Regular Summer School Program Policies and Standards

Summer School Handbook
This handbook is designed to provide Local Education Agencies (LEAs) with references to the applicable statutes, rules, and policies governing the application and operation of a state-funded summer school program. It is imperative that all summer school administrators and staff responsible for completing the application thoroughly read and understand the program guidelines.

Introduction to Missouri Summer School Programs
The utilization of extended learning opportunities, including summer school, aligned to the Missouri Learning Standards (MLS), may be used by LEAs to improve the academic performance of students. Summer school programs are not mandatory and student attendance cannot be required, except in cases of student promotion conditioned on remediation (pursuit to Section 167.645.4 RSMo). LEAs may utilize summer school programs to provide a variety of academic content to students. The curriculum in an approved summer school program, at any level, must include one (1) or more of the following academic areas as the major portion of the clock hours of instruction in the program: elementary school—language arts, mathematics, science, and/or social studies; and high school—language arts, mathematics, science, social studies, and/or practical arts.

A summer school program approvable for state aid consists of a planned schedule of course offerings for students at the elementary and/or secondary level that operates between the close of the regular school term and the beginning of the next regular term and provides at least 120 clock hours of instruction. No individual course or segment of an approved summer school program, other than special education programs, may consist of less than thirty (30) clock hours of classroom instruction.

http://s1.sos.mo.gov/cmsimages/adrules/csr/current/5csr/5c20-100.pdf

In order to distinguish between the regular school year and the summer school session, there must be a break of at least one school day between the close of one program and the start of the other. LEAs with “year-round” schedules may conduct an approved component of their regular summer school during their fall and spring cycle breaks. All summer programs, excluding Extended School Year (ESY), must be approved by the local board of education prior to the LEA submitting an application to the Department of Elementary and Secondary Education.

Students may enroll and attend summer school classes in only one LEA. Section 167.227 RSMo, states “No pupil shall attend summer school classes in more than one district during any one summer”. For more information, see Administrative Memo FAS-14-007 Summer School Attendance-Multi-District/LEA Enrollment http://dese.mo.gov/sites/default/files/am/documents/FAS-14-007.pdf.

Application Approval and Due Date
All summer school programs, excluding ESY programs, must be approved by the Department of Elementary and Secondary Education in order to qualify for state funds. In order to be granted approval, an LEA must submit the Application for Summer School no later than May 1 (see Appendix) for all Summer School deadline dates. The Application is part of the Core Data system, Screen 24A. See Appendix B for specific instructions. The data collected includes: name and number of attendance center(s) where the students will be attending in the fall (not the actual physical location where summer instruction is given), estimated enrollments, grade levels, start and close dates, dates not in session, hours of class per day, total hours, days the program will operate, service provider information and the locations of all off-site summer school campuses. If an ESY program is operated in conjunction with a summer school program, and the LEA plans to stack hours, the LEA may include ESY hours on the application in order to meet the 120 clock hour minimum.
Close Date
The closing date for summer school is determined at the local level. However, it is recommended that summer schools close in sufficient time for LEAs to meet the **August 15** due date of the August Student Enrollment and Attendance file in MOSIS. Timely submission of this data enables the School Finance Section to calculate the additional ADA generated by summer school and ESY students in a timely manner and adjust LEA state aid payments. Please refer to **Appendix D** to view a sample of Screen 16.

Final Approval
The School Improvement Office will review applications, consult with local school officials as needed, and approve eligible summer school programs for state aid. In addition, LEAs are required to submit a **Summer School Review Checklist and Final Approval Form** due by **August 15, 2017**. The form can be located on the Department’s website at: [https://dese.mo.gov/sites/default/files/dac_forms/MO5002086.pdf](https://dese.mo.gov/sites/default/files/dac_forms/MO5002086.pdf). Once completed by the summer school director and signed by the superintendent (or LEA representative), the form should be faxed to 573-522-1759, scanned/emailed to desesummerschool@dese.mo.gov or mailed to:

- Department of Elementary and Secondary Education
- Office of Quality Schools – School Improvement
- PO Box 480
- Jefferson City, MO  65102-0480

Curriculum
The curriculum for elementary or secondary summer school programs must include one or more core academic areas, including English language arts, mathematics, science, and/or social studies. The curriculum should align with the curriculum utilized by the LEA during the traditional school year and also be aligned with the Missouri Learning Standards (MLS). Any course which is offered during the regular school term, except those noted below, may be approved as part of the summer school program. All classes must be open to all students unless there is a prerequisite required in the course handbook used during the regular school year. Any course requiring special approval during the regular school year must also receive similar approval for summer school. The major portion of the clock hours of instruction in the program at the elementary and secondary levels must be in the core academic area(s). For example, LEAs may not have a stand-alone non-academic course, such as driver education, art or music, at the secondary level without having at least one class in a core academic area.

Unallowable Courses
LEAs may **NOT** count the following in their summer school attendance and they may not be included as part of an approved summer school program:

<table>
<thead>
<tr>
<th>Athletic practices</th>
<th>Body conditioning</th>
<th>Weightlifting</th>
<th>Gymnastics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition-based activities</td>
<td>Swimming lessons</td>
<td>Cheerleading clinics</td>
<td>Recreation programs</td>
</tr>
<tr>
<td>Study hall</td>
<td>Computer camps</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fee-based activities (school or provider)</td>
<td>PE classes without credit towards graduation</td>
<td>Band/vocal/instrumental music practices or camps</td>
<td>Community-based public, private or other non-academic programs</td>
</tr>
</tbody>
</table>

Partnering with Community Summer Programs
LEAs are encouraged to share information with students and parents regarding the availability of other summer programs and opportunities offered by community-wide, public and private agencies. While district or charter students may benefit from such other summer programs, LEAs may **not** partner or contract with those agencies for ADA purposes if the program is:
• an activity that students are able to enroll and participate in independently of the LEA
• a day-care service
• an educational course/activity that is not offered by the LEA during the regular school year
• a fee or tuition-based service or activity
• body conditioning, weight-lifting, football or other team sport program
• a PE course that does not qualify for credit counting towards graduation
• a summer camp (including recreational, sport, music, band, dance, etc.)
• a college or university orientation
• an entity that primarily operates to provide non-academic, recreational and field trip activities
• an activity that does not require a Missouri certified teacher
• part of another LEA summer program
• not offered on a first-come/first-served basis
• fully-funded by federal monies
• a previously defined unallowable activity

Service Provider
ADA reimbursement to LEAs for the costs of partner services is limited to only those attendance hours that students are in class under the direct supervision of an instructor holding a valid Missouri teaching certificate. In order to be approved for ADA, a description of the proposed summer school partnership must be submitted to DESE at desesummerschool@dese.mo.gov no later than May 1, 2017. The program description must include the name, address and contact of the partner agency, the educational service(s) to be provided, the approximate enrollment in the activity, and the proposed dates of services.

