

Jill collected the honey from 3 of her beehives. From the first hive she collected  $\frac{1}{2}$  gallon of honey. The last 2 hives yielded  $\frac{1}{5}$  gallon each.

a) How many gallons of honey did Lila collect in all? *Don't*

b) How many gallons + would remain if Jill gave Bill  $\frac{3}{20}$  gallon?

c) Draw a diagram to support your answer.
