

$7 + b = 25$

Solve the equation.

Select the correct statement

There is only one solution that makes this equation true.

There is more than one solution that could make this equation true.

② $x + 12 \leq 13$

Choose all answers that make the inequality true.

0

1

2

3

③ $x + 1 = x + 2$

Which of these values are a solution for the equation?

1 no solution possible

3

7

④ $x + 1 \geq x + 2$

(Drop and drag) or select all values of x that are a solution for the inequality

$x = 2$ $x = 3$ no solution possible

Are there other answers you

would like to include with #4? What about when $x < 0$?
