Introduction

In 2014 Missouri legislators passed House Bill 1490, mandating the development of the Missouri Learning Expectations. In April of 2016, these Missouri Learning Expectations were adopted by the State Board of Education. Groups of Missouri educators from across the state collaborated to create the documents necessary to support the implementation of these expectations.

One of the documents developed is the item specification document, which includes all Missouri grade level/course expectations arranged by domains/strands. It defines what could be measured on a variety of assessments. The document serves as the foundation of the assessment development process.

Although teachers may use this document to provide clarity to the expectations, these specifications are intended for summative, benchmark, and large-scale assessment purposes.

Components of the item specifications include:

Expectation Unwrapped breaks down a list of clearly delineated content and skills the students are expected to know and be able to do upon mastery of the Expectation.

Depth of Knowledge (DOK) Ceiling indicates the highest level of cognitive complexity that would typically be assessed on a large scale assessment. The DOK ceiling is not intended to limit the complexity one might reach in classroom instruction.

Item Format indicates the types of test questions used in large scale assessment. For each expectation, the item format specifies the type best suited for that particular expectation.

Content Limits/Assessment Boundaries are parameters that item writers should consider when developing a large scale assessment. For example, some expectations should not be assessed on a large scale assessment but are better suited for local assessment.

Sample stems are examples that address the specific elements of each expectation and address varying DOK levels. The sample stems provided in this document are in no way intended to limit the depth and breadth of possible item stems. The expectation should be assessed in a variety of ways.

Stimulus Materials defines types of stimulus materials that can be used in the item stems.

Grades 6-8 Geography

Geography		6-8.G.1.CC.A
Theme	<p>Tools of Social Science Inquiry In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>History: Continuity and Change Create and use historical maps and timelines in order to represent continuity and change within and among regions over time.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u> 3
<p>The student will define and explain the term <i>region</i>. The student will use historical maps and timelines to examine and then assess what has remained constant, as well as what has changed, given a specific timeframe in the region. In addition, the student will examine and then assess what remained constant, as well as what has changed, given different regions in a specific timeframe. This could include examining demographics, human-environment interactions, and cultural exchanges through primary and secondary sources. Given the unit parameters, the student will create maps that depict the chronology.</p>		<u>Item Format</u> Selected Response Constructed Response Technology Enhanced
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to local, regional, national, and/or international areas of emphasis, including:</p> <ul style="list-style-type: none"> • Missouri River valley, from Lewis and Clark to present day • Migratory habits and settlement patterns of cultural groups • Major regions of the world (Middle East, sub-Saharan Africa, etc.) 		
<u>Stimulus Materials</u>		
<p>Maps, timelines, primary sources, before/after visuals, charts, graphs, diagrams</p>		

Grades 6-8 Geography

Geography		6-8.G.1.CC.B
Theme	<p>Tools of Social Science Inquiry</p> <p>In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>History: Continuity and Change</p> <p>Evaluate historical solutions to problems within and among world regions in order to draw conclusions about current and future decisions.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define and explain the term <i>region</i>. Using teacher-provided historical solutions to situations/problems/issues (e.g., dropping an Atomic Bomb in WWII), the student will identify the problem(s) associated with the chosen solution(s) of the time. The student will draw conclusions about historical solutions to problems within and/or among world regions. The student will critique strengths and weaknesses of the solution(s) to make inferences about current issues and predict future courses of action within and/or among world regions (e.g., relationships with modern Japan). This could include examining demographics, human-environment interactions, and cultural exchanges through primary and secondary sources.</p>		3
		<u>Item Format</u>
		<p>Selected Response</p> <p>Constructed Response</p> <p>Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international areas of emphasis, including:</p> <ul style="list-style-type: none"> • Domestic and/or foreign policy, relationships, and/or events • Specific cultural conflicts • Specific human-environment interactions 		
<u>Stimulus Materials</u>		
<p>Current or historical event materials in print and/or electronic formats, such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as primary sources, maps, timelines, visuals, charts, graphs, diagrams, music/art/writing databases and archives, policy statements, government websites and documents, speeches, and/or oral histories</p>		

