Program-Specific Requirements for Vocational Rehabilitation (General)

The Vocational Rehabilitation (VR) Services Portion of the Unified or Combined State Plan* must include the following descriptions and estimates, as required by section 101(a) of the Rehabilitation Act of 1973, as amended by WIOA:

* Sec. 102(b)(D)(iii) of WIOA

**a. Input of State Rehabilitation Council**

All agencies, except for those that are independent consumer-controlled commissions, must describe the following:

1. **input provided by the State Rehabilitation Council, including input and recommendations on the VR services portion of the Unified or Combined State Plan, recommendations from the Council's report, the review and analysis of consumer satisfaction, and other Council reports that may have been developed as part of the Council’s functions;**

The State Rehabilitation Council (SRC) reviewed Missouri Vocational Rehabilitation’s (MVR) services portion of the Combined State Plan for the Title I and VI B programs. On behalf of the Council, Aimee Wehmeier, SRC chairperson, submitted the following comments and suggestions:

1. The SRC Planning Committee, acting for the SRC, had an opportunity to review and comment on MVR’s services portion of the Combined State Plan. We are in support of your plan.

2. We applaud MVR's response to the passage of the Workforce Innovation and Opportunity Act (WIOA). Your commitment to cooperating, collaborating and coordinating with other components of the statewide workforce development system is commendable. Improving partnerships and supporting people, including youth and students, with disabilities to obtain competitive integrated employment benefits everyone.

3. We would like to acknowledge MVR’s work on the goals and priorities for FY2015. Results demonstrate that though good faith effort was made, MVR was unable to achieve Goal 1: Improve the accountability and performance of service providers. We recognize that improving the accountability and performance of service providers is an ongoing process. The SRC recommends MVR continue to work on strategies to assist them in reaching the goal that was not met and provide an update at future Council meetings.

4. The SRC agrees that MVR’s goal of increasing employment outcomes for individuals with autism spectrum disorder (ASD) is needed. We support your strategies to develop training in serving people with ASD as well as to collaborate with the Department of Mental Health and other agencies.

5. The SRC is pleased that MVR’s efforts to improve efficiency and cost effectiveness allowed the agency to currently eliminate its waiting list and place eligible applicants into services. The SRC recognizes the progress made on reducing the waiting lists. However, the SRC believes that any
waiting list is undesirable and will force more individuals to become dependent on public assistance and increase the number of individuals who drop from the program before services are provided.

6. The SRC would like to commend MVR for meeting or exceeding five out of six required Standard 1 performance indicators in FY2015 and meeting two of the three required primary indicators. MVR also achieved successful performance on Standard 2. We acknowledge that all performance indicators were exceeded except 1.5. For performance indicator 1.5, the federal standard is .52, and MVR was at .51.

7. The SRC shares with MVR a concern that the economy makes MVR’s role in accessing employment opportunities for people with disabilities more challenging. SRC continues to support MVR’s efforts to find solutions by encouraging innovation and job creation and focusing on high quality employment outcomes.

The SRC had opportunities in the past year to provide input on other important matters with your agency. Some of these were reviewing and providing input to the FY2017 goals, priorities, strategies and state plan; the SRC FY2015 annual report; recommendations on policy revisions; state rule changes, collaboration with other disability–related councils; customer satisfaction survey results; the participation in and feedback from public hearings; hearing decision reviews; the recruitment and selection of an impartial hearing officer; and reviewing MVR’s outcomes and performance indicators.

The SRC appreciates the opportunity to work with MVR on these matters of importance to people with disabilities in the state of Missouri.

2. the Designated State unit’s response to the Council’s input and recommendations; and

Response to SRC recommendation 1: MVR is pleased that the SRC is in support of MVR’s services portion of the Combined State Plan.

Response to SRC recommendation 2: MVR is pleased that the SRC recognizes our commitment to supporting WIOA initiatives and our desire to work with other components of the statewide workforce development system in improving competitive integrated employment opportunities for people, including youth and students, with disabilities.

Response to SRC recommendation 3: MVR appreciates the acknowledgment from the SRC about meeting goals, which were established for FY2015. MVR agrees to comply with the SRC’s recommendations to continue working on the goal that was not met and update the SRC at quarterly meetings about the progress toward meeting that goal.

Response to SRC recommendation 4: MVR appreciates the SRC’s support of the goal of increasing employment outcomes for individuals with ASD and will keep the SRC informed about the continued progress toward reaching this goal.

Response to SRC recommendation 5: As of September 30, 2015, all priority categories were open without a wait list. Significant progress has been made, and MVR will continue striving to completely eliminate all priority category waiting lists now and in the future. MVR agrees with the SRC that waiting lists are undesirable and have many negative effects on people with disabilities.

Response to SRC recommendations 6 and 7: MVR is pleased that it met or exceeded five of the six required Standard 1 performance indicators in FY2015 and that two of three required primary
indicators were met. It is also happy that it successfully achieved Standard 2. While almost all performance indicators were exceeded, Indicator 1.5 was missed by a small margin. The economic outlook for jobs is a significant concern. MVR will strive to increase quality employment outcomes, develop and maintain strong partnerships with other agencies and provide effective employment services.

MVR expresses its sincere thanks and appreciation for the excellent assistance from the SRC this year. The SRC has been extremely active and helpful with the development of FY2017 goals and priorities. In addition, the Council reviewed consumer satisfaction information, reviewed new policy and procedural changes along with hearing decisions, recruited and selected an impartial hearing officer, attended 2015 public hearings, and collaborated on other important issues. MVR looks forward to working with the SRC in the future to better serve people with disabilities.

3. the designated State unit’s explanations for rejecting any of the Council’s input or recommendations.

MVR did not reject any of the Council's input or recommendations.

b. Request for Waiver of Statewideness

When requesting a waiver of the statewideness requirement, the designated State unit must identify the types of services to be provided by the program on a non-statewide basis. The waiver request must also include written assurances that:

1. a local public agency will provide the non-Federal share of costs associated with the services to be provided in accordance with the waiver request;

This agency has not requested a waiver of statewideness.

2. the designated State unit will approve each proposed service before it is put into effect; and

This agency has not requested a waiver of statewideness.

3. All State plan requirements will apply

requirements of the VR services portion of the Unified or Combined State Plan will apply to the services approved under the waiver.

This agency has not requested a waiver of statewideness.

c. Cooperative Agreements with Agencies Not Carrying Out Activities Under the Statewide Workforce Development System.
Describe interagency cooperation with and utilization of the services and facilities of agencies and programs that are not carrying out activities through the statewide workforce development system with respect to:

1. Federal, State, and local agencies and programs;

Cooperation, Collaboration and Coordination

MVR has long-standing working relationships with partner agencies both inside and outside of the statewide workforce development system. The first part of this section will focus on those relationships and activities within the SWDS.

Cooperation with the Statewide Workforce Development System (SWDS)

The SWDS of services are provided through the Division of Workforce Development’s (DWD) 14 workforce regions in Missouri. MVR is a key partner and works closely with the job centers to provide vocational rehabilitation services to eligible persons with disabilities. MVR has appointed a state liaison to collaborate with DWD, and MVR staff serves as active members on all 14 local Workforce Development Boards (WDBs). MVR district supervisors participated in the development of Memoranda of Understanding (MOUs) with all fourteen WDBs. These MOUs direct and explain how partners work together to deliver services to persons with disabilities in the local community.

Through the MOUs with job centers, MVR is the primary referral source from job center partners for people with disabilities. MVR counselors visit various Missouri Job Centers (both full service sites and satellites) frequently to provide services to consumers in a timely fashion. One Missouri Job Center location (where all partners, including MVR, are co-located) has an intra-building electronic linkage which has been effective.

MVR also provides ongoing cross-training and technical assistance to job center staff regarding rehabilitation technology and accommodations in the workplace. An MVR director works with partner agencies to facilitate collaboration with workforce development agencies and ensure that all federal regulations pertaining to Title IV of the Workforce Innovation and Opportunity Act are followed.

MVR has access to DWD’s statewide case management system. Many MVR counselors and business outreach specialists have been given access to this system known as Toolbox. This arrangement helps strengthen MVR’s and DWD’s partnership and improves the sharing of resources for individuals with disabilities.

Both MVR and DWD are using Missouri Connections as a vocational guidance tool for their clients. DWD and MVR have collaborated by integrating MVR offices into each of the 14 workforce regions and creating mutual login passwords to access Missouri Connections. This eliminates the duplication of clients’ records and allows for more efficient and effective services for mutual clients.

Public Institutions of Higher Education (IHE)

In collaboration with the Missouri Rehabilitation Services for the Blind, MVR has written cooperative agreements with all 34 public IHEs in Missouri. These agreements outline the responsibilities of each entity regarding the provision of services pursuant to the regulations specified in 34 CFR 361.53(d)(1).

Client Assistance Program (CAP)
MVR and CAP management staff meet on a quarterly basis to discuss important issues such as order of selection, new policies, best case practices, due process hearings and mediation, performance indicators, joint training activities and public hearings. The CAP is a frequent participant and presenter at MVR-sponsored training sessions. The director of advocacy services with Missouri Protection and Advocacy Services, which CAP is a part of, is a governor-appointed member of the State Rehabilitation Council and sits on the Council’s Planning Committee, which reviews the state plan, and also on the Impartial Hearing Officer and Program Evaluation Committees.

Missouri Department of Mental Health (DMH)

MVR has appointed a state liaison to collaborate with DMH and the governor’s office in a variety of projects and activities. The Missouri Developmental Disabilities Council has active and cooperative participation with MVR, DMH, the governor’s office and other agencies.

MVR has active participation in the following DMH programs:

• Division of Behavioral Health – Psychiatric Services State Advisory Council

• Division of Developmental Disabilities State Employment Leadership Network

• MVR/Division of Behavioral Health Individual Placement with Supports Evidence–Based Supported Employment Program implementation

• The Healthy Transitions Initiative (Transition Youth Behavioral Health)

• Show Me Careers: Missouri’s Transition to Employment Collaborative Grant (Transition Youth – Developmental Disability)

MVR is collaboratively funding Disability Benefits 101 with DMH’s Division of Behavioral Health Services.

Missouri Rehabilitation Services for the Blind

MVR and Missouri Rehabilitation Services for the Blind (RSB) have a cooperative agreement for serving individuals who are Deaf–blind. Individuals who meet the Helen Keller definition of Deaf–blind may receive services from both agencies. MVR and RSB staff participated in joint training to discuss the cooperative agreement and best case practices developed to outline coordination of services from both agencies. The cooperative agreement provides an opportunity for each agency to serve individuals with multiple disabilities by taking advantage of the skills and expertise within each agency, while at the same time, utilizing the resources of MVR and RSB to the best advantage.

Missouri Reentry Process

MVR participates in the Missouri Reentry Process, which encourages collaboration between state and local agencies to improve the transition of offenders leaving prison and returning to Missouri communities and work. State and local agencies include the Departments of Corrections, Mental Health, Revenue, Social Services, Economic Development, Public Safety, and Health and Senior Services; Elementary and Secondary Education; Missouri Board of Probation and Parole; and Office of the State Court Administrator. Local community representatives include law enforcement, the faith–based community, crime victims and service/treatment providers.
Centers for Independent Living (CILs)

There are 22 Independent Living Centers in Missouri. MVR and the CILs work together on a regular basis to routinely share referrals and provide services to mutual clientele. A number of the CILs have MVR district staff as active board members.

MVR continues to collaborate with the Statewide Independent Living Council (SILC) and the CILs to provide direct services to people with disabilities. The state plan developed by MVR and SILC details the tasks necessary to accomplish the delivery of independent living services that will assist consumers with disabilities to achieve their goals. MVR and SILC utilize an outcome-based measurement tool for the CILs. This tool measures consumer satisfaction using a telephone survey method rather than previously used mail-out surveys. MVR has also developed cross-trainings with the CILs to improve the provision of services. A transition toolkit was developed through the collaboration of MVR, the CILs and local education agencies.

U.S. Department of Veterans Affairs Compensated Work Therapy Program

MVR has a memorandum of understanding (MOU) with the U.S. Department of Veterans Affairs Compensated Work Therapy Program (CWT). MVR and CWT are mutually committed to promoting and enhancing competitive employment opportunities for veterans, enabling every individual to reach his or her life’s potential. MVR and CWT are prepared to work together in bringing enhanced employment opportunities to veterans with disabilities leading to greater individual and family economic stability and security.

2. State programs carried out under section 4 of the Assistive Technology Act of 1998;

MVR and Missouri Assistive Technology (MoAT) have collaborated to develop a cooperative agreement to ensure maximum statewide utilization of services. By establishing a cooperative relationship, MVR and MoAT can increase rehabilitation technology services utilization and understanding by taking advantage of the expertise and knowledge within each agency. The agreement provides a plan for the coordination of services; for using the resources of the cooperating agencies to the best advantage; to provide information sharing, technical support and training; to facilitate the referral of potential eligible persons between agencies; and to jointly serve eligible persons obtain rehabilitation technology services. A VR staff member is a representative on the MoAT Advisory Council.

3. Programs carried out by the Under Secretary for Rural Development of the United States Department of Agriculture;

MVR works closely with the U.S. Department of Agriculture–funded Agricultural Engineering Extension of the University of Missouri–Columbia (UMC) in the delivery of information and assistance for agricultural operators with disabilities.

MVR and the AgrAbility Project housed within UMC and the Brain Injury Association of Missouri has had a productive working relationship for more than ten years. The mutual goals of MVR and AgrAbility are a commitment of delivering vocational rehabilitation services, rehabilitation technology, information, education and a safe environment for farm operators with disabilities. Operating under an MOU, MVR and AgrAbility completed a fee–for–service plan for rehabilitation technology services.
MVR and AgrAbility staff set the following goals for future activities:

• Collaborate with the National AgrAbility Project on hosting joint training with partner agencies, MVR staff, CRP staff, consumers and AgrAbility staff.

• Participate in national conferences and forums on AgrAbility, MVR and rehabilitation technology services for rural agricultural services for eligible persons with disabilities.

4. Noneducational agencies serving out-of-school youth; and

MVR sponsors students with disabilities to participate in the Governor’s Council on Disability Missouri Youth Leadership Forum that focuses on leadership, citizenship, social and career development skills.

CRPs work with out-of-school youth in providing job development and placement services along with skills training.