High School Credit
Some high school courses may be offered for credit and some courses for no credit in an approved summer school program http://s1.sos.mo.gov/cmsimages/adrules/csr/current/5csr/5c20-100.pdf. LEAs may grant credit for courses offered free of charge, providing the instructional time meets state standards. High school pupils in grades 9-12 may earn one unit of high school credit for courses which meet at least 120 clock hours, 1/2 unit for courses which meet at least 60 clock hours, or 1/4 unit of credit for courses which meet at least 30 clock hours (excludes lunch time).

• Dual credit courses are to be reported to DESE in accordance with MSIP guidelines located at: https://dese.mo.gov/communications/webinar/msip-5-dual-credit-reporting-0.
• High school credit may be granted for driver education classes offered free of charge. This includes no charge to students for gasoline, as it is a basic essential of the class.
• Summer school PE hours that do not count as credit toward graduation are not allowed when calculating an LEA's average daily attendance, pursuant to Section 163.011[2] RSMo.

Credit Recovery
Credit Recovery provides an opportunity for high school students (grades 9-12), who would otherwise fail a course taken during the regular school year, to complete the requirements of the class and receive credit by attending summer school. Credit recovery is to be used only when a student has a reasonable chance to complete the unfulfilled requirements of a course within the summer school session. Otherwise, the complete course must be repeated. The regular school year teacher must outline the deficiencies the student must complete in order to receive credit for the class. The summer school teacher acts as a monitor (resource teacher) to students in the class as they work to complete the required assignments. Since students in the class may be working in a variety of subject areas, the supervising teacher in a credit recovery class may hold any valid Missouri teacher certificate. Summer school credit recovery classes occur between the approved start and finish dates. Students who successfully complete their assignments before the end of the summer session may be awarded the deficient credit(s) and may be released.
End-of-Course Assessments (EOC)
The LEA that awards credit for Algebra I, English II, Government or Biology during the summer session (whether in a traditional or virtual setting), must administer the corresponding EOC. The LEA delivering instruction, administering the corresponding EOC, and awarding credit will be held accountable for the assessment score on their Annual Performance Report (APR).

Extended School Year (ESY)
The curriculum provided for students with disabilities in an ESY program must be consistent with the needs of the students as determined by the Individualized Education Program (IEP) team and the student's IEP. See Appendix A for additional information.

Virtual and Electronic Programs
LEAs may elect to use virtual and/or electronic programs or other methods to deliver academic content during the summer school session. Teacher assignment/certification and MOSIS reporting with virtual/electronic courses must be in accordance with the guidelines set forth in Exhibit 34 of the Department's Core Data/MOSIS Manual http://dese.mo.gov/sites/default/files/cd-mosis-manual.pdf.

The Missouri Virtual Instruction Program (MoVIP) will offer courses during the 2017 summer school. Please visit the Course Information section of the MoVIP website for a complete listing of summer school courses available: http://movip.org/courseinfo/. For purposes of calculation and distribution of state school funding, attendance of a student enrolled in a district or charter school virtual class shall equal, upon course completion, ninety-four percent of the hours of attendance possible for such class delivered in the non-virtual program in the student's resident district or charter school.

Virtual classes may also be purchased from an outside vendor or developed by the LEA. The LEA shall ensure that the virtual classes are aligned with the Missouri Learning Standards, comply with state requirements for teacher certification and ensure the following standards are satisfied:

1. The virtual course or virtual program utilizes appropriate content-specific tools and software;
2. Orientation training is available for teachers, instructors, and students as needed;
3. Privacy policies are stated and made available to teachers, parents/guardians and students;
4. Academic integrity and Internet etiquette expectations regarding lesson activities, discussions, electronic communications, and plagiarism are stated to teachers, instructors, and students prior to the beginning of the virtual course or virtual program;
5. Computer system requirements, including hardware, web browser, and software, are specified to participants;
6. The virtual course or virtual program architecture, software and hardware permit the online teacher or instructor to add content, activities and assessments to extend learning opportunities;
7. The virtual course or virtual program makes resources available by alternative means, including but not limited to, video and podcast;
8. Resources and notes are available for teachers and instructors in addition to assessment and assignment answers and explanations;
9. Technical support and course management are available to the virtual course or virtual program teacher and school coordinator;
10. The virtual course or virtual program includes assignments, projects and assessments that are aligned with students' different visual, auditory and hands-on learning styles;
11. The virtual course or virtual program demonstrates the ability to effectively use and incorporate subject-specific and developmentally appropriate software in an online learning module; and
12. The virtual course or virtual program arranges media and content to help transfer knowledge most effectively in the online environment.
**Instructional Activities**
Special instructional activities, such as, demonstrations, guest speakers, outdoor learning activities, and other non-traditional instructional activities not possible during the regular school year, are encouraged in approved summer school programs. Special approval is required for extended off-campus activities.

**Field Trips**
Field trips are permitted as a special exploratory educational experience for students during summer school and are not intended to be implemented daily as a stand-alone course.
- No fees may be charged for field trips.
- Field trips conducted outside of the regular scheduled school day or calendar (after-school or on weekends) cannot be counted for ADA purposes.
- Eligible attendance hours, for state aid purposes for field trips, are limited to the length of the normal school day. For example, if a field trip requires eight clock hours to complete but the length of the normal summer school day is four hours, only four clock hours of attendance may be claimed for each participating student for state aid purposes.
- State transportation aid for field trips is not allowed.

