constant

Clear and Concise

Used to improve the clarity of a question

Teacher

Start with a question word (who, when, what, where, why or how); limit to two clauses (rigorous and demanding but limited to two clauses); write them in advance when they matter (script them as a part of lesson planning); ask an actual question (not making a statement with a question mark); and assume the answer (state it assuming someone can answer it).

Student

Is not held accountable for a wrong answer when the actual problem was the way the question was asked
Can formulate better questions themselves

Growth Guide 6.2 – Teach Like a Champion Techniques

Standard 6: Effective Communication

Quality Indicator 2: Sensitivity to culture, gender, intellectual and physical differences

Emerging		Developing		Proficient		Distinguished	
6E2) The emerging teacher... Is aware of personal bias in regard to differences in culture, gender, intellectual, and physical ability in classroom and its impact on student learning.		6D2) The developing teacher also... Demonstrates and promotes sensitivity to differences in culture, gender, intellectual, and physical ability in classroom communication and in responses to students' communications.		6P2) The proficient teacher also... Helps students to develop a respect for all through sensitivity to cultural, gender, intellectual and physical ability differences in classroom communication.		6S2) The distinguished teacher also... Promotes a respect for all and sensitivity to cultural, gender, intellectual and physical ability differences throughout the school and community.	
Score = 0	1	2	3	4	5	6	7
Technique 4: Format Matters It's not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 21: Take a Stand Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.							
Teacher Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture). Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).				Student Actively engages in the ideas around them by making judgments about the answers their peers provide. Are open to having their ideas be assessed by peers as well			
Technique 26: Everybody Writes Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.							
Teacher Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.				Student Is challenged intellectually and is engaged The quality of the ideas and their writing improves			

Growth Guide 6.3 – Teach Like a Champion Techniques

Standard 6: Effective Communication

Quality Indicator 3: Learner expression in speaking, writing and other media

Emerging		Developing		Proficient		Distinguished	
6E3) The emerging teacher... Supports and expands learner expression in speaking, writing, listening, and other media ensuring it adheres to district policy.		6D3) The developing teacher also... Develops students in directing their own safe, free and respectful expression in speaking, writing, listening, and other media ensuring it adheres to district policy.		6P3) The proficient teacher also... Promotes respect, safe and free expression in the school and the larger school community ensuring it adheres to district policy.		6S3) The distinguished teacher also... Shares with others strategies for promoting respect, safe and free expression in the school and the larger school community ensuring it adheres to district policy.	
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique2: Right is Right Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique4: Format Matters It's not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 10: Double Plan It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			

Technique 21: Take a Stand

Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.

Teacher

Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture).
Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).

Student

Actively engages in the ideas around them by making judgments about the answers their peers provide.
Are open to having their ideas be assessed by peers as well

Technique 26: Everybody Writes

Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.

Teacher

Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.

Student

Is challenged intellectually and is engaged
The quality of the ideas and their writing improves

Growth Guide 6.4 – Teach Like a Champion Techniques

Standard 6: Effective Communication

Quality Indicator 4: Technology and media communication tools

Emerging		Developing		Proficient		Distinguished	
6E4) The emerging teacher... Demonstrates knowledge and understanding of technology and media communication tools for purposeful instruction.		6D4) The developing teacher also... Implements instruction that encourages technology and media communication tools use for learning and models those techniques.		6P4) The proficient teacher also... Facilitates the students’ effective use of technology and media communication tools.		6S4) The distinguished teacher also... Either mentors, or assists students in mentoring, members of the school and community in the use of technology and media communication tools.	
Score = 0	1	2	3	4	5	6	7
Technique 4: Format Matters							
It’s not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society;			
Technique 10: Double Plan							
It’s as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with “You” on one side and “Them” on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 14: Board = Paper							
Students learning how to be good students by learning to take notes and retain a record of their knowledge.							
Teacher Have students take exact notes of what you put on the board as a starting point to their capturing their own increasing knowledge Provide exact direction and then increasing flexibility				Student Learn to capture own learning by first copying exactly what the teacher puts down; move on to making internal decisions about what to capture Increases in own discretion of what is important to capture and how they capture			
Technique 18: Check for Understanding							
Gather data constantly on what students can do while you’re teaching and act immediately on that knowledge to inform what you do next and how you do it.							
Teacher Check for understanding and do something about it “right away” Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.				Student Gives off data on the degree of their understanding and mastery of content through the answers they provide			

Lemov, Doug. (2010) Teach Like a Champion: 49 Techniques that put students on the path to college. San Francisco, CA: Jossey-Bass.

Technique 26: Everybody Writes

Set students up for rigorous engagement by giving them the opportunity to reflect first in writing before discussing.

Teacher

Ask all students to prepare for more ambitious thinking and discussion by reflecting in writing for a short interval. Benefits include selection of effective responses by circulating and reading over shoulders; you know everyone is prepared with something to share; allows you to involve everyone; processing thoughts refines them; steers students in a direction you think especially fruitful; and students remember twice as much.

Student

Is challenged intellectually and is engaged
The quality of the ideas and their writing improves

Technique 27: Vegas

A moment during class when you might observe some production values: music, lights, rhythm, dancing.

