CONTENT ALIGNMENTS AND SHIFTS – Grade 6 *DRAFT***

<b>Grade 6</b>			
<p><b>Critical Areas</b></p> <p>In Grade 6, instructional time should focus on four critical areas:</p> <ol style="list-style-type: none"> <li>1. connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems;</li> <li>2. completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers;</li> <li>3. writing, interpreting, and using expressions and equations; developing understanding of statistical thinking; and</li> <li>4. developing understanding of statistical thinking.</li> </ol>		<p><b>Mathematical Practices</b></p> <ol style="list-style-type: none"> <li>1. Make sense of problems and persevere in solving them.</li> <li>2. Reason abstractly and quantitatively.</li> <li>3. Construct viable arguments and critique the reasoning of others.</li> <li>4. Model with mathematics.</li> <li>5. Use appropriate tools strategically.</li> <li>6. Attend to precision.</li> <li>7. Look for and make use of structure.</li> <li>8. Look for and express regularity in repeated reasoning.</li> </ol>	
<p><b>Core Academic Standard (CAS)</b></p> <p><b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p> <p><b>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</b></p>		<p><b>Grade 6 GLE</b></p> <p><b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>	<p><b>GLE Shift to Grade 6</b></p> <p><b>Bold, ITALICIZED portions</b> of these off-grade 2008 Missouri GLEs indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>
<b>Ratio and Proportional Relationships 6.RP</b>			
<b>Understand ratio concepts and use ratio reasoning to solve problems</b>			
<p><a href="http://illustrativemathematics.org/illustrations/496">http://illustrativemathematics.org/illustrations/496</a></p> <p><a href="http://illustrativemathematics.org/illustrations/61">http://illustrativemathematics.org/illustrations/61</a></p> <p><a href="http://illustrativemathematics.org/illustrations/62">http://illustrativemathematics.org/illustrations/62</a></p> <p><a href="http://illustrativemathematics.org/illustrations/63">http://illustrativemathematics.org/illustrations/63</a></p> <p><a href="http://illustrativemathematics.org/illustrations/65">http://illustrativemathematics.org/illustrations/65</a></p>			
<p><b>6.RP.1</b></p>	<p>Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. <i>For example, “The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every two wings there was 1 beak.” “For every vote candidate A received, candidate C received nearly three votes.”</i></p> <p><a href="http://illustrativemathematics.org/illustrations/76">http://illustrativemathematics.org/illustrations/76</a></p>	<p><b>N3E6 <i>solve problems using ratios and rates</i></b></p>	

**MISSOURI MATHEMATICS CORE ACADEMIC STANDARDS CROSSWALK TO MISSOURI GLES/CLES  
CONTENT ALIGNMENTS AND SHIFTS – Grade 6 *DRAFT***

<p><b>Core Academic Standard (CAS)</b>  <b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.  <i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i></p>	<p><b>Grade 6 GLE</b>  <b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 6. <p><b>6.NS.4</b> Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12. Use the distributive property to express a sum of two whole numbers 1–100 with a common factor as a multiple of a sum of two whole numbers with no common factor. <i>For example, express <math>36 + 8</math> as <math>4(9 + 2)</math>.</i>  <a href="http://illustrativemathematics.org/illustrations/257">http://illustrativemathematics.org/illustrations/257</a>  <a href="http://illustrativemathematics.org/illustrations/258">http://illustrativemathematics.org/illustrations/258</a>  <a href="http://illustrativemathematics.org/illustrations/255">http://illustrativemathematics.org/illustrations/255</a>  <a href="http://illustrativemathematics.org/illustrations/256">http://illustrativemathematics.org/illustrations/256</a>  <a href="http://illustrativemathematics.org/illustrations/259">http://illustrativemathematics.org/illustrations/259</a></p>	<p><b>A2B6</b> <i>use the</i> commutative, <b><i>distributive</i></b> and associative <b><i>properties</i></b> to generate equivalent forms for simple algebraic expressions</p>	<p><b>N1D5</b> <i>*describe numbers according to their characteristics, including whole number common factors and multiples</i>, prime or composite and square numbers</p>
<p><b>Apply and extend previous understandings of numbers to the system of rational numbers.</b></p>		
<p><b>6.NS.5</b> Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.  <a href="http://illustrativemathematics.org/illustrations/277">http://illustrativemathematics.org/illustrations/277</a>  <a href="http://illustrativemathematics.org/illustrations/278">http://illustrativemathematics.org/illustrations/278</a></p>		<p><b>N1A8</b> <i>*compare and order all rational numbers</i> including percents, and find their location on a number line</p>
<p><b>6.NS.6</b> Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.</p>		

**MISSOURI MATHEMATICS CORE ACADEMIC STANDARDS CROSSWALK TO MISSOURI GLES/CLES  
CONTENT ALIGNMENTS AND SHIFTS – Grade 6 *DRAFT***

