

Academics + Career and Technical Skills =
Balanced Education

Business leaders throughout the nation seek out employees with great academic and technical skills. That same combination of skills sparks the American entrepreneurial spirit and drives our economy.

By combining academics, science, technology and business, **Career and Technical Education** prepares students to take their place in the most productive work force in history.

Career and Technical Education is for all students—94% of U.S. high school students enroll in one or more CTE courses—and student organizations provide opportunities for personal and career development.

Help build America. Invest in **Career and Technical Education**.

Career and Technical Student Organizations:
Enriching, advising and delivering **Career and Technical Education**.