Teacher

Use it to reinforce not just academics but the day's learning objective; its upbeat but often short, sweet and on point – once it's done, it's done.

Student

Is more highly engaged due to the excitement, the spontaneity and fun of learning

Change the Pace

Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson

Teacher

People of all ages tend to lose focus after ten minutes, so do something new to engage them.
Creation an illusion of speed by using a variety throughout the lesson

Student

Is energized as a part of the learning process
Feels as if they are moving quickly from activity to activity

Growth Guide 7.1 – Teach Like a Champion Techniques

Standard 7: Student Assessment and Data Analysis

The teacher understands and uses formative and summative assessment strategies to assess the learner’s progress and uses both classroom and standardized assessment data to plan ongoing instruction. The teacher monitors the performance of each student and devises instruction to enable students to grow and develop, making adequate academic progress.

Quality Indicator 1: Effective use of assessments

Emerging		Developing		Proficient		Distinguished	
7E1) The emerging teacher... Demonstrates the use of formal and informal assessments to determine progress towards specific learning goals.		7D1) The developing teacher also... Effectively uses multiple formal and informal student assessments to address specific learning goals, including modifications for students with special needs.		7P1) The proficient teacher also... Identifies student’s prior knowledge, progress during instruction and achievement at the end of an instructional unit to demonstrate individual and whole class learning.		7S1) The distinguished teacher also... Shares knowledge and expertise with others on the effective use of assessments to generate data demonstrating progress toward individual and whole class learning.	
Score = 0	1	2	3	4	5	6	7
Technique 2: Right is Right							
Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don’t let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique 7: 4 Ms							
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it’s the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			

Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
<p>Teacher</p> <p>Check for understanding and do something about it "right away"</p> <p>Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery)</p> <p>Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.</p>	<p>Student</p> <p>Gives off data on the degree of their understanding and mastery of content through the answers they provide</p>
Technique 20: Exit Ticket	
Use a single question or short sequence of problems to solve at the close of a class to check for understanding that provides strong data and critical insights.	
<p>Teacher</p> <p>Refine your next lesson based on the data from the exit ticket</p> <p>These are quick (one to three questions); they're designed to yield data (fairly simple and focus on one key part of the objective); and make for great Do Nows (technique 29).</p>	<p>Student</p> <p>Looks at the data from the exit ticket to understand how well they mastered the key part of the objective and to inform what else they need to know.</p>
Technique 36: 100 Percent	
There's one acceptable percentage of students following a direction: 100%. Less and your authority is subject to interpretation, situation, and motivation.	
<p>Teacher</p> <p>Sets a standard, not a goal, of 100% compliance; culture of compliance is both positive and more importantly invisible (matter of habit). Most sustainable form of compliance is one that for both teacher and student is about achievement, not an empty exercise in teacher power. To get 100% compliance use the least invasive form of intervention (in order try nonverbal intervention, positive group correction, anonymous individual correction, private individual correction, lightning-quick public correction, and consequence); rely on firm, calm finesse (complying is an exercise in purpose, not power: you emphasize compliance when you invent ways to maximize visibility, be seen looking, avoid marginal compliance, and leverage the power of unacknowledged behavioral opportunities).</p>	<p>Student</p> <p>Does as they are asked without ever seeming to think about it (out of habit).</p> <p>Learns how to do rituals and routines right.</p> <p>Engages in 100% compliance because it promotes their own achievement, not because it is about the teacher's power</p> <p>Does not comply in order to please the teacher but to promote their own learning</p>
Technique 39: Do It Again	
Doing it again and doing it right or better or perfect is often the best consequence.	
<p>Teacher</p> <p>Practice helping students to improve; frame it as "good – better – best" sets a standard of excellence by challenging students positively to show you their best at something</p> <p>Have students go back and try again as soon as you know the level of execution won't meet the standard you have set</p>	<p>Student</p> <p>Improves their own performance; experiences greater levels of success</p> <p>Students improve at something without feeling like their being punished or doing it out of compliance</p>
Hit Rate	
The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)	
<p>Teacher</p> <p>If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.</p>	<p>Student</p> <p>Is challenged with questions that are not too hard or unfair, but are not too easy either</p> <p>Stretches their thinking without being impossible; students are bored with easy content</p>