MVR cooperates with the CILs in providing services for adults and students with disabilities. It coordinated summer work experience pilot projects with the CILs. The CIL Summer Pre-Employment Transition Services Pilot Projects provided potentially VR eligible students with disabilities access to job exploration activities, workplace readiness training and social support and self-advocacy, including peer mentoring.

5. State use contracting programs.

MVR does not participate in state–use contracting programs.

d. Coordination with Education Officials

Describe:

1. DSU’s plans

The designated State unit's plans, policies, and procedures for coordination with education officials to facilitate the transition of students with disabilities from school to the receipt of VR services, including pre-employment transition services, as well as procedures for the timely development and approval of individualized plans for employment for the students.

Transition services provide eligible or potentially eligible students with disabilities, the knowledge, skills and opportunities to make a successful transition to postsecondary education/training, independent living and competitive integrated employment based on their educational and career goals.

MVR, in collaboration with the Office of Special Education and local education agencies, will provide or arrange for the provision of pre-employment transition services in the areas of job exploration counseling, work-based-learning experiences, counseling on opportunities for post-secondary education/training, workplace readiness training, and self-advocacy, including peer mentoring, for all students in need of such services who are eligible or potentially eligible for VR services.
Each local MVR district office will also participate in pre–employment transition coordination with the local education agency to include attending IEP meetings when invited, using conference calls and video conferences, when necessary; working with local workforce development entities and employers to develop work opportunities for students with disabilities; coordinating pre–employment transition services with transition services provided in accordance with IDEA; and, when invited, attending person–centered planning meetings for youth receiving services under Title IX of the Social Security Act. To effectively coordinate these services, MVR:

- conducted statewide training to include guidance regarding IEP participation for all MVR staff that served students in Missouri high schools;
- worked in partnership with the Parent Advocacy Coalition Educational Rights Center to develop a video introducing VR services that can be shown at IEP meetings;
- conducted cross training on services to youth with local job center staff and MVR staff in Kansas City and St. Louis, the two largest metropolitan areas of the state;
- invited special education personnel to train new MVR counselors on transition services within the IEP;
- provided cross training with local CILs to include information regarding benefits planning; and
- is currently working in collaboration with DMH’s Division of Developmental Disabilities to provide cross training with MVR counselors and IDD case managers regarding their respective services.

To deliver pre–employment transition services, MVR developed two summer pilot projects, which include a six week paid summer work experience, one for VR eligible students with disabilities in partnership with CRPs and a pilot project with CILs for students with disabilities who are eligible or potentially eligible for VR. MVR collaborated with businesses and school districts to provide services in these pilot projects.

In addition, MVR is contracting with the Hook Center, a regional professional development center at the University of Missouri, to provide assistance with the provision of pre–employment transition services. The University hired 23 transition specialists located across the state, who are certified teachers and can go into the classroom, to collaborate with local education agencies and MVR to provide pre–employment transition services to students with disabilities who are potentially eligible for VR services.

MVR is also working with Wonderland Camp, an educational camp for children, teenagers and adults who have disabilities, to provide internship opportunities for both students and youth with disabilities. This past year, MVR sponsored students and youth with disabilities to participate in a week long Missouri Youth Leadership Forum, developed by the Governor’s Council on Disability, that focuses on leadership, citizenship, and social and career development skills. MVR is utilizing its business outreach specialists to work with employers on creating work experiences for youth and students with disabilities. And, it is collaborating with its WIOA partners in providing seamless, coordinated services to youth and students with disabilities.

MVR has a policy that outlines transition activities and services including the timely development and approval of an individualized plan for employment (IPE) for each eligible student prior to leaving high school. MVR will provide for the development of the IPE as early as possible during the transition planning process, but, at least, by the time the eligible student leaves the school setting. The IPE will include specific transition services or pre–employment transition services and supports needed for
an eligible student with a disability or a youth with a disability, including youth with the most significant disabilities, to achieve an employment outcome or projected post–school employment outcome. An IPE is required to be developed in consideration of the IEP of a student with a disability under IDEA or a student’s Section 504 services.

2. Information on the formal interagency agreement with the State educational agency with respect to:

A. consultation and technical assistance to assist educational agencies in planning for the transition of students with disabilities from school to post-school activities, including VR services;

The DESE Cooperative Agreement is a written agreement within the Department of Elementary and Secondary Education (DESE) between MVR and the Offices of Special Education and College and Career Readiness as well as Rehabilitation Services for the Blind (RSB). The purpose of this agreement is to facilitate the coordination of transition services from school to post–secondary training and/or employment for individuals with disabilities who are enrolled in secondary education and are/or may be eligible to receive vocational rehabilitation services. This agreement addresses the following:

(A) consultation and technical assistance;

(B) transition planning to include pre–employment transition services, focusing on competitive integrated employment outcomes;

(C) roles and responsibilities and financial obligations;

(D) outreach and identification; and

(E) work–based learning experiences to include programs like Project Search.

Special Education Advisory Panel

DESE appointed an advisory panel for the purpose of providing policy guidance with respect to special education and related services for youth and students with disabilities in the state. The advisory panel is appointed by the commissioner of DESE and includes MVR’s assistant director of Transition Services. Other members include:

• parents of children with disabilities (ages birth through 26)

• individuals with disabilities

• representatives of other state agencies involved in the purchase or delivery of related services

• administrators of programs for children with disabilities

• state agencies’ representatives who provide services to children with disabilities including welfare and juvenile corrections

• representatives of private schools and public charter schools
• vocational, community or business organizations

Missouri Connections

Missouri Connections is a web–based career exploration tool to assist Missourians in determining their career interests, explore employment opportunities, set up career plans and establish job search strategies and resources. Sponsored by DESE and the Department of Economic Development (DED), Missouri Connections is free of charge to students, parents, guidance counselors, educators and job seekers. Through Missouri Connections, DWD, Department of Higher Education, MVR and local school districts can utilize the same career planning tool with their clients/students. In addition to general career exploration/resource sharing, students/job seekers may also develop a career portfolio by creating a unique username/password that will allow them to login and save information regarding their specific career interests, job search, resume, etc. Students/job seekers who are receiving services through one or more of the above entities may also choose to share their login information thus eliminating the duplication of clients’ records and allowing for more efficient and effective services for mutual clients.

MVR Transition Ad–hoc Team

MVR’s assistant commissioner appointed an ad–hoc Transition Team, composed of MVR management and counselor staff as well as special education transition specialists and a representative from the CILs, to provide recommendations about transition–related activities and services for students and youth with disabilities. The team is involved with: coordinating joint statewide training activities for special educators, rehabilitation counselors, providers, and MPACT; developing strategies to better measure and increase overall success rates of students with disabilities receiving transition services; increasing the overall participation and employment outcome of students with disabilities in work experience programs; developing strategies for increasing student engagement and decreasing the dropout rate for students with disabilities from Missouri high schools; and developing strategies for outreach/improving transition outcomes for students from underserved populations.

Missouri Interagency Transition Team (MITT)

The MITT was formed through the Office of Special Education and includes members representing state–level agencies, including MVR, across Missouri who have an interest in improving post–secondary outcomes for youth with disabilities. The MITT meets to collaborate, break down service barriers, share resources, improve overall systems of service and improve data sharing among agencies.

The director of Transition Services works closely with other MVR management staff to disseminate information and provide technical assistance to improve transition services and outcomes in Missouri.

Missouri Parent Training and Information Center (MPACT)

MPACT is a statewide parent training and information center serving all disabilities. A representative of MVR’s supervisory staff is an active member of the MPACT Board. In addition, a representative of MPACT is a member of the State Rehabilitation Council. MVR and MPACT collaborate on projects to assist students and children with disabilities to reach their full potential.

Community Transition Teams (CTTs)
CTTs are developed and supported in Missouri to elevate community awareness of and commitment to the improvement of post-secondary outcomes of youth with disabilities. CTTs are trained on transition planning, services and effective practices as well as implementing a strategic plan for transition in their respective communities. There are 42 CTTs, and an MVR counselor is a required partner on each local CTT.

Project Search and Other Employer–Based Transition Training Programs

Project Search is a one–year, employer–led internship opportunity for VR eligible youth with cognitive/intellectual disabilities. It provides employability skills training and workplace internships for individuals with the most significant disabilities particularly students transitioning from high school to adult life. MVR is one of five required partners in the Project Search model. The other required partners are education, a Community Rehabilitation Program (CRP), a long–term provider (follow–along) and business. The first pilot Project Search site was in the St. Charles County School District. The Office of Special Education awarded funding for training and technical assistance to replicate the Project Search High School Transition Program in the following schools: St. Louis City Public Schools, KC North School District, Sedalia Smith Cotton High School, the Independence School District, and Jefferson City High School. In addition to the Project Search programs, MVR is partnering with the Special School District of St. Louis County, the Franklin County Cooperative, Windsor C–1 School District in Jefferson County, St. Mary’s Hospital in St. Louis and Mercy Hospitals in each of those counties to provide similar employer–based transition training programs prior to high school graduation for eligible students with most significant disabilities. MVR district offices and counselors that serve each of these schools serve on an executive management team. MVR has made a commitment to assist with referrals and partial funding for training for MVR eligible youth to participate in these programs. In addition, through the supported employment program model, MVR is also working in partnership with CRPs and two other school districts, in Rolla and Columbia, to provide services for youth with disabilities through their employer–led work experience programs.

Show Me Careers Grant – Missouri’s Transition to Employment Collaborative

The U.S. Department of Health and Human Services, Administration on Developmental Disabilities, awarded the Institute of Human Development, University of Missouri–Kansas City (UMKC), a “Partnerships in Employment Systems Change” grant to fund the Show Me Careers project. These funds are used to increase competitive employment outcomes for youth and young adults with developmental and intellectual disabilities and promote change efforts leading to the development of policies and practices that support competitive employment in integrated settings for youth and adults with developmental disabilities. The MVR director of Transition Services served as a lead consultant in the development of this grant. The MVR director of Transition Services, MVR director of Mental Health Services and the MVR director of Workforce Development, continue to actively serve on the Missouri Show Me Careers Leadership Consortium that will support a statewide structure through which to demonstrate evidence–based practices, revise and develop needed policies and practices, and enhance statewide collaborations.

In order to scale–up or enhance evidence–based practices that support seamless transition, eight Missouri Pilot Communities were chosen through a competitive application process to test ideas on how to bring real and lasting change in the area of transition. Pilot communities developed plans tailored to their local needs and available resources. Initially there were eight Pilot Communities selected to receive funding, coaching, leadership training and technical supports. The remaining seven are: Access II (Gallatin), L.I.F.E. (Farmington), Northeast Missouri (LOQW), Platte County, Show–Me–Columbia, St. Charles County and United Cerebral Palsy (St. Joseph).
Add Us In–Kansas City Grant

The Office of Disability Employment Policy awarded the Institute of Human Development, UMKC, a grant to improve employment opportunities for minority youth and enhance employer engagement. The MVR director of Transition Services served as a lead consultant in the development of this grant, and the Transition Services Kansas City MVR district supervisor continues to play an active role in the continuation and completion of grant activities. The overall goal of Add Us In–KC is “to provide a continuum of career opportunities for minority youth with disabilities within the greater Kansas City area through a business–led network that creates jobs and markets workforce training and services to prospective employers.”

B. transition planning by personnel of the designated State agency and educational agency that facilitates the development and implementation of their individualized education programs;

See Section (2)(A).

C. roles and responsibilities, including financial responsibilities, of each agency, including provisions for determining State lead agencies and qualified personnel responsible for transition services;

See Section (2)(A).

D. procedures for outreach to and identification of students with disabilities who need transition services.

See Section (2)(A).

e. Cooperative Agreements with Private Nonprofit Organizations

(Formerly known as Attachment 4.8(b)(3)). Describe the manner in which the designated State agency establishes cooperative agreements with private non-profit VR service providers.

MVR enters into cooperative written agreements with nonprofit, private CRPs to provide services on a fee–for–service basis to individuals with disabilities. MVR does not own or operate any of the programs. The CRP must be accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) or other approved accreditation entities as specified in the agreement. All CRPs must agree to the provisions of and sign the cooperative agreement with MVR prior to providing services to MVR consumers. CRPs provide services which may include job development, supported employment, employment skills training, employment services and employment transition services for individuals with disabilities. All CRP programs emphasize community integrated competitive employment.

MVR district offices meet with local CRPs to outline joint activities assisting mutual consumers in reaching employment outcomes. MVR and CRP staff offer input on service delivery processes and develop action plans to improve those processes. Other collaborative activities involve joint training programs.

Multiple ad hoc teams composed of MVR and CRP staff members work together developing new ideas and designing processes to successfully support and implement those new ideas. For
example, an ad hoc team focused on CRP staff training standards developed a recommendation for annual training requirements to be completed by CRP staff members. This recommendation has been successfully incorporated into the revised CRP–VR agreement.

Collaboration and partnership continue to be cornerstones of the relationship between VR and CRPs in Missouri and have created an environment of creativity and innovation. The CRP–MVR steering committee meets regularly to review progress on projects, service delivery and to discuss current and future issues warranting attention.

f. Arrangements and Cooperative Agreements for the Provision of Supported Employment Services

(Formerly known as Attachment 4.8(b)(4)). Describe the designated State agency’s efforts to identify and make arrangements, including entering into cooperative agreements, with other State agencies and other appropriate entities in order to provide supported employment services and extended employment services, as applicable, to individuals with the most significant disabilities, including youth with the most significant disabilities.

As indicated in section (e), MVR enters into cooperative written agreements with CRPs to provide services on a fee–for–service basis to individuals with disabilities, which includes youth with the most significant disabilities. Ad hoc teams composed of MVR and CRP staff members worked together developing new ideas and designing processes to successfully support and implement those new ideas. The CRP–MVR steering committee meets regularly to improve services and outcomes for individuals with disabilities who are receiving supported employment services. Through collaborative efforts, MVR and CRP partners have strengthened the requirements for CRP who want to provide Employment Services Plus in the areas of deaf/hard of hearing, brain injury, and/or autism spectrum disorder. Two MVR district offices and a CRP in Mid–Missouri began piloting a newly designed supported employment model for adults and youth diagnosed with autism spectrum disorder. Additionally, through collaborative efforts between CRPs and MVR, a successful pilot project which provided a six week work experience for students with disabilities was developed and completed during the summer of 2015. Through this pilot project, 143 students with disabilities were able to experience work in a competitive integrated environment.