Grades 6-8 Geography

Geography		6-8.G.1.CC.C
Theme	<p>Tools of Social Science Inquiry</p> <p>In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>History: Continuity and Change</p> <p>With assistance, develop a research plan, identify appropriate resources for investigating social studies topics and create a research product that applies an aspect of geography to a contemporary issue.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u> 3
<p>With assistance throughout the process: The student will identify a contemporary issue. The student will then hypothesize how an aspect of geography is interrelated to the contemporary issue. The student will gather and cite evidence to support the hypothesis of how geography impacts the issue. This could address political, environmental, socioeconomic, and/or cultural issues.</p>		<u>Item Format</u> Selected Response Constructed Response Technology Enhanced
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international issues of emphasis, including:</p> <ul style="list-style-type: none"> • Cause-and-effect relationships (natural disaster preparation, response, and recovery, etc.) • Geopolitical conflict and challenges (Sahel, drinking water in Africa, etc.) • Population dynamics (population density in urban India, China, etc.) • Resource management and conservation (oil exploration, transportation, and use, etc.) • Sociocultural issues (religious conflict, immigration, migration, etc.) 		
<u>Stimulus Materials</u>		
<p>Current-event materials in print and/or electronic formats, such as newspaper editorials, articles, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, databases, and/or oral history</p>		

Grades 6-8 Geography

Geography		6-8.G.1.CC.D
Theme	<p>Tools of Social Science Inquiry In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>History: Continuity and Change Using an inquiry lens, develop compelling geographic questions, determine helpful resources, and consider multiple points of view represented in the resources.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u> 3
<p>The student will demonstrate curiosity by developing a compelling (open-ended geographic question with no one right answer and of high interest to students). To do this, the student will identify, gather, and cite appropriate resources that include multiple points of view to investigate the question.</p>		<u>Item Format</u> Selected Response Constructed Response Technology Enhanced
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international issues of emphasis:</p> <ul style="list-style-type: none"> • Examples of compelling questions (C3 Framework by NCSS) may include, but are not limited to: <ul style="list-style-type: none"> ○ Was it destiny to move west? ○ Did geography greatly affect the development of colonial America? ○ Does a geographic minority have the right to ignore the laws of the geographic majority? 		
<u>Stimulus Materials</u>		
<p>Print and/or electronic format newspaper editorials, articles, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, databases, and/or oral history</p>		

Grades 6-8 Geography

Geography		6-8.G.1.CC.E
Theme	<p>Tools of Social Science Inquiry In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>History: Continuity and Change Analyze the causes and consequences of a current geographic issue as well as the challenges and opportunities faced by those trying to address the problem.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u> 4
Considering current geographic issues, the student will identify causes and consequences, noting contradictions and emerging patterns. The student will also analyze obstacles and opportunities encountered by those trying to address the problem(s). Those attempting to address the problem may include, but are not limited to, governments and/or their agencies, individuals, private groups, etc.		<u>Item Format</u> Selected Response Constructed Response Technology Enhanced
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
Content may include, but is not limited to, local, regional, national, and/or international issues of emphasis: <ul style="list-style-type: none"> • Cause-and-effect relationships (natural disaster preparation, response, and recovery, etc.) • Geopolitical conflict and challenges (Sahel, drinking water in Africa, etc.) • Population dynamics (population density in urban India, China, etc.) • Resource management and conservation (oil exploration, transportation, and use, etc.) • Sociocultural issues (religious conflict, immigration, migration, etc.) 		
<u>Stimulus Materials</u>		
Current event materials in print and/or electronic format such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, databases, policy statements, government documents, speeches, and/or oral histories		

