STRATEGIC PRIORITY

Access, Opportunity, Equity – Provide all students access to a broad range of high-quality educational opportunities from early learning into post-high school engagement.

SUMMARY

The Department of Elementary and Secondary Education (DESE) issued the first Annual Performance Report (APR) under MSIP 5 in the fall of 2013. DESE produces the district's APR as an objective analysis of each district's attainment of the MSIP 5 Performance Standards and Indicators. The Department produces APRs for charter schools as well. Those APRs are not included in this list because charter schools are not accredited by the State Board of Education.

DESE reviews each district's accreditation status and the APR supporting data for the three most recent APRs to identify status and trends in performance outcomes. Other considerations for reclassification may include Comprehensive School Improvement Plan Goals, previous DESE MSIP findings, financial status, leadership stability, etc. A district's accreditation classification remains in effect until the State Board of Education rules otherwise.

In accordance with Section 161.855.4, RSMo, DESE will not use the results of English language arts and mathematics assessments to lower a district's classification.

PRESENTER

Chris Neale, Assistant Commissioner, Office of Quality Schools, will participate in the presentation and discussion of this agenda item.

RECOMMENDATION

The Department recommends that the State Board of Education take no action for five provisionally accredited school districts.

The Department recommends that the State Board of Education classify 511 accredited school districts as accredited.

The Department recommends that the State Board of Education classify Normandy Schools Collaborative as provisionally accredited with the effective date to be determined by the board.