**Class Size**
Resource standards relative to class size used during the regular school year are applicable to state funded summer school programs.

**Learning Resources**
Textbooks, library resources, and other instructional materials and aids shall be of a quality equal to that used during the regular term.

**Facilities and Equipment**
Facilities and equipment used for summer school programs shall be of equal quality to that used during the regular school term.

**School Health Services**
School health services, for summer school pupils, are encouraged but not required.

**Planning Time**
Planning time is recommended for teachers teaching more than four hours per day in summer school. Planning time is *not* to be reported in the MOSIS June Summer Course Assignment file.

**Teacher Certification**
All teachers employed in an approved summer school program must hold a valid Missouri teaching certificate during their teaching assignment. This certificate must be at the proper level and in the content area for the summer teaching assignment. Teachers whose certificates have expired do not hold a valid certificate. Expired certificates must be renewed prior to the start of the summer session in order for the class to qualify for state aid. Also, if recent graduates or out-of-state teachers are employed as summer school teachers, the LEA must secure substitute or provisional teacher certificates for them. Failure to do so will result in disapproval of ADA of students enrolled in classes taught by teachers not holding a valid certificate.

Be advised, candidates making application for an initial Missouri teaching certificate will be issued a certificate based on the following:
- Applications received from May 1 through July 31 may be effective June 1.
- Applications received from August 1 through November 30 may be effective August 15.
- Applications received during the period of December 1 through April 30 may be effective January 1.
Renewal of professional certificates will be effective upon the date of expiration if the renewal application and supporting documents are received within eleven months of expiration. If the license is submitted for renewal more than eleven months after the expiration date, the individual must meet the current certification requirements as set forth in the rules promulgated by the State Board.

Substitute teaching certificates become effective upon receipt of an educator’s application, transcripts, and current background check clearance. The certificate is valid for four years provided the educator continues employment or, if a new hire, has a current background check clearance.

Please refer to Exhibit 10 of the Core Data/MOSIS Manual (http://dese.mo.gov/sites/default/files/cd-mosis-manual.pdf) for the certificate required to teach specific courses.

**Reading Remediation (167.645 RSMo)**
Course Code 054841 (Reading) may be used to report reading remediation as required by 167.645 RSMo. The required certificate for this assignment is Reading Specialist, PK-3, Elementary, Middle and/or English. Title I required certifications for teaching Course Code 054840 (Supplemental Reading) are Teaching Certificate + K-12 Special Reading certificate OR proper grade level certificate + Masters in Reading.

**Days/Hours in Session**
The school day for LEAs establishing a five-day school week must be at least three hours, but not more than seven hours long, except for vocational schools in St. Louis City and St. Louis County, which may plan school days up to eight hours long (Sections 160.041 and 171.031 RSMo). LEAs with a regular school year that is less than 174 hours may also schedule up to eight hour days during a five-day school week. The school day for LEAs establishing a four-day school week must be at least four hours, but not more than eight hours long. There are no standard day/hour requirements for ESY programs, as length and duration are determined by the student’s IEP team. There is no required number of days that an approved summer school must be in session. Summer schools may operate three, four, or five days per week at the discretion of the LEA.

An approved summer school program provides at least 120 clock hours of instruction regardless of the number of days it is in operation. This requirement can be met in a variety of ways. First, and most common, is by LEAs offering a variety of classes at either the elementary or secondary level which meet state guidelines and whose total hours of instruction equal at least 120 clock hours.

**“Stacking” Hours**
A second method of meeting the clock hour requirement is by LEAs offering a variety of classes at the elementary and secondary level whose combined hours total at least 120. This method is commonly referred to as “stacking”. Under the “stacking” method, LEAs typically offer 60 hours of instruction at the elementary level with 60 hours of instruction at the secondary level for a combined total of 120 clock hours.

Stacking may also include ESY program hours to meet the required 120 clock hours, if necessary. LEAs with “year-round” schedules may include instructional hours earned in a structured summer school program held during fall and spring term cycle breaks. These attendance hours will be reported in the August MOSIS Enrollment and Attendance file. Examples of acceptable combinations are as follows:

- 60 hours in grades K-6 or K-8 plus 60 hours in grades 7-8 or 9-12 in a regular summer school.
- 30 hours in grades K-6 plus 30 hours in grades 7-8 plus 60 hours in grades 9-12 in a regular summer school.
- 60 hours in grades K-8 earned during fall and spring term/cycle breaks plus 60 hours in grades 9-12 in an approved summer school program.
Title I Summer School Hours
Title I summer school hours may not be used in the “stacking” method. The LEA must demonstrate compliance with the supplement, not supplant, requirement before federal programs funds may be used for summer services. Prior to obligating ESEA federal funds for summer services, the LEA must complete a Federal Program Proposed Summer School Plan: https://dese.mo.gov/sites/default/files/dac_forms/MO5002330.pdf

Extended School Year (ESY) Hours
ESY programs for disabled or severely disabled pupils, as required by an Individualized Education Program (IEP), are exempted from the 120 clock hours of instruction for a minimum summer school offering. There is no clock hour requirement for ESY programs. However, LEAs may combine ESY hours with regular summer school hours to meet the minimum of 120 clock hours, if necessary. Otherwise, ESY programs and hours are not reported on the Summer School Application.

Core Data/MOSIS Requirements
Summer School course assignments are submitted through MOSIS in the June Summer Course and Student Assignment file. Once the MOSIS submission is certified, it will populate the information on Screen 24 as part of the June cycle of Core Data and is due no later than June 30. Please refer to Appendix C.

June Cycle Reporting-Course Names and Course Codes
Assignments for summer school teachers are reported through MOSIS in the June Summer Course Assignment file. Once the MOSIS submission is certified, it will populate the information on Screen 24 of the June Cycle Core Data. This report is due no later than June 30.

