

Summary of Proposed Draft Missouri EOC Blueprints for 2016 and Beyond

August 9, 2016

This document summarizes the proposed draft Missouri blueprints for future Missouri End-of-Course (MO EOC) Assessments (2016 and beyond) in Algebra I, Algebra II, Geometry, Biology, Physical Science, English I, English II, American History, and Government. The proposed blueprints were developed to reflect the depth and breadth of the Missouri Learning Standards. The proposed test blueprints were developed based on existing test blueprints, a comparison of the new and previous standards, and best practices with regard to coverage necessary to yield reliable information regarding student mastery of concepts/ideas, time allotted for assessments, potential grouping of items in sets, and interaction of items measuring similar/different skills. The proposed test blueprints include information regarding the suggested reporting categories and the number of items and score points for each suggested reporting category.
