## Introduction

In 2014 Missouri legislators passed House Bill 1490, mandating the development of the Missouri Learning Expectations. In April of 2016, these Missouri Learning Expectations were adopted by the State Board of Education. Groups of Missouri educators from across the state collaborated to create the documents necessary to support the implementation of these expectations.

One of the documents developed is the item specification document, which includes all Missouri grade level/course expectations arranged by domains/strands. It defines what could be measured on a variety of assessments. The document serves as the foundation of the assessment development process.

Although teachers may use this document to provide clarity to the expectations, these specifications are intended for summative, benchmark, and large-scale assessment purposes.

Components of the item specifications include:

**Expectation Unwrapped** breaks down a list of clearly delineated content and skills the students are expected to know and be able to do upon mastery of the Expectation.

**Depth of Knowledge (DOK) Ceiling** indicates the highest level of cognitive complexity that would typically be assessed on a large scale assessment. The DOK ceiling is not intended to limit the complexity one might reach in classroom instruction.

**Item Format** indicates the types of test questions used in large scale assessment. For each expectation, the item format specifies the type best suited for that particular expectation.

**Content Limits/Assessment Boundaries** are parameters that item writers should consider when developing a large scale assessment. For example, some expectations should not be assessed on a large scale assessment but are better suited for local assessment.

**Sample stems** are examples that address the specific elements of each expectation and address varying DOK levels. The sample stems provided in this document are in no way intended to limit the depth and breadth of possible item stems. The expectation should be assessed in a variety of ways.

**Stimulus Materials** defines types of stimulus materials that can be used in the item stems.

World History		9-12.WH.4.GS.A
<b>Theme</b>	<b>Age of Revolution</b> The Enlightenment and the Age of Revolution brought radical change to all aspects of peoples' lives. Ideas from classical governments, along with new ways of thinking resulting from the Renaissance and Reformation, caused individuals to view their relationship with government in new ways. These revelations led to political, social, and cultural revolutions in Europe, and the Americas including changing ideas about class, race and identity. The Industrial Revolution changed the way in which individuals lived: the production of new goods, a global movement of people, a division of labor, and a new stratification of society.	
<b>Strand</b>	<b>Governmental Systems and Principles</b> <b>(World History post c. 1450)</b>	
<b>MLS</b>	Analyze the key ideas of Enlightenment thinkers to explain the development of ideas such as natural law, natural rights, social contract, due process, and separation of powers.	
<b><u>Expectation Unwrapped</u></b>		<b><u>DOK Ceiling</u></b>
The student will explain how the Enlightenment represented new ideas about government and the changing role of the citizen. The student will describe how these ideas challenged the old order (new ideas such as limited government, individual/natural rights, reliance on logic and reason).		3

<b>Theme</b>	<b>Accelerated Exchange</b> The study of world history begins with a brief review of areas of wealth including African cultures, the Islamic world, and Chinese dynasties. The links among regions through travel are emphasized, which illustrates interregional connections in the period of accelerated exchange. Examples include: West Africa, the Eurasian heartland, and the oceanic routes of the South China Sea and the Indian Ocean. The rebirth of education, arts, and sciences, along with major shifts in perspectives of culture, government and the Church, shaped the Western world. Students will examine how the accelerated exchanges occurring before the Renaissance and Reformation challenged old ideas and created new solutions for an emerging modern world.

<b>Theme</b>	<b>Accelerated Exchange</b> The study of world history begins with a brief review of areas of wealth including African cultures, the Islamic world, and Chinese dynasties. The links among regions through travel are emphasized, which illustrates interregional connections in the period of accelerated exchange. Examples include: West Africa, the Eurasian heartland, and the oceanic routes of the South China Sea and the Indian Ocean. The rebirth of education, arts, and sciences, along with major shifts in perspectives of culture, government and the Church, shaped the Western world. ## Grades 9-12 World History

World History		9-12.WH.4.PC.D
<b>Theme</b>	<b>Age of Revolution</b> The Enlightenment and the Age of Revolution brought radical change to all aspects of peoples' lives. Ideas from classical governments, along with new ways of thinking resulting from the Renaissance and Reformation, caused individuals to view their relationship with government in new ways. These revelations led to political, social, and cultural revolutions in Europe, and the Americas including changing ideas about class, race and identity. The Industrial Revolution changed the way in which individuals lived: the production of new goods, a global movement of people, a division of labor, and a new stratification of society.

## Grades 9-12 World History

World History		9-12.WH.5.PC.A
<b>Theme</b>	<b>Modern Era</b> The conditions and developments of the late nineteenth and twentieth centuries significantly influence today's world. Imperialism, nationalism, and economic transformations contributed to the first World War. Economic collapse of the 1930s enabled the rise of totalitarianism which sparked World War II. The polarization which followed the world wars resulted in competition and conflict between the United States and Soviet Union. Technology played a vital role in conflicts and cooperation as well as the increasing globalization of the world. These developments greatly impacted cultural diffusion along with the movement and displacement of peoples.	
<b>Strand</b>	<b>People, Groups, and Cultures</b> <b>(World History post c. 1450)</b>
