

EOC Exceptions Report Instructions

EOC exceptions collection should be used to identify graduates that did not meet participation requirements for End Of Course (EOC) assessment for the following reasons:

Refer to the exception codes.

EOCEX2: Student received content out-of-state; in a private, parochial or home school.

EOCEX3: MAP-Alternate – Students identified by the IEP team received content without an alternate assessment available. Currently this is only applicable to Social Studies.

EOCEX4: Student took content in another public Missouri district, but was not assessed.

Login in to MOSIS.

The subject listed in the Subject column is the content(s) for which there is no score. In the example below Joe Smith has not participated in Algebra I or Government.

If the student is eligible for an exception, enter the applicable exceptions code in the Assessment column. For additional requirements to identify high school math accountability please refer to:

In the example below, no exceptions code has been entered for John or Joe in Government. These students are participating in that content during the 2018-2019 school year and will test at the end of the year. You can remove them from this spreadsheet.

- If a student moves in and is eligible for an exception, then manually add a row for each applicable exception. (See example below.)
- Remove any students that have:
 - Transferred out
 - Dropped out
 - Been retained
 - Taken the assessment during the most recent school year.
- If your district does not need an exception for any graduates then you will not need to certify this file.
- Do not forget to include applicable information for early graduates.

Remember to save the file, with your changes, as a comma delimited file (*.csv). Districts will then go back to MOSIS and upload the file into the June 2019 EOC Exception Collection.

The file, once uploaded, will go through the validation process. The only errors that should occur would be related to inaccurate exception codes, or if a student were manually added to the file.