Grades 6-8 Geography

Geography		6-8.G.1.GS.A
Theme	<p>Tools of Social Science Inquiry</p> <p>In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>Government Systems and Principles</p> <p>Using a geographic lens, analyze laws, policies and processes to determine how governmental systems affect individuals and groups in society.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define and distinguish among governmental systems and their resulting laws, policies, and processes. Then, considering a geographic perspective, the student will investigate an issue and determine at least two laws, two policies, and two processes associated with the issue. The student will define and distinguish between groups and society. The student will then draw conclusions, citing appropriate evidence, as to how government decisions impact individuals and groups.</p>		3
		<u>Item Format</u>
		<p>Selected Response</p> <p>Constructed Response</p> <p>Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international issues of emphasis:</p> <ul style="list-style-type: none"> • Cause-and-effect relationships (natural disaster preparation, response, and recovery, etc.) • Geopolitical conflict and challenges (utilizing international waters, conflicting government authorities, etc.) • Population dynamics (population density in urban India or China, rural/urban development and management, etc.) • Resource management and conservation (oil exploration/transportation/use, environmental monitoring and regulations, etc.) • Sociocultural issues (religious conflict, immigration, migration, etc.) 		

Grades 6-8 Geography

Stimulus Materials

Print and/or electronic format materials such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, databases, policy statements, government documents, speeches, and/or oral histories

Grades 6-8 Geography

Geography		6-8.G.1.GS.B
Theme	<p>Tools of Social Science Inquiry</p> <p>In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>Government Systems and Principles</p> <p>Analyze current human environmental issues using relevant geographic sources to propose solutions.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define <i>human-environment interaction</i>. Using teacher-provided prompts, the student will identify at least two current issues to analyze. The student will investigate the selected issues and list probable causes for each issue. Using relevant geographic sources, the student will draw conclusions and propose feasible solutions that are grounded in evidence.</p>		3
		<u>Item Format</u>
		<p>Selected Response</p> <p>Constructed Response</p> <p>Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international issues of emphasis, including:</p> <ul style="list-style-type: none"> • Cause-and-effect relationships (natural disaster preparation, response, and recovery, etc.) • Geopolitical conflict and challenges (utilizing international waters, conflicting government authorities, etc.) • Population dynamics (population density in urban India, China, rural/urban development and management, etc.) • Resource management and conservation (oil exploration/transportation/use, environmental monitoring and regulations, etc.) • Sociocultural issues (religious conflict, immigration, migration, etc.) 		

Grades 6-8 Geography

Stimulus Materials

Current-event materials in print and/or electronic format, such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, databases, policy statements, government documents, speeches, and/or oral histories

Strand MLS	<p>Geographic Study</p> <p>Locate the major landforms of the world.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define <i>landform</i> and identify major landforms of the world. The student will also classify landforms by their significance and identify what constitutes a “major” landform.</p>		2
		<u>Item Format</u>
<p>Selected Response Constructed Response Technology Enhanced</p>		<u>Sample Stems</u>
		<u>Content Limits/Assessment Boundaries</u>
<p>Major landforms could include, but are not limited to, those that are:</p> <ul style="list-style-type: none"> • Archaeologically/historically significant locations • Culturally significant • Environmentally significant • Part of migratory/settlement patterns • Known for natural-resource availability, use, and/or conservation • Regions 		
<u>Stimulus Materials</u>		
<p>Printed and electronic maps, graphs, and charts, GIS databases, as well as other primary and secondary sources</p>		

