

# VIDEO

## Video Postcard Overview

**GOAL:** Create a video postcard to be sent via e-mail to your instructor.

Measurable Learner Objectives	Crosswalk to Show-Me Standards	Instructional Activities	Assessment
Access and capture video clips from a variety of sources (e.g., laser disk, CD-ROM, video camera). E1	1.4, 1.8	Students will videotape each other in front of a solid background (blue or green) then capture video and open in video editing software (5-10 seconds). Students will choose a background scene (either image or video) and import it into video editing software. Students will layer the two clips onto the timeline and key-out the solid color so the new background shows through. Students will export the final video clip as a compressed file (MPEG or MPG). This file should be small enough (no larger than 1 megabyte) to attach to an e-mail and send to the instructor.	Use the <i>Video Postcard</i> assessment to evaluate the postcard for video taping, importing and exporting video, using background with an overlay, adjustments to overlay of tracks, and file management. Any text in the video and the e-mail will also be evaluated for accuracy.
Edit a video. E2	1.4, 1.8, 2.2		
Proofread and correct multimedia errors. A 14	CA1, 2.2		
Manage files. A7	1.4, 2.7
