Statistics and Probability	Grade 6	<p>These comments are to include grades 6-8. I am pleased that statistics and probability are primarily in the middle grades. Having all of the standards in these grades will allow teachers to connect all the concepts we've scattered across grade levels previously. The standards are developmentally appropriate for the middle grades. Concentrating statistics and probability in the</p>			
Statistics and Probability	High School	<p>The Common Core Standards were/are a viable mechanism to assure students become mathematically fluent and competent - particularly as it pertains to workplace readiness. A traditionally undersrepresented portion of the curriculum is in the area of stats and probability. It seems it has been forgotten that ALL stakeholders in the process received opportunities to participate in crafting the CC standards...legislators, educators, etc. The standards were developed at the state level - NOT the federal level. Given the political realities I suppose the name will be changed...the standards should not be changed. Standards should be phased in starting in grade K and implemented at an additional grade level each subsequent year. The standards are too rigorous to get dropped across the 13 grades at one time.</p>	Yes	Educator	63366
Statistics and Probability	High School	<p>Please do tell, what is the probability our nation can dumb down its education anymore and the statistical outcome that we will be as nation of idiots</p>
