

Marissa received her graded homework in math class to correct and return. The teacher requires students to determine the correct answer and an explanation of what the student did wrong. What is the correct answer to the problem and what explanation will she most likely give to her teacher?

Solve using $<$, $=$, $>$

$\frac{4}{5}$	\otimes	$\frac{1}{7}$	\star
$\frac{2}{3}$	$<$	$\frac{6}{9}$	
$\frac{14}{15}$	\otimes	$\frac{7}{8}$	\star

Explanation:
