Exit Criteria Programming

A) If: $2018 \text{ Score} + 2 \times (\text{step size}) \geq 2021$, then "yes" for meeting exit criteria, otherwise "no"

B) If: $2018 \text{ Score} + 2 \times (\text{step size}) < 2021$, then did the MPI increase by step size 2 of 3 years? Then "yes"

C) Condition for exit in year two: Did the MPI increase by step size in each of first two years?

**In order to exit in last year with just one year of improvement, final MPI must be above the 2018 baseline year*

ESSA plan says "...must make progress equal to or greater than the average step size... In both ELA and MA for two of the most recent three years...."

^This is an example step size for illustration only. Actual step sizes are located in the Missouri ESSA State Plan, Appendix A. The plan is located at
