## NOTES:

1. To achieve quality rendering and clarity in video (such as American Sign Language) and technology enhanced items, DLM requires Windows systems to use 1.4 GHz processor.
2. To achieve best quality rendering and clarity for iOS devices, DLM recommends iPad 3 with 1 GB RAM.
3. To achieve best quality viewing of technology enhanced items, DLM requires a minimum screen size of 10 inches.
4. Content caching servers are **strongly recommended** as they protect testing sessions from Internet service disruptions and reduce bandwidth requirements.
