\*SMART measures of success are written in a manner that makes them easy for any reader to understand. SMART measures are:

Specific: The measure identifies a specific action that will take place.

Measurable: The measure quantifies the amount of change to be achieved.

Appropriate: The measure is logical and relates to the goals of the local wellness policy.

Realistic: The measure is practical given the available resources.

Time Specific: The measure identifies a specific time by which the measure will be achieved.
