

Maya buys 2 apples^(x) each week and 3 oranges^(y). She spends \$4.45. If each apple cost \$1.19, which of the following equations would represent this situation.

(A) $2x + 3y = 4.45$

(B) $3x + 2y = 4.45$

(C) $3y + 2x = 4.45$

(D) $4.45 = 2y + 3x$

(E) $4.45(x+y) = 5$

(F) $5xy = 4.45$