<b>Core Academic Standard (CAS)</b> <b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS. <b>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</b>		<b>Grade 6 GLE</b> <b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.	<b>GLE Shift to Grade 6</b> <b>Bold, ITALICIZED portions</b> of these off-grade 2008 Missouri GLEs indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.
<b>6.NS.6.a</b>	Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line; recognize that the opposite of the opposite of a number is the number itself, e.g., $-(-3) = 3$ , and that 0 is its own opposite.		<b>N1A8</b> <b>*compare and order all rational numbers</b> including percents, and <b>find their location on a number line</b>
<b>6.NS.6.b</b>	Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane; recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes.	<b>G3A6</b> <b>*describe the transformations from a given pre-image using the terms reflection/flip, rotation/turn, and translation/slide</b>	<b>G2A7 use coordinate geometry to construct and identify geometric shapes in the coordinate plane using their properties</b>  <b>G3A8 reposition shapes under formal transformations such as reflection, rotation and translation</b>
<b>6.NS.6.c</b>	Find and position integers and other rational numbers on a horizontal or vertical number line diagram; find and position pairs of integers and other rational numbers on a coordinate plane.		<b>N1A8 *compare and order all rational numbers</b> including percents, <b>and find their location on a number line</b>  <b>G2A7 use coordinate geometry to construct and identify geometric shapes in the coordinate plane using their properties</b>
<b>6.NS.7</b>	Understand ordering and absolute value of rational numbers. <a href="http://illustrativemathematics.org/illustrations/288">http://illustrativemathematics.org/illustrations/288</a> <a href="http://illustrativemathematics.org/illustrations/286">http://illustrativemathematics.org/illustrations/286</a>		
<b>6.NS.7.a</b>	Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram. <i>For example, interpret <math>-3 &gt; -7</math> as a statement that <math>-3</math> is located to the right of <math>-7</math> on a number line oriented from left to right.</i>		<b>N1A8 *compare and order all rational numbers</b> including percents, <b>and find their location on a number line</b>

**CONTENT ALIGNMENTS AND SHIFTS – Grade 6 *DRAFT***

<p><b>Core Academic Standard (CAS)</b>  <b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.  <i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i></p>	<p><b>Grade 6 GLE</b>  <b><i>Bold, ITALICIZED portions</i></b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>	<p><b>GLE Shift to Grade 6</b>  <b><i>Bold, ITALICIZED portions</i></b> of these off-grade 2008 Missouri GLEs indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>
<p><b>6.EE.2.c</b> Evaluate expressions at specific values of their variables. Include expressions that arise from formulas used in real-world problems. Perform arithmetic operations, including those involving whole-number exponents, in the conventional order when there are no parentheses to specify a particular order (Order of Operations). <i>For example, use the formulas <math>V = s^3</math> and <math>A = 6s^2</math> to find the volume and surface area of a cube with sides of length <math>s = \frac{1}{2}</math>.</i></p>	<p><b><i>N2C6 *apply properties of operations (including order of operations) to positive rational numbers</i></b></p>	<p><b><i>M2C7 solve problems involving</i></b> circumference and/or area of a circle and <b><i>surface area/volume</i></b> of a rectangular or triangular prism or cylinder</p>
<p><b>6.EE.3</b> Apply the properties of operations to generate equivalent expressions. <i>For example, apply the distributive property to the expression <math>3(2 + x)</math> to produce the equivalent expression <math>6 + 3x</math>; apply the distributive property to the expression <math>24x + 18y</math> to produce the equivalent expression <math>6(4x + 3y)</math>; apply properties of operations to <math>y + y + y</math> to produce the equivalent expression <math>3y</math>.</i></p>	<p><b><i>N2C6 *apply properties of operations (including order of operations) to positive rational numbers</i></b></p> <p><b><i>A2B6 use the commutative, distributive and associative properties to generate equivalent forms for simple algebraic expressions</i></b></p>	
<p><b>6.EE.4</b> Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). <i>For example, the expressions <math>y + y + y</math> and <math>3y</math> are equivalent because they name the same number regardless of which number <math>y</math> stands for.</i>  <a href="http://illustrativemathematics.org/illustrations/542">http://illustrativemathematics.org/illustrations/542</a>  <a href="http://illustrativemathematics.org/illustrations/461">http://illustrativemathematics.org/illustrations/461</a></p>	<p><b><i>A2B6 use</i></b> the commutative, distributive and associative <b><i>properties to generate equivalent forms for simple algebraic expressions</i></b></p>	
<p><b>Reason about and solve one-variable equations and inequalities.</b>  <a href="http://illustrativemathematics.org/illustrations/494">http://illustrativemathematics.org/illustrations/494</a></p>		

**MISSOURI MATHEMATICS CORE ACADEMIC STANDARDS CROSSWALK TO MISSOURI GLES/CLES  
CONTENT ALIGNMENTS AND SHIFTS – Grade 6 *DRAFT***