Growth Guide 7.2 – Teach Like a Champion Techniques

Standard 7: Student Assessment and Data Analysis

Quality Indicator 2: Assessment data to improve learning

Emerging		Developing		Proficient		Distinguished	
7E2) The emerging teacher... Demonstrates basic strategies for accessing, analyzing and appropriately using information and assessment results to improve learning activities.		7D2) The developing teacher also... Reviews student trend data and growth in learning through a comparison of student work (i.e. pre-/post- test results or similar mechanisms) to inform instructional decisions.		7P2) The proficient teacher also... Uses tools such as rubrics, scoring guides, performance analyses, etc., that clearly identify the knowledge and skills intended for students to acquire in well-defined learning goals.		7S2) The distinguished teacher also... Is able to model and/or share information and expertise with others on the use of a wide variety of assessments and evidence that they improved the effectiveness of instruction.	
Score = 0	1	2	3	4	5	6	7
Technique1: No Opt Out A sequence that begins with a student unwilling or unable to answer a question ends with that student giving the right answer as often as possible even if they only repeat it.							
Teacher Provides answer and student repeats it; another student provides answer and first student repeats; provide cue and student uses it to find the answer; another student provides a cue and first student uses it to answer correctly				Student Is not able to avoid work or failure Becomes increasingly familiar with success because they answer questions correctly more often			
Technique2: Right is Right Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique3: Stretch It A sequence of learning does not end with the right answer; reward right answers with follow up questions that extend knowledge and test for reliability (Differentiated Instruction)							
Teacher Respond to a right answer by asking a different/tougher question that builds and extends Use questioning to make sure that a right answer is repeatable (ask how or why; ask for another way to answer; ask for a better word; ask for evidence; ask students to integrate a related skill; ask students to apply the same skill in a new setting)				Student Knows how to get similar right answers again and again Explains their thinking or applies knowledge in new ways Pushed in a way that's directly responsive to what they've shown they can already do			
Technique 6: Begin with the End Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			

Technique7: 4 Ms	
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).	
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).	Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)
Technique 13: Name the Steps	
Subdivide complex skills into component tasks and build knowledge up systematically.	
Teacher Identify the steps; make them sticky (memorable and stick in students' minds); build the steps; use two stairways (explaining the process and doing the process)	Student Learn steps and use this road map as they progress towards mastery (competence) Explains the process while another student does the process. Provides a process that the student can use as they work to remember content
Technique 16: Break it Down	
In regards to student error or guess, conceptualize the original material as a series of smaller, simpler pieces; build a student's knowledge back up from a point of partial understanding.	
Teacher Go back and ask a question or present information that bridges the part of the material that they think most likely caused the error Provide the smallest hint possible and yet still enable a student to answer correctly Provide an answer, context, rule or missing (or first) step; rollback (repeat answer back); eliminate false choices (take away incorrect possibilities).	Student Commits error but whose learning is then facilitated to result in a correct answer
Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
Teacher Check for understanding and do something about it "right away" Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.	Student Gives off data on the degree of their understanding and mastery of content through the answers they provide
Technique 20: Exit Ticket	
Use a single question or short sequence of problems to solve at the close of a class to check for understanding that provides strong data and critical insights.	
Teacher Refine your next lesson based on the data from the exit ticket These are quick (one to three questions); they're designed to yield data (fairly simple and focus on one key part of the objective); and make for great Do Nows (technique 29).	Student Looks at the data from the exit ticket to understand how well they mastered the key part of the objective and to inform what else they need to know.
Technique 39: Do It Again	
Doing it again and doing it right or better or perfect is often the best consequence.	
Teacher Practice helping students to improve; frame it as "good – better – best" sets a standard of excellence by challenging students positively to show you their best at something Have students go back and try again as soon as you know the level of execution won't meet the standard you have set	Student Improves their own performance; experiences greater levels of success Students improve at something without feeling like their being punished or doing it out of compliance
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
Teacher Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.	Student Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.

Hit Rate

The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)

Teacher

If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.

Student

Is challenged with questions that are not too hard or unfair, but are not too easy either
Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 7.3 – Teach Like a Champion Techniques

Standard 7: Student Assessment and Data Analysis

Quality Indicator 3: Student-led assessment strategies

Emerging		Developing		Proficient		Distinguished	
7E3) The emerging teacher... Uses assessment strategies and timely descriptive feedback to involve learners in some personal-goal setting and self-assessment activities		7D3) The developing teacher also... Purposefully teaches students to use assessment data to think about their own learning, including setting personal learning goals.		7P3) The proficient teacher also... Adjusts and adapts strategies for teaching students how to use assessment data in thinking about their own learning, including setting personal goals, based on unique student strengths, needs and learning styles.		7S3) The distinguished teacher also... Model for others how to provide timely descriptive feedback and the engaging of students in establishing personal learning goals, self-assessment, and using evidence to report on their own progress to the teacher, parents, and others.	
Score = 0	1	2	3	4	5	6	7
Technique 4: Format Matters It's not just what students say that matters but how they communicate it. To succeed, students must take their knowledge and express it in the language of opportunity.							
Teacher Prepare students to succeed by requiring complete sentences and proficient grammar Format Expectations: grammatical; complete sentence; audible; and unit				Student Take knowledge and express it in a variety of clear and effective formats to fit the demands of the situation and of society			
Technique 14: Board = Paper Students learning how to be good students by learning to take notes and retain a record of their knowledge.							
Teacher Have students take exact notes of what you put on the board as a starting point to their capturing their own increasing knowledge Provide exact direction and then increasing flexibility				Student Learn to capture own learning by first copying exactly what the teacher puts down; move on to making internal decisions about what to capture Increases in own discretion of what is important to capture and how they capture			
Technique 17: Ratio Push more and more of the cognitive work out to students as soon as they are ready, with the understanding that the cognitive work must be on-task, focused, and productive.							
Teacher Unbundle (sharing more with more students and forcing them to react with one another); half-statement (students complete the idea); what's next? (asking about process and product both); feign ignorance (pretend you don't know); repeated examples (especially rigorous when you set the terms for how it must be different than the one that preceded it); rephrase or add on (improving an answer); whys and hows (explaining the thinking); supporting evidence (constantly ask about the evidence that supports it); batch process (allow a short series of student comments to be made directly following and in response to, one another); and discussion objectives (focus discussions on the most productive and rigorous points).				Student Engages in increased doses of cognitive work as soon as they are ready (but not before) Engages in larger and larger shares of the right work – focused and productive			

Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
<p>Teacher</p> <p>Check for understanding and do something about it "right away"</p> <p>Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery)</p> <p>Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.</p>	<p>Student</p> <p>Gives off data on the degree of their understanding and mastery of content through the answers they provide</p>
Technique 21: Take a Stand	
Push students to actively engage in the ideas around them by making judgments about the answers their peers provide.	
<p>Teacher</p> <p>Push students to assess the responses of other students (can be whole class, evaluative, verbal or signaled through a gesture).</p> <p>Don't ask if they agree, but make students accountable for mentally engaged judgments rather than empty and obligatory participation (have students defend their judgment and do this technique for both correct and incorrect answers).</p>	<p>Student</p> <p>Actively engages in the ideas around them by making judgments about the answers their peers provide.</p> <p>Are open to having their ideas be assessed by peers as well</p>
Technique 32: SLANT	
Key behaviors that maximize students' ability to pay attention: Sit up; Listen; Ask & answer questions; Nod your head; Track the speaker.	
<p>Teacher</p> <p>Serves as shorthand for reminding students to be attentive and ready learners. Develop non-verbal signals allowing you to remind them without interrupting what you're otherwise doing.</p>	<p>Student</p> <p>Understands what the letters of the acronym means and can successfully adjust their behavior to comply with the direction for each.</p>
Technique 33: On Your Mark	
Show students how to prepare for a lesson to begin and expect them to do so every day.	
<p>Teacher</p> <p>Show students how to prepare for class and expect it every day: be explicit about what is needed; set a time limit for preparation; use a standard consequence; provide tools without consequence to those who recognize the need "before" class begins; and include homework (most important thing students do that is unsupervised by a teacher).</p>	<p>Student</p> <p>Can successfully prepare themselves for learning.</p>
Technique 48: Explain Everything	
Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).	
<p>Teacher</p> <p>Deliberately make your expectations clear, rational and logical.</p> <p>The rationale behind decisions made in students' interest and the way that adults think on behalf of children is made clear; it happens well in advance of a behavior that needs fixing or after the fixing has resulted in the meeting of expectations.</p>	<p>Student</p> <p>Understands the logic behind rules and expectations designed for their betterment; understands that group success depends on everyone's participation.</p>
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
<p>Teacher</p> <p>Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.</p>	<p>Student</p> <p>Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.</p>

Growth Guide 7.4 – Teach Like a Champion Techniques

Standard 7: Student Assessment and Data Analysis

Quality Indicator 4: Effect of instruction on individual/class learning

Emerging		Developing		Proficient		Distinguished	
7E4) The emerging teacher... Observes the effect of class instruction on individual and whole class learning.		7D4) The developing teacher also... Collects relevant information and data about current instruction to plan future instruction.		7P4) The proficient teacher also... Engages in ongoing assessment of progress of individual students and whole class in order to advance each individual’s learning of instructional objectives through modifications to instructional strategies.		7S4) The distinguished teacher also... Is capable of modeling for others the use of ongoing, consistent assessment throughout the instructional process to gather data about the effect of instruction to enhance individual and class achievement.	
Score = 0	1	2	3	4	5	6	7
Technique 6: Begin with the End Teaching by methodically asking how one day’s lesson builds off the previous day’s, prepares for the next day’s and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it’s the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique 10: Double Plan It’s as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with “You” on one side and “Them” on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 18: Check for Understanding Gather data constantly on what students can do while you’re teaching and act immediately on that knowledge to inform what you do next and how you do it.							
Teacher Check for understanding and do something about it “right away” Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.				Student Gives off data on the degree of their understanding and mastery of content through the answers they provide			

Change the Pace

Use a variety of activities to accomplish your objective and move from one to the other throughout the course of a lesson

Teacher

People of all ages tend to lose focus after ten minutes, so do something new to engage them.

Creation an illusion of speed by using a variety throughout the lesson

Student

Is energized as a part of the learning process

Feels as if they are moving quickly from activity to activity

Hit Rate

The rate at which students answer the teacher's questions correctly (or adequately and thoroughly if there's no firm right answer)

Teacher

If the hit rate is 100%, it's probably time to ask harder questions (unless you've just wrapped up a review) and if it is below 2 out of 3 (67%) there is a problem with how you presented material or how aligned your questions are to that material.

