Which DLM students are assessed in writing? When are DLM Students assessed in writing?

All DLM students in every grade are assessed every year in writing as a part of the English language arts blueprint adopted by DLM states in May, 2014. Writing is considered integral to English language arts. It is not a separate subject. Writing testlets will be field tested in all grades in Phase C.

How does DLM assess writing?

DLM assesses both emergent writing and conventional writing. Each student is assessed in emergent or conventional writing. Writing testlets are similar to DLM teacher-administered testlets in reading and math where the test administrator engages in a scripted activity with a student outside the KITE system and then enters observations and ratings of the student’s behavior into KITE. Emergent writing testlets and conventional writing testlets require the test administrator to engage the student in writing about information using the tools the student normally writes with as a part of instruction and then observing the student’s writing processes and products. Most items focus on teacher observation of the student’s writing process. One or more items require the teacher to evaluate the student’s written product. Writing testlets are expected to take 10-20 minutes to administer.

Are there linkage levels for the writing EEs?

Yes, and the linkage levels are grouped together in DLM writing testlets. The initial and distal precursor levels are combined in an “Emergent Writing” testlet. The proximal precursor, target, and successor levels are combined in a “Conventional Writing” testlet. Emergent and Conventional Writing testlets will be available for every grade. Since EEs are combined into a single writing testlet at every grade level, the codes used in the KITE system will look different than the EEs that appear on the blueprint. Emergent Writing testlets will be labeled with an “EW” in the EE code. Conventional writing testlets will be labeled with a “CW” in the EE code.

For example, Grade 4 Writing EE codes will appear in KITE as:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELA.EE.EW.4.IP</td>
<td>This is an ELA Essential Element for Emergent Writing, Grade 4, Initial Precursor (IP)</td>
</tr>
<tr>
<td>ELA.EE.EW.4.DP</td>
<td>This is an ELA Essential Element for Emergent Writing, Grade 4, Distal Precursor (DP)</td>
</tr>
<tr>
<td>ELA.EE.CW.4.PP</td>
<td>This is an ELA Essential Element for Conventional Writing, Grade 4, Proximal Precursor (PP)</td>
</tr>
<tr>
<td>ELA.EE.CW.4.T</td>
<td>This is an ELA Essential Element for Conventional Writing, Grade 4, Target (T)</td>
</tr>
<tr>
<td>ELA.EE.CW.4.S</td>
<td>This is an ELA Essential Element for Conventional Writing, Grade 4, Successor (S)</td>
</tr>
</tbody>
</table>
**What is emergent writing?**

Emergent writing describes the marks, scribbles, and random selection of letters seen in beginning writers. The DLM EEs focus on having students work toward an understanding of writing as a form of communication and the ability to write about information. Emergent writing testlets focus on nodes in the learning map that are identified as being important precursor skills on the way toward conventional writing. DLM Professional Development Module 29: Emergent Writing\(^1\), includes examples of strategies teachers can use to start writing with students as a part of instruction.

**What is conventional writing?**

Conventional writing includes methods of writing that use orthography (letters, words) assembled in ways that are meaningful to others. Key conceptual components of conventional writing include an understanding that words are comprised of letters, that words have meanings, and that written words can be put together in order to communicate to others. Key behaviors associated with conventional writing include writing letters and words through the use of a traditional writing tool or alternate pencil. Examples of conventional writing by students with significant cognitive disabilities can be seen in DLM Professional Development Module 13: Writing Production and Distribution\(^1\).

**What are the general principles of assessing writing in the DLM system?**

1. Maximize student independence while he or she writes.
2. Assess writing in a way that is appropriate for all DLM students. DLM accomplishes this principle through a set of structured tasks within a testlet. Tasks assess the student’s writing process and product, for both emergent and conventional writers.

**What will students write about?**

DLM testlets that assess writing allow students to select their own topic, or to select a topic with assistance from test administrators. The writing-related EEs in the ELA blueprint focus on writing about information. Since writing is a complex process, students should be allowed to write about familiar informational topics. A student highly motivated to write about types of cars should be allowed to write about cars as part of the DLM writing testlets. The tasks that the test administrator will guide the student through will focus on whether the student can write about information related to the selected topic. More information about instruction for students with significant cognitive disabilities in writing can be found in DLM Professional Development Module 26: Writing Information and Explanation Texts\(^1\).

**How are students who do not physically write using paper and pencil or a traditional keyboard assessed?**

Many DLM students will need the support of test administrators to assist them in accessing a tool for writing. Some examples of partner-assisted alternate pencils that can be used by students who cannot physically access a traditional pencil include: eye-gaze systems, alphabet flip-charts used with partner-assisted scanning, adapted keyboards and onscreen switch-enabled keyboards. All students are required to have access to a tool used for writing. Tools that require dictation of letters or words to the test administrator are acceptable. Specific information about allowable tools is included in the updated

TEST ADMINISTRATION MANUAL (expected publication in early January 2015). More information about alternate pencils and emergent writers can be found in these DLM professional development modules:

- Module 16: Writing with Alternate Pencils
- Module 29: Emergent Writing

**How can I prepare to give a student a writing testlet?**

- Use DLM professional development resources. The following modules are recommended for test administrators who will deliver DLM writing testlets.
  - Module 12: Writing: Text Types and Purposes
  - Module 13: Writing: Production and Distribution
  - Module 26: Writing Information and Explanation Texts
  - Module 29: Emergent Writing
- Before administering a writing testlet, access the Testlet Information Page (TIP) to learn more about what is needed for the specific testlet.

**What else do I need to know about writing assessment during the phase C testing window (January 5 – March 13, 2015)?**

- Writing testlets will be field tested in all grades during phase C.
  - Educators can use the Instructional Tools Interface (ITI)\(^2\) to choose emergent and conventional writing testlets.
- KITE delivers the same testlet if you choose the Initial Precursor or Distal Precursor linkage levels. KITE delivers the same testlet if you choose the Proximal Precursor, Target, or Successor linkage levels.
- DLM encourages you to provide feedback about your students’ experience with writing assessments. If your student receives a writing testlet, please go to [http://goo.gl/mrJLDh](http://goo.gl/mrJLDh) after the assessment is complete.

---

\(^2\) Procedures for ITI are in the TEST ADMINISTRATION MANUAL and the TEST ADMINISTRATION MANUAL 2014-15 RELEASE NOTES.
Additional resources for administration of DLM writing testlets will become available before the end of the phase C testing window. Check the DLM educator resource page for new information.