- Administrators, librarians, counselors, and regular classroom aides are not required to be reported in the June Cycle submission.
- Secondary staff assignments must be reported using course titles and numbers provided by the Department which are listed in the Core Data/MOSIS Reference Manual, Exhibit 10 (http://dese.mo.gov/sites/default/files/cd-mosis-manual.pdf). If there is not a clear match between the course title used at the local level and the title in the Core Data and MOSIS Reference Manual, the LEA must use the Core Data title and accompanying course code number.
- At the elementary level, LEAs often advertise class offerings through the use of innovative titles such as, “Write Your Own Book”, “Math Magic”, “Slugs, Bugs, and Slimy Things”, and “Home Town Heroes and History” and report them using a secondary course code number. These courses should not be reported using specific course codes. Therefore, elementary classes with a special theme, topic or subject should be reported on Core Data as general elementary classes at the grade level at which they are being taught.
- Specific course codes should only be used at the elementary level to report art (024100), music (126900), physical education (086000), and computer literacy (991100).

Use of Course Code 991010-Exploratory and Enrichment
There are few instances that require an LEA to use course code 991010, “Exploratory and Enrichment” for a summer school course or program. In order to do so, the session must clearly supplement a regular academic school activity by enhancing the curriculum with special projects or activities appropriate for student engagement and learning. Beginning with the 2015 MOSIS June cycle, LEAs reporting course code 991010 are required to provide a brief description of the activity that demonstrates it is linked to academic standards and provides relevant opportunities different than the regular school day (examples: 9th grade student science projects through Science Center; STEM engineering-technology in candy production).

Grade Level
Permission from the Department is required to include grade levels in a summer school program that were not served by the LEA during the regular school year. LEAs wishing to add grade levels for summer school must supply a written rationale verifying the need, as well as the capacity and other resources to
adequately serve the new population. For more information, please contact the School Improvement Section at 573-751-4426.

Summer school is considered the beginning of the 2017-2018 school year. Students receiving high school credit should be reported in the class that the credit is given when completing the MOSIS June Summer Course Assignment file. When an elementary or secondary class is made up of students in only one grade, it is appropriate to report the class as grade 3, grade 7, or other single grade that is reflective of the class. If there are children in more than one grade in an elementary or secondary classroom, report the grade that best identifies the majority of the students in the classroom, or the level at which the instruction is being delivered. Please use the following Grade Level indicators when completing the MOSIS June Summer Course Assignment file:

K Kindergarten (Limited to students who will be eligible to attend kindergarten in the fall of 2017. Report children who were in kindergarten during the 2016-2017 school year as first graders).

1-12 Grades 1-12 (Report one specific grade level).

13 High School (Any combination that includes grades 9-12 or 7-12 in a high school building). Typically used to report physical education, art, music, practical arts, career education and elective classes composed of students in several different grades.

14 Junior High (Any combination that includes only grades 7-9). Typically used to report physical education, art, music, practical arts, and exploratory classes composed of students in two or more grades.

15 Middle School (Any combination that includes only grades 4-8). Typically used to report physical education, art, music, practical arts, and exploratory classes composed of students in two or more grades.

16 Elementary (Any combination that includes only grades K-8). Use only when reporting an elementary class with one of the following course code numbers: 024100 art, 126900 vocal music, 086000 physical education, 991100 computer literacy, 991010 exploratory and enrichment, and 990808 gifted. Do not use when two or more regular elementary classes are combined. See note above for 1-12 grades.

State Aid and Other Payments for Summer School Programs - Fees
LEAs may not charge fees of any type for school work for which academic credit is granted. Therefore, fees may not be charged for a state-approved summer school program or ESY program. Charging fees for any part of the program will disqualify the entire program for state funding. State aid cannot be claimed for resident or nonresident pupils if tuition and fees are charged. Please refer to Appendix H for additional information.

Membership and Attendance - Resident Students
The summer school attendance hours of resident pupils eligible for admission to kindergarten in the next fall term (if the pupil will reach the age of five, by August 1, 2017 pursuant to Section 160.053 RSMo) through the earlier of age twenty-one, or the completion of grade 12, will be counted for state aid purposes in accordance with Section 163.011 RSMo.

As part of the requirement for MOSIS, every student must be assigned a MOSIS State ID before the district is able to submit information in the June Summer Course Assignment and Student Assignment submission in MOSIS. This includes each student who is enrolled in the LEA's summer school. LEAs must keep individual membership and attendance records by the clock hour for summer school programs. Summer school attendance records shall be audited as required by law. The summer school membership hours will be reported for these same pupils for whom summer school attendance hours are maintained. The membership hours are the maximum hours all students enrolled in summer school could attend if all students had perfect
attendance for their enrollment. Membership hours are not used in state aid calculations. A student cannot have more attendance hours than hours possible in the approved summer school session.

Membership and Attendance - Nonresident Missouri Students
LEAs may provide summer school services to nonresident Missouri students under the provisions of Section 167.227, RSMo. Under the provisions of this section, LEAs conducting approved summer school programs may, at their option, allow students from other Missouri LEAs to attend or may limit their program to resident students. If students from other Missouri LEAs are allowed to attend the summer school program, the LEA must select one of the following methods for receiving compensation for providing this service:

- Charge a tuition fee to all nonresident students based on the number of classes and/or hours of instruction involved in the nonresident student’s summer school schedule. The LEA providing the summer program would not be eligible to claim state aid for these students. The LEA of residence, however, under an inter-district/charter school agreement, may claim state aid for these students in order to help defray the tuition paid to the LEA providing the summer school service.
- Allow all nonresident students to attend on a tuition-free basis and claim the attendance hours generated by these students for state aid purposes as though they were resident students. No tuition may be charged to parents or other LEAs for these students.
- State aid cannot be claimed for resident or nonresident pupils if tuition and fees are charged.

LEAs may give first priority to resident students in their summer school program or otherwise limit the number of nonresident students they enroll in their program. Students may enroll and attend summer school classes in only one LEA.

Summer school programs funded wholly by federal money may not serve students from other LEAs, except under an inter-district/charter school agreement.

Charters and Non-Resident Students: During summer school only, charter schools may provide services to Missouri students who are residents in districts other than the school district in which the charter school exists. Charter schools may not charge tuition. Charter schools will receive state aid for these services, but will not receive local effort from the district in which the charter is located. Charter schools are required to report nonresident students. All other requirements for the provision of summer school services that apply to traditional LEAs also apply to charter schools.