Student

Is challenged with questions that are not too hard or unfair, but are not too easy either
Stretches their thinking without being impossible; students are bored with easy content

Growth Guide 7.5 – Teach Like a Champion Techniques

Standard 7: Student Assessment and Data Analysis

Quality Indicator 5: Communication of student progress and maintaining records

Emerging		Developing		Proficient		Distinguished	
7E5) The emerging teacher... Communicates general information about student progress knowledgeably, responsibly, and ethically based on appropriate indicators, to students, families, and/or colleagues.		7D5) The developing teacher also... Uses evidence to communicate student progress, knowledgeably and responsibly, based on appropriate indicators.		7P5) The proficient teacher also... Uses holistic evidence from multiple data points to detail student achievement continuously throughout instruction.		7S5) The distinguished teacher also... Is able to mentor colleagues in the use of student performance evidence and managing records to effectively communicate student progress.	
Score = 0	1	2	3	4	5	6	7
Technique 2: Right is Right Set and defend a high standard of correctness in your classroom							
Teacher Do not accept partially or almost right answers; hold out for all the way; make students answer the question you asked and when you ask it (don't let them get ahead of you); have students use technical vocabulary; tell students they are almost there or almost correct until they are 100% correct				Student Strives to provide precise answers to specific questions asked Believes they are capable of getting answers as right as students anywhere else			
Technique 18: Check for Understanding Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.							
Teacher Check for understanding and do something about it "right away" Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.				Student Gives off data on the degree of their understanding and mastery of content through the answers they provide			

Growth Guide 7.6 – Teach Like a Champion Techniques

Standard 7: Student Assessment and Data Analysis

Quality Indicator 6: Collaborative data analysis

Emerging		Developing		Proficient		Distinguished	
7E6) The emerging teacher... Engages in a collaborative process of data analysis with colleagues at the grade, department and school level.		7D6) The developing teacher also... Works in teams to share and analyze data to measure accomplishment of curricular goals to inform grade-department level and/or school-wide decisions.		7P6) The proficient teacher also... Helps to establish, maintain and/or participate in professional learning communities to share and analyze data to measure accomplishment of curricular goals and plan for curricular modification.		7S6) The distinguished teacher also... Acts in a leadership position when working in teams to share and analyze data to measure accomplishment of curricular goals and to use this information to inform his/her instruction.	
Score = 0	1	2	3	4	5	6	7
Technique 6: Begin with the End							
Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			

Growth Guide 8.1 – Teach Like a Champion Techniques

Standard 8: Professionalism

The teacher is a reflective practitioner who continually assesses the effects of choices and actions on others. The teacher actively seeks out opportunities to grow professionally in order to improve learning for all students.

Quality Indicator 1: Self-assessment and improvement

Emerging		Developing		Proficient		Distinguished	
8E1) The emerging teacher...		8D1) The developing teacher also...		8P1) The proficient teacher also...		8S1) The distinguished teacher also...	
Generally uses self-assessment and problem-solving strategies to reflect on practice in order to influence students' growth and learning.		Consistently engages in reflective practice and consistently applies this to his/her instructional process and to modify future instruction.		Continuously engages in a variety of self-assessment and problem-solving strategies which have implications for student growth and learning, within the classroom and the larger school environment.		Models and/or serves as a mentor, in how to engage in reflective practice and in the use of, policies about, and training for using assessment data and other sources of information about student performance.	
Score = 0	1	2	3	4	5	6	7
Technique 5: Without Apology							
The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			
Technique 6: Begin with the End							
Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique 7: 4 Ms							
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 9: Shortest Path							
All things being equal, the simplest explanation or strategy is the best; opt for the most direct route from point to point.							
Teacher Mastery of the objective is the main criterion and the best strategy for achieving it is what gets you to mastery best and fastest.				Student Is focused on the lesson objectivity; Experiences reduced distractions			

Technique 10: Double Plan	
It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.	
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other	Student What students will do during the lesson? Taking notes? Writing Summaries?
Technique 18: Check for Understanding	
Gather data constantly on what students can do while you're teaching and act immediately on that knowledge to inform what you do next and how you do it.	
Teacher Check for understanding and do something about it "right away" Gather data (think of answers to your questions as data); use questions to generate a deeper understanding that you can act on; observation (students indicating non-verbally that they have achieved mastery) Respond to the data; the shorter the delay between recognizing a lack of mastery and fixing it the more likely the intervention will be effective; Fixing it can include re-teaching by: a different approach; identifying and re-teaching the problem step; identifying and explaining difficult terms; a slower pace; using a different order; and identifying students of concern.	Student Gives off data on the degree of their understanding and mastery of content through the answers they provide
Technique 38: Strong Voice	
Manifestation of the unique power of individuals and their ability to earn respect and credibility, build relationships, and exude confidence and poise.	
Teacher Establish control, command and benign authority that make the use of excessive consequences unnecessary. This includes an economy of language (focus students on what is most important and nothing more); do not talk over (wait until there is no other talking or rustling); do not engage (avoid engaging in other topics until you have satisfactorily resolved the topic you initiated); square up/stand still (turn, with two feet and two shoulders to face the object of your words directly); and use quiet power (when you get nervous, anxious and upset, drop your voice and make students strain to listen-exude poise and calm even if you aren't feeling it).	Student Feels as if they are being taught by someone who is in control of their learning. Sees the teachers as someone who can control their emotions, is credible and worthy of respect.
Technique 45: Warm / Strict	
At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).	
Teacher Warmth and strictness are not opposites: explain to students why you are doing what you are doing; distinguish between the behavior and the person; demonstrate that a consequence is temporary, once over it is immediately in the past; use warm, nonverbal behavior	Student Understands that they are held to very high standards that will be enforced by someone who genuinely cares about them.
Technique 46: The J-Factor	
Find and promote the joy of learning to achieve a happy and high-achieving classroom.	
Teacher Uses fun and games to draw on a kid's love for challenges, competition and play; makes kids feel they belong and are a part of "us"; uses drama, song and dance to raise spirits and establish collective identity; invokes humor to make happy and fulfilled students; and uses suspense and surprise to make the classroom an adventure.	Student Experiences the joy and enjoyment of learning Realizes that learning can be fun and exciting and yet controlled and productive
Technique 47: Emotional Constancy	
Model the modulation of emotions (no explosions) and tie emotions to student achievement not the emotions of students you teach.	
Teacher Earn students' trust by having them know you are always under control. Provide an emotional rudder to help students return to productivity as soon as possible when emotions run hot.	Student Success, in the long run, is about a consistent relationship with productive behaviors

