

WebSPOE Updates

Release Date: March 26, 2019

System Enhancements

Active Authorizations Without Claims Homepage Query	Impacted Users: Providers, Agency, State, CFO	MWS-9621
--	--	-----------------

- Filters will be added to the Active Authorizations Without Claims homepage query. The homepage query results will display authorizations in which no claim has been entered. This enhancement will add a filter to the query to allow users to select if they would like to view the following authorization types:
 - All (Excludes AT Devices)
 - Service
 - Evaluation/Assessment
 - AT Devices

Modified Filters - Provider, Independent Provider

Modify Mileage Summary Page	Impacted Users: Providers, Agency, State, CFO	MWS-9626
------------------------------------	--	-----------------

- This enhancement will modify the Mileage Summary page to better represent the date search feature as a way to search the complete mileage history. Users will be able to enter a date range and the results will return the mileage history from the dates entered.

Modified Provider Mileage Page with Search Mileage History – Agency Provider