Attendance Records and Reporting
LEAs operating state approved summer school programs must maintain student attendance records in order to qualify for state aid. Attendance records for individual students must be maintained by the clock hour in a manner which can be audited. At the conclusion of the summer program, the attendance data for all students must be summarized and submitted to the Department via MOSIS in the August Enrollment Attendance file which will populate Screen 16 of the August cycle of Core Data (due August 15).

Payment for Virtual Courses
Section 162.1250[3] RSMo allows school LEAs to receive state school funding for resident students who are enrolled in the LEA and who are taking a virtual course offered by the LEA. In order to receive summer school funding, the virtual classes must meet the following requirements:

- Be included in the approved summer school plan,
- For purposes of calculation and distribution of state school funding, attendance of a student enrolled in a virtual class shall equal, upon course completion, ninety-four percent of the hours of attendance possible for such class delivered in the non-virtual program in the student’s resident district or charter school pursuant to Section 162.1250[3] RSMo. For additional information please see: http://dese.mo.gov/sites/default/files/sf-AttendanceReporting.pdf.
The major portion of the clock hours of instruction in the program must be from the core academic area, and
Employ a contact teacher with a valid Missouri teaching certificate assigned to interact with students of virtual courses.

Transportation
Pupil transportation for a regular summer school program is not approved for state funding, but may be provided at LEA expense. Some federal programs allow funds to be used for transportation. Consult the guidelines for those programs. Please refer to “Summer School Transportation” in Appendix F for additional information.

School Food Services
School food services for summer school pupils are encouraged but not required. Please refer to “Summer School Child Nutrition Programs” in Appendix G for additional information.

For additional information related to state aid payments, please see:

- Summer School Finance/State Aid - Appendix E.
- Extended School Year Finance/State Aid – Appendix A.
APPENDIX A
Special Education Extended School Year (ESY) Services

Extended School Year for Students with Disabilities
LEAs are required to provide ESY services for students with disabilities when the student’s Individualized Education Program (IEP) team has determined that such services are required to provide the student a Free Appropriate Public Education (FAPE). Extended school year programs and regular approved summer school programs are separate and distinct programs. In implementing the requirements for ESY, a public agency may not limit ESY services to particular categories of disability or unilaterally limit the type, amount or duration of these services.

Eligibility
In order to be eligible for funding of ESY services, LEAs must have a policy which governs eligibility for extended school year services. This LEA policy must include the following:

1. Process and procedures utilized by the IEP team for determining, for each individual student, whether or not special education and related services are required for more than the typical school year of 174 days for the provision of FAPE to the child.

2. Processes and procedures for documenting ESY eligibility predicated on regression/recoupment criteria. If regression/recoupment is utilized for determining eligibility, both actual and predicted regression/recoupment must be considered.

3. Processes and procedures for documenting the IEP team’s decision regarding the determination of a student’s need for ESY services in the student’s IEP.

4. Processes and procedures utilized to determining and documenting the type of special education and related services and their frequency, intensity, and duration shall be determined by the IEP team and documented in the IEP.

State Aid
An extended school year program is exempted from the 120 clock hours of instruction for a minimum summer offering. However, LEAs may use ESY hours in conjunction with regular summer school hours to meet the minimum 120 clock hours for the minimum summer offering.

When extended school year services are not provided in conjunction with the LEA’s regular and approved summer school program, the LEA will receive regular state aid as described in Appendix E “Summer School Finance” for the students receiving ESY services.

Transportation
Extended school year programs for students with disabilities are eligible for state transportation funding. Please refer to “Summer School Transportation” in Appendix F for information relating to transportation.

Transportation for Early Childhood Special Education (ECSE) ESY
ECSE ESY services and transportation are reimbursed through an Expenditure Report (ER) and not through State Aid/Transportation Aid. ECSE ESY expenditures must be recorded to function codes 1280 and 2559 in the ASBR in addition to being reported on the ECSE ER in order to be reimbursed.
APPENDIX B
Core Data Screen 24A – Summer School Application

The Summer School Application, Screen 24A, is made available to Missouri LEAs to apply for approval to operate a state-funded summer school program. The information must be complete and submitted by May 1 of the year the summer session is to be held. All approved LEAs that offer summer school programming must also provide information specific to their program as part of the MOSIS June Summer Course Assignment submission.
Item Definitions – Screen 24A-Summer School Application

Summer School Director Information

First Name – First name of the educator that directs the summer school program.

Last Name – Last name of the educator that directs the summer school program.

Phone Number – Phone number of individual that directs the summer school program.

Email – Email of individual who directs the summer school program.

Program Information

Line – A sequential number for each line assigned by the system.

Program Location – 4-digit number and name of attendance center where the students will be attending in the Fall, not the actual physical location where summer instruction is given (Select from drop down list.)

Estimated Enrollment – The number of students estimated to be enrolled in the summer program at each program location.

Grade Span – Lowest and highest grades of the attendance center; valid selections are K and 1-12. (Select from drop down list.)

Open Date – The date the summer school program begins (use extra lines for multiple sessions with different start/close dates).

Close Date – The date the summer school program closes.

Days Not in Session – Total number of planned days that school will not be in session between the starting and closing dates.

Total Days in Session – Total number of planned days that school will be in session between the starting and closing dates.

Hours Per Day – Total number of hours between the starting time of the first class and the dismissal time of the last class, excluding lunch periods.

Total Hours in Session – Total number of planned hours that school will be in session between the starting and closing dates.

Summer School enrollment exceeds Regular year enrollment – If the estimated summer enrollment exceeds the enrollment reported during the traditional school year, the LEA must select the yes button. The comment box must include the rationale and capacity to serve the excess enrollment.
Provision of Services

**Service Provider** – Organization utilized to operate and provide the LEA’s summer school program. If the LEA’s summer school program is operated by a service provider, whole, or in part, the LEA must select the yes button and provide the Service Provider’s contact information.