<p><b>Core Academic Standard (CAS)</b>  <b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.  <i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i></p>	<p><b>Grade 6 GLE</b>  <b>Bold, ITALICIZED portions</b> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>	<p><b>GLE Shift to Grade 6</b>  <b>Bold, ITALICIZED portions</b> of these off-grade 2008 Missouri GLEs indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>
<p><b>6.EE.5</b> Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true.  <a href="http://illustrativemathematics.org/illustrations/673">http://illustrativemathematics.org/illustrations/673</a></p>		<p><b>A2A8 use symbolic algebra to represent and solve problems that involve linear relationships</b></p>
<p><b>6.EE.6</b> Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.  <a href="http://illustrativemathematics.org/illustrations/425">http://illustrativemathematics.org/illustrations/425</a></p>	<p><b>A2A6 use symbolic algebra to represent unknown quantities in expressions or equations and solve one-step equations</b></p>	
<p><b>6.EE.7</b> Solve real-world and mathematical problems by writing and solving equations of the form <math>x + p = q</math> and <math>px = q</math> for cases in which <math>p</math>, <math>q</math> and <math>x</math> are all nonnegative rational numbers.  <a href="http://illustrativemathematics.org/illustrations/425">http://illustrativemathematics.org/illustrations/425</a></p>		<p><b>A2A7 use symbolic algebra to represent unknown quantities in expressions or equations and solve linear equations with one variable</b></p>
<p><b>6.EE.8</b> Write an inequality of the form <math>x &gt; c</math> or <math>x &lt; c</math> to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form <math>x &gt; c</math> or <math>x &lt; c</math> have infinitely many solutions; represent solutions of such inequalities on number line diagrams.  <a href="http://illustrativemathematics.org/illustrations/642">http://illustrativemathematics.org/illustrations/642</a></p>		
<p><b>Represent and analyze quantitative relationships between dependent and independent variables.</b></p>

This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.</p>
<p><b>6.G.2</b> Find the volume of a right rectangular prism with fractional edge lengths by packing it with unit cubes of the appropriate unit fraction edge lengths, and show that the volume is the same as would be found by multiplying the edge lengths of the prism. Apply the formulas <math>V = lwh</math> and <math>V = bh</math> to find volumes of right rectangular prisms with fractional edge lengths in the context of solving real-world and mathematical problems. .</p>		<p><b>M2C5</b> <i>determine volume by finding the total number of the same size units needed to fill a space without gaps or overlaps</i></p> <p><b>M2C7</b> <i>solve problems involving circumference and/or area of a circle and surface area/volume of a rectangular or triangular prism or cylinder</i></p>
<p><b>6.G.3</b> Draw polygons in the coordinate plane given coordinates for the vertices; use coordinates to find the length of a side joining points with the same first coordinate or the same second coordinate. <b>Apply these techniques in the context of solving real-world and mathematical problems.</b></p>	<p><b>G2A6</b> <i>use coordinate systems to construct geometric shapes</i></p>	<p><b>G2A5</b> <i>*use coordinate systems to specify location, describe paths and find distance between points along horizontal and vertical lines</i></p>
<p><b>6.G.4</b> Represent three-dimensional figures using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems.</p>	<p><b>G4B6</b> <i>draw or use visual models to represent and solve problems</i></p>	<p><b>G4A5</b> <i>given a net of a prism or cylinder, identify the 3-dimensional shape</i></p> <p><b>M2C7</b> <i>solve problems involving circumference and/or area of a circle and surface area/volume of a rectangular or triangular prism or cylinder</i></p>
<p><b>Statistics and Probability 6.SP</b></p>		
<p><b>Develop understanding of statistical variability.</b></p>

CONTENT ALIGNMENTS AND SHIFTS – Grade 6 *DRAFT***

<b>Core Academic Standard (CAS)</b>	<b>Bold/Highlighted portions</b> of the CAS indicate content that does not align to any existing GLE/CLE for any course or grade. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS. <i>Note: The link(s) provided from the Illustrative Mathematics Project in the CAS column provide draft examples intended to illustrate and clarify the CAS.</i>	<b>Grade 6 GLE</b> <i>Bold, ITALICIZED portions</i> of the 2008 Missouri GLE indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.	<b>GLE Shift to Grade 6</b> <i>Bold, ITALICIZED portions</i> of these off-grade 2008 Missouri GLEs indicate content that aligns to the CAS for Grade 6. This content should be included in the instruction and assessment for Grade 6 upon transition to the mathematics CAS.
6.SP.1	<b>Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers.</b> <i>For example, “How old am I?” is not a statistical question, but “How old are the students in my school?” is a statistical question because one anticipates variability in students’ ages.</i>	<b>D1A6</b> <i>formulate questions</i> , design studies and collect data <b>about a characteristic</b>	
6.SP.2	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.		<b>D2A7</b> <i>find, use and interpret measures of center and spread, including range</i>
6.SP.3	<b>Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</b>		
<b>Summarize and describe distributions.</b>			
6.SP.4	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.		<b>D1C7</b> select, <i>create</i> and use <b>appropriate graphical representation of data, including circle graphs, histograms</b>  <b>D1C8</b> select, <i>create</i> and use <b>appropriate graphical representation of data</b> (including scatter plots) <b>and box plots (box and whiskers)</b>
6.SP.5	Summarize numerical data sets in relation to their context, such as by:		
6.SP.5.a	Reporting the number of observations.	<b>D1A6</b> <i>formulate questions</i> , design studies and <b>collect data about a characteristic</b>
