compliance are required to write a plan of action to demonstrate how they will provide services to students who are English learners in order to achieve AEP.

Technical Assistance is provided at the state level by the director of English Language Programs and the director of English Language Curriculum. Additional assistance is provided through a network of regional English language instructional specialists who work directly with LEAs that have been identified for services.

LEAs receive personalized technical assistance via MO-DESE representatives and MELL instructional coaches. MO-DESE representatives proactively hold technical assistance workshops throughout the state as part of the ELD Curriculum, Instruction and Assessment program.

To ensure that LEAs are continuously improving their plans to address the unique needs of ELs and immigrant students, the SEA includes Migrant & English Language Learner (MELL) instructional coaches on the Regional School Improvement Teams (RSIT). In addition, various MO-DESE sponsored Train the Trainer opportunities are available during the year along with statewide, regional and virtual ongoing professional development workshops addressing the needs of all ELs including low-incidence districts, ELs with disabilities, students with interrupted formal education (SIFE), and recently arrived ELs (RAELs) as part of the ELD Curriculum, Instruction and Assessment Program.

F. Title IV, Part A: Student Support and Academic Enrichment Grants
Local schools have significant latitude to determine the allowable uses of Title IV, Part A funds most closely aligned to local need. The state level perspective for these needs includes an understanding that many schools, especially smaller and outstate ones, lack adequate resources to provide access to advanced coursework. While this is often attributed to a lack of qualified teachers, a confounding factor is the fact that outstate schools often lack sufficient connectivity to supply coursework virtually. Missouri is fortunate to have a current statewide government effort to ensure that every school has a minimum bandwidth of 100 kbps per student.

Use of Funds (ESEA section 4103(c)(2)(A)): Describe how the SEA will use funds received under Title IV, Part A, Subpart 1 for State-level activities.

MO-DESE has a single area of critical need for state-level activities under Title IV, Part A, Subpart 1. A recent statewide analysis of advanced course offerings in mathematics and science indicated that a significant number of high schools do not offer, and consequently a significant number of students do not have access to, advanced coursework. The table below provides examples of courses that have limited availability to students.

The need for proper preparation in STEM areas is critical for both students’ future success and for the economic health of our state and nation. In addition to the content of the courses, the development of critical thinking through problem solving is embedded in the pedagogy of these courses.

To overcome the lack of course availability, MO-DESE intends to improve access to advanced coursework for all students, but particularly for minorities and economically disadvantaged students and for those whose rural or small school settings reduce their access. MO-DESE may also subsidize fees for AP and IB courses. Furthermore, where advanced coursework, including advanced mathematics and science are locally unavailable, MO-DESE will subsidize course fees for the Missouri Virtual Instruction Program.

1. **Awarding Subgrants (ESEA section 4103(c)(2)(B))**: Describe how the SEA will ensure that awards made to LEAs under Title IV, Part A, Subpart 1 are in amounts that are consistent with ESEA section 4105(a)(2).

   MO-DESE will ensure no allocation is below $10,000 through its internal fiscal and performance management controls.

Title IV, Part B: 21st Century Community Learning Centers

Many young people and families stand to benefit from extended opportunities for learning, both academic and otherwise, as well as opportunities for meaningful engagement with others. MO-DESE supports these students and families through grants to establish and expanded 21st Century Community Learning Centers. These competitive grants are awarded across the state but the priority will be to support communities in which a Comprehensive Support and Improvement School is located.

2. **Use of Funds (ESEA section 4203(a)(2))**: Describe how the SEA will use funds received under the 21st Century Community Learning Centers program, including funds reserved for State-level activities.

   MO-DESE will

   i. reserve no less than 93 percent of the amount allotted to the state for making awards to eligible entities to implement a 21st CCLC program.