The CRPs provide SE services, which may include:

• community–based assessments;

• job supports;

• survey of businesses and assurance of potential community–based exploration, assessment and work sites suited to the needs of the clients;

• analysis of all relevant job–related variables (e.g., transportation, job restructuring, tax credit for employers, etc.);

• provision of direct training at employment sites until employment standards have been achieved;

• development of an internal advocacy system;

• provision of long–term, extended services support with the individual or employer; and
• customized employment for individuals and employers.

g. Coordination with Employers

(Formerly known as Attachment 4.8(b)(5)). Describe how the designated State unit will work with employers to identify competitive integrated employment and career exploration opportunities in order to facilitate the provision of:

1. VR services; and

MVR continually reviews its strategies to develop new employer relationships and support those who employ persons with disabilities. Some of its flexible strategies include increasing work–based learning opportunities, on–the–job training, internships and customized employment.

MVR is reviewing its internal processes to work more effectively with employers and WIOA partners. MVR customizes its services to meet the needs of employers. It has several employer projects underway. MVR has recently partnered with Staples to customize an employment and training program in its distribution center. It is partnering with Toys R Us in providing similar customized services. MVR is also working with BJC Healthcare to assist in their recruitment and interview process for applicants with disabilities through the utilization of a resource called Talent Acquisition Portal (TAP). TAP is a collaboration with businesses to assist them in finding candidates with disabilities and connecting them with available job openings.

In order to meet business needs, MVR developed business outreach specialist positions that provide statewide coverage at local and state levels. Business outreach specialists work with labor market information to support both business and MVR staff needs. These specialists not only offer outreach to employers and businesses, they also work with WIOA partners to collaborate and create a single point of contact among agencies. MVR has representatives on regional WIOA business services teams. The teams will work with local Chambers of Commerce, local educational agencies, local and state economic developers, regional planning commissions, human resource groups and other business organizations to determine employer needs in workforce regions across the state.

MVR is involved in sector strategies planning at the local and state levels to address skills gaps and create career pathways to better serve employers with their individual needs and to provide them with prepared candidates. It has been forming employment collaboratives at the local levels to ensure employers receive the best possible delivery of services. MVR will work with businesses to ensure they have resources for necessary workplace accommodations and rehabilitation technology.

2. transition services, including pre-employment transition services, for students and youth with disabilities.

MVR is utilizing its business outreach specialists to work with employers on providing paid and unpaid work experiences for youth and students with disabilities. It has been coordinating with employers, school districts, CRPs and CILs to provide summer work experience pilot projects. MVR is also working with Wonderland Camp on an internship program. MVR will collaborate with the WIOA business services teams on developing opportunities for pre–employment transition services.

h. Interagency Cooperation
Describe how the designated State unit will collaborate with the State agency responsible for administering each of the following programs to develop opportunities for competitive integrated employment, to the greatest extent practicable:

1. the State Medicaid plan under title XIX of the Social Security Act;

MVR is in ongoing conversations with the Missouri State Medicaid Authority, Missouri Department of Social Services MOHealthNet Division, to update its current MOU to consider the requirements of WIOA. This includes coordination of employment activities with the Missouri Department of Mental Health (DMH) Division of Behavioral Health (DBH) and Division of Developmental Disabilities (DD), which serve individuals with mental illness, substance use disorders and intellectual disabilities provided under the Medicaid state plan and waivers.

2. the State agency responsible for providing services for individuals with developmental disabilities; and

MVR has an MOU with DMH, the state agency responsible for providing services for individuals with developmental disabilities and mental health services, which covers DMH's DBH and DD divisions. The agreement outlines the collaboration on existing services, alignment of funding sources, information and data sharing, referrals and on-going development of services.

DMH's DBH and MVR work together to increase access to evidence-based supported employment, also known as Individual Placement and Support (IPS), for adults with serious mental illnesses who are interested in improving their work lives. Missouri has 12 Community Mental Health/Treatment Centers (CMHCs) participating in this implementation collaborative. Ongoing technical assistance and fidelity reviews to the evidence-based practice are provided by a state trainer and a team consisting of MVR and DMH employees. The partnership between DMH and MVR includes a training format, offered to interested CMHCs statewide, on adopting IPS and on improving existing employment activities within treatment services. DMH and MVR are implementing IPS for youth with serious mental illnesses in one current site with more to come.

Additional partnering activities include the sponsoring of an employment summit with the Missouri Coalition for Community Behavioral Healthcare to facilitate clinical integration of behavioral health and community employment efforts and MVR’s and DMH–DBH’s co-funding of the customized Missouri benefits planning website DB101.

MVR has appointed a state liaison to collaborate with DMH and the governor’s office in a variety of projects and activities. MVR has active participation in many of DMH programs.

3. the State agency responsible for providing mental health services.

See Section (h)(2).

i. Comprehensive System of Personnel Development; Data System on Personnel and Personnel Development

(Formerly known as Attachment 4.10)). Describe the designated State agency's procedures and activities to establish and maintain a comprehensive system of personnel development designed to
ensure an adequate supply of qualified State rehabilitation professional and paraprofessional personnel for the designated State unit, including the following:

1. Data System on Personnel and Personnel Development

A. Qualified Personnel Needs.

Describe the development and maintenance of a system for collecting and analyzing on an annual basis data on qualified personnel needs with respect to:

i. the number of personnel who are employed by the State agency in the provision of VR services in relation to the number of individuals served, broken down by personnel category;

MVR developed a system of collecting and analyzing data annually to determine the needs of qualified personnel. This describes the data system on the following: personnel/personnel development; recruitment, preparation and retention of qualified personnel; standards; requirements for vocational rehabilitation counselor (VRC) positions; staff development activities; personnel to address individual communication needs; performance evaluation system; and coordination with personnel development under the Individuals with Disabilities Education Act (IDEA).

In FY2015, MVR received 13,687 new applications, developed 9,225 Individualized Plans for Employment (IPEs), placed 5,063 clients into successful employment outcomes and had 5,328 cases closed after eligibility but before services were received.

The VRCs, district supervisory positions and clerical staff are directly involved in providing services for individuals with disabilities (14 supervisors and assistant supervisors have a partial caseload). The number of individuals who had an open file with MVR as of September 30, 2015 was 14,077. The average number of cases per VRC is approximately 98 per counselor.

MVR’s management team reviews each vacancy to determine if the position should be filled, relocated or reclassified to a counselor position (if the position was a different one) based upon factors such as current need and expected population growth. The goal for MVR is to continually evaluate caseload sizes, office work load and staffing to maximize efficiency.

(i & ii) MVR is made up of the following sections: Disability Determination, Independent Living and Vocational Rehabilitation (VR). There are approximately 660 full-time employees in all three sections. This report will focus on the VR section. As of September 30, 2015, the breakdown of the MVR Client Services Section needed for service delivery is as follows:

144 Vocational Rehabilitation Counselors
8 Assistant Supervisors
24 District Supervisors (one also serves as regional manager, 14 have a partial caseload)
63 Clerical Support Staff Positions
Administrative Staff:
1 Assistant Commissioner
5 Coordinators (three are shared with all sections of MVR)

1 Field Operations Manager

6 Regional Managers

11 Program Directors (two are shared with all sections of MVR)

1 Human Resource Manager (shared with all sections of MVR)

5 Assistant Directors (three are shared with more than one section of MVR)

3 Supervisors (shared with all sections of MVR)

1 Human Resource/Payroll Benefit Specialist

5 Quality Assurance Specialists

2 Accounting Analysts

1 Executive Assistant

3 Administrative Assistants (two are shared with more than one section of MVR)

1 Procurement Specialist (shared with all sections of MVR)

1 Program Specialist

1 Billing Specialist

1 General Services Specialist

ii. the number of personnel currently needed by the State agency to provide VR services, broken down by personnel category; and

See Section (i)(1)(A)i

iii. projections of the number of personnel, broken down by personnel category, who will be needed by the State agency to provide VR services in 5 years based on projections of the number of individuals to be served, including individuals with significant disabilities, the number of personnel expected to retire or leave the field, and other relevant factors.

MVR anticipates approximately 13 VRCs per year will be needed to fill the vacancies from retirements, resignations, terminations, etc. The total VRCs needed for a five-year period is approximately 65. MVR estimates that 2 assistant supervisors, 12 district supervisors, 36 clerical support staff and 24 administrative staff may be needed over the next five years to fill vacancies due to turnover and retirements.

B. Personnel Development
Describe the development and maintenance of a system for collecting and analyzing on an annual basis data on personnel development with respect to:

i. a list of the institutions of higher education in the State that are preparing VR professionals, by type of program;

There is one graduate rehabilitation counselor training program in Missouri. Maryville University in St. Louis, a private institution, offers a master's level degree program in rehabilitation counseling. Graduates of this program are ready to take the Certified Rehabilitation Counselor (CRC) certification test and also the Licensed Professional Counselor (LPC) test upon graduation. Maryville University began offering a new program with a master's degree in rehabilitation counseling in September 1999. The program had 45 students enrolled in the fall 2015 semester, and 7 students are expected to graduate from Maryville University by summer 2016. MVR will continue to work closely with Maryville University to recruit and hire potential graduates of the program.

MVR is also working with other graduate counseling programs in Missouri and offers practicum or internship opportunities.

ii. the number of students enrolled at each of those institutions, broken down by type of program; and

See Section (i)(1)(B)(i).

iii. the number of students who graduated during the prior year from each of those institutions with certification or licensure, or with the credentials for certification or licensure, broken down by the personnel category for which they have received, or have the credentials to receive, certification or licensure.

See Section (i)(1)(B)(i).

2. Plan for Recruitment, Preparation and Retention of Qualified Personnel

Describe the development and implementation of a plan to address the current and projected needs for qualified personnel including, the coordination and facilitation of efforts between the designated State unit and institutions of higher education and professional associations to recruit, prepare, and retain personnel who are qualified, including personnel from minority backgrounds and personnel who are individuals with disabilities.

MVR works actively in recruiting new counselors with master's degrees in rehabilitation counseling or other related areas. As mentioned above, Missouri has one graduate level rehabilitation counseling program that, at this time, is not sufficient to produce the number of qualified rehabilitation professionals needed by MVR in all areas of the state. Even though graduate enrollment is high at Maryville University, many of the students are not willing to relocate from the St. Louis area. To address this issue, job announcements are sent to other institutions of higher learning that have rehabilitation counseling programs such as Southern Illinois University–Carbondale, Emporia State University, Arkansas State University, University of Arkansas, and Missouri universities that offer graduate–level counseling, social work and/or psychology programs.
MVR advertises all openings with the jobs.mo.gov web page and lists all openings on the agency’s website. Additionally, MVR advertises all openings on multiple online job search sites, including Indeed.com.

MVR sends all job announcements to its state’s historically black college, Lincoln University–Jefferson City, Missouri; as well as other historically black colleges such as Southern University–Baton Rouge, Louisiana; Fort Valley State College–Fort Valley, Georgia; and Mississippi State–Starkville, Mississippi.

MVR utilizes a diversity consultant to assist with ongoing staff development activities and outreach to underserved populations around the state. The consultant and the MVR Diversity Team work with MVR staff as well as CRP staff. The diversity consultant presented in–person training sessions for all staff in each of MVR’s 25 offices and in–person training to new counselors this past year.

At the end of FY2015, approximately 12% of all professional staff and 24% of support staff with MVR were persons from diverse backgrounds. MVR also actively recruits individuals with disabilities. District supervisors and VRCs in MVR district offices receive all VRC job notices. Other disability organizations, including CILs and CRPs, are consulted about recruiting persons with disabilities. At the end of FY2015, approximately 28% of all professional staff and 14% of support staff with MVR were persons with disabilities.

MVR continues to offer non–paid as well as paid graduate internships for potential employees. MVR also considers candidates who have completed their necessary coursework and need to complete their internship requirement for open positions with the agency. During FY2015, MVR provided two students with unpaid internships and practicum experiences to enable them to complete their graduate coursework. Those students will be considered for upcoming counselor vacancies.

MVR has a close working relationship with graduate rehabilitation counselor programs at Maryville University, University of Arkansas, University of Southern Illinois–Carbondale and Emporia State University. MVR representatives sit on the advisory councils of the above programs or make regular contacts and visits to recruit students from the above master’s level rehabilitation programs. Staff development needs and important future training/recruiting issues are discussed at these advisory meetings.

3. Personnel Standards

Describe the State agency’s policies and procedures for the establishment and maintenance of personnel standards consistent with section 101(a)(7)(B) and 34 CFR 361.18(c) to ensure that designated State unit professional and paraprofessional personnel are adequately trained and prepared, including:

A. standards that are consistent with any national or State-approved or -recognized certification, licensing, registration, or other comparable requirements that apply to the profession or discipline in which such personnel are providing VR services; and

MVR acknowledges the state code: 5 CSR 20–500.140 is the standard in Missouri for the highest degree required for VRCs.

The State of Missouri requires that a qualified VR counselor must have the following minimum qualifications:
• A master’s degree from an accredited college or university in rehabilitation counseling, guidance
and counseling, psychology, social work, or closely related field; and

• Fluency in American Sign Language or other appropriate mode of communication if the counselor
provides services to individuals who are Deaf or hard of hearing.

MVR is pleased that two VRCs completed CSPD requirements for their master’s degree in
counseling during FY2015. MVR has identified three VRCs who need supplemental coursework,
certification or licensure to meet the requirements for CFR 361.18 and RSMo 337. At the end of
FY2015, MVR had 142 VRCs who met the CSPD requirements. There are a total of 144 VR
counselors, some of which are part–time positions.

MVR continues to prioritize the CSPD funding of the VRCs mentioned above who are involved in
university coursework, certification (CRC) and licensure (LPC). MVR is committed to ensuring that
VRCs’ tuition, fees and books are funded to obtain necessary coursework to meet the above
requirements.

The human resource manager (HRM) for MVR develops an individualized plan with each newly
hired staff member to identify/evaluate specific staff development needs, required courses, available
resources and timelines necessary to achieve the standards in RSMo 337 or the appropriate CRC
requirement. The HRM also monitors each staff development plan to ensure that all objectives are
met. As necessary, the HRM consults with the state licensing boards and CRC officials. All staff is
required to submit updated transcripts to the HRM to ensure compliance with the objectives of the
standards.

The above plan is non–discriminatory and encourages the retraining and recruitment of persons with
disabilities and from diverse backgrounds.

Annually MVR reviews the performance evaluations for rehabilitation staff to determine if they are
consistent with the actual job functions, agency values and the Rehabilitation Act mandates. A part
of this evaluation assesses their levels of performance based on the RSA performance standards
and indicators.

