Use the numbers 1 through 9, at most one time each, to make a true equation where $x$ has the largest possible value.

\[ \square \square + x = \square \square \]

\[ x = \square \square \]

Example 2

Use all 4 cards to create an equation with a solution of 24.

\[ 6 + 4 \times 3 \times 18 \]

Example 3

Select 2 answers that would make the following inequality true.

\[ 3x < 15 \]

a. 4
b. 6
c. 2
d. 15