**Company Name** – Organization utilized to operate and provide the LEA’s summer school program. (Service Provider).

**First Name** – First name of the contact for the company that operates the LEA’s summer school program.

**Last Name** – Last name of the contact for the company that operates the LEA’s summer school program.

**Phone Number** – Phone number of the contact for the company that operates the LEA’s summer school program.

**Email Address** – Email of contact for the company that operates the LEA’s summer school program.

**Offsite Location** – Service provider operates summer school program in a facility not owned by the LEA (If the LEA’s summer school program is operated by a service provider in a facility not owned by the LEA, the LEA must select the yes button and provide all service provider offsite locations in comments box. If the LEA operates a joint program, the information must be provided in the comments box).

**Comments** – Required LEA response(s) to Y/N questions/Free-form commentary.

**DESE Comments** – DESE Response /Free-form commentary.

**Del X** – Click button to delete row.

**Save** – Click button to save all data on screen.

**Add More Rows** – Click button to add more rows.

**Screen 24** – Click button to move to Screen 24 Summer School Course and Enrollment.

**Submit** - Click button to submit the Summer School Application for review/approval.
The Summer School Courses and Enrollment screen is used to report specific information for each class that is included in the LEA’s state-funded summer school program and each certificated staff person as well as each specially funded aide participating in the program. These data, along with information submitted on the Application for Summer School Approval-Part I (Screen 24A), will be reviewed to determine the status of the LEA’s state-funded summer school program. Please refer to the Application for Summer School Approval submitted to the Department of Elementary and Secondary Education on May 1 when completing the MOSIS June Summer Course Assignment and Summer Student Assignment submission. When the MOSIS submission is certified, Screen 24 will be populated.
For additional information on the completion of Screen 24 of the June Cycle, please see the MOSIS/Core Data Manual at [http://dese.mo.gov/data-system-management/manuals](http://dese.mo.gov/data-system-management/manuals).
APPENDIX D
Core Data Screen 16 – Enrollment, Membership and Summer School

Actual summer school attendance and membership and actual extended school year attendance are reported on an hourly basis on this screen. When the August Student Enrollment and Attendance file is submitted and certified in MOSIS, Screen 16 will be populated.

February Cycle
January membership counts are reported on this screen by attendance center by grade.
**Item Definitions – Screen 16-Enrollment, Membership and Summer School**

**Header Information** – Refer to Core Data Collection Menu – Cycles and Layout (page preceding the August Cycle) for definition of District, Year, Status, Location, and Help.

**School** – 4-digit school number and name of attendance center. (Select from drop-down list).

**Grade** – Grade level of the attendance center for which data are reported. Valid selections from the drop-down list are PK, K, KA, KP, and 1-12. Select ‘K’ for full-day kindergarten, ’KA’ for AM kindergarten, or ‘KP’ for PM kindergarten.

**Summer School and Extended School Year (ESY) Hours Just Completed** – Actual summer school attendance and membership hours and actual extended school year program attendance hours for students with disabilities as required by the Individualized Education Program (IEP) submitted in the August Cycle. Summer school students should be entered in the grade in which they are enrolled in the current school year (after summer school). ESY hours that are outside of the timeframe and days of the summer school program must be reported under the ESY hours. However, ESY hours running in conjunction with the summer school program can be reported as either ESY hours or summer school hours.

- **Attendance Regular** – Actual number of summer school attendance hours by resident students (excluding desegregation students) in a program approved by the School Improvement Section.
- **Attendance Deseg In** – Actual number of summer school attendance hours for incoming desegregation students.
- **Attendance Fed Lands** – Actual number of summer school attendance hours for federal lands students.
- **Attendance TOTAL** – Total regular, deseg in, and fed lands summer school attendance hours. (Item is system calculated and displayed).
- **Attendance Deseg Out** – Actual number of summer school attendance hours for outgoing desegregation students.

- **Membership Regular** – Actual number of summer school membership hours of resident students (excluding desegregation students) in a program approved by the School Improvement Section. (Maximum hours all students enrolled by grade could attend if all students had perfect attendance).
- **Membership Deseg In** – Actual number of summer school membership hours for incoming desegregation students.
- **Membership Fed Lands** – Actual number of summer school membership hours for federal lands students.
- **Membership TOTAL** – Total regular, deseg in, and fed lands summer school membership hours. (Item is system calculated and displayed).
- **Membership Deseg Out** – Actual number of summer school membership hours for outgoing desegregation students.

- **Attendance Adjustment-Regular** – Number of summer school attendance adjustment hours of resident students (excluding desegregation students). (Display only).
Attendance Adjustment-Deseg In – Number of summer school attendance adjustment hours for incoming desegregation students. (Display only)

Attendance Adjustment-Fed Lands – Number of summer school attendance adjustment hours for federal lands students. (Display only)

Attendance Adjustment-Total – Total regular, deseg registration in, and federal lands summer school students adjustment hours. (Item is system calculated.)

Attendance Adjustment-Deseg Out – Number of summer school attendance adjustment hours for outgoing desegregation students. (Display only)

ESY Attendance Regular – Actual number of ESY attendance hours by resident students (excluding desegregation students).

ESY Attendance Deseg In – Actual number of ESY attendance hours for incoming desegregation students.

ESY Attendance Fed Lands – Actual number of ESY attendance hours for federal lands students.

ESY Attendance Total – Total regular, deseg in, and fed lands ESY attendance hours. (Item is system calculated and displayed.)

ESY Attendance Deseg Out – Actual number of ESY attendance hours for outgoing desegregation students.

September Enrollment – Head count taken the last Wednesday of September of all resident and non-resident students in grades PK through 12 enrolled in the attendance center. Each student (part-time, full-time or kindergarten) should be counted as one. Desegregation transfer students are reported as residents of the district in which they attend school. Enrollment for students attending alternative schools and area vocational schools should be reported at the students’ regular school in their home district. (Populated from MOSIS - October Cycle.)

September Membership By County – Count of resident students in grades K-12 taken the last Wednesday in September who are enrolled on the count day and in attendance at least 1 of the 10 previous school days, by grade at each attendance center. Students attending an alternative school or an area vocational school part of the day and their home school the remainder of the day should be counted as full-time students in the regular school in their home district. To receive full-time credit for special education kindergarten students whose IEPs call for full-day attendance, report the membership in full-day kindergarten. Membership for Title I extended day kindergarten should not be reported. Part-time students are reported on FTE basis under part-time. For example, a part-time student enrolled 4 hours in a 6-hour day equals 0.67 FTE. Membership of students for whom the home district pays full tuition is counted by the home district. Membership of students for which local tax effort only is paid is not reported by the home district, but is reported by the receiving district. Membership of students for whom parents have paid tuition is not counted by any district. (Populated from MOSIS - October Cycle.)