Growth Guide 8.2 – Teach Like a Champion Techniques

Standard 8: Professionalism

Quality Indicator 2: Professional learning

Emerging		Developing		Proficient		Distinguished	
8E2) The emerging teacher... Is aware of and utilizes resources available for professional learning.		8D2) The developing teacher also... Applies knowledge gained from a variety of sources to the benefit of students in the classroom.		8P2) The proficient teacher also... Shares new knowledge and expertise with colleagues to benefit the learning of students in multiple classrooms.		8S2) The distinguished teacher also... Evaluates, procures and creates resources for professional development and actively participates in professional development in the larger professional community.	
Score = 0	1	2	3	4	5	6	7
Technique 6: Begin with the End							
Teaching by methodically asking how one day’s lesson builds off the previous day’s, prepares for the next day’s and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it’s the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique 7: 4 Ms							
A great lesson objective and therefore a great lesson should be Manageable, Measureable, Made first, and Most important on the path to college (Todd McKee).							
Teacher Great objectives are manageable (has size & scope to be taught in a single lesson); measureable (success can be determined by the end of class); made first (guides activities); and most important (focuses on the most essential learning there is).				Student (Not executed live in front of students; it’s the preparation done before teaching. This technique will result in student learning driven by useful, effective lesson objectives)			
Technique 10: Double Plan							
It’s as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with “You” on one side and “Them” on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 47: Emotional Constancy							
Model the modulation of emotions (no explosions) and tie emotions to student achievement not the emotions of students you teach.							
Teacher Earn students’ trust by having them know you are always under control. Provide an emotional rudder to help students return to productivity as soon as possible when emotions run hot.				Student Success, in the long run, is about a consistent relationship with productive behaviors			
Every Minute Matters							
Time is water in the desert, a teacher’s most precious resource; You can always be teaching							
Teacher Keep a series of short learning activities ready so you’re prepared when a two-minute opportunity emerges (end of class, in the hallway, waiting for buses, etc.).				Student Experiences no wasted time; comes to understand that the learning process is one in which every minute counts			

Look Forward

Mild suspense creates tension, excitement and anticipation around learning

Teacher

Make your pacing feel more vibrant by building in some type of mild suspense into your learning objective

Student

Is motivated to see the learning through to the end (how it turns out)
Wants to know what is coming next

Growth Guide 8.3 – Teach Like a Champion Techniques

Standard 8: Professionalism

Quality Indicator 3: Professional rights, responsibilities and ethical practices

Emerging		Developing		Proficient		Distinguished	
8E3) The emerging teacher... Demonstrates professionalism and ethical behavior by adhering to the code of conduct and aligning classroom practices to district policies and school procedures.		8D3) The developing teacher also... Consistently exhibits professionalism in all situations and ensures that classroom practices align to district policies and school procedures.		8P3) The proficient teacher also... Assists colleagues by consistently modeling professionalism throughout the school and district and the broader community.		8S3) The distinguished teacher also... Influences the framing, revision and advocating of policies and procedures that promotes ethical and professional behavior of all educators.	
Score = 0	1	2	3	4	5	6	7
Technique 5: Without Apology The skill of not apologizing for students is critical not only in the introduction and framing of material but in reacting to students' response to it.							
Teacher Reframe from apologizing for what we teach by assuming something will be boring; blaming it (we have to learn it); or not making it accessible				Student Self-perception is raised because they know they can handle any content, no matter how difficult They discover interest in content they might not have thought would be interesting			
Technique 6: Begin with the End Teaching by methodically asking how one day's lesson builds off the previous day's, prepares for the next day's and all three fit into a larger sequence of objectives that leads to mastery.							
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity				Student (Not executed live in front of students; it's the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			
Technique 10: Double Plan It's as important to plan for what students will be doing during each phase of a lesson as it is to plan for what you will be doing and saying.							
Teacher Too often, planning only focusing on what the teacher is doing and fails to account for what the student does. Thinking and planning for what students will do allows you to see your lesson through their eyes and keeps them productively engaged. Use a T-Chart with "You" on one side and "Them" on the other				Student What students will do during the lesson? Taking notes? Writing Summaries?			
Technique 35: Props Public praise from the class for students who demonstrate excellence or exemplify virtues (also called "shout-outs" or "ups")							
Teacher Can cue a prop in one second; can be visceral (non-verbal and without a message); is universal (everyone joins in); its tone is lively and fun; is evolving (students can suggest and develop ideas)				Student Gives props the right way: crisply, quickly and enthusiastically for peers Receives props from classmates for doing something excellent or virtuous			