B. the establishment and maintenance of education and experience requirements,
in accordance with section 101(a)(7)(B)(ii) of the Rehabilitation Act, to ensure that
the personnel have a 21st century understanding of the evolving labor force and
the needs of individuals with disabilities.

MVR continuously evaluates its hiring and training processes to ensure that staff has the education
and experience necessary to provide a 21st century understanding of the evolving labor force and
needs of persons with disabilities. As mentioned earlier, MVR uses the state code: 5 CSR 20–
500.140 as the standard in Missouri for the highest degree required for VRCs. This basic
educational requirement is enhanced with ongoing training for new and experienced counselors
focusing on business development/engagement and effective service delivery to persons with
disabilities.

Many newly hired VRCs have had experience working with a CRP partner providing direct
employment services to persons with disabilities. Other new VRCs have previous work experience
with an independent living center, job center or a community mental health agency. Paid or unpaid
work experience in helping persons with disabilities obtain and maintain employment is considered
valuable prior work experience.
MVR has a comprehensive professional development system that ensures that its personnel have an understanding of the medical and psychosocial aspects of a variety of disabilities. Initially, MVR strives to hire counselors who meet the state code: 5 CSR 20–500.140 and prior experience working with persons with disabilities. MVR augments that with professional development opportunities by providing training focused on specific disabilities. Additionally, MVR sends counselors to conferences that focus on specific disabilities such as the Missouri Brain Injury Association Conference. MVR has statewide and regional specialists that have had extensive training and experience in their area of expertise, e.g., business specialists, mental health, autism, assistive technology, AgrAbility, benefits planning, brain injury, hearing impairments, vision impairments, learning disabilities and self-employment. These specialists are available to provide direct assistance to clients as well as consultation with counselors. All counselors, regardless of their tenure, have the opportunity to work with a mentor who has expertise and experience in an area that is of interest to them.

MVR’s clients have repeatedly expressed the value of having a high quality rehabilitation counselor in reaching their employment goals. This input is gained through customer satisfaction surveys, individual letters and public hearings. In order to help counselors assess their client’s skills and abilities to obtain and retain employment, MVR has stressed the value of counseling skills. Counselors are encouraged to have a “tool bag” of skills. Primary in this tool bag is the ability to hear and understand clients’ goals, provide informed choice and address the specific barriers to successful employment. All professional MVR staff has been trained in Motivational Interviewing (MI), an evidence-based practice, which helps clients and counselors have constructive conversations that identifies their values and goals resulting in an individualized plan to reach their employment goal. Using MI, counselors and clients identify clients’ skills and abilities, the supports that they need to reach their goals, plan for setbacks and challenges, and how successful employment will affect their lives.

MVR has a multi-pronged approach to assist staff with modifying environmental and attitudinal barriers that clients face. Group training and individual assistance is provided to new and existing staff to effectively learn and perform their position. As mentioned earlier, MVR places a high value on the counseling skills of staff. All professional staff and many support staff have received four days of MI training. On–going MI training is available for all staff. MVR offers case management training to new counselors within the first six months of their employment. New counselors are also trained to learn to advocate and understand environmental and attitudinal barriers clients face. All counselors are encouraged to maximize resources by knowing and forming relationships with the varied resources in their territories. Many times these resources can provide assistance with environmental and attitudinal barriers. MVR recognizes the value of group trainings but also provides individual assistance to counselors through mentoring and coaching experiences.

Advances in rehabilitation technology are creating opportunities for clients. MVR has statewide and regional specialists who offer expertise in this area. These specialists will provide individual consultation and also help staff remain up–to–date with regional trainings. During FY2015, all counselors and supervisors received training on rehabilitation technology. Additionally, MVR utilizes Missouri Assistive Technology for consultation and training purposes.

MVR has been providing additional resources in developing effective relationships with employers in both the public and private sectors. MVR has a team of individuals whose primary responsibility is working with employers and assisting in connecting clients with potential employment. Additionally, all staff is trained and encouraged to develop relationships with businesses. MVR considers employers its partners and works toward helping them address their staffing needs.
MVR looks to the Missouri Economic Research and Information Center (MERIC) for local employment dynamics and labor market information. Job development and placement efforts utilize local level data to assist clients in making informed choices regarding their career goals, considering wages, turnover rates, current vacancies and areas of job creation. MERIC has provided training to MVR staff to aid them in using their website with clients.

4. Staff Development.

Describe the State agency's policies, procedures, and activities to ensure that, consistent with section101(a)(7)(C) of the Rehabilitation Act, all personnel employed by the designated State unit receive appropriate and adequate training in terms of:

A. System of staff development

A system of staff development for professionals and paraprofessionals within the designated State unit, particularly with respect to assessment, vocational counseling, job placement, and rehabilitation technology, including training implemented in coordination with entities carrying out State programs under section 4 of the Assistive Technology Act of 1998; and

MVR has a comprehensive program for in–service training and staff development for all positions. Staff at all levels will attend training in new employee orientation, cultural diversity training, sexual harassment prevention and customer service. Supervisory staff and upper management personnel are required to attend training in leadership, supervision, interviewing and other training offered through the state or other private sources. MVR is invested in its leadership training program for supervisors and emerging MVR leaders. MVR also contracts with the Missouri Training Institute to provide leadership training presentations to supervisory and management staff. Many MVR employees have graduated from, and some are currently participating in, the National Rehabilitation Leadership Institute. MVR utilizes an internal training consultant who assists in leadership training.

All new counselor and paraprofessional staff, together with their district supervisor, completes the New Counselor Training Manual or New Administrative Staff Training Manual, which assists in the development and understanding of the rehabilitation field and the agency's goals, priorities and responsibilities in serving individuals with disabilities under the federal/state VR program. MVR gathers ad hoc teams to address and evaluate specific staff development needs including topics such as leadership development, training manuals, new counselor orientations, and MI.

In addition to New Employee Orientation, new counseling staff receives training specific to vocational counseling/career development, job development/job placement, vocational services, and case management techniques from MVR staff.

MVR supports staff attendance on an annual basis to the Power–Up Conference, which promotes the use and understanding of assistive technology and rehabilitation technology services and resources across the state. This conference is sponsored by the Missouri Assistive Technology Project. MVR has an ad hoc assistive technology team, which assists the agency in staff development activities for assistive technology.

MVR supports staff attendance at the National AgrAbility Conference. Additionally, statewide training has been provided on services and technology supports for agricultural careers.

Staff development needs are established in a number of ways. A survey of training needs is administered annually to all counseling and paraprofessional staff to ascertain the needs and
interests of all MVR staff. MVR also monitors employee performance and has incorporated RSA standards and indicators into staff evaluations. Other methods to determine staff development needs are: quality assurance reviews, evaluation of consumer satisfaction studies, feedback and recommendations from the State Rehabilitation Council and Individual Staff Development/Leadership Plans.

Results of the training needs survey are shared with members of the administrative team and regional managers. MVR works to provide training in a variety of ways to accommodate staff needs. Staff members regularly participate in both in–person and web–based trainings.

The nature and scope of the staff development program is tied to MVR’s overall goals and priorities. MVR is committed to improving staff competencies to ensure that the Rehabilitation Act, as amended, will be fully implemented and the philosophy embraced. MVR training supports the goals and priorities that have been established in the comprehensive statewide needs assessment.

MVR just completed the fifth year of a five–year grant from RSA for in–service training to assist with staff development. The following are the goals under this grant, which are supportive of MVR’s goals and priorities:

1. Effective recruitment and retention of qualified rehabilitation professionals
2. Effective succession planning
3. Effective leadership development and capacity building

**B. Acquisition and dissemination of significant knowledge**

procedures for the acquisition and dissemination of significant knowledge from research and other sources to designated State unit professionals and paraprofessionals.

MVR continues to participate and has collaborative relationships with research programs and partner agencies.

Other training areas which MVR frequently sponsors or staff participates in are:

• Motivational Interviewing
• Legal and Ethical Issues in Rehabilitation
• Medical and Psychological Aspects of Disability
• Autism Spectrum Disorders
• Vocational Counseling/Assessment
• Americans with Disabilities Act
• Informed Choice
• Social Security Work Incentive Programs, including Ticket to Work
MVR is involved in a variety of activities to recruit and retain qualified rehabilitation personnel. Recruitment efforts are focused in part on maintaining good relationships with colleges and universities that offer degrees that meet state rule. Additionally, MVR staff sits on their advisory boards, attend career fairs, serve as guest speakers and MVR offers internship opportunities. MVR provides a career ladder for counselors rewarding their success and tenure. MVR has a succession plan team who visited each office during FY2015. This team has shared data related to past turnover and projected turnover (due only to retirement). The team has also shared ways in which any individual staff could enhance their leadership competencies. These office visits were intended to provide informed choice on future leadership opportunities and transparency about the competencies needed to be promoted. Leadership development and capacity building is encouraged statewide through optional trainings, the Emerging Leaders program, guidance from the MVR director of leadership, annual Individual Staff Development and Leadership Plans, tuition reimbursement, team membership and others. MVR encourages each staff member to view themselves as a leader in their current role.

5. Personnel to Address Individual Communication Needs

Describe how the designated State unit has personnel or obtains the services of other individuals who are able to communicate in appropriate modes of communication with or in the native language of applicants or eligible individuals who have limited English speaking ability.

MVR employs seven vocational rehabilitation counselors for the deaf (VRCDs) located throughout Missouri who are skilled in manual communication for the deaf and hearing impaired. Each year, they gather for training to discuss services and meet with students at the Missouri School for the Deaf. MVR sends representatives to the Missouri Association for the Deaf Biannual Conference. Five of the VRCDs are deaf or hard of hearing. Each of these counselors met CSPD requirements. One of the district office supervisors is also Deaf/hearing impaired. MVR has three additional counselors who assist this team and have specialized training in this area.
MVR staff work with several assistive technology projects, located at various Centers for Independent Living in the state, which have demonstration centers for exploring, reviewing and demonstrating various assistive technology devices, services and resources that are available to individuals with alternative communication needs. The agency has developed an ad hoc assistive technology team and has identified two assistive technology specialists to assist staff with any assistive technology–related needs regarding services for individuals with disabilities.

Applicants and eligible individuals who have limited English–speaking skills are provided interpreters funded by MVR. All brochures and many forms are translated into Spanish so that individuals and families who speak Spanish have access to information in their native language. At this time, MVR has a counselor who is fluent in Spanish in Cape Girardeau. This counselor has assisted with staff development and Hispanic liaison activities. MVR also has staff bilingual in Japanese and Romanian. The state has a contract with an over–the–telephone foreign language interpretation service, which MVR has utilized upon occasion for translation.

6. Coordination of Personnel Development Under the Individuals with Disabilities Education Act

As appropriate, describe the procedures and activities to coordinate the designated State unit’s comprehensive system of personnel development with personnel development under the Individuals with Disabilities Education Act.

MVR works closely with the Office of Special Education and school districts to coordinate staff development activities and services for students with disabilities.

During FY2015, the Transition Team, composed of MVR staff and special education personnel from both the state and local level, focused on participation in special education transition–related trainings/professional development activities. Examples of these activities include attendance and presentations at the DESE Summer Transition Institute, attendance at the Missouri Department of Higher Education 2015 Fall Workshop and attendance at the Missouri School Counselor Association Conference.

The Cooperative Work Experience Program (COOP) agreement is an interagency state and local program between the Department of Elementary and Secondary Education (Special Education, MVR and Career Education); Rehabilitation Services for the Blind (RSB); and local school districts in the state of Missouri. The agreement is embedded in the state transition MOU and is available for all school districts. The purpose is to facilitate the coordination of transition services from school to post–secondary training and/or employment for students with disabilities who participate in special education programs and are eligible to receive vocational rehabilitation services. The MOU outlines roles and responsibilities among participating agencies and school districts in the development of off–campus work experience programs. Through these programs, students with disabilities who are receiving services through an IEP can earn high school credit in accordance with Missouri high school graduation requirements for the number of hours they work in a paid competitive, integrated employment setting. Additionally, MVR continues to work collaboratively with providers and local school districts to meet transition needs of students. In FY2015, of all the eligible youth with disabilities who received MVR services and exited the program, 1,753 obtained a successful employment outcome.

MVR, the Office of Special Education, school personnel and CRP staff are involved in partnership activities, joint training and technical assistance activities. The director of Transition Services is a member of the Missouri Interagency Transition Team. The assistant director is an active member of
the state’s Special Education Advisory Panel and an active member of the MPACT Board. MPACT is a statewide parent training and information center serving all disabilities.

State Rehabilitation Council: The State Rehabilitation Council reviews and comments on the development of the CSPD plan and related policies.

j. Statewide Assessment

(Formerly known as Attachment 4.11(a)).

1. Provide an assessment of the rehabilitation needs of individuals with disabilities residing within the State, particularly the VR services needs of those:

A. with the most significant disabilities, including their need for supported employment services;

MVR and the State Rehabilitation Council (SRC) jointly conduct a comprehensive, statewide assessment of the rehabilitation needs of Missourians with disabilities, annually over a three–year period. MVR submits the results of the needs assessment to the Rehabilitation Services Administration on an annual basis. This attachment pertains to the third of a three–year statewide assessment period and illustrates all areas of need. The conclusions and recommendations of these assessments are incorporated into MVR’s goals and priorities for the purpose of improving services to individuals with disabilities.

MVR uses a mixed methods approach to collect, in aggregate, qualitative and quantitative information on the rehabilitation needs of Missouri individuals with disabilities. Information resources include:

a. Consumer Satisfaction Surveys

MVR routinely surveys a random sample of clients throughout various stages of open cases and case closures to obtain feedback on MVR services and to determine how to better serve the needs of individuals with disabilities.

b. Public Hearings

Annually, MVR conducts public hearings throughout the state to obtain input on the state plan, its key goals and priorities, plan changes and any other topic related to MVR services. In FY2015, MVR and the SRC jointly held public hearings in Cape Girardeau, Columbia, Jefferson City, Kansas City, Springfield and St. Louis, Mo.

c. Input from the State Rehabilitation Council

During quarterly meetings, the SRC provides input to MVR on the rehabilitation needs of individuals with disabilities.

d. Strategic Teams
MVR utilizes both ad hoc and on-going teams, such as the CRP–MVR steering committee team, Transition Team, and Cultural Diversity Team, to gather data from its partners, school districts and underserved individuals with disabilities.

e. Analysis of Standards and Indicators

On a quarterly basis, MVR management reviews data to ensure the standards and indicators are being met or exceeded. The SRC annually reviews and analyzes this information with MVR.

f. During FY2011, MVR conducted a telephone survey of randomly–selected closed cases prior to IPE to identify how well their needs were met. MVR is still using data collected with this tool.

g. MVR used an online questionnaire to survey its staff in FY2011 on the rehabilitation needs of Missourians with disabilities and continues to use the results in its decision–making processes along with feedback from its annual training needs assessment.

