<b>COURSE INTRODUCTION</b>							
Computer technology skills are vital to business; they permeate the entire workplace. Familiarity with computer programming is required in a growing number of firms and occupations primarily because of the increasingly widespread use of computerized management information systems.							
This course focuses on converting problems into detailed plans, writing code into computer language, testing, monitoring, debugging, documenting and maintaining computer programs. Students will also design programs for specific uses.							
<b>UNIT DESCRIPTION</b>			<b>SUGGESTED UNIT TIMELINE</b>				
Students will learn how to create a program and validate the code.			2 weeks				
			<b>CLASS PERIOD (min.)</b>				
			50 min.				
<b>ESSENTIAL QUESTIONS</b>							
<ol style="list-style-type: none"> <li>1. What changes with each execution of a program?</li> <li>2. Why follow standards?</li> <li>3. Why validate input?</li> <li>4. What is the benefit of using a method?</li> </ol>