Grades 6-8 Geography

Geography		6-8.G.1.EC.A
Theme	<p>Tools of Social Science Inquiry</p> <p>In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>Economic Concepts</p> <p>Using a geographic lens, evaluate economic decisions to determine costs and benefits on contemporary society.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define <i>cost</i>, <i>benefits</i>, <i>opportunity cost</i>, and <i>fiscal</i> as they apply to economic decision-making. Through a geographic perspective, the student will then identify at least two economic decisions and critique those decisions based upon the positive and negative implications for contemporary society.</p>		3
		<u>Item Format</u>
		<p>Selected Response</p> <p>Constructed Response</p> <p>Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international issues of emphasis, including:</p> <ul style="list-style-type: none"> • Disaster and relief preparedness, response, and recovery (choices to use federal aid, rebuild, etc.) • Environmental issues and related regulations, taxes, tariffs, etc. • Fiscal policy of government agencies • Demographic/socioeconomic buying power (tweens, singles, single-parent families, young families, senior citizens, etc.) 		
<u>Stimulus Materials</u>		
<p>Current-event materials in print and/or electronic format, such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, databases, policy statements, government websites and documents, speeches, and/or oral histories</p>		

Grades 6-8 Geography

Geography		6-8.G.1.PC.A
Theme	<p>Tools of Social Science Inquiry</p> <p>In order to investigate and draw conclusions about the past, students need to think critically about information as well as evaluate multiple sources of evidence. The following steps of inquiry outline ways of thinking that apply to the study of social studies rather than content to be learned. As part of this process, instruction should apply disciplinary tools as well as use these processes to answer questions and solve problems.</p> <ul style="list-style-type: none"> • Ask questions (Why? Why there? Why then? What’s the impact of? What’s the real story of? What’s the significance of?) • Develop compelling questions and research geography. • Anticipate and utilize the most useful sources to address their questions. • Develop and test claims and counter-claims to address their questions. • Take informed action based on their learning. 	
Strand MLS	<p>People, Groups, and Cultures</p> <p>Analyze material culture to explain a people’s perspective and use of place.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define and describe <i>material culture, place, and perspective</i>. Then, the student will investigate an example of material culture to interpret a people’s point of view. The student will construct an understanding of <i>place</i> for that geographic area. From this, the student will draw conclusions about material culture as it relates to human and physical characteristics.</p>		3
		<u>Item Format</u>
		<p>Selected Response</p> <p>Constructed Response</p> <p>Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international examples of emphasis:</p> <ul style="list-style-type: none"> • Material culture (housing, resources, weapons, animals, tools, use of wildlife, travel, trade, belief systems, art, music, writings, etc.) of <ul style="list-style-type: none"> ○ Regional/cultural groups such as Native American peoples, Bedouins, Mongols, Appalachian Mountain groups, etc. ○ Migrant workers such as agricultural/oil industry/construction workers, etc. ○ Emerging and developed nations ○ Cultural/religious/political centers 		
<u>Stimulus Materials</u>		
<p>Current-event materials in print and/or electronic format, such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as maps, timelines, primary sources, visuals, charts, graphs, diagrams, music/art/writing databases and archives, policy statements, government websites and documents, speeches, and/or oral histories</p>

Strand MLS	<p>People, Groups and Cultures</p> <p>Compare and contrast the human characteristics within and among contemporary and historic regions over time.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u>
<p>The student will define and describe human characteristics, contemporary regions, and historic regions. From teacher-provided options, the student will investigate at least two regions (one historic and one contemporary). The student will focus on two distinct time periods for the investigation. The student will compare and contrast the human characteristics within and across each region over the specified time.</p>		3
		<u>Item Format</u>
		<p>Selected Response</p> <p>Constructed Response</p> <p>Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international examples of emphasis:</p> <ul style="list-style-type: none"> • Historic regions: Middle East, Holy Land, Indus Valley, Tigris-Euphrates, Cahokia Mounds, Yellow River Valley, Italian peninsula, etc. • Contemporary regions: Silicon Valley, Sun Belt, European Union, self-identified states/groups/people, etc. <p>Instructional Consideration: the teacher could select one region and have students examine it from both a historical and a contemporary perspective, instead of two different regions. An example of this could be the metropolitan St. Louis, Missouri, area today compared/contrasted with the same region during the Lewis and Clark era.</p>		