Additional resources include:

• quality assurance case reviews

• quarterly reviews of case management data

• census data annually or as data is available

• data from the American Community Survey

• data from other state and federal agencies

• data from state and community boards and commissions

• due process hearings and mediations—annually MVR analyzes feedback from hearings

• literature reviews

Feedback from the public hearings cited that a lack of transportation was a barrier to services. MVR will review this issue for possible resolutions. The need for transition services was a common theme throughout the hearings. This need is addressed in this assessment.

The following is a summary of the comprehensive statewide assessment results in response to the rehabilitation needs of individuals with disabilities in Missouri, particularly the VR service needs of:

(A) individuals with the most significant disabilities (MSD) including their need for supported employment (SE) services

Based on MVR data from the last three years, the projected number of eligible individuals with MSD who will receive MVR services in FY2017 will be approximately 14,000. Of that number, approximately 5,200 individuals will need SE services.

From the comprehensive statewide assessment, MVR identified the following services as necessary to meet the key needs of the MSD:
• SE Services — The nature of the service itself requires intensive one–on–one job training. Services are provided by CRPs and include job development, job coaching, natural supports, task analysis and assessment, counseling and advocacy services and customized employment. Usually, SE services will not exceed nine months, but MVR can provide up to 24 months of community–based job training.

• Assistive Technology and Rehabilitation Engineering Services — Services include assessment and recommendations for accommodations, assistive devices and assistive technology necessary to improve the quality of work and/or increase work productivity. Services are usually provided over a four–week period by accredited CRPs and qualified rehabilitation engineers.

• Self–Employment Services — Individuals with MSD will need assistance in setting up approved business plans for self–employment. These services may include required business equipment, various supplies, rental fees or start–up costs for the plan. Services will be provided by MVR counselors and business consultants as needed.

B. who are minorities;

(B & C) individuals with disabilities who are minorities and individuals who have been unserved or underserved by the VR program

An analysis of the comprehensive statewide assessment revealed that other than when individuals are placed on a waiting list, there are no populations in Missouri that are unserved. MVR counselors refer any individuals on a waiting list to Missouri Job Centers and other resources to assist with employment, housing, food and clothing needs.

The needs assessment identified underserved individuals with disabilities as minority populations of Hispanics and African–Americans, individuals with autism spectrum disorders (ASD) and individuals with traumatic brain injury (TBI).

Hispanic Population:

Based on MVR data from the last three years, the projected number of eligible individuals with disabilities who are Hispanic that will receive MVR services in FY2017 will be approximately 400. After analyzing data from the census and the American Community Survey, MVR feels these individuals are significantly underserved when compared to the total number of Hispanics with disabilities in Missouri.

From the comprehensive needs assessment, MVR identified the following services as necessary to meet the key needs of Missouri’s Hispanic population with disabilities:

• Interpreter Services — These services depend upon the specific needs of clients and are provided by MVR’s bilingual MVR staff and state–contracted interpreters. The duration of interpreter services mirrors the length of other services.

• Translated Forms — Many of MVR’s translated forms and brochures are now available in offices and on the MVR website.

• Job Placement Services — Services involve specialists who identify and cultivate job placement possibilities in the community. These services offer short–term follow–up support and can last between three and nine months. MVR counselors and CRPs provide job placement services.
• SE Services (see description above)

• Assistive Technology and Rehabilitation Engineering Services (see description above) In addition, MVR has a diversity consultant who provides cultural diversity training to all MVR staff. The consultant delivers training specific to each office’s population area and assists with developing office plans to address diversity.

African–American Population:

Based on MVR data from the last three years, the projected number of eligible individuals with disabilities that are African–American who will receive MVR services in FY2017 will be approximately 5,800. MVR data reveals that, as a percentage, there are fewer Caucasians dropping from services than African–Americans; therefore, a percentage of African–Americans receiving services are underserved. In addition, MVR reviewed data from the census and the American Community Survey and feels these individuals are underserved when compared to the total number of African–Americans with disabilities in Missouri.

From the comprehensive needs assessment, MVR identified the following services as necessary to meet the key needs of Missouri’s African–American population with disabilities:

• Follow–Up Services — MVR established the need for follow–up services for individuals at risk of dropping out of services. Key MVR staff, MVR intake counselors and CRPs assist with follow–up services and activities. Clients are contacted to uncover reasons for leaving or barriers to receiving services. Key MVR personnel and CRP staff work with community resources to alleviate any barriers. These follow–up services are implemented before clients’ cases are closed and can last between three and nine months. In addition, MVR has a diversity consultant who provides cultural diversity training to MVR staff.

Autism Spectrum Disorders (ASD):

Based on MVR data from the last three years, the projected number of eligible individuals with ASD who will receive MVR services in FY2017 will be approximately 1,300. Other variables could have an effect on this estimate such as the economy and the number of applicants coming into the system. MVR reviewed information and recommendations from the Centers for Disease Control (CDC); the National Autism Society; NAMI; 2014 newspaper report, MO to “Light It Up Blue” for Autism; the “Fact Sheet on Autism Employment,” by Scott Standifer, PhD.; and MVR data. Based on this information and additional research, MVR concludes these individuals are underserved.

From the comprehensive statewide assessment, MVR identified the following services as necessary to meet the key needs of individuals with ASD:

• SE Services (see description above)

• Assistive Technology and Rehabilitation Engineering Services (see description above)

• Job Placement Services (see description above)

• Transition Services — Transition services assist eligible students and youth with disabilities to successfully prepare them for transitioning into post–secondary education, vocational training or integrated employment. Services can be provided by MVR and coordinated with the Office of Special Education, local school districts and CRPs. Services are provided for the duration of the case.
• Workplace Modifications — Individuals with ASD may experience difficulties in modulating sensory input. Environmental assessments can be provided to identify distractions such as noise levels, lighting, high traffic areas, etc. Services are provided by CRPs and can overlap SE services usually lasting nine months, but MVR can provide up to 24 months of community–based job training.

• Employment Services Plus (ESP) — ESP is designed to assist an individual with Autism Spectrum Disorder – Adult (ASD–A), Brain Injury (BI), and/or Cultural Deafness/Hard of Hearing (D/HH) who has barriers that require additional supports to achieve a successful employment outcome. ESP provides augmentative services for clients whose disability–related needs exceed the level of support provided by traditional vocational rehabilitation services but does not merit consideration of SE services.

• Other training appropriate to need such as vocational technical school, community college or college.

Traumatic Brain Injury (TBI):

Based on MVR data from the last three years, the projected number of eligible individuals with TBI who will receive MVR services in FY2017 will be close to 400. MVR reviewed data from the CDC, the Missouri Department of Health and Senior Services, the Brain Injury Associations of America and Missouri, “2011 Missouri Traumatic Brain Injury Needs Assessment Report,” by the Missouri Department of Health and Senior Services and the University of Missouri Kansas City–Institute for Human Development, and data from brainline.org. Research revealed that Missourians with TBI exceed 13,000. Based on this information and the number of clients with TBI, MVR concludes these individuals are underserved.

From the comprehensive statewide assessment, MVR identified the following services as necessary to meet the key needs of individuals with TBI:

• SE Services (see description above)

• Job Placement Services (see description above)

• Assistive Technology and Rehabilitation Engineering Services (see description above)

• Transition Services (see description above) (data indicated that one of the highest risk groups for TBI was ages 15 to 24)

• ESP Services (see description above)

C. who have been unserved or underserved by the VR program;

See Section (j)(1)(B).

D. who have been served through other components of the statewide workforce development system; and

Based on information from the Missouri Division of Workforce Development, the projected number of individuals with disabilities that will be served through Missouri’s workforce development system for FY2017 is 11,698.
From the comprehensive needs assessment, MVR identified the following services as necessary to meet the key needs of individuals with disabilities served through other components of the statewide workforce development system:

• job search assistance
• labor market information
• resume assistance
• case management
• assessment
• individual planning and referral
• educational attainment
• skills development and training
• computer skills training
• transportation assistance

Individuals providing the services are representatives from the Division of Workforce Development and other Workforce Innovation and Opportunity Act program partners.

E. who are youth with disabilities and students with disabilities, including, as appropriate, their need for pre-employment transition services or other transition services.

In assessing the needs of youth and students with disabilities, research from the National Center on Secondary Education and Transition documents unsatisfactory outcomes achieved by youth with disabilities exiting school. They have difficulty accessing employment, education and community services. There is a need to bridge the information gap between schools, rehabilitation services, community agencies and employers.

Based on December 2015 core data from the Missouri Department of Elementary and Secondary (DESE) Office of Special Education, the number of students, ages 16 to 21, with individualized education plans (IEPs) is 20,816. This number represents students with disabilities who are eligible or potentially eligible for pre-employment transition services or other transition services. MVR further disaggregated this data by MVR district office so that school districts were grouped together based on the MVR office that serves each school. Therefore, the local MVR office knows the specific number of students, ages 16 to 21 with IEPs, for each of the schools that they serve.

MVR has received feedback from many stakeholders such as consumers, parents, school districts and employers regarding the need for services for youth and students with disabilities. There are limited competitive integrated employment opportunities for this population especially in rural areas.
MVR is answering these pre-employment transition needs of eligible or potentially eligible students with multiple strategies that supplement the VR transition services that have traditionally been provided by its staff and partners. These strategies include summer work experience pilot projects coordinated with CRPs and pilot projects with CILs. The VR Summer Work Experience Pilot Project was developed in partnership with CRPs. MVR offered paid summer work experience opportunities in integrated settings for VR eligible students with disabilities. In addition to working, the students received classroom training in soft skills. The CIL Summer Pre-Employment Transition Services Pilot Project provided potentially VR eligible students with disabilities access to job exploration activities, workplace readiness training, social support and instruction on self-advocacy including peer mentoring. MVR collaborated with businesses and school districts to provide services in these pilot programs.

MVR is contracting with the Hook Center at the University of Missouri to provide assistance with the provision of pre-employment transition services through regional pre-employment specialists. The University hired 23 specialists, all certified teachers, to work in collaboration with local education agencies and MVR to provide statewide pre-employment transition services to students with disabilities who are potentially eligible for VR services.

MVR is also working with Wonderland Camp on an internship program for both students and youth with disabilities. This past year, MVR sponsored students and youth with disabilities to participate in the Governor’s Council on Disability Missouri Youth Leadership Forum that focuses on leadership, citizenship, and social and career development skills. MVR is utilizing its business outreach specialists to work with employers on creating work experiences for youth and students with disabilities. And, it is collaborating with its WIOA partners in providing seamless, coordinated services to youth and students with disabilities.

2. Identify the need to establish, develop, or improve community rehabilitation programs within the State; and

a) Establish new CRPs: MVR does not believe that there is a need to establish new CRPs.

b) Expand/develop current network of CRPs: No, MVR does not believe that there is a need to expand or develop the current network of CRPs.

c) Improve CRPs: Yes, MVR has identified the following strategies to improve CRPs within the state:

• The CRP–MVR steering committee will continue to make recommendations to improve services.

• Minimum training requirements for CRP staff members have been developed and incorporated into the CRP–MVR Agreement. The CRP–MVR steering committee will monitor implementation of these new requirements and make recommendations as necessary.

3. Include an assessment of the needs of individuals with disabilities for transition career services and pre-employment transition services, and the extent to which such services are coordinated with transition services provided under the Individuals with Disabilities Education Act.

Research verifies that pathways from school to work or secondary to post-secondary education can be more difficult for individuals with disabilities therefore the need for transition career services and pre-employment transition services is great.
DESE reports that for 2013–2014 school year, the percent of youth who had IEPs, are no longer in secondary school and who have been:

- enrolled in higher education is 29.13%.

- enrolled in higher education or competitively employed is 55.62%.

This data indicates that over half of students with IEPs are successfully transitioning indicating a need for services.

In 2013, MVR surveyed staff statewide to gather information on practices and services for youth with disabilities. Among the findings, staff reported that some of the barriers that youth with disabilities face in obtaining successful employment is a lack of work exposure or work experiences. A need for widespread education regarding VR services for school staff, students and interested parties was also indicated.

Feedback has shown that not all school districts are open to promoting transition services. MVR is utilizing its transition counselors to forge inroads with school districts statewide. Additional strategies include an MVR–developed YouTube video, which can be shared with parents and students before, during or after IEP meetings. MVR counselors are present at IEP meetings when invited in order to coordinate services that are a part of the VR individualized plan for employment (IPE). MVR conducted a statewide training for MVR staff on outreach, joint service provision and coordination of IEP/IPE services. New MVR counselor training includes a special education transition coordinator who provides training on IEP development and transition services. The DESE Graduation Handbook and DESE Transition Agreement include three work–based learning experiences for students with disabilities on an IEP and are coordinated with special education. Students receive high school credit. These three experiences are the COOP Program, employer–based transition training/Project Search for students with most significant disabilities, and unpaid internships.

**k. Annual Estimates**

(Formerly known as Attachment 4.11(b)). Describe:

1. **The number of individuals in the State who are eligible for services;**

   The number of individuals in the MVR program who were eligible for services as of September 30, 2015 was 14,077.

2. **The number of eligible individuals who will receive services under:**

   **A. The VR Program;**

   The estimated number of eligible individuals who will receive services in FY2017 under the MVR program is 24,300 and the Supported Employment Program is 5,200 for a total of 29,500.

   **B. The Supported Employment Program; and**

   See Section (k)(2)(A).
C. each priority category, if under an order of selection;

The estimated number of eligible individuals who will receive services under each priority category is as follows:

Estimated number to be served under Priority Category 1: 14,000; Priority Category 2: 15,000; Priority Category 3: 500

3. The number of individuals who are eligible for VR services, but are not receiving such services due to an order of selection; and

The number of individuals who are eligible for VR services but are not receiving such services due to an order of selection is currently zero.

4. The cost of services for the number of individuals estimated to be eligible for services. If under an order of selection, identify the cost of services for each priority category.