January Membership – Count of resident students in grades K-12 taken the last Wednesday in January who are enrolled on the count day and in attendance at least 1 of the 10 previous school days, by grade at each attendance center. Students attending an alternative school or an area vocational school part of the day and their home school the remainder of the day should be counted as full-time students in the regular school in their home district. To receive full-time credit for special education kindergarten students whose IEPs call for full-day attendance, report the membership in full-day kindergarten. Membership for Title I extended day kindergarten should not be reported. Part-time students are reported on FTE basis under part-time. For
example, a part-time student enrolled 4 hours in a 6-hour day equals 0.67 FTE. Membership of students for whom the home district pays full tuition is counted by the home district. Membership of students for which local tax effort only is paid is not reported by the home district, but is reported by the receiving district. **Membership of students for whom parents have paid tuition is not counted by any district.** *(Populated from MOSIS - February Cycle.)*

**Edits** – Click button to display list of potential data errors and/or warnings related to data displayed.
To qualify for state aid, a regular summer school program must provide at least 120 clock hours of instruction. The exception is an extended school year (ESY) for special education students, which has no specific requirement of clock hours.

The attendance of a summer school pupil is a fraction of a regular school term FTE. The summer school average daily attendance (ADA) is calculated by dividing the total summer school attendance hours by the minimum regular school term of 1,044 hours. The easiest illustration is to assume one student attended all 120 hours of a 120 hour summer school session. The FTE in this example would be .1149 which is computed by dividing 120 by 1,044. Thus, it would take approximately nine summer school students with perfect attendance to equal one regular term FTE pupil.

Summer School for the 2017-18 Payment Year
For the 2017-18 Basic Formula payment, the 2017 summer school ADA will be added to the highest of the current year’s estimated weighted average daily attendance (2017-18), the first preceding year’s weighted average daily attendance (2016-17), or the second preceding year’s weighted average daily attendance (2015-16). The summer school ADA will be counted once (not twice).

The 2017-18 Proposition C payments will be based on the 2015-16 weighted average daily attendance (using the 2016 summer school data once).

Revenues generated by a summer school program are included in the total payments made to a school district for Basic Formula and Proposition C. No separate payment or payment transmittal designation is made for summer school.

The following section provides an example for computing revenues attributed to summer school.
Summer School Revenue Calculations

School districts may use the following information to estimate summer school revenues for budget purposes. Remember, since the actual payment amounts may vary as payment information is updated throughout the year, it is important to monitor changes to estimated receipts and adjust the district’s budget accordingly.

1) **ESTIMATED SUMMER SCHOOL AVERAGE DAILY ATTENDANCE SAMPLE CALCULATION**

   Summer school enrollment: 200
   
   175 students @ 120 hours = 21,000  Maximum hours of attendance
   25 students @ 60 hours = + 1,500  “ “
   22,500  Total hours of attendance possible
   x .92  Historical summer school attendance
   20,700  Projected summer school attendance

   \[ 20,700 \div 1044 = 19.83 \] Projected summer school ADA

2) **ESTIMATED BASIC FORMULA REVENUE CALCULATION**
   (School Districts) Calculated for School Year 2017-18

   Complete the Basic Formula Calculation worksheet located at:

   Estimated Basic Formula payment including the projected summer school ADA =
   Minus Estimated Basic Formula payment excluding projected summer school ADA =

   Estimated Basic Formula Revenue attributed to summer school

3) **ESTIMATED SUMMER SCHOOL PROPOSITION C REVENUE:**

   Projected summer school ADA x Estimated Prop C Amount per WADA** =

   Estimated Proposition C Revenue

   **TOTAL ESTIMATED SUMMER SCHOOL REVENUE**
   
   Basic Formula Estimate Prop C
   Estimate C Estimate
   
   Total Estimated Summer School Revenue

** Refer to the Monthly Financial Memo under sections titled Budget Estimates for the year for which this calculation is performed.
APPENDIX F
Summer School Transportation

State transportation reimbursement is paid to LEAs for costs incurred transporting eligible students to and from school only during the regular school term. The only exception to this is for the costs incurred transporting students with disabilities. If a student’s IEP requires them to be transported or if that IEP requires summer school or ESY services to be provided, those miles would be considered eligible route miles.

Sections 162.710, 163.161, 167.231, 167.241, and 178.510, RSMo, provide authority for reimbursement for transportation services to and from school only during the school term as defined in Sections 160.011 (9) and 171.031, RSMo.

Provisions for Extended School Year Transportation of Students with Disabilities

To receive reimbursement for extended school year transportation for students with disabilities, the following criteria must be met:

- Students with disabilities route miles should be included on the Application for State Transportation Aid under Section III-Mileage Data, Eligible Route Miles, Students with Disabilities Approved Miles. If disabled and non-disabled students are transported on the same route, only the miles for students with disabilities should be reported as approved route miles. The difference between the students with disabilities approved route miles and actual miles traveled must be reported as disapproved route miles on the Application for State Transportation Aid under Section III-Mileage Data. Ineligible Miles should be reported on the Application for State Transportation Aid in the same year as the costs are reported on the Annual Secretary of the Board Report (ASBR).

- Costs for transporting students with disabilities must be coded on the ASBR on Part III-B in Function 2553, 2554, or 2556. If both categories of pupils (disabled/non-disabled) are transported on the same route, the cost for the route must be prorated on a per-student basis to the appropriate category on the ASBR. The prorated costs for the disabled portion of the route should be coded as students with disabilities transportation (Function 2553, 2554, or 2556) while the remaining cost should be coded to regular transportation (Function 2551, 2552, or 2555).

- ECSE ESY transportation should not be included on the application. These expenditures must be coded on the ASBR on Part III-B in Function 2559 and on the ECSE Expenditure Report (ER).

