Not just a Test Score!!

9-21-16

This is an utterly futile exercise. If you miraculously got 3 brilliant ideas, before they could be implemented, all of the people in power would be in different positions or gone to some other job.

I worked for 35 years in industry and they did those kinds of things every other year - the management that implemented these changes were long gone before any changes were seen.

What does student success look like to you?

Success looks like people who are able to be successful in life. Students are successful if they are able to support themselves in life financially + with character, integrity as adults. Success looks like knowing how to solve problems and think critically. Success is not about being prepared for the next grade - its about being prepared for life → what will one enjoy doing & make money to be productive citizens at the same time.

What do school communities need to do to prepare students for success after graduation?

Get them into the community + into internships in early grades - like jr. 7/8. Develop more partnerships @ businesses - Students need experiential learning - being there makes a difference. We also need to get parents on board so they don't feel that every classroom has to have a text book - text books ARE NOT the curriculum. Many parents + some teachers struggle with this.

How will you know Missouri schools have been effective in preparing students for success after graduation?

When Missouri gets out of the accreditation business and brings in AdvancEd which is a Continuous School Improvement model with a balanced approach to school accreditation. DESE cannot afford to provide the support needed. Why not bring on an entity that helps schools + districts grow + improve + provides the personnel + resources to help the improvement process? The money DESE would save
