

Jocelyn, Dany, and Cadence each had a bag of candy. All three girls ate some candy leaving  $\frac{2}{3}$  of a bag for each girl. Choose the equations that could correctly solve how much candy the girls have left?

(A)  $\frac{1}{3} + \frac{1}{3} + \frac{1}{3}$       (C)  $3 \times \frac{2}{3}$       (E)  $3 + \frac{2}{3}$

(B)  $\frac{2}{3} + \frac{2}{3} + \frac{2}{3}$       (D)  $3 \times \frac{1}{3}$       (F)  $3 + \frac{1}{3}$

Claire, Toni, Noah, and Jayden each swam  $\frac{3}{4}$  of a mile. How many miles did they run altogether? Show two different ways to solve the problem using models and/or numbers.