Grades 6-8 Geography

Stimulus Materials

Current and historical event materials in print and/or electronic format, such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as primary sources, maps, timelines, visuals, charts, graphs, diagrams, music/art/writing databases and archives, policy statements, government websites and documents, speeches, and/or oral histories

Grades 6-8 Geography

Geography		6-8.G.2.CC.A
Theme	<p>World Geography and Cultures The study of world geography and cultures focuses on human and physical systems of the world’s regions. The emphasis is on the interaction between/among these systems as they impact the establishment and evolution of societies. Students will utilize spatial reasoning and examine organization of people, places, and environments to understand that human and physical systems vary from place to place, change over time, and give meaning to places. In a time of globalization, students will understand that geography influences culture, migration of people, diffusion of ideas, and the development of new technologies. A geographically informed person understands that there are multiple valid types of regions that have unique characteristics. When studying the world by “regions” several schema for organization exist including physical regions (e.g., continents, climate, topography, and environment), human/functional regions (e.g., transportation, communication, and economics), and perceptual regions (e.g., history, culture, and government). One possible organization of regions includes US/Canada, Latin America, Europe/Russia, Middle East/North Africa, Sub-Saharan Africa, South Asia, East Asia, and Oceania. No matter how they are defined, the skills and concepts listed below should be applied to the study of regions.</p>	
Strand MLS	<p>History: Continuity and Change Explain how regions of the world change over time in relation to historical events and trends and the human characteristics of place.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u> 3
<p>The student will define and describe historical events, trends, and human characteristics of place. From teacher-provided options, the student will investigate how historical events, trends, and human characteristics of place affected regional changes. The student will compare and contrast historical events, trends, and human characteristics within and/or across regions. Then, the student will summarize how these factors led to regional change over time.</p>		<u>Item Format</u> Selected Response Constructed Response Technology Enhanced
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international examples of emphasis:</p> <ul style="list-style-type: none"> • Colonialism in Africa, South America, North America, etc. • Industrialization (Rust Belt, Great Britain, China, etc.) • Civil rights issues (America, Haiti, Poland, etc.) • Isolationism (Japanese, American, Turkey, Armenia, etc.) • Middle East conflicts 		

Grades 6-8 Geography

Stimulus Materials

Current and historical event materials in print and/or electronic format, such as press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as primary sources, maps, timelines, visuals, charts, graphs, diagrams, music/art/writing databases and archives, policy statements, government/embassy websites and documents, speeches, and/or oral histories

Grades 6-8 Geography

Geography		6-8.G.2.CC.B
Theme	<p>World Geography and Cultures The study of world geography and cultures focuses on human and physical systems of the world’s regions. The emphasis is on the interaction between/among these systems as they impact the establishment and evolution of societies. Students will utilize spatial reasoning and examine organization of people, places, and environments to understand that human and physical systems vary from place to place, change over time, and give meaning to places. In a time of globalization, students will understand that geography influences culture, migration of people, diffusion of ideas, and the development of new technologies. A geographically informed person understands that there are multiple valid types of regions that have unique characteristics. When studying the world by “regions” several schema for organization exist including physical regions (e.g., continents, climate, topography, and environment), human/functional regions (e.g., transportation, communication, and economics), and perceptual regions (e.g., history, culture, and government). One possible organization of regions includes US/Canada, Latin America, Europe/Russia, Middle East/North Africa, Sub-Saharan Africa, South Asia, East Asia, and Oceania. 		<p>Selected Response Constructed Response Technology Enhanced</p>
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international examples of emphasis:</p> <ul style="list-style-type: none"> • Military conflicts (Iraq, Civil War, Vietnam, American Revolution, Persian, etc.) • Resource development, extraction, and/or conservation (farming, national parks, oil/natural gas industry, etc.) • Historical significance (Trail of Tears, building pyramids/monuments, Transcontinental Railroad, etc.) • Infrastructure projects (I-70 or other interstate corridors, river shipping lanes, canals, etc.) 		