Technique 36: 100 Percent	
There's one acceptable percentage of students following a direction: 100%. Less and your authority is subject to interpretation, situation, and motivation.	
<p>Teacher Sets a standard, not a goal, of 100% compliance; culture of compliance is both positive and more importantly invisible (matter of habit). Most sustainable form of compliance is one that for both teacher and student is about achievement, not an empty exercise in teacher power. To get 100% compliance use the least invasive form of intervention (in order try nonverbal intervention, positive group correction, anonymous individual correction, private individual correction, lightning-quick public correction, and consequence); rely on firm, calm finesse (complying is an exercise in purpose, not power: you emphasize compliance when you invent ways to maximize visibility, be seen looking, avoid marginal compliance, and leverage the power of unacknowledged behavioral opportunities).</p>	<p>Student Does as they are asked without ever seeming to think about it (out of habit). Learns how to do rituals and routines right. Engages in 100% compliance because it promotes their own achievement, not because it is about the teacher's power Does not comply in order to please the teacher but to promote their own learning</p>
Technique 37: What To Do	
Give directions to students in a way that provides clear and useful guidance – enough to allow any student who wanted to do as they have been asked to do so easily.	
<p>Teacher Make directions routinely useful and easy to follow. They should be specific (focus on manageable and precisely described actions); concrete (involve clear, actionable steps that any student knows how to do); sequential (describes a sequence of actionable steps); and observable (things the teacher can plainly see and verify).</p>	<p>Student A larger portion of non-compliance occurs because of incompetence, not defiance Incompetence requires direction in order to become competent allowing the student to move from non-compliant to compliant.</p>
Technique 38: Strong Voice	
Manifestation of the unique power of individuals and their ability to earn respect and credibility, build relationships, and exude confidence and poise.	
<p>Teacher Establish control, command and benign authority that make the use of excessive consequences unnecessary. This includes an economy of language (focus students on what is most important and nothing more); do not talk over (wait until there is no other talking or rustling); do not engage (avoid engaging in other topics until you have satisfactorily resolved the topic you initiated); square up/stand still (turn, with two feet and two shoulders to face the object of your words directly); and use quiet power (when you get nervous, anxious and upset, drop your voice and make students strain to listen-exude poise and calm even if you aren't feeling it).</p>	<p>Student Feels as if they are being taught by someone who is in control of their learning. Sees the teachers as someone who can control their emotions, is credible and worthy of respect.</p>
Technique 40: Sweat the Details	
To reach the highest standards, you must create the perception of order.	
<p>Teacher Clean up clutter, keep desk rows tidy, make sure shirts are tucked in and hats off, Change students' perception of your classroom by making it seem an orderly, organized place where it is hard to imagine disorder rearing its head</p>	<p>Student If they think the front line of their struggle to test the rules is seeing what color socks they can get away with under uniform guidelines, they are far less likely to consider other ways to test the rules</p>
Technique 42: No Warnings	
Using minor interventions and small consequences administered fairly and without hesitation before a situation gets emotional is the key to maintaining control and earning student respect.	
<p>Teacher Take action rather than get angry: act early (use minor interventions to prevent major ones); act reliably (be predictably consistent); act proportionately (start small when the misbehavior is small). Giving a warning is not taking action; it is threatening to take action; once you determine a behavior is the result of disobedience (it's deliberate) rather than incompetence, a consequence is better than a warning. Issue consequences: be calm, poised and impersonal; be incremental; and be private when you can and public when you must</p>	<p>Student Does not behave to please you, but demonstrates the correct behaviors to better themselves, and to be the best they can be and get the most out of school Experiences help and clarity when they demonstrate incompetence Experiences incremental consequences when they demonstrate disobedience</p>