The estimated cost in FY2017 for serving the above eligible individuals in the VR and supported employment programs will be approximately $71,525,000. As described in section (m), Order of Selection, of the VR services portion of this state plan, MVR is currently in an order of selection. The estimated cost of services for each priority category is as follows:

Priority Category 1: $2,464; Priority Category 2: $2,367; Priority Category 3: $3,050

I. State Goals and Priorities

The designated State unit must:

1. Identify if the goals and priorities were jointly developed

Identify if the goals and priorities were jointly developed and agreed to by the State VR agency and the State Rehabilitation Council, if the State has a Council, and jointly agreed to any revisions.

MVR’s goals and priorities for FY2017 were jointly developed and agreed upon by MVR and the SRC, as described in section (a), Input of the State Rehabilitation Council, of the VR services portion of this state plan.

2. Identify the goals and priorities in carrying out the VR and Supported Employment programs.

The following FY2017 goals and priorities for MVR are as follows:

Goal 1: Increase the number of employment outcomes for youth with disabilities.

Baseline data: The number of youth with disabilities reaching competitive integrated employment in FY2012 was 1,556.
Objective 1:

Increase the number of competitive integrated employment outcomes for youth with disabilities.

Strategies

1. Develop joint training activities with MVR, school and CRP staff. Training will be focused on improving services and outcomes for students with disabilities.

2. Expand pre–employment transition services statewide.

3. Coordinate services with Workforce Development programs that target youth.

4. Expand individualized placement services to target youth with disabilities receiving services from the Department of Mental Health.

5. Provide opportunities for youth in identified workforce job–driven training programs and STEM degree/certificate programs.

Goal 2: Increase competitive integrated employment outcomes for individuals with autism spectrum disorder (ASD).

Baseline: The number of competitive integrated employment outcomes in FY2012 for individuals with ASD was 136.

Objective 1:

Increase competitive integrated employment outcomes for individuals with ASD.

Strategies

1. Develop and maintain close working relationships with state and local partners (e.g., Department of Mental Health, WIOA partners, Independent Living Centers, CRPs, etc.) to maximize resources and develop appropriate services and support systems.

2. Coordinate joint training activities for MVR counselors and direct services CRP staff to improve services and outcomes for clients with ASD.

3. Develop capacity of regional specialists.

4. Expand specialized employment services for individuals with ASD.

Goal 3: Expand services for individuals with severe and persistent mental illness receiving Individual Placement and Support (IPS) services.

Baseline data: At the end of FY2013, the number of individuals with severe and persistent mental illness receiving IPS service authorizations (open/closed) was 707.

Objective 1:
Increase the number of individuals receiving IPS services.

Strategies

1. Training staff on IPS evidence–based practices.

2. Training staff using Motivational Interviewing.

3. Collaborate with the Department of Mental Health Behavioral Health Division on the implementation of evidence–based practices.

4. Increase the number and service capacity of IPS providers in the state.

5. Explore integration of evidence–based practices/fidelity into other CRP/MVR services.

6. Expand services to include youth with disabilities.

3. Ensure that the goals and priorities are based on an analysis of the following areas:

As noted above, MVR and the SRC jointly developed the FY2017 goals and priorities, which were based on an analysis of the FY2015 comprehensive statewide needs assessment (CSNA), a review of the new performance accountability measures and other input from stakeholders and resources. The CSNA was expanded to include an assessment of the needs of students and youth with disabilities. In determining goals and priorities, MVR reviewed its past performance on the standards and indicators in relation to its upcoming performance based on the new performance accountability measures. Other input was considered as well in the development of the goals and priorities as listed in section 3.C. below.

A. The most recent comprehensive statewide assessment, including any updates;

In developing its goals and priorities, MVR analyzed information and results obtained from the most recent comprehensive statewide needs assessment from FY2015, which can be found in section (j) Statewide Assessment. The CSNA revealed that youth with disabilities need guidance with job exploration, work-based learning experiences, exploring opportunities for enrollment in comprehensive or post-secondary educational programs, workplace readiness training and instruction in self-advocacy. Findings indicate that this population has difficulty accessing employment, education and community services, and that youth need to develop the skills necessary to prepare for, obtain, retain or advance in competitive, integrated employment. MVR has made it a priority to improve outcomes for youth with disabilities as evidenced in the setting of goals and objectives in previous and its current state plan. Likewise, MVR has set goals and priorities to increase the number of individuals receiving IPS services, which includes youth with disabilities.

The CSNA also indicated that individuals with ASD were an underserved population. For several years, including this year, MVR has made the improvement of outcomes for this population a goal in its state plan. Several strategies have been developed to achieve success in increasing the competitive, integrated employment outcomes for individuals with ASD.

B. the State's performance under the performance accountability measures of section 116 of WIOA; and
Missouri’s anticipated performance under the new performance accountability measures of section 116 of WIOA. MVR met all required federal performance indicators during the past two years. MVR will apply the same quality of service utilized in meeting those indicators to achieve the new performance measures and provide the same level of quality while moving forward.

C. other available information on the operation and effectiveness of the VR program, including any reports received from the State Rehabilitation Council and finding and recommendations from monitoring activities conducted under section 107.

Other available information on the operation and effectiveness of the VR program utilized in the development of the goals and priorities are:

• State Rehabilitation Council (SRC) input and recommendations

• RSA monitoring feedback from the Section 107 Monitoring Review

• performance on standards and indicators

• other sources, e.g., CRPs’ legislative input, consumer satisfaction surveys, input from the Client Assistance Program, and public hearings

The goals and priorities for carrying out the supported employment program can be found in section (n) of the VR services portion of this plan titled Goals and Plans for Distribution of Title VI funds.

m. Order of Selection

Describe:

1. Whether the designated State unit will implement and order of selection. If so, describe:

A. The order to be followed in selecting eligible individuals to be provided VR services.

The order to be followed in selecting eligible individuals to be provided VR services.

Services shall be provided based upon the eligible individual’s placement in one of the following priority categories:

Priority Category I: An individual with the most significant disability as defined below.

Priority Category II: An individual with a significant disability as defined below.

Priority Category III: An individual with a disability as defined below.

Definitions:
Individual with the Most Significant Disability: An individual who is seriously limited in three or more of the following functional areas: self-care; communication; mobility; self-direction; work tolerance; work skills; and/or interpersonal skills, and

a. whose vocational rehabilitation can be expected to require multiple vocational rehabilitation services over an extended period of time; and

b. who has one or more physical or mental disabilities resulting from amputation, arthritis, autism, blindness, burn injury, cancer, cerebral palsy, cystic fibrosis, deafness, head injury, heart disease, hemiplegia, hemophilia, respiratory or pulmonary dysfunction, mental retardation, mental illness, multiple sclerosis, muscular dystrophy, musculo–skeletal disorders, neurological disorders (including stroke and epilepsy), spinal cord conditions (including paraplegia and quadriplegia), sickle cell anemia, specific learning disability, end-stage renal disease, or another disability or combination of disabilities determined on the basis of an assessment for determining eligibility and vocational rehabilitation needs to cause comparable substantial functional limitation.

Individual with a Significant Disability: An individual who has a severe physical or mental impairment that seriously limits one or two functional capacities (such as mobility, communication, self-care, self-direction, interpersonal skills, work tolerance, or work skills) in terms of an employment outcome; and

a. whose vocational rehabilitation can be expected to require multiple vocational rehabilitation services over an extended period of time; and

b. who has one or more physical or mental disabilities resulting from amputation, arthritis, autism, blindness, burn injury, cancer, cerebral palsy, cystic fibrosis, deafness, head injury, heart disease, hemiplegia, hemophilia, respiratory or pulmonary dysfunction, mental retardation, mental illness, multiple sclerosis, muscular dystrophy, musculo–skeletal disorders, neurological disorders (including stroke and epilepsy), spinal cord conditions (including paraplegia and quadriplegia), sickle cell anemia, specific learning disability, end-stage renal disease, or another disability or combination of disabilities determined on the basis of an assessment for determining eligibility and vocational rehabilitation needs to cause comparable substantial functional limitation.

Individual with a disability: all other eligible individuals.

B. The justification for the order.

MVR continues to experience an increase in the cost of providing services to persons in all categories. Due to this increase in the cost of services and the insufficient financial resources, MVR may not be able to provide services to all eligible individuals. MVR estimates that there will be 29,500 eligible individuals in FY2017 who will receive services.

C. The service and outcome goals.

As of September 30, 2015, all categories are open and do not have a waiting list. However, as noted above, MVR is experiencing an increase in costs to serve persons in all categories, which may necessitate waiting lists. In that case:

Priority Category 1: out of the estimated 14,000 persons who will be served, 2,300 is the estimated number of persons who will exit with employment outcomes after receiving services, and 1,452 is the estimated number of persons who will exit without employment outcomes after receiving services.
Priority Category 2: out of the estimated 15,000 persons who will be served, 2,700 is the estimated number of persons who will exit with employment outcomes after receiving services, and 1,749 is the estimated number of persons who will exit without employment outcomes after receiving services.

Priority Category 3: out of the estimated 500 persons who will be served, 175 is the estimated number of persons who will exit with employment outcomes after receiving services, and 132 is the estimated number of persons who will exit without employment outcomes after receiving services.

D. The time within which these goals may be achieved for individuals in each priority category within the order.

The timeline to reach an employment outcome varies significantly with each individual. It is estimated that the average number of months to reach an employment outcome for priority category I is approximately 16 months, priority category II is approximately 19 months, and priority category III is approximately 15 months.

E. How individuals with the most significant disabilities are selected for services before all other individuals with disabilities; and

MVR will serve eligible consumers with the most significant disabilities (Priority Category 1) first. Eligible consumers with significant disabilities (Priority Category 2) will be served next following with eligible consumers with disabilities (Priority Category 3).

The following procedures will be followed in the implementation of the order of selection:

1) An eligible individual will be placed in the appropriate priority category and receive written notification of the assigned priority category. The eligible individual's date of application will be used to determine the order of services within a priority category.

2) Individuals will be notified of their right to appeal their category assignment.

3) An eligible individual's placement in a priority category may be changed under justifiable circumstances.

4) Rationale for placement will appear in the individual's case file.

5) The order of selection shall in no way affect the provision or authorization of diagnostic and evaluation services needed to determine eligibility.

6) Services authorized or provided to any eligible individual shall not be disrupted as a result of an order of selection or the closing of a priority category.

7) Order of selection priority categories do not apply to post–employment services.

8) All funding arrangements for providing services, including any third–party arrangements and awards by MVR, shall be consistent with the order of selection. If any funding arrangements are inconsistent with the order of selection, MVR shall renegotiate these funding arrangements so that they are consistent with the order of selection.
9) The order of selection shall in no way affect eligible individuals’ access to services provided through MVR’s information and referral system.

10) Eligible individuals who are in a priority category that is not open shall be provided accurate vocational rehabilitation information and guidance, including counseling and referral for job placement, using appropriate modes of communication to assist them in preparing for, securing, retaining, regaining or advancing in employment. These individuals will also be referred to other appropriate federal and state programs, including Missouri Job Centers.

11) Individuals being referred to appropriate programs, as mentioned above, shall be provided the following:

(A) a notice of the referral to the agency carrying out the program

(B) information identifying a specific point of contact within the agency to which the individual is being referred

(C) information and advice regarding the most suitable services to assist the individual to prepare for, secure, retain, regain or advance in employment

2. If the designated State unit has elected to serve eligible individuals, regardless of any established order of selection, who require specific services or equipment to maintain employment.

MVR has elected to serve eligible individuals, regardless of any established order of selection, who require specific services or equipment to maintain employment.

n. Goals and Plans for Distribution of title VI Funds.

1. Specify the State's goals and priorities for funds received under section 603 of the Rehabilitation Act for the provision of supported employment services.

The FY2017 goals and priorities for the distribution of funds from section 603 of the Rehabilitation Act for the provision of supported employment services are:

Goal 1: Monitor and evaluate the supported employment outcome–based model that was implemented FY2013.

Goal 2: Research the efficiency and effectiveness of braided programs with Workforce Development.

Title VI funds are utilized for supported employment, job development and individual and group placement models of supported employment. All Title VI funds for supported employment services are utilized through a fee–for–service as established in MVR’s supported employment cost analysis. Title I funds are also utilized for the provision of supported employment services.

In FY2015, a total of 1,234 individuals with the most significant disabilities obtained employment outcomes after receiving supported employment services through MVR. Of the individuals that exited the program and received supported employment services during FY2015, 62.7 percent were
successfully employed in competitive jobs. These individuals averaged $8.61 per hour and worked an average of 24 hours per week.

It is estimated that approximately 5,200 individuals with the most significant disabilities will receive supported employment services in FY2017. It is also estimated that in FY2017, MVR will spend approximately 8.5 million dollars in Title VI, Part B funds and Title I funds in supported employment services. These services will be provided through nonprofit, accredited CRPs.

2. Describe the activities to be conducted, with funds reserved pursuant to section 603(d), for youth with the most significant disabilities, including:

A. the provision of extended services for a period not to exceed 4 years; and

MVR will provide supported employment services to youth with the most significant disabilities for up to 24 months and will extend, if necessary, should these services be needed to achieve an employment outcome. These services may include: job coaching, job supports (both on and off the job), guidance and counseling, retention services, resources for benefits counseling, information and referral, and employer consultation.

MVR will continue to work closely with the Missouri Department of Social Services MOHealthNet Division and the Department of Mental Health (DMH) Behavioral Health and Developmental Disabilities (DD) divisions to ensure that youth with the most significant disabilities are receiving extended services.

B. how the State will leverage other public and private funds to increase resources for extended services and expanded supported employment opportunities for youth with the most significant disabilities.

MVR will work closely with the DMH DD division utilizing home and community-based waivers to increase supported employment and extended services for youth with the most significant disabilities.

o. State's Strategies

Describe the required strategies and how the agency will use these strategies to achieve its goals and priorities, support innovation and expansion activities, and overcome any barriers to accessing the VR and the Supported Employment programs (See sections 101(a)(15)(D) and (18)(B) of the Rehabilitation Act and section 427 of the General Education Provisions Act (GEPA)):

1. The methods to be used to expand and improve services to individuals with disabilities.

All strategies identified to achieve goals and priorities, support innovation and expansion activities and overcome barriers to accessing the VR and the supported employment programs in FY2017 are listed below. The following strategies have been developed and reviewed by MVR and the State Rehabilitation Council:

Goal 1: Increase the number of employment outcomes for youth with disabilities.
Strategies

1. Develop joint training activities with MVR, school and CRP staff. Training will be focused on improving services and outcomes for students with disabilities.