Grades 6-8 Geography

Stimulus Materials

Current and historical event materials in print and/or electronic format, such as international media outlets, press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as primary sources, maps, timelines, visuals, weather charts, almanacs, graphs, diagrams, music/art/writing, databases and archives, policy statements, government/embassy websites and documents, speeches, and/or oral histories, seismographs and other related data

Grades 6-8 Geography

Geography		6-8.G.2.G.D
Theme	<p>World Geography and Cultures The study of world geography and cultures focuses on human and physical systems of the world’s regions. The emphasis is on the interaction between/among these systems as they impact the establishment and evolution of societies. Students will utilize spatial reasoning and examine organization of people, places, and environments to understand that human and physical systems vary from place to place, change over time, and give meaning to places. In a time of globalization, students will understand that geography influences culture, migration of people, diffusion of ideas, and the development of new technologies. A geographically informed person understands that there are multiple valid types of regions that have unique characteristics. When studying the world by “regions” several schema for organization exist including physical regions (e.g., continents, climate, topography, and environment), human/functional regions (e.g., transportation, communication, and economics), and perceptual regions (e.g., history, culture, and government). One possible organization of regions includes US/Canada, Latin America, Europe/Russia, Middle East/North Africa, Sub-Saharan Africa, South Asia, East Asia, and Oceania. No matter how they are defined, the skills and concepts listed below should be applied to the study of regions.</p>	
Strand MLS	<p>Geographical Study Explain how the movement of people, goods, and ideas impact world regions.</p>	
<u>Expectation Unwrapped</u>		<u>DOK Ceiling</u> 3
<p>The student will define <i>region</i>. From teacher-provided options, the student will select at least two world regions. Within the selected regions, the student will identify an example of a group of people. Next, the student will cite evidence of the exchange of goods and ideas as the group migrates to a new region. This may include the dispersal and/or adoption of cultural characteristics (e.g., cultural diffusion) and/or loss of cultural identity. It also may include voids/benefits created by the movement of the group. The student will make inferences as to the effects of this group’s movement into and/or from the selected regions.</p>		<u>Item Format</u> Selected Response Constructed Response Technology Enhanced
<u>Content Limits/Assessment Boundaries</u>		<u>Sample Stems</u>
<p>Content may include, but is not limited to, local, regional, national, and/or international examples of emphasis:</p> <ul style="list-style-type: none"> • Forced and voluntary migrations (Jewish Diaspora, Trail of Tears, Eastern Europeans at the turn of the 20th Century, Indo-European movement into northern India, natural disasters, etc.) • Colonialism and imperialism • Historical trails (Silk Road, Westward Expansion, etc.) <p>Focus of inquiry could include architecture, language, belief systems, government, the arts, family structure, food, tools, technological advancements, etc.</p>		

Grades 6-8 Geography

Stimulus Materials

Current and historical event materials in print and/or electronic format, such as international media outlets, press releases, news clips, newspaper editorials, articles, blogs, cartoons, etc., as well as primary sources, maps, timelines, visuals, weather charts, almanacs, graphs, diagrams, music/art/writing, databases and archives, policy statements, government/embassy websites and documents, speeches, and/or oral histories

Grades 6-8 Geography

Geography		6-8.G.2.EC.A
Theme	<p>World Geography and Cultures The study of world geography and cultures focuses on human and physical systems of the world’s regions. The emphasis is on the interaction between/among these systems as they impact the establishment and evolution of societies. Students will utilize spatial reasoning and examine organization of people, places, and environments to understand that human and physical systems vary from place to place, change over time, and give meaning to places. In a time of globalization, students will understand that geography influences culture, migration of people, diffusion of ideas, and the development of new technologies. A geographically informed person understands that there are multiple valid types of regions that have unique characteristics.
