Worksheet for the Calculation of Adjusted Expenditures

The purpose of the \$162,326 or 7% x SAT x WADA Transfer is to provide a limited source of district funds for capital outlay as a transfer from the General (Incidental) Fund to the Capital Projects Fund to cover expenditures incurred in the Capital Projects Fund. Section 165.011, RSMo, specifically states a district in compliance with Section 163.031.6, RSMo may transfer from the General (Incidental) Fund to the Capital Projects Fund amounts necessary for capital outlay expenditures. If the transfer is in excess of adjusted expenditures, the board must pass a resolution identifying the specific projects and the estimated expenditure date (or dates).

The amount of transfer allowed is not compared to the gross amount of expenditures in the Capital Projects Fund but rather to the "adjusted" expenditure amount calculated as explained above. This calculation identifies and subtracts from total capital projects expenditures all sources of revenue specifically received for capital outlay purposes. Once these sources have been identified and backed out of total expenditures, the remainder is the amount expended for capital outlay not covered by other revenue sources that may be covered by the \$162,326 or 7% x SAT x WADA transfer.

Note: This calculation only applies to those districts not in compliance with certificated salaries for the preceding year.