Technique 43: Positive Framing	
Make corrections consistently and positively. Narrate the world you want your students to see even while you are relentlessly improving it.	
<p>Teacher</p> <p>Live in the now (in public: in front of your class or when a lesson is underway); assume the best instead of ill intention (it could be the result of distraction, lack of practice, or genuine misunderstanding instead of ill intention); allow plausible anonymity (don't call someone out until you have to); build momentum and narrate the positive (make the positive the normal or status quo); challenge (build competition into the day); talk expectations and aspirations (the goal is for them to leave you and move on to bigger and better things).</p>	<p>Student</p> <p>Is encouraged to do their best without being threatened by penalty unless it becomes absolutely necessary</p> <p>Does not experience embarrassment or harassment</p> <p>Experience positive reaction even when being corrected</p>
Technique 44: Precise Praise	
Use positive reinforcement as a powerful classroom tool	
<p>Teacher</p> <p>Differentiate acknowledgment and praise (acknowledge when expectations have been met and praise when the exceptional has been achieved); praise and acknowledge loud – fix soft; praise must be genuine (address praise and correction specifically to those who need to receive it – don't use the praise of one student to serve as the correction of another).</p>	<p>Student</p> <p>Understands that meeting expectation will be acknowledged but that receiving praise is reserved for when exceptional work has been demonstrated</p>
Technique 45: Warm / Strict	
At exactly the same time, be both warm (caring, funny, concerned, nurturing) and strict (by the book, relentless, and sometimes inflexible).	
<p>Teacher</p> <p>Warmth and strictness are not opposites: explain to students why you are doing what you are doing; distinguish between the behavior and the person; demonstrate that a consequence is temporary, once over it is immediately in the past; use warm, nonverbal behavior</p>	<p>Student</p> <p>Understands that they are held to very high standards that will be enforced by someone who genuinely cares about them.</p>
Technique 47: Emotional Constancy	
Model the modulation of emotions (no explosions) and tie emotions to student achievement not the emotions of students you teach.	
<p>Teacher</p> <p>Earn students' trust by having them know you are always under control.</p> <p>Provide an emotional rudder to help students return to productivity as soon as possible when emotions run hot.</p>	<p>Student</p> <p>Success, in the long run, is about a consistent relationship with productive behaviors</p>
Technique 48: Explain Everything	
Make expectations clear, rational and logical; remind students why they do what they do and ground the explanation in the mission: getting to college (future success).	
<p>Teacher</p> <p>Deliberately make your expectations clear, rational and logical.</p> <p>The rationale behind decisions made in students' interest and the way that adults think on behalf of children is made clear; it happens well in advance of a behavior that needs fixing or after the fixing has resulted in the meeting of expectations.</p>	<p>Student</p> <p>Understands the logic behind rules and expectations designed for their betterment; understands that group success depends on everyone's participation.</p>
Technique 49: Normalize Error	
Getting it wrong and then getting it right is the fundamental process of schooling; respond to both parts of the sequence as if they were totally and completely normal.	
<p>Teacher</p> <p>Since wrong answers are a normal and healthy part of the learning process, avoid chastening wrong answers. Avoid spending a lot of time talking about wrongness and get down to fixing. Acknowledge correct or hard work and then move on; don't flatter or fuss.</p>	<p>Student</p> <p>Experiences an incentive to take on challenges and take risks because being wrong is ok. They are acknowledged for hard work and being correct and wrong answers are normal part of their learning.</p>

Growth Guide 9.1 – Teach Like a Champion Techniques

Standard 9: Professional Collaboration

The teacher has effective working relationships with students, parents, school colleagues, and community members.

Quality Indicator 1: Induction and collegial activities

Emerging			Developing		Proficient		Distinguished	
9E1) The emerging teacher... Engages in supporting the school’s vision, mission, values and goals, participates in curriculum and staff development, and works with their trained mentor to strengthen relationships in the school and community.			9D1) The developing teacher also... Contributes to achieving the mission, vision, values and goals, including monitoring and evaluating progress toward these goals, and other school improvement efforts.		9P1) The proficient teacher also... Actively engages in relationship building efforts in the school, district and community and contributes and shares knowledge and expertise in order to assist in the collective improvement of professional practice.		9S1) The distinguished teacher also... Informally (or formally as a mentor) is available as a resource to colleagues in the school and/or district in achieving a shared mission, vision, values and goals and relationship building efforts through collegial activities and the induction process.	
Score = 0	1	2	3	4	5	6	7	
Technique 6: Begin with the End								
Teaching by methodically asking how one day’s lesson builds off the previous day’s, prepares for the next day’s and all three fit into a larger sequence of objectives that leads to mastery.								
Teacher Progress from unit planning to lesson planning; use a well-framed objective to define the goal of each lesson; determine how to assess your effectiveness in reaching your goal; and decide on your activity					Student (Not executed live in front of students; it’s the preparation done before teaching. This technique will result in students experience cohesive, learning progressions)			

Growth Guide 9.2 – Teach Like a Champion Techniques

Standard 9: Professional Collaboration

Quality Indicator 2: Collaborating to meet student needs

Emerging			Developing		Proficient		Distinguished	
9E2) The emerging teacher... Identifies ways to work with others across the system to provide needed services to support individual learners.			9D2) The developing teacher also... Works with colleagues and administrators at the school level and in the larger professional community to develop strategic, school-based systems to address student needs		9P2) The proficient teacher also... Consistently works with colleagues and administrators to develop strategic, school-based systems to address student needs and assists in monitoring the effectiveness of those systems.		9S2) The distinguished teacher also... Is capable of taking a leadership role or serving as an informal resource in working with the larger professional community in how to work with others across the system to identify and provide needed services to support individual learners.