2. Expand pre-employment transition services statewide.

3. Coordinate services with Workforce Development programs that target youth.

4. Expand IPS services to target youth with disabilities receiving services from DMH.

5. Provide opportunities for youth in identified workforce job-driven training programs and STEM degree/certificate programs.

Goal 2: Increase competitive integrated employment outcomes for individuals with autism spectrum disorder (ASD).

Strategies

1. Develop and maintain close working relationships with state and local partners (e.g., Department of Mental Health, WIOA partners, Independent Living Centers, CRPs, etc.) to maximize resources and develop appropriate services and support systems.

2. Coordinate joint training activities for MVR counselors and direct services CRP staff to improve services and outcomes for clients with ASD.

3. Develop capacity of regional specialists.

4. Expand specialized employment services for individuals with ASD.

Goal 3: Expand services for individuals with severe and persistent mental illness receiving Individual Placement and Support (IPS) services.

Strategies

1. Training staff on IPS evidence-based practices.

2. Training staff using Motivational Interviewing.

3. Collaborate with DMH-BHD on the implementation of evidence-based practices.

4. Increase the number and service capacity of IPS providers in the state.

5. Explore integration of evidence-based practices/fidelity into other CRP/MVR services.

6. Expand services to include youth with disabilities.

All of the above strategies will be used to expand and improve services to individuals with disabilities in FY2017.
2. How a broad range of assistive technology services and devices will be provided to individuals with disabilities at each stage of the rehabilitation process and on a statewide basis.

The following strategies will be utilized:

1. MVR will work jointly with CRPs and other partnering agencies, including WIOA partners, to develop and sponsor on–going training in assistive technology services.

2. At any time during the rehabilitation process, MVR’s statewide assistive technology specialists will provide technical assistance to MVR counselors throughout the state.

3. MVR staff will participate in activities, training programs and conferences sponsored by Missouri Assistive Technology.

4. MVR’s coordinator for deaf services will meet with all vocational rehabilitation counselors for the deaf on an annual basis to discuss new strategies, resources and issues for deaf and hard of hearing consumers.

5. MVR employs an assistive technology specialist who will continue to help staff in areas of mobility, work accommodations and home and van modifications.

6. The MVR assistant director of rural services will continue to work with the assistive technology needs of farm operators with disabilities and consult with staff statewide.

7. MVR has an assistant director of Deaf/hard of hearing services who will continue providing statewide support for staff with assistive technology services for clients with hearing impairments.

3. The outreach procedures that will be used to identify and serve individuals with disabilities who are minorities, including those with the most significant disabilities, as well as those who have been unserved or underserved by the VR program.

1. MVR will recruit rehabilitation counselors from culturally diverse backgrounds to better serve individuals with significant disabilities from underserved populations.

2. MVR will utilize state–contracted interpreters to reduce communication barriers.

3. MVR will continue to translate forms and brochures in Spanish for the Hispanic community.

4. MVR’s diversity consultant will provide cultural diversity training to MVR staff and deliver training to each MVR office. In addition, the consultant will continue to lead the Diversity Team, which includes MVR and CRP staffs.

5. Utilize the strategies under Goal 2 as mentioned under section (o) above.

4. The methods to be used to improve and expand VR services for students with disabilities, including the coordination of services
designed to facilitate the transition of such students from school to postsecondary life (including the receipt of VR services, postsecondary education, employment, and pre-employment transition services).

The methods to be used to improve and expand VR services for students with disabilities, including the coordination of services designed to facilitate the transition of such students from school to postsecondary life (including the receipt of VR services, postsecondary education, employment, and pre-employment transition services) can be found under Goal 1, strategies 1 through 5 under section (o) above.

5. If applicable, plans for establishing, developing, or improving community rehabilitation programs within the State.

The specific strategies that will be used to improve CRPs can be found under Goal 1 strategy 1, Goal 2 with strategies 1 and 2, and Goal 3 with strategy 5 listed above in section (o). In addition, MVR and CRP staffs offer input on service delivery processes during partnering meetings and develop action plans to improve those processes. The CRP–MVR steering committee meets regularly to review progress on these processes, service delivery and to discuss current and future issues warranting attention. This effort, along with joint training activities, is beneficial to improving both the CRP and MVR programs.

6. Strategies to improve the performance of the State with respect to the performance accountability measures under section 116 of WIOA.

MVR is collaborating, cooperating and coordinating with WIOA partners to work on methods to align data systems, share referrals and determine common intake practices. It will review the performance of the state with respect to the performance accountability measures with WIOA partners to ensure measures are consistent throughout the core programs. Efforts will be directed at cross training to educate partner staff on each other’s programs. MVR will be analyzing methods to work with partners on braided services among programs.

7. Strategies for assisting other components of the statewide workforce development system in assisting individuals with disabilities.

MVR will continue to work with DWD, which provides the statewide workforce development system services through the Missouri Job Centers in 14 workforce regions. MVR has appointed a state liaison to collaborate with DWD, and MVR staff serves as active members on all 14 local workforce development boards.

Through Memoranda of Understanding, MVR is an important referral source from job center partners for individuals with disabilities. MVR counselors visit various Missouri Job Centers (both full service sites and satellites) frequently to provide services to consumers in a timely fashion. One Missouri Job Center location (where all partners, including MVR, are co–located) has an intra–building electronic linkage which has been effective. MVR will work with partners in learning what services are available and how to capitalize on resources and processes already in place.

MVR is working closely with all of the WIOA partners in order to provide the best services possible for consumers. Many teams, consisting of members from all of the partner programs, are meeting and developing methods to meet individuals’ and employers’ needs.
8. How the agency’s strategies will be used to:

A. achieve goals and priorities by the State, consistent with the comprehensive needs assessment;

MVR obtains input on goals and priorities from the comprehensive statewide assessment of need, which includes the SRC, public hearings and consumer satisfaction surveys. This information is given to the administrative and strategic teams to develop strategies. MVR utilizes a variety of teams to assist with the development and implementation of many of the strategies identified in this section. Team members include MVR staff, management, providers, former consumers and school personnel. Quality assurance reviews are also used to assess the progress of the strategies toward the targets. MVR’s Management Team monitors outcomes and progress toward goals on a regular basis.

Goals, priorities and strategies were developed from the statewide assessment of need. Strategies to assist with improving services to clients and families with ASD were established. In addition, MVR will use Strategy 2 from Goal 2 as mentioned above in section (o).

B. support innovation and expansion activities; and

In FY2015, MVR continued to support innovation and expansion activities through a pilot project involving one of MVR’s CRP partners and two MVR district offices in Mid–Missouri. The pilot project is a newly designed supported employment model for people diagnosed with ASD.

Additional strategies to support innovation and expansion activities involve MVR’s commitment to growing the IPS model. MVR has implemented IPS services to help individuals with serious and persistent mental illness reach competitive employment. In partnership with the Department of Mental Health (DMH) Division of Behavioral Health, MVR has and continues to jointly fund the IPS state trainer to implement the fidelity IPS model. The trainer represents MVR’s and the DMH Division of Behavioral Health’s model of clinical integration.

MVR will utilize innovation and expansion funds to support activities of the Missouri State Rehabilitation Council and the Statewide Independent Living Council pursuant to 34 CFR section §361.35.

C. overcome identified barriers relating to equitable access to and participation of individuals with disabilities in the State VR Services Program and the State Supported Employment Services Program.

MVR uses strategies identified in sections (o)(2)(3) and (8)(B) above to overcome identified barriers relating to equitable access to and participation of individuals with disabilities in the state VR program and the state supported employment services program.

p. Evaluation and Reports of Progress: VR and Supported Employment Goals

Describe:
1. An evaluation of the extent to which the VR program goals described in the approved VR services portion of the Unified or Combined State Plan for the most recently completed program year were achieved. The evaluation must:

A. Identify the strategies that contributed to the achievement of the goals.

Strategies that contributed to the achievement of or factors that impeded the achievement of the FY2015 Goals and Priorities established by MVR and the State Rehabilitation Council were as follows:

Goal 1: Improve the accountability and performance of service providers.

Evaluation of Progress: Not yet achieved.

Factors that impeded the achievement of the above goal in FY2015:

This goal is part of MVR's continuous improvement process. MVR will always strive to improve the performance and accountability of CRPs for the benefit of MVR consumers. After the implementation of the AWARE case management system, MVR initiated a reporting program that will aid in tracking performance.

Goal 2: Increase employment outcomes for individuals with ASD.

Evaluation of Progress: Goal met.

The number of employment outcomes for individuals with ASD at the end of:

Strategies that contributed to the achievement of Goal 2 in FY2015:

1. Developed and maintained close working relationships with state and local partners (e.g., Department of Mental Health, WIOA partners, Independent Living Centers, CRPs, etc.) to maximize resources and develop appropriate services and support systems.

2. Coordinated joint training activities for MVR counselors and direct services CRP staff to improve services and outcomes for clients with ASD.

3. Developed capacity of regional specialists.

4. Expanded specialized employment services for individuals with ASD.

Goal 3: Increase the number of employment outcomes of transition-age consumers.

Evaluation of Progress: Goal met.

The number of transition-age consumers reaching employment outcomes in:
Strategies that contributed to the achievement of Goal 2 in FY2015:

1. The ad hoc Transition Team developed joint training activities with MVR, school and CRP staff. Training focused on improving services and outcomes for students with disabilities.

2. MVR continued to promote the development of partnering activities with school districts and CRPs to provide community–based transition services and opportunities for students with disabilities.

3. Continued emphasis on transition students entering postsecondary education programs.

4. Increased the utilization of Missouri Connections with transition consumers.

5. Identified current practices through MVR surveys and data.

B. Describe the factors that impeded the achievement of the goals and priorities.

See Section (p)(1)(A).

2. An evaluation of the extent to which the Supported Employment program goals described in the Supported Employment Supplement for the most recent program year were achieved. The evaluation must:

A. Identify the strategies that contributed to the achievement of the goals.

FY2015 Goals for the Supported Employment Program and strategies that contributed to the achievement of the goals were as follows:

Goal 1: Monitor and evaluate the new supported employment outcome–based model that was implemented FY2013.

Evaluation of Progress: Goal met.

MVR has produced extensive work through the CRP–MVR steering committee team in order to maximize benefits for supported employment (SE), which includes the IPS services. MVR and the CRPs developed and implemented a new outcome–based SE model FY2013. Statewide training for MVR and the CRPs was provided.

MVR also revised its cooperative agreement with CRPs to align with the new outcome–based model. This agreement includes service provision, authorization, billing, compliance and verification processes.

B. Describe the factors that impeded the achievement of the goals and priorities.

See Section (p)(2)(A).
3. The VR program's performance on the performance accountability indicators under section 116 of WIOA.

The most recently completed program year was FY2015 in which MVR utilized standards and indicators as the measure of performance.

MVR met five out of six performance indicators and two of three primary indicators under Standard 1 as required by federal regulations. MVR also achieved successful performance on required Standard 2.

The evaluation revealed the following areas of need and priority: MVR needs to continue to increase the number of employment outcomes. A model of employment services was implemented in FY2011. This has significantly reduced the number of vocational assessments and focuses on the milestones of job placement and 30– and 90–day retention. In addition, MVR implemented an outcome–based model for SE services in FY2013 that emphasizes quality employment outcomes and 30– and 90–day retention.

MVR should continue to focus on and improve quality employment outcomes. By a small margin, MVR did not meet Performance Indicator 1.5, which compares client average wages with Missouri average wages. Certain populations, such as individuals with ASD, continue to be underserved. Joint training with MVR and CRPs has been developed to improve services and employment outcomes.

Standard 1: EMPLOYMENT OUTCOMES

PERFORMANCE INDICATOR 1.1: The number of individuals exiting the Vocational Rehabilitation (VR) program who achieved an employment outcome during the current performance period compared to the number of individuals who exit the VR program after achieving an employment outcome during the previous performance period.

Required standard: Equal to or greater than previous year

FY2014: 4,874 FY2015: 5,063 Difference: +189

PERFORMANCE INDICATOR 1.2: Of all individuals who exit the VR program after receiving services, the percentage that are determined to have achieved an employment outcome.

Required Standard: 55.8% FY2015: 60.99%

*PERFORMANCE INDICATOR 1.3: Of all individuals determined to have achieved an employment outcome, the percentage who exits the VR program in competitive or self–employment with earnings equivalent to at least the minimum wage.

Required Standard: 72.6% FY2015: 99.25%

*PERFORMANCE INDICATOR 1.4: Of all individuals who exit the VR program in competitive or self–employment with earnings equivalent to at least the minimum wage, the percentage who are individuals with significant disabilities.

Required Standard: 62.4% FY2015: 96.56%
PERFORMANCE INDICATOR 1.5: The average hourly earnings of all individuals who exit the VR program in competitive or self-employment with earnings levels equivalent to at least the minimum wage as a ratio to the state’s average hourly earnings for all individuals in the state who are employed (as derived from the Bureau of Labor Statistics report, “State Average Annual Pay,” for the most recent available year).

Required Standard: .52 FY2015: .51

PERFORMANCE INDICATOR 1.6: Of all individuals who exit the VR program in competitive or self-employment with earnings equivalent to at least the minimum wage, the difference between the percentages who reported their own income as the largest single source of economic support at exit and the percentage that reported their own income as the largest single source of support at application.

Required Standard: 53% FY2015: 63.06%

Standard 2: EQUAL ACCESS TO SERVICES

PERFORMANCE INDICATOR 2.1: The service rate for all individuals with disabilities from minority backgrounds as a ratio to the service rate for all non-minority individuals with disabilities.

Required Standard: .80 FY2015: .92

4. How the funds reserved for innovation and expansion (I&E) activities were utilized.

In FY2015, MVR continued to support innovation and expansion activities through a pilot project involving one of MVR’s CRP partners and two MVR district offices in Mid-Missouri. The pilot project is a newly designed supported employment model for people diagnosed with ASD.

Additional strategies to support innovation and expansion activities involve MVR’s commitment to growing the IPS model. MVR has implemented IPS services to help individuals with serious and persistent mental illness reach competitive employment. In partnership with the Department of Mental Health (DMH) Division of Behavioral Health, MVR has and continues to jointly fund the IPS state trainer to implement the fidelity IPS model. The trainer represents MVR’s and the DMH Division of Behavioral Health’s model of clinical integration.

In 2015, MVR utilized Part B, Title I funds for the SRC and Part B, Title VII funds for the SILC quarterly meetings. These funds were primarily used to pay for council members’ travel, meeting expenses and supplies.