Regular Summer School Transportation Expense

Expenses for transporting students to and from summer school programs (excluding approved students with disabilities programs) must be reported on the ASBR in Function 2551, 2552, or 2555 and the miles reported as Ineligible-Disapproved on the Application for State Transportation Aid.
Local education agencies (LEAs) that operate a summer school program offering regular credit may also extend the services of the school lunch and/or school breakfast programs to attending students. Federal assistance is extended to the LEA through various programs during the summer. It must be understood that federal funds may be used to cover only one of the options offered for lunch and/or breakfast programs. Listed below are the options for feeding children during the summer:

1. **Regular National School Lunch/Breakfast Programs:** If the school site restricts meal services to just summer school students, the summer school only sites must operate under the National School Lunch/School Breakfast Program (NSLP/SBP) regulations. The meals must be recorded in the appropriate category; i.e., free, reduced price, and paid. NSLP/SBP rates of reimbursement will apply. Claims for reimbursement must be submitted via the Web to DESE.

2. **The Seamless Summer Option** is operated under the NSLP/SBP guidelines and is administrated by DESE. The summer sites (area eligible sites) must be located in needy areas where 50 percent or more of the children qualify for free and reduced price school meals. The summer sites (enrolled sites) may also be located in non-needy areas, provided that at least 50 percent of the children enrolled in these sites qualify for free and reduced price school meals. Meal services for summer school sites must also be open to all children (18 years and under) in the community. The meal services cannot be limited to just summer school students. The availability of meals to the children in the community must be advertised. All meals must be served free and reimbursed at the free reimbursement rate of the NSLP/SBP. Claims for reimbursement must be submitted via the Web to DESE.

The purpose of the Seamless Summer Option is to feed all children in low-income areas during the summer months. Pre-approval by the State Agency, prior to operation of each site is required to verify individual site eligibility. Applications will be available in March via the DESE Web Applications Login Page. Seamless Summer Option claims must be completed separately from the claims for the regular school term. For example, if the LEA’s regular term ended in June and summer school began in June, the LEA would complete a regular term June reimbursement claim and a summer school term June claim. The two claims would be combined for payment purposes. Approval of an area-eligible site is for five years. Enrolled site eligibility must be re-determined each year.

3. **Summer Food Service Program:** The Department of Health and Senior Services (DHSS) administers the SFSP. Site eligibility for the SFSP is determined in the same way as for the Seamless Summer Option. The determinations are made by the DHSS and are good for five years. Meals may also be served in non-needy areas, provided that at least 50 percent of the children enrolled in the site's food program qualify for free or reduced price school meals. As in the Seamless Summer Option, the meal service must be open to all children (18 years and under) in the community, and the availability of the meals to all children in the community must be advertised. The SFSP regulations and reimbursement rates (which are higher than NSLP/BP rates) apply. Schools that have participated in the Seamless Summer Option in the past may complete a user- friendly on-line application with the DHSS for the SFSP, and claims for reimbursement, are submitted via the Web to the DHSS as well.
LEAs may also participate in the After School Snack Program for students enrolled in summer school if the LEA sponsors or operates an after school care program. The program must:

- provide children with regularly scheduled activities in an organized, structured and supervised environment;
- include educational or enrichment activities;
- serve students snacks that comply with USDA meal pattern requirements;
- operate after the summer school day ends.
APPENDIX H
Legal Implications
Relative to Local Education Agencies (LEAs)
Charging Fees and Issuing Credit for Summer School Attendance

There are three important issues that need to be addressed in considering the question of whether or not fees can legally be charged for summer school attendance by LEAs:

- Section 1(a), Article IX, of the Missouri Constitution, states: “A general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people, the general assembly shall establish and maintain free public schools for the gratuitous instruction of all persons in this state within ages not in excess of twenty-one years as prescribed by law”.

- In the Missouri Supreme Court case entitled Concerned Parents v. Caruthersville School District 18 (sup. 1977) 548 S.W.2d 554, it was stated: “Even if registration fees and course fees charged by public school districts were so small as to be de minimus, that fact would not excuse a violation of the prohibition of this section against a public school district charging registration or course fees in courses for which academic credit is given”.

- In Attorney General Opinion No. 66, issued March 7, 1973, the Attorney General reviewed the legal implications of a school charging a fee for summer school or night school where the course work is given for academic credit. The opinion was that a district may not charge fees for summer school or night school to residents of the school district under twenty-one years of age.

In evaluating the legal implications of these issues, it would appear that under our State Constitution and present state statutes, it would not be legal for a local public school district to charge a fee for resident students for summer school work for which academic credit would be granted by the local public school system.
APPENDIX I
Summer School Cooperative Education

Summer School Program Requirements
The purpose of offering Cooperative (co-op) Career Education (CCE) during summer school is to provide students participating in these programs with supervision and support during the summer months. Summer school co-op should serve as a bridge between enrollment and training station placement in the spring, and the start of classes in the fall. Students may earn ½ unit of credit for cooperative education during the summer.

As with work-based learning activities through a Cooperative Career Education Program offering during the fall and spring semesters, summer school activity must meet the common criteria and quality indicators established and approved by the Office of College and Career Readiness, Career Education Unit. The program incorporates real world work experience and learning into the student’s academic experience.

Requirements:

- Summer school co-op can only be offered as part of a career education program that has been approved by the Department of Elementary and Secondary Education, Office of College and Career Readiness, Career Education Unit.
- The district’s summer school program must be approved by DESE.
- A properly certificated teacher must be employed to supervise the program.
- Students must be enrolled in a cooperative education program for the following fall.
- Students must complete at least 148 clock hours of supervised employment.
- Students must complete at least 12 hours of related summer school classroom instruction.
- There must be a written instructional plan which sets forth specific learner objectives, an evaluation plan for student performance, and a training agreement signed by all parties involved. Evaluation of students on the job must include occupationally specific skills as well as attitudinal criteria. Students may or may not receive pay. The employment relationship must be established for off-campus experience as part of Cooperative Career Education programs.

Reporting:

- Report 60 hours in HRS column on Screen 24 Core Data.
- Use the following course codes:
  - 040081
  - 040080
  - Spv CCE
  - Occupational
  - Emp
