It is assumed the normal six hour day will provide for 360 minutes of instructional activities in which children are under the guidance and direction of teachers in the teaching process. The above recommendations provide 30 minutes for primary grades and 45 minutes for upper elementary grades that the teacher can schedule additional activities that are in the best interest of the youngsters. The school week should consist of 1800 minutes of instruction at both the primary and upper elementary grade levels. This allows approximately 200 minutes of instruction time per week to be used at the discretion of the teacher. It should be noted that in both the daily and weekly schedule that reading and language arts activities should be incorporated into other instructional areas.