49. Quality, Scope, and Extent of Supported Employment Services.

Include the following:

1. The quality, scope, and extent of supported employment services to be provided to individuals with the most significant disabilities, including youth with the most significant disabilities.
MVR maintains cooperative, written agreements with nonprofit, private CRPs to provide services on a fee–for–service basis. All supported employment fees authorized by MVR are a uniform, flat rate as recommended by the RSA 107 Monitoring Review.

Title VI funds are used to secure supported employment (SE) services for consumers. Some of the services may include:

- discovery and exploration;
- community–based assessments;
- job supports;
- surveying businesses for potential community–based exploration, assessments and work sites suited to the needs of the consumers;
- analysis of all relevant job–related variables, (e.g., transportation, job restructuring, tax credit for employers, etc.);
- providing long–term, extended services support with the consumer or employer; a minimum of twice per month; and
- customized employment for individuals and employers.

MVR is committed to providing greater access to SE services. The scope of SE services reaches throughout the state. All counties in Missouri are being served by CRPs that provide SE services.

During FY2015, 1,234 MVR consumers with the most significant disabilities who received SE services successfully achieved their employment goals. 62.7% of the SE consumers who exited the program were successfully employed in competitive jobs. SE consumers worked an average of 24 hours per week and earned an average of $8.61 per hour. There were 640 youth with disabilities that received SE services and exited the system successfully.

MVR district offices meet with local CRPs to outline joint activities to assist mutual consumers reach employment outcomes. MVR and CRP staffs both offer input on service delivery processes during partnering meetings and develop action plans to improve those processes. Other collaborative activities involve joint training programs. Last year, 20 joint trainings were held for MVR and CRP staff on supported employment.

One of the methods that MVR uses to continuously improve SE services and the service delivery process is through the use of a strategic team. The CRP–MVR steering committee meets regularly to improve services, review feedback, monitor progress and to discuss current and future issues warranting attention.

MVR and the CRPs developed an outcome–based service model that emphasizes quality employment outcomes and retention. The model was implemented FY2013.

The Department of Mental Health (DMH), Division of Behavioral Health Services and MVR have been working to increase access to evidence–based supported employment, also known as IPS, for adults with serious mental illnesses who are interested in improving their work lives. Missouri has 12 Community Mental Health/Treatment Centers participating in this implementation collaborative. DMH
and MVR are implementing IPS for youth with serious mental illnesses in one current site with more to come.

To assist in determining the quality and effectiveness of SE services, MVR surveys its consumers. The FY2015 Customer Satisfaction Survey results indicated that 96 percent of SE clients, who left services both successfully and unsuccessfully, felt MVR staff were available when needed and treated them with respect.

2. The timing of transition to extended services.

MVR can provide up to 24 months of community–based job training. During the provision of assessment, job development and job coaching, the need for services is reviewed in three–month increments by the MVR counselor, the CRP and the SE consumer. Transitioning from supported employment to extended services occurs when the consumer requires job supports for 25 percent of the work time or less. In cases where consumers have serious and persistent mental illness, the 25 percent level does not apply; instead, the benchmark is the successful achievement of goals and objectives as outlined in monthly progress reports.

Certifications

Name of designated State agency or designated State unit, as appropriate

Name of designated State agency

Full Name of Authorized Representative:

Title of Authorized Representative:

States must provide written and signed certifications that:

1. The designated State agency or designated State unit (as appropriate) listed above is authorized to submit the VR services portion of the Unified or Combined State Plan under title 1 of the Rehabilitation Act of 1973 (Rehabilitation Act), as amended by WIOA*, and its supplement under title VI of the Rehabilitation Act.** Yes

2. As a condition for the receipt of Federal funds under title I of the Rehabilitation Act for the provision of VR services, the designated State agency listed above agrees to operate and administer the State VR Services Program in accordance with the VR services portion of the Unified or Combined State Plan*, the Rehabilitation Act, and all applicable regulations, policies, and procedures established by the Secretary of Education. Funds made available under section 111 of the Rehabilitation Act are used solely for the provision of VR services and the administration of the VR services portion of the Unified or Combined State Plan; Yes

3. As a condition for the receipt of Federal funds under title VI of the Rehabilitation Act for supported employment services, the designated State agency agrees to operate and administer the State Supported Employment Services Program in accordance with the supplement to the VR services portion of the Unified or Combined State Plan*, the Rehabilitation Act, and all applicable regulations, policies, and procedures established by the Secretary of Education. Funds made available under title VI are used solely for the provision of supported employment services and the administration of the supplement to the VR services portion of the Unified or Combined State Plan;** Yes
4. The designated State agency and/or the designated State unit has the authority under State law to perform the functions of the State regarding the VR services portion of the Unified or Combined State Plan and its supplement;  Yes

5. The State legally may carry out each provision of the VR services portion of the Unified or Combined State Plan and its supplement.  Yes

6. All provisions of the VR services portion of the Unified or Combined State Plan and its supplement are consistent with State law.  Yes

7. The Authorized Representative listed above has the authority under State law to receive, hold, and disburse Federal funds made available under the VR services portion of the Unified or Combined State Plan and its supplement;  Yes

8. The Authorized Representative listed above has the authority to submit the VR services portion of the Unified or Combined State Plan and the supplement for Supported Employment services;  Yes

9. The agency that submits the VR services portion of the Unified or Combined State Plan and its supplement has adopted or otherwise formally approved the plan and its supplement.  Yes

Footnotes

Certification 1 Footnotes

* Public Law 113-128.

** Unless otherwise stated, "Rehabilitation Act" means the Rehabilitation Act of 1973, as amended by WIOA, signed into law on July 22, 2014.

Certification 2 Footnotes

* All references in this plan to "designated State agency" or to "the State agency" relate to the agency identified in this paragraph.

** No funds under title 1 of the Rehabilitation Act may be awarded without an approved VR services portion of the Unified or Combined State Plan in accordance with section 101(a) of the Rehabilitation Act.

*** Applicable regulations, in part, include the Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 76,77,79,81, and 82; 2 CFR part 200 as adopted by 2 CFR part 3485; and the State VR Services Program regulations.

Certification 3 Footnotes

* No funds under title VI of the Rehabilitation Act may be awarded without an approved supplement to the VR services portion of the Unified or Combined State Plan in accordance with section 606(a) of the Rehabilitation Act.

** Applicable regulations, in part, include the citations in *** under Certification 2 footnotes
Additional Comments on the Certifications from the State

Certification Regarding Lobbying — Vocational Rehabilitation

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions. Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Assurances

The designated State agency or designated State unit, as appropriate and identified in the State certifications included with this VR services portion of the Unified or Combined State Plan and its supplement, through signature of the authorized individual, assures the Commissioner of the Rehabilitation Services Administration (RSA), that it will comply with all of the requirements of the VR services portion of the Unified or Combined State Plan and its supplement, as set forth in sections 101(a) and 606 of the Rehabilitation Act. The individual authorized to submit the VR services portion of the Unified or Combined State Plan and its supplement makes the following assurances:

The State Plan must provide assurances that:

1. Public Comment on Policies and Procedures:

The designated State agency assures it will comply with all statutory and regulatory requirements for public participation in the VR Services Portion of the Unified or Combined State Plan, as required by section 101(a)(16)(A) of the Rehabilitation Act.

2. Submission of the VR services portion of the Unified or Combined State Plan and Its Supplement:

The designated State unit assures it will comply with all requirements pertaining to the submission and revisions of the VR services portion of the Unified or Combined State Plan and its supplement for the State Supported Employment Services program, as required by sections 101(a)(1), (22), (23), and 606(a) of the Rehabilitation Act; section 102 of WIOA in the case of the submission of a unified plan; section 103 of WIOA in the case of a submission of a Combined State Plan; 34 CFR 76.140.

3. Administration of the VR services portion of the Unified or Combined State Plan:

The designated State agency or designated State unit, as applicable, assures it will comply with the requirements related to:

a. the establishment of the designated State agency and designated State unit, as required by section 101(a)(2) of the Rehabilitation Act.

b. the establishment of either a State independent commission or State Rehabilitation Council, as required by section 101(a)(21) of the Rehabilitation Act.

The designated State agency or designated State unit, as applicable (B) has established a State Rehabilitation Council.
c. consultations regarding the administration of the VR services portion of the Unified or Combined State Plan, in accordance with section 101(a)(16)(B) of the Rehabilitation Act.

d. the financial participation by the State, or if the State so elects, by the State and local agencies, to provide the amount of the non-Federal share of the cost of carrying out the VR program in accordance with section 101(a)(3).

e. the local administration of the VR services portion of the Unified or Combined State Plan, in accordance with section 101(a)(2)(A) of the Rehabilitation Act.

The designated State agency allows for the local administration of VR funds  No

f. the shared funding and administration of joint programs, in accordance with section 101(a)(2)(A)(ii) of the Rehabilitation Act.

The designated State agency allows for the shared funding and administration of joint programs:  No

 g. statewideness and waivers of statewideness requirements, as set forth in section 101(a)(4) of the Rehabilitation Act.

Is the designated State agency requesting or maintaining a waiver of statewideness for one or more services provided under the VR services portion of the Unified or Combined State Plan? See Section 2 of this VR services portion of the Unified or Combined State Plan.  No

h. the descriptions for cooperation, collaboration, and coordination, as required by sections 101(a)(11) and (24)(B); and 606(b) of the Rehabilitation Act.

i. all required methods of administration, as required by section 101(a)(6) of the Rehabilitation Act.

j. the requirements for the comprehensive system of personnel development, as set forth in section 101(a)(7) of the Rehabilitation Act.

k. the compilation and submission to the Commissioner of statewide assessments, estimates, State goals and priorities, strategies, and progress reports, as appropriate, and as required by sections 101(a)(15), 105(c)(2), and 606(b)(8) of the Rehabilitation Act.

l. the reservation and use of a portion of the funds allotted to the State under section 110 of the Rehabilitation Act for the development and implementation of innovative approaches to expand and improve the provision of VR services to individuals with disabilities, particularly individuals with the most significant disabilities.
m. the submission of reports as required by section 101(a)(10) of the Rehabilitation Act.

4. Administration of the Provision of VR Services:

The designated State agency, or designated State unit, as appropriate, assures that it will:

a. comply with all requirements regarding information and referral services in accordance with sections 101(a)(5)(D) and (20) of the Rehabilitation Act.

b. impose no duration of residence requirement as part of determining an individual’s eligibility for VR services or that excludes from services under the plan any individual who is present in the State in accordance with section 101(a)(12) of the Rehabilitation Act.

c. provide the full range of services listed in section 103(a) of the Rehabilitation Act as appropriate, to all eligible individuals with disabilities in the State who apply for services in accordance with section 101(a)(5) of the Rehabilitation Act?

Agency will provide the full range of services described above No

d. determine whether comparable services and benefits are available to the individual in accordance with section 101(a)(8) of the Rehabilitation Act.

e. comply with the requirements for the development of an individualized plan for employment in accordance with section 102(b) of the Rehabilitation Act.

f. comply with requirements regarding the provisions of informed choice for all applicants and eligible individuals in accordance with section 102(d) of the Rehabilitation Act.

g. provide vocational rehabilitation services to American Indians who are individuals with disabilities residing in the State, in accordance with section 101(a)(13) of the Rehabilitation Act.

h. comply with the requirements for the conduct of semiannual or annual reviews, as appropriate, for individuals employed either in an extended employment setting in a community rehabilitation program or any other employment under section 14(c) of the Fair Labor Standards Act of 1938, as required by section 101(a)(14) of the Rehabilitation Act.

i. meet the requirements in sections 101(a)(17) and 103(b)(2) of the Rehabilitation Act if the State elects to construct, under special circumstances, facilities for community rehabilitation programs

j. with respect to students with disabilities, the State,
i. has developed and will implement,
   A. strategies to address the needs identified in the assessments; and
   B. strategies to achieve the goals and priorities identified by the State, to improve and expand vocational rehabilitation services for students with disabilities on a statewide basis; and

ii. has developed and will implement strategies to provide pre-employment transition services (sections 101(a)(15) and 101(a)(25)).

5. Program Administration for the Supported Employment Title VI Supplement:

   a. The designated State unit assures that it will include in the VR services portion of the Unified or Combined State Plan all information required by section 606 of the Rehabilitation Act.

   b. The designated State agency assures that it will submit reports in such form and in accordance with such procedures as the Commissioner may require and collects the information required by section 101(a)(10) of the Rehabilitation Act separately for individuals receiving supported employment services under title I and individuals receiving supported employment services under title VI of the Rehabilitation Act.

   c. The designated state unit will coordinate activities with any other State agency that is functioning as an employment network under the Ticket to Work and Self-Sufficiency program under Section 1148 of the Social Security Act.

6. Financial Administration of the Supported Employment Program:

   a. The designated State agency assures that it will expend no more than 2.5 percent of the State’s allotment under title VI for administrative costs of carrying out this program; and, the designated State agency or agencies will provide, directly or indirectly through public or private entities, non-Federal contributions in an amount that is not less than 10 percent of the costs of carrying out supported employment services provided to youth with the most significant disabilities with the funds reserved for such purpose under section 603(d) of the Rehabilitation Act, in accordance with section 606(b)(7)(G) and (H) of the Rehabilitation Act.

   b. The designated State agency assures that it will use funds made available under title VI of the Rehabilitation Act only to provide supported employment services to individuals with the most significant disabilities, including extended services to youth with the most significant disabilities, who are eligible to receive such services; and, that such funds are used only to supplement and not supplant the funds provided under Title I of the Rehabilitation Act, when providing supported employment services specified in the individualized plan for
employment, in accordance with section 606(b)(7)(A) and (D), of the Rehabilitation Act.

7. Provision of Supported Employment Services:

a. The designated State agency assures that it will provide supported employment services as defined in section 7(39) of the Rehabilitation Act.

b. The designated State agency assures that:

i. the comprehensive assessment of individuals with significant disabilities conducted under section 102(b)(1) of the Rehabilitation Act and funded under title I of the Rehabilitation Act includes consideration of supported employment as an appropriate employment outcome, in accordance with the requirements of section 606(b)(7)(B) of the Rehabilitation Act

ii. an individualized plan for employment that meets the requirements of section 102(b) of the Rehabilitation Act, which is developed and updated with title I funds, in accordance with sections 102(b)(3)(F) and 606(b)(6)(C) and (E) of the Rehabilitation Act.
